

Statistics on Payments and Securities Trading, Clearing and Settlement in Germany 2013 to 2017

(as of September 2018)

The payment statistics were harmonised within the European monetary union beginning with the reporting year 2007 and are collected in Germany using a census survey of all monetary financial institutions (MFIs) with the exception of money market funds (according to the ECB regulation concerning the balance sheet of the monetary financial institutions sector MFIs are all institutions whose business is to receive deposits and/or close substitutes for deposits (for example, by issuing debt securities) and, for their own account, grant credit (including by investing in securities)). Since reference period 2014 the reporting population has been enlarged to all domestic payment service providers (PSPs), offering payment services to non-PSPs.

Data for reference periods 2014 to 2016 have been partly amended as a result of revised payments statistics reports.

Where a field is marked with a dot, data is not available or confidential. Where a field is marked with a minus, data is nil.

Basis of the survey: Regulation of the European Central Bank nr. 1409/2013 of 28 November 2013

¹ Includes transactions of non-PSP clients of national PSPs, irrespective of whether they are processed on an intra- or interbank basis.

² Simple book entries are included until reference year 2013.

³ Includes transactions which are initiated using online banking applications from payment service providers or via special services (payment initiation services) by non-payment providers to make online payments (ie. Giro pay or Sofortüberweisung).

⁴ Up to 2013 payments with debit and credit cards included transactions with specific non-rechargeable retailer cards (Table 5 does not include the number of these cards). For methodological reasons, all payments initiated using a card (until 2013 including ELV transactions) should be included here. However, some of these payments are indistinguishably included in the item "direct debits". Since reference period 2014 ELV transactions are included in direct debits.

⁵ Since reference period 2014 including "Money remittances" and "Transactions via telecommunication, digital or IT device".

¹ Includes transactions of non-PSP clients of national PSPs, irrespective of whether they are processed on an intra- or interbank basis.

² Simple book entries are included until reference year 2013.

³ Includes transactions which are initiated using online banking applications from payment service providers or via special services (payment initiation services) by non-payment providers to make online payments (ie. Giro pay or Sofortüberweisung).

⁴ Up to 2013 payments with debit and credit cards included transactions with specific non-rechargeable retailer cards (Table 5 does not include the number of these cards). For methodological reasons, all payments initiated using a card (until 2013 including ELV transactions) should be included here. However, some of these payments are indistinguishably included in the item "direct debits". Since reference period 2014 ELV transactions are included in direct debits.

⁵ Since reference period 2014 including "Money remittances" and "Transactions via telecommunication, digital or IT device".
