Interest rates and volumes for new business of German Banks (MFIs)

Savings deposits at statutory notice

Methodological notes on interest rates statistics – interest rates for savings deposits with agreed notice of 3 months

The term **standard savings rate** originally referred to the interest rate for **savings deposits at statutory notice**. This interest rate was regulated by the deposit rates regulation, which was abolished in 1967. In the normal sense of the term it was applied to the average interest rate on savings deposits at statutory period of notice – a three-month notice period from July 1993 onwards – which was calculated as part of the Bundesbank's former interest rate statistics from June 1967 onward. Starting in November 1996, the savings deposits with a three-month period of notice used for the basic savings rate were termed savings deposits with minimum rates of return (time series: BBIB1.M.DE.B.H.DNB.SPM.K3M.A.N1.11A average interest rate, BBIB1.M.DE.B.H.DNB.SPM.K3M.A.N2.11A lowest rate of spread, BBIB1.M.DE.B.H.DNB.SPM.K3M.A.N3.11A highest rate of spread).

The interest rates calculated for savings deposits with minimum rates of return and a (until June 1993 statutory) period of notice of three months (time series SU0022) in the context of the Bundesbank's former interest rate statistics were often used as a reference value for calculating the interest on **rent deposits**.

When the Bundesbank's interest rate statistics were changed as of the November 1996 reporting month, above all the collection of data on interest rates on savings deposits was modified; greater emphasis was now placed on newer savings methods such as bonus-carrying savings deposits and special savings forms (see savings deposits with higher interest rates).

The **Bundesbank's former interest rate statistics** measured the interest rates most frequently agreed upon for **new business** with domestic non-banks as well as extensions of and changes to earlier agreements in a two-week (mid-month) reporting period. The interest rates for savings deposits were calculated as the unweighted arithmetic average of the reported interest rates within the spread. The spread was calculated by eliminating the highest 5% and the lowest 5% of the reported interest rates.

In July 2003 the Bundesbank's interest rate statistics were superseded by the new MFI interest rate statistics, the German contribution to the harmonised MFI interest rate statistics in the countries participating in the European monetary union. Tables with lending and deposit rates for new business from 2003 are also enclosed. Since the two sets of statistics differ in their methodology, **the statistical results of both sources can be compared with each other only on a very restricted basis**.

Within the framework of the **MFI interest rate statistics**, savings deposits at three months' notice with minimum rates of return (time-series: BBIB1.M.DE.B.H.DNB.SPM.K3M.A.N1.11A) and higher rates of return are included in the households' deposits redeemable at notice up to three months (time-series: BBIM1.M.DE.B.L23.D.R.A.2250.EUR.N). This "product basket" contains all deposits of households and non-financial corporations redeemable at notice up to three months. The interest rates are calculated as volume-weighted averages of outstanding amounts at the end of the month. The inclusion of a wider range of different types of savings deposits – including instruments bearing higher rates of interest such as growth savings accounts, indexed-linked savings or volumedependent graduated interest rate agreements – had pushed the average interest rate in the MFI interest rate statistics 1 ½ percentage points higher during the overlapping collecting period from January to June 2003 than that on the standard savings deposit component (time-series: BBIB1.M.DE.B.H.DNB.SPM.K3M.A.N1.11A) in the Bundesbank's former statistics on lending and deposit rates. In addition, the category (BBIM1.M.DE.B.L23.D.R.A.2250.EUR.N) collected as outstanding amounts at the end of the month contains not only pure new business but also "old contracts" from past periods when interest rates were higher. The interest rate is calculated as volume-weighted average. Spreads are not calculated for the MFI interest rate statistics.

The interest rate for savings deposits with minimum rates of return, redeemable at notice up to three months, is lower than the interest rate for time series BBIM1.M.DE.B.L23.D.R.A.2250.EUR.N. However, from July 2003 onward, it is generally not possible to calculate the exact interest rate level by deducting around 1 ½ percentage points, because, as mentioned above, time series BBIM1.M.DE.B.L23.D.R.A.2250.EUR.N comprises a number of different components with different interest rates and the components have varying shares in the total volume. From October 2009 onward, deducting 1 ½ percentage points even results in negative interest rates.

Change of the grossing-up procedure in MFI interest rate statistics: The grossing-up procedure was changed according to the ECB (Guideline ECB/2014/15). The interest rates published hitherto until May 2015 in the time series BBIM1.M.DE.B.L23.D.R.A.2250.EUR.N (grossed-up with the previous procedure) are now available in the time series BBIM1.M.DE.B.L23.D.R.A.2250.EUR.NHN. For the time series BBIM1.M.DE.B.L23.D.R.A.2250.EUR.N the data were grossed-up again with the new method from June 2010 to May 2015.

MFI interest rate statistics – New business	Bundesbank's survey of lending and deposit rates
<p>Deposits from households redeemable at notice of up to 3 months (including non-financial corporations deposits redeemable at notice of 3 months)</p> <p>Fidelity and groth premiums are included when they are granted.</p> <p>Volume-weighted average interest rates of outstanding amounts at the end of the month</p> <p>BBIM1.M.DE.B.L23.D.R.A.2250.EUR.N: Deposits redeemable at notice of up to 3 months (from January2003)</p>	<p>Savings deposits with agreed notice of 3 months with minimum rates of return (of domestic non-banks)</p> <p>These rates do not include any bonus payments.</p> <p>Most frequently applied interest rate for new business</p> <p>BBIB1.M.DE.B.H.DNB.SPM.K3M.A.N1.11A: Savings deposits with minimum rates of return (June 1967 to June 2003)</p> <p>with higher rates of return An interest rate above the minimum rates of return and/or a premium or a bonus was granted.</p> <p>with higher rates of return without a duration of contract being agreed (November 1996 to June 2003)</p> <p>BBIB1.M.DE.B.H.DNB.SPH.K3M.11.N1.11A: less than EUR 5,000 BBIB1.M.DE.B.H.DNB.SPH.K3M.12.N1.11A: EUR 5,000 and more but less than EUR 10,000 BBIB1.M.DE.B.H.DNB.SPH.K3M.14.N1.11A: EUR 10,000 and more but less than EUR 25,000</p> <p>with higher rates of return and a duration of contract being agreed Savings deposits of EUR 10,000 and more but less than EUR 25,000 (November 1996 to June 2003) In the case of products for which a graduated interest rate, a premium, a bonus payment, additional interest or a combination thereof had been granted, the institutions reported not the nominal interest rate applying on the transaction but the total rate of return which was paid when savings plans were held until maturity or when savings objectives had been achieved.</p> <p>BBIB1.M.DE.B.H.DNB.SPHV.K3V1.A.N1.11A: duration of contract up to 1 year BBIB1.M.DE.B.H.DNB.SPHV.K3V2.A.N1.11A: duration of contract over 1 year and up to 4 years BBIB1.M.DE.B.H.DNB.SPHV.K3V4.A.N1.11A: duration of contract over 4 years</p>

Footnotes

- * The MFI interest rate statistics are based on the interest rates applied by MFIs and the related volumes of euro-denominated deposits and loans to households and non-financial corporations domiciled in the euro area. The household sector comprises individuals (including sole proprietors) and non-profit institutions serving households. Non-financial corporations include all enterprises other than insurance companies, banks and other financial institutions. The interest rate statistics gathered on a harmonised basis in the euro area from January 2003 are collected in Germany on a sample basis. The most recent figures are in all cases to be regarded as provisional. Subsequent revisions appearing in the following month are not specially marked. Further information on the MFI interest rate statistics can be found on the Bundesbank's website (Statistics / Money and capital markets / Interest rates and yields / Interest rates on deposits and loans).
- o In the case of deposits redeemable at notice, new business is collected in the same way as outstanding amounts for the sake of simplicity. This means that all outstanding deposit business at the end of the month has to be incorporated in the calculation of average rates of interest.
- 1 Including non-financial corporations' deposits; including fidelity and growth premiums.
- 2 The effective interest rates are calculated either as annualised agreed interest rates or as narrowly defined effective rates. Both calculation methods cover all interest payments on deposits and loans but not any other related charges which may occur for enquiries, administration, preparation of the documents, guarantees and credit insurance. Disagios are regarded as interest payments and included in the interest rate calculation. The annualised agreed interest rate and the narrowly defined effective rate differ in the underlying method of annualising interest rate payments.
- 3 Data based on monthly balance sheet statistics.
- 4 The interest rates published from June 2010 to May 2015 were grossed-up again with a new method according to the ECB – Guideline ECB/2014/15.
- 5 The average rates are calculated as unweighted arithmetic means from the interest rates reported to be within the spread. The spread is ascertained by eliminating the reports in the top 5% and the bottom 5% of the interest rate range.
- 6 Second and third weeks of the months indicated.
- 7 Until June 1993 savings deposits at statutory notice. These rates do not include any bonus payments.
- 8 Since January 1991 the rates of the credit institutions in the new federal states of Germany have been included in the interest rate survey.
- 9 An interest rate above the minimum rate of return and/or a premium or a bonus is granted.
- 10 Rate of return which is paid when savings plans are held until maturity or when savings objectives have been achieved.
- 11 Collected from November 1996.
- A The interest rates for April 2026 are expected to be published on **5 June 2026**.
