

**Industrial statistics**

Meta-information

**1. Codes**

1. Frequency:	<b>M</b>	monthly
2. Adjustment indicator:	<b>N, S, Y</b>	unadjusted, seasonally adjusted only, calendar and seasonally adjusted
3. Reference area:	<b>DE</b>	Germany
4. Accounting system:	<b>L</b>	<b>short-term labour market indicators</b>
5. Indicator category:	<b>BE1</b>	<b>employed persons</b>
	<b>BE2</b>	<b>hours worked by employed persons</b>
	<b>DE2</b>	<b>gross wages and salaries</b>
6. Identification:	<b>AA022</b>	<b>manufacturing, mining and quarrying</b>
7. Price or unit reference:	<b>P, H, V</b>	persons, hours, at current prices
8. Calculation basis:	<b>I</b>	index

**2. Available vintages**

from September 2005

**3. Methodological chronology***Initial publication*    *Change*

<i>4 March 2010</i>	<i>Reporting period: from January 1991.</i> <i>Methodological note:</i> Rebasing to 2005=100 and conversion to the classification of economic activities, NACE Rev. 2 (WZ 2008). The results from 2005 onwards are based on reports from enterprises with at least 50 employees. The earlier data are chain-linked to the new data using the annual average of 2005.
<i>16 April 2007</i>	<i>Reporting period: from January 1991.</i> <i>Methodological note:</i> Change in the reporting population: from January 2006, based on reports from local units with at least 50 employees; previously, local units with at least 20 employees had reported. The resulting difference is eliminated by chain-linking the old data with the new using the annual average of 2006. This has entailed revisions to the previous data due to rounding.
<i>June 2005</i>	<i>Reporting period: from January 1991.</i> <i>Methodological note:</i> A distinction is no longer made between workers and salaried staff and between wages and salaries. This has entailed methodological revisions when converting the data to specialist sections of local units.

### **Methodological chronology (cont'd)**

October 2004      *Reporting period: from January 1991.*  
*Methodological note:* Rebasing to 2000=100 and conversion to the classification of economic activities, NACE Rev. 1.1 (WZ 2003). Since January 2003, the hours worked by all persons active in the enterprise have been recorded. Previously, only the hours worked by employed workers were recorded while the hours worked by salaried employees were estimated by the Bundesbank and hours worked by the owners and assisting family members were disregarded. The results are chain-linked to eliminate breaks in the series.
