Footnotes to Table VI.1

1 Gold parity agreed with the International Monetary Fund or fixed autonomously, US\$ parity (or central rate) or official US\$ rate. The parities agreed with the IMF ceased to apply with the entry into force of the Second Amendment of the IMF Articles of Agreement on 1 April 1978.

2 The DM parities were calculated on the basis of the US\$ relationships (DM currency since 21 June 1948).

3 Multiple exchange rate system (Belgium since 1951, France from 21 August 1971 to 20 March 1974, Italy from 22 January 1973 to 21 March 1974).

4 Owing to the revaluation of the Deutsche Mark.

5 Central rate; in Switzerland: middle rate. See also the footnotes to Table VI.2.

6 DM comparative value, calculated on the basis of the US\$ relationship in conjunction with the central rate US\$ 1 = DM 3.2225 (until 13 February 1973) or US\$ 1 = DM 2.9003 (from 14 February to 18 March 1973).

7 Reciprocal value of the conversion rate of DM 1 = US\$ 0.30 fixed according to the JEIA Operational Memorandum No 25, Amendment No 1.

8 With effect from 1 January 1963: Fmk 100 (old) = Fmk 1 (new).

9 Valid until 25 January 1948.

10 Under the system of rates used in France, the pro rata conversion of the US dollar on the basis of the official and the free rate yielded DM equivalents which fluctuated on average between DM 1.23 and DM 1.27 for Ffr 100.

11 Between 2 February 1948 and 19 September 1949 a multiple exchange rate system.

12 Against the official rate of 26 January 1948.

13 Official US\$ major rate plus 20% premium (Ffr 350 + Ffr 70 = Ffr 420); from June 1958 the premium was included in the rate.

14 Against the gold parity of 18 December 1946.

15 With effect from 1 January 1960: Ffr 100 = NF 1.

16 Average of the official, fluctuating US\$ rate (calculated on the basis of the monthly averages of the period in question). Between 1946 and 29 March 1960 a multiple exchange rate system.

17 No percentage calculation because there was no uniform official US\$ rate before 30 March 1960.

18 Owing to the depreciation of the Deutsche Mark.

19 For 1 currency unit.

20 Between 30 September 1950 (after the abandonment of the parity agreed with the IMF) and 1 May 1962, floating US\$ rate.

21 Against the parity of 19 September 1949.

22 Between 25 November 1949 and 2 May 1953 a multiple exchange rate system.

23 Foreign exchange rates (= middle rates of the Bank deutscher Länder) between 21 December 1949 and 23 June 1950: S 100 = DM 29.17; between 26 May 1954 and 31 December 1956: S 100 = DM 16.155.

24 Against the official rate of 26 October 1946.

25 According to the decision of the Swiss Federal Council of 27 September 1936, the Swiss National Bank was obliged to keep the gold value of the Swiss franc between 190 and 215 milligrams of fine gold. In the Swiss National Bank's statistics the gold parity was shown at Sfr 1 = 0.2032258 g fine gold.

26 According to publications of the Swiss National Bank.

27 In German-Swiss payment transactions, the following bilateral exchange rates were applied: US\$ 1 = Sfr 4.31 (until 30 November 1948); US\$ 1 = Sfr 4.305 (between 1 December 1948 and 18 September 1949); US\$ 1 = Sfr 4.30 (between 19 September and 12 October 1949).

28 According to the Federal Coinage Act of 17 December 1952 (which came into force on 20 April 1953) the franc corresponded to 63/310 (0.20322 ...) grams of fine gold.

29 In accordance with the decision of the Federal Council of 9 May 1971 the gold parity of the Sfr was changed to "47/216 (0.21759 ...) grams of fine gold ...".

30 The parity value was agreed with the IMF with effect from 8 May 1972.

31 The parity value was agreed with the IMF with effect from 18 October 1973.

Special drawing rights, which were created as an international reserve asset in 1969, were equal in value to the US dollar (US\$ 1 = 0.888671 grams of fine gold) up to the Monetary Conference in Washington on 18 December 1971 as, in accordance with Article XXI (2) of the Articles of Agreement of the International Monetary Fund in the wording of 1969 (first amendment of the Articles of Agreement), the unit of value of special drawing rights corresponded to 0.888671 gram of fine gold. The introduction of central rates, which took place in accordance with the Washington Agreements (Smithsonian Agreement of 18 December 1971) on the basis of decision No 3463-(71/126) of 18 December 1971 by the IMF directors, which was amended by decision No 4083-(73/104) of 7 November 1973, made it possible for IMF member countries temporarily to fix new exchange rate relationships for their currencies. According to paragraph 2(b) of that decision, a central rate for a member currency could be reported in gold, in units of value of special drawing rights or in the currency of another member of the IMF. After the IMF parties had ceased to exist on 1 April 1978, the central rates reported to the IMF under the terms of the decision of 18 December 1971 were likewise of no practical significance, since with the deletion of Article IV 4(a) of the IMF Articles of Agreement in the former wording, they ceased to have any legal basis.

- 1 Calculated on the basis of the relationship SDR 1 = CU ...
- 2 The following countries participated in the joint float: as from 19 March 1973 Belgium/Luxembourg, Denmark, Germany, France (until 18 January 1974 and between 10 July 1975 and 12 March 1976), the Netherlands, Norway (until 11 December 1978) and Sweden (until 26 August 1977). From 19 March 1973 the spot middle rates of those countries were kept within a fluctuation band of 2.25% (except Belgium/Luxembourg and the Netherlands, which had agreed on fluctuation margins of approx. 1.5% until 12 March 1976).
- 3 Because of the appreciation of the Deutsche Mark.
- 4 From 14 February 1973 (owing to the change in the central rate of the Deutsche Mark against the US dollar) the computed values are SDR 1 = DM 3.49877 and DM 1 = SDR 0.285814.
- 5 Central rate notified to the IMF by the Federal Government.
- 6 Effective until 18 March 1973; thereafter, the exchange rate of the Deutsche Mark floated against the currencies of those countries which did not participate in the joint float.
- 7 From 15 March 1976 France no longer participated in the joint float, as had already been the case between 21 January 1974 and 9 July 1975.
- 8 Computed relationship (not notified to the IMF as the central rate).
- 9 Sweden no longer participated in the joint float from 29 August 1977.
- 10 Switzerland was not a member of the IMF; the SDR relationship was computed on the basis of the middle rate of US\$ 1 = Sfr 3.84 published by the Swiss National Bank.
- 11 The parity value was agreed with the IMF with effect from 8 May 1972.
- 12 Central rate for US\$ 1 notified to the IMF by the Federal Government.
- 13 The parity value was agreed with the IMF with effect from 18 October 1973.

- Calculated in terms of the computed SDR parity before the Washington Agreements of December 1971.

Explanatory notes

Exchange rates in the euro area and in Germany

Euro reference rates of the European Central Bank and effective exchange rates of the euro

On 1 January 1999 eleven member states of the European Union adopted the euro as their single currency (see Excerpts from official announcements, pp 21-26). Greece and Slovenia became the twelfth and thirteenth members of the euro area on 1 January 2001 and 1 January 2007 respectively.

Since the introduction of the euro, there has been no autonomous foreign exchange market for the currencies replaced by the euro; the euro alone is quoted against non-euro-area currencies such as the US dollar, the yen etc. Since 4 January 1999 the ECB has published, each working day, reference rates for selected currencies. The reference rates are calculated on the basis of the daily concertation between central banks which takes place at 2.15 pm. Only one reference rate, ie the middle rate, is established by this procedure.

Initially the reference rates for 17 currencies were published. This reporting group was enlarged in three stages (October 2000, January 2001 and April 2005) and as of 1 January 2007 comprises a total of 34 currencies.

Euro/US dollar exchange rates during the day

The rates shown in the table are the buying rates predominating in the interbank market between 8.30 am and 4.30 pm; they have been compiled by the Deutsche Bundesbank from information disseminated by business news agencies. They are intended to provide a rough picture of the movement of the rates in the course of the day. It is not known whether deals were conducted at the quoted rates or, if they were, to what extent this occurred. In ascertaining the highest and lowest daily rates, account is taken of both the half-hourly recorded buying rates and all the data on rates communicated by the reporting banks.

The rates in the interbank market shown in this table are not to be confused with the euro reference exchange rate of the ECB for the day in question, which is listed as a memo item (see also Table I1).

ECU values of the European Monetary System (EMS)

The ECU was the currency unit of the European Monetary System, which entered into force on 13 March 1979. It was used as a unit of account in all areas of the Community from 1981 and succeeded the European Unit of Account (introduced in 1975), with which it was identical in definition and value at the time of transition. At the start of the third stage of European Economic and Monetary Union on 1 January 1999, the euro replaced the ECU as the accounting unit of the European Communities in the ratio of 1:1.

According to the arrangements relating to the EMS, the intention was for the weights of the currencies to be reviewed every five years and revised if necessary. With the first revision (17 September 1984) the Greek drachma was included in the basket; since the admission of the Spanish peseta and the Portuguese escudo with effect from 21 September 1989 (second revision), the currencies of all EC member states at that time were included in the basket. The periodic review of the weights of the currencies in the ECU definition was discontinued upon the entry into force of the Treaty on European Union on 1 November 1993; the composition of the ECU currency basket was not subject to further change. The currencies of the three countries which acceded to the European Union on 1 January 1995 (Austrian schilling, Swedish krona, Finnish markka) were therefore not included in the ECU basket.

The arithmetical value of the ECU in terms of a given currency was the total of the equivalents of the amounts in that currency indicated in the table below.

The European Commission based its arithmetical calculation of the ECU daily rates on the representative US dollar rates at 2.15 pm. These rates were communicated to it by the central banks of the countries represented in the ECU basket of currencies. On the basis of these rates, the equivalent of the ECU was computed first in US dollars and then in all EU currencies.

Composition of the ECU basket			
	As from 13 Mar 1979	As from 17 Sep 1984	As from 21 Sep 1989
Deutsche Mark	0.828	0.719	0.6242
Pound sterling	0.0885	0.0878	0.08784
French franc	1.15	1.31	1.332
Italian lira	109.00	140.00	151.8
Dutch guilder	0.286	0.256	0.2198
Belgian franc	3.66	3.71	3.301
Luxembourg franc	0.14	0.14	0.130
Danish krone	0.217	0.219	0.1976
Irish pound	0.00759	0.00871	0.008552
Greek drachma	–	1.15	1.440
Spanish peseta	–	–	6.885
Portuguese escudo	–	–	1.393

These arithmetical daily rates of the ECU, expressed in terms of Community currencies (and some other currencies), were published regularly – to six significant figures – in the Official Journal of the European Communities (C series).

The ECU rates regularly quoted in the market for private ECU financial instruments could differ from these arithmetical rates because they reflected current supply and demand.

Overview of the currencies of the world

Currencies and exchange rates in particular countries

The rates listed in this table are in all cases the latest end-of-month rates known to us in a given month; in general they have been taken from reliable sources in the country in question. However, we do not know whether conversions were actually carried out at those rates in all cases.

In the case of multiple exchange rate systems, the types of rates are explained in footnotes. If no rates for the euro are available from a country, we have calculated comparative values at the exchange rates and relationships shown and marked them „W“ in the column „type of rate“.

The previous year average specified in this table was essentially calculated from all the rates or comparable figures available to us.

In addition to the generally accepted currency designation and its abbreviation, the three-character alphabetical ISO currency code (see also Table V) was developed by the International Organization for Standardization as ISO Standard 4217. This currency code is designed to enable uniformly abbreviated designations for currency-related values to be used in international financial transactions. This applies, *inter alia*, to all external payments under the SWIFT system (Society for Worldwide Interbank Financial Telecommunication). These abbreviations do not replace the official national short designations of the currencies.

Values of the special drawing right

Since 1 April 1978 the value of the special drawing right, which was previously also defined in terms of gold, has been defined only as the sum of the values of fixed amounts of a number of currencies. Since 1 July 1974 the International Monetary Fund has been using this „standard basket“ technique to determine the equivalent of an SDR unit in national currency.

Until the end of December 1980, the SDR basket comprised sixteen currencies. With effect from 1 January 1981, the number of currencies included in the basket was reduced from sixteen to five. With the introduction of the euro on 1 January 1999 this number was further reduced to four.

The composition of the currency basket as well as the weight and amount of the currency units in the basket are reviewed every five years. As a result of the latest review, conducted in 2005, since 1 January 2006 the SDR basket has contained the fixed currency amounts shown in column (a). They were fixed on 30 December 2005, on the basis of the average exchange rates in the

London spot exchange market in the fourth quarter of 2005, in such a way that they corresponded to the initial percentage weights listed in column (b) and generated the same SDR value on 30 December 2005 as did the basket until the end of 2005.

	(a)	(b)
US dollar	0.632	44
Euro	0.410	34
Yen	18.4	11
Pound sterling	0.0903	11

With the introduction of the euro as the single currency for initially eleven member states of the European Union, an adjustment of the selection criteria for the currencies of the SDR valuation basket was required. Hence the former criterion, whereby the currencies of the member states with the highest exports of goods and services were chosen, was extended in such a manner that it now also includes exports by monetary unions incorporating IMF members. In the case of a monetary union, exports of goods and services do not cover cross-border trade between the members of the monetary union.

Moreover, a second selection criterion was introduced so as to ensure that the currencies included in the basket are actually the commonest currencies used in international transactions. To that end, the IMF must state that a currency included in the basket is „freely usable“. A currency is deemed to be freely usable if, in the estimation of the Executive Board of the IMF, it is widely used in payments for international transactions and is heavily traded in the major foreign exchange markets.

The weights of the various SDR basket currencies continue to depend on the value of exports of goods and services, and the value of the reserve balances held in those currencies by other member states of the IMF in the five years preceding the year of review.

The above-mentioned currency components are converted into US dollars on the basis of the market rates on every business day. In principle, the middle rates between the buying and selling rates fixed at noon in the London spot exchange market are used as market rates. The sum of the US dollar equivalents of the

currency components yields the rate for the SDR in terms of the US dollar. Exchange rates for the SDR in terms of all other currencies are ascertained, using the rate for the SDR in terms of the US dollar, from the representative market exchange rates of these currencies for the US dollar. The representative rate for the Deutsche Mark was the official middle rate for the US dollar on the Frankfurt Exchange, whereas for the euro it is the reference rate of the European Central Bank.

The SDR is used by the IMF as a unit of account for its transactions and for all conversions into national currencies. In addition, the SDR is used by public and private bodies in Germany and abroad, inter alia as the „successor“ to those units of account which had hitherto been defined in terms of gold (eg gold francs).

whereas Article 109l(4), second sentence, of the Treaty, provides that the adoption of the conversion rates shall by itself not modify the external value of the ECU; whereas this is ensured by adopting as the conversion rates, the exchange rates against the ECU of the currencies of the Member States adopting the euro, as calculated by the Commission on 31 December 1998 according to the established procedure for the calculation of the daily official ECU rates;

**Communiqué of the European Union
of 16 March 2007**

At the request of the Slovak authorities, the ministers of the euro-area Member States of the European Community, the European Central Bank and the ministers and the central bank governors of Cyprus, Denmark, Estonia, Latvia, Lithuania, Malta and Slovakia have decided, by mutual agreement, following a common procedure involving the European Commission and after consultation of the Economic and Financial Committee, to adapt the central rate of the Slovak koruna in the Exchange Rate Mechanism II (ERM II).

The central rate of the Slovak koruna has been revalued by 8 ½ percent. The new central rate of the koruna is

1 euro = 35.4424 koruna.

The standard fluctuation band of plus or minus 15 percent continues to be observed around the central rate of the Slovak koruna.

...

The compulsory intervention points in the exchange-rate mechanism will be communicated by the ECB and the National Bank of Slovakia, in time for the opening of the foreign exchange markets on 19 March 2007.

Explanatory notes on individual countries

Equatorial Guinea

Along with Cameroon, the Central African Republic, Chad, the Republic of the Congo and Gabon, Equatorial Guinea is served by the "Banque des Etats de L'Afrique Centrale" (Bank of the Central African States), whose CFA Franc (F.CFA = Franc de la Coopération Financière en Afrique Centrale) is legal tender only in the aforementioned countries. Until the end of 1998, the CFA franc was pegged to the French franc (FF 1 = 100 CFA francs); since 1999, it has been pegged to the euro based on the irrevocable conversion rate of the French franc to the euro.

Bangladesh

Units of account for larger amounts: 1 lakh (in digits: 1,00,000) = 100,000 taka; 1 crore (in digits: 1,00,00,000) = 100 lakh = 10,000,000 taka.

Belarus

In Germany, the traditional German word "Weissrussland" (literally, "White Russia", or Byelorussia) is used instead of Belarus.

Benin

Benin, Burkina Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, Senegal and Togo all belong to the West African Monetary Union (Union Monétaire Ouest Africaine). The responsible monetary authority is the "Banque Centrale des Etats de l'Afrique de l'Ouest", whose CFA franc (F.CFA = Franc de la Communauté Financière Africaine) is legal tender only in the aforementioned countries. Until the end of 1998, the CFA franc was pegged to the French franc (FF 1 = 100 CFA francs); since 1999, it has been pegged to the euro based on the irrevocable conversion rate of the French franc to the euro.

Bhutan

The Indian rupee is also legal tender alongside the Bhutanese ngultrum (convertible at par).

Brunei Darussalam

Under an agreement between Brunei Darussalam and Singapore, the Singapore dollar is also accepted as legal tender at a rate of S\$ 1 = BR\$ 1.

Cook Islands

The New Zealand dollar is also legal tender alongside the Cook Islands dollar (convertible at par).

El Salvador

The US dollar is likewise legal tender alongside the El Salvador colón.

Ghana

The Bank of Ghana has notified us of a currency conversion on 1 July 2007. 10,000 Cedi = 1 Ghana Cedi (GH¢), divided into 100 Ghana Pesewas (Gp).

India

Units of account for larger amounts are as follows: 1 lakh (in digits: 1,00,000) = 100,000 rupees; 1 crore (in digits: 1,00,00,000) = 100 lakh = 10,000,000 rupees.

Iran, Islamic Republic of

The term "toman" (an old Persian currency) is also used to denote 10 rials.

Kenya

The term "Kenya pound" is a unit of account equivalent to 20 Kenya shillings.

Kiribati

The Australian dollar (convertible at par) is also legal tender alongside some of Kiribati's own coins.

Comoros

The Comorian franc was pegged to the French franc (FF 1 = FC 75 or FC 1 = FF 0.0133) until the end of 1998; since 1999, it has been pegged to the euro based on the French franc's irrevocable conversion rate to the euro.

Cuba

Alongside the Cuban peso, which is used by residents to purchase their basic needs, there is a "convertible peso" (CUC), which is used particularly for purchasing non-subsidised goods and for spending on travel.

Since the CUC is supposed to be of the same value as the CUP, the rates that apply to the CUP also apply to the CUC.

The euro is also accepted as legal tender in some tourist centres.

Lesotho

The rand is also legal tender alongside the loti.

Macau

The Hong Kong dollar, to which the pataca is pegged at a rate of HK\$ 100 = 103 patacas, is in circulation as a common currency alongside the pataca.

Macedonia

On 8 April 1993, Macedonia was admitted to the United Nations under the temporary designation "**Former Yugoslavian Republic of Macedonia**"; this designation is in use within the European Union (and therefore also Germany) until further notice.

Myanmar

Parallel exchange rates which vary considerably from the official rate also exist; however, we have no information on these rates.

Namibia

The rand is likewise legal tender alongside the Namibia dollar.

New Caledonia

CFP was originally the abbreviation for "Colonies Françaises du Pacifique" and is still used as a currency symbol (in connection with the franc). The CFP franc was pegged to the French franc (FF 1 = 18.1818 CFP francs or 1 CFP franc = FF 0.055) until the end of 1998; since 1999, it has been pegged to the euro based on the irrevocable conversion rate of the French franc to the euro.

Netherlands Antilles

Bonaire, Curaçao, Saba, Sint Eustatius and Sint Maarten (the southern part) constitute the Netherlands Antilles.

Panama

The US dollar is legal tender alongside the balboa, which is in circulation exclusively in coin form.

São Tomé and Príncipe

The unit of account for 1,000 dobras is 1 conto.

Singapore

Under an agreement between Singapore and Brunei Darussalam, the Brunei dollar (convertible at par) is also accepted as legal tender.

Somalia

No official exchange rates have been available for the Somali shilling for some time now.

Sudan

Since 10 January 2007, the Sudanese pound has been in circulation as a new currency alongside the Sudanese dinar at the rate of 100 Sudanese dinars to 1 Sudanese pound. The Sudanese dinar will remain legal tender at that parity until the end of June 2007. Foreign exchange rates are still determined in relation to the Sudanese dinar.

Syrian Arab Republic

In addition to the exchange rates shown, there is still a rate of US\$ 1 = S£ 11.20/11.25 (buy/sell) for a small number of debt service payments. This is due to bilateral payment agreements.

Turkey

Alongside the official central bank rates, commercial banks set their own rates which, over the course of a trading day, can differ from the central bank rate.

Hungary

With effect from 4 June 2003, Hungary reset its central parity to the euro to € 1 = Ft 282.36, with a fluctuation band of plus or minus 15%. Hungary is therefore in compliance with the standard fluctuation band of ERM II.

United Arab Emirates

The United Arab Emirates include Abu Dhabi, Ajman, Dubai, Fujaira, Ras al-Khaimah, Sharjah and Umm al-Qiwain.

United Kingdom

In Scotland and Northern Ireland, a small volume of banknotes issued by commercial banks in these territories is in circulation alongside notes issued by the Bank of England.

Quelle: IWF, Washington. — **1** Die Währung eines anderen Landes ist als alleiniges gesetzliches Zahlungsmittel in Umlauf, oder das Mitglied gehört einer Währungsunion an, in der die Mitglieder der Union das gleiche gesetzliche Zahlungsmittel verwenden. — **2** Ostkaribische Währungsunion. — **3** Das Land praktiziert ein vom IWF unterstütztes oder sonstiges geldpolitisches Programm. — **4** Westafrikanische Wirtschafts- und Währungsunion. — **5** Zentralafrikanische Wirtschafts- und Währungsgemeinschaft. — **6** Währungssystem, aus dessen gesetzlicher Grundlage sich die Verpflichtung ergibt, Inlandswährung gegen eine bestimmte Auslandswährung zu einem festen Wechselkurs umzutauschen, wobei die Emissionsstelle Beschränkungen unterliegt, um die Erfüllung ihrer gesetzlichen Verpflichtung zu gewährleisten. — **7** Das Land hat mehr als einen nominalen Anker, an dem die Geldpolitik ausgerichtet werden kann. — **8** Das Land bindet seine Währung (formell oder de facto) mit einem festen Kurs an eine große Währung oder einen Währungskorb, wobei der Wechselkurs

innerhalb einer engen Bandbreite von weniger als 1% um einen Leitkurs schwankt. — **9** Der Wert der Währung wird innerhalb von Schwankungsbreiten eines formell oder de facto festen Kurses gehalten; dabei darf die Währung um mehr als 1% um einen Leitkurs schwanken. — **10** Die Währung wird regelmäßig in kleinen Schritten mit einem festen, vorher angekündigten Prozentsatz oder als Reaktion auf Veränderungen ausgewählter quantitativer Indikatoren angepasst. — **11** Die Währungsbehörde beeinflusst die Wechselkursbewegungen durch aktive Interventionen am Devisenmarkt, ohne im Voraus einen Pfad für den Wechselkurs festzulegen und anzukündigen oder sich zur Einhaltung eines solchen Pfades zu verpflichten. — **12** Der Wechselkurs wird vom Markt bestimmt, wobei etwaige Devisenmarktinterventionen die Veränderungsrate dämpfen und übermäßige Wechselkursschwankungen verhindern, jedoch kein bestimmtes Kursniveau herbeiführen sollen. — **13** Abweichung von der Quelle; siehe Auszüge aus amtlichen Bekanntmachungen (Seite 71 ff.).
