Territory
All data relate to the Federal Republic of Germany in accordance with the territorial definition in existence since 3 October 1990.

Explanation of symbols
- – = no figures or magnitude zero
- / = no data because the numerical value is not sufficiently reliable

Preliminary remarks

This publication presents the balance sheets for the domestic institutional sectors and the total economy. Both non-financial assets, calculated by the Federal Statistical Office, as well as financial assets and liabilities, compiled by the Deutsche Bundesbank, are recorded. The methodological basis is always the European System of Accounts 2010 (ESA 2010). This statistical framework is binding for all countries of the European Union since September 2014 and, as a general rule, breaks down total assets into non-financial assets and financial assets. Furthermore, it contains provisions for a uniform classification of non-financial assets, financial assets and liabilities, as well as institutional sectors. The following amalgamation of these two components to form an integrated balance sheet provides a more or less complete picture of currently statistically recorded assets, both at a sectoral level and for the total economy. Considerable gaps occur only in the area of non-financial assets, as data are not available for all of the non-financial asset categories defined in ESA 2010. Corresponding data are not available for either inventories or valuables, nor for non-produced assets other than land, such as subsoil assets, water resources and the like.

The integrated balance sheet thus generally shows the items listed in the table below. However, as not every sector has or can have all types of non-financial assets or financial assets and liabilities, the specific data vary between sectors.

Overview of the balance sheet items recorded in the integrated balance sheets

ASSETS	LIABILITIES
Non-financial assets	Borrowed funds
Produced assets	Loans and other liabilities
Fixed assets	
Buildings and structures	
Dwellings	
Other buildings and structures	
Machinery and equipment	
Cultivated assets	
Intellectual property products	
Non-produced assets	
Land	
including: Land underlying buildings and structures	
Financial assets	Own funds
Currency and deposits	Shares and other equity
Securities	*Net worth*
Other financial assets	

The overview below contains data on the following institutional sectors:

S.1 Total economy
S.11 Non-financial corporations
S.12 Financial corporations
S.13 General government
S.14 + S.15 Households and non-profit institutions serving households

This publication represents the total value of land which was estimated within a project
on the basis of the area survey by types of actual use and average standard land values (see last reference).

Please note the following points with regard to the results presented in this publication.

- The data are as of November 2025.
- The stocks are shown as at the end of the year (closing balance sheet data).
- The data are recorded in EUR billion, rounded to one decimal place.
- The stock of fixed assets and the stock of consumer durables of householdsis are recorded net, at current replacement cost. This corresponds to the current market value of the types of assets.
- Financial assets are consolidated, that is intra-sectoral claims and liabilities were nettet out.

Further results regarding the national accounts can be found in the various series of Fachserie 18, "National Accounts"
(partly available in German only) or on the internet at

www.destatis.de

Federal Statistical Office Notice
In support of the German government's digitization initiative, the Federal Statistical Office has established the digital agenda. The aim of this agenda is to improve the efficiency and increase the utility of our results. We are therefore continuously expanding the services offered in our GENESIS-Online database. As soon as all data will be available in the database, various series of Fachserie will be discontinued.
Digitale Agenda
GENESIS-Online

The Deutsche Bundesbank publishes the data on financial assets as well as methodological notes regularly in its Statistical Series Financial Accounts as well as in the time series data base, both of which can be found at

www.bundesbank.de/en
