## Footnotes

- \* The MFI interest rate statistics are based on the interest rates applied by MFIs and the related volumes of euro-denominated deposits and loans to households and non-financial corporations domiciled in the euro area. The household sector comprises individuals (including sole proprietors) and non-profit institutions serving households. The interest statistics gathered on a harmonised basis in the euro area from January 2003 are collected in Germany on a sample basis. Further information on the MFI interest rate statistics can be found on the Bundesbank's website (Statistics / Money and capital markets / Interest rates and yields / Interest rates on deposits and loans).
- + New business covers all new agreements between households or non-financial corporations and the bank. This includes all financial arrangements in which terms have been agreed for the first time in the reporting month as well as all newly negotiated (but extant) lending contracts. The interest rates are calculated as volume-weighted average rates of all new agreements concluded during the reporting month. The following cases are not regarded as new business (i.e. they are included in outstanding amounts):
  - (a) Prolongations of existing loan contracts that are carried out automatically without any active involvement of the households or non-financial corporations;
  - (b) Changes in variable interest rates caused by pre-scheduled automatic interest rate adjustments;
  - (c) Changes from fixed to floating interest rates or vice versa which have been agreed at the beginning of the contract.The interest rates are calculated as volume-weighted average rates of all new agreements concluded during the reporting month.
- o The statistics on outstanding amounts are collected at the end of the month.
- 1 The effective interest rates are calculated either as annualised agreed interest rates or as narrowly defined effective rates. Both calculation methods cover all interest payments on deposits and loans but not any other related charges which may occur for enquiries, administration, preparation of the documents, guarantees and credit insurance.
- 2 Data based on monthly balance sheet statistics.
- 3 Secured and unsecured loans for home purchase, including building and home improvements; including loans granted by building and loan associations and interim credits as well as transmitted loans granted by the reporting agents in their own name and for their financial corporations domiciled in the euro area. The household sector comprises own account.
- 4 Loans for consumption are defined as loans granted for the purpose of personal use in the consumption of goods and services.
- 5 For the purpose of these statistics, other loans are loans granted for other purposes such as business, debt consolidation, education, etc.
- 6 Including overdrafts (see also footnotes 9 to 11).
- 7 Projected. The volume of new business is extrapolated to form the underlying total using a grossing-up procedure.
- 8 Including non-financial corporations' deposits; including fidelity and growth premiums.
- 9 Including revolving loans which have all the following features:
  - (a) the borrower may use or withdraw the funds to a pre-approved credit limit without giving prior notice to the lender;
  - (b) the amount of available credit can increase and decrease as funds are borrowed and repaid;
  - (c) the loan may be used repeatedly;
  - (d) there is no obligation of regular repayment of funds.
- 10 Overdrafts are defined as debit balances on current accounts. They include all bank overdrafts regardless of whether they are within or beyond the limits agreed between customers and the bank.
- 11 Including convenience and extended credit card debt. Convenience credit is defined as the credit granted at an interest rate of 0% in the period between payment transactions effected with the card during one billing cycle and the date at which the debt balances from this specific billing cycle become due.
- 12 Excluding revolving loans and overdrafts, credit card debt.
- 13 For renegotiated loans only loans that have been granted but not yet repaid at the time they are renegotiated are included.
- 14 Annual percentage rate of charge, which contains other related charges, which may occur for enquiries, administration, preparation of the documents, guarantees and credit insurance.
- 15 For the purposes of the interest rate statistics, a loan is considered to be secured if collateral (amongst others financial collateral, real estate collateral, debt securities) in at least the same value as the loan amount has been posted, pledged or assigned. The total value of the collateralisation can be calculated as the sum of all protection instruments provided for this loan that can be recognised when calculating the prudential capital requirements according to the respective approach used. The collateral must be taken into account according to the time of the conclusion of the loan agreement, which was concluded on the basis of such cover, even if the collateralisation effect is not yet legally effective at this time.
  - . Dominated by the business of one or two banks. Therefore, the value cannot be published because of confidentiality.
- A The interest rates for May 2026 are expected to be published on **3 July 2026**.
