If you have any questions, please do not hesitate to contact the supervisor of the project you are interested in.

Title: Research on Household Finance using data from the PHF-Study („Private Haushalte und Ihre Finanzen“)

Description of the project:

The Panel on Household Finance (PHF) is a large scale survey of households in Germany. The main focus of the survey is on household finance. It yields detailed household-level information on the wealth and its composition for over 3,500 households. The PHF is an integral part of the Household Finance and Consumption survey (HFCS), a ECB coordinated project which collects harmonized data on household finance in all euro area countries. During the initial analysis of the data several questions were raised that require a more in-depth scientific analysis.

Task for the intern:

The intern will collaborate with members of the PHF team on the scientific analysis of the micro-data. Potential topics for analysis are listed in the research program (see below). However, we are also open for suggestions of topics from the prospective interns.

Necessary skills:

Experience with the analysis of micro-data on households. Stata skills would be beneficial.

Benefits for the intern:

You will get in-depth insight into an interesting scientific project and the workings of the Bundesbank research centre. You will be able to learn how to use a multiple-imputed dataset. A joint publication on some of the results is an option.

Begin:

Continuously, not before May 2019

Duration:

Approx. 3 months

Supervisor of the project:

Tobias Schmidt, phone: 069 9566-3730, E-Mail: Tobias.Schmidt@bundesbank.de

Title: Internship in Bundesbank's Research Centre

We are constantly looking for interns for

various projects on a variety of topics in the fields of monetary macroeconomics, banking and finance, microeconomics and econometrics.

Necessary skills:

- Master- or PhD-students in Economics, Finance or Econometrics interested in quantitative and empirical methods.
- Knowledge of standard software packages like Stata and/or Matlab
- Experience with research projects is an advantage

Begin: Continuously, not before March 2019

Duration: Usually three months, up to six months, depending on the project
