

Ivica Aračić

CTO

SWIAT GmbH

Ivica Aračić has been a part of SWIAT since its inception in February 2022, stepping into the role of Chief Technology Officer. In this role, he is responsible for the company's technological vision, software development, and IT operations. Ivica's method is characterized by a thoughtful balance between the visionary aspects of distributed ledger technology and its pragmatic and secure application in the financial sector.

Prior to joining SWIAT, Ivica worked for 10 years at DekaBank as an IT Architect, where his focus was on the integration of enterprise applications. His engagement with blockchain initiatives since 2016 at DekaBank was instrumental in laying the groundwork for innovative projects like SWIAT. During his time at DekaBank, Ivica collected valuable experience in designing, developing, deploying, and operating Distributed Ledger Technology (DLT)-based applications.

His extensive software engineering background also features work as an IT freelancer and as a research assistant at the university, delving into programming language design and software visualization. Altogether, he accumulated more than 20 years of experience in software engineering.

Ivica's academic achievements include earning a Master's Degree in Computer Science (Diplom-Informatiker) in 2004 from the Darmstadt University of Technology and writing research papers in the area of programming language design and software visualization.
