

“Reporting made simple”

➤ What do I need to report, and how can I make sure I report it?

You need to follow your own particular reporting path:

Do you want to submit a payment report or a stock report?

-> Reporting a payment

Payments include: cash payments, payments by (SEPA) direct debit, cheque and bill of exchange, (SEPA) credit transfers via financial institutions in euro or foreign currency, netting and clearing arrangements as well as contributions of assets and rights in enterprises, branches and permanent establishments.

-> Reporting stocks

Here you can report your stock of external assets and liabilities or provide information on cross-border equity investments (direct investment).

➤ Background

Anyone in the Federal Republic of Germany can make payments to, or receive payments from, non-residents without restrictions or official authorisation. However, the **statistical reporting requirements governing external transactions** in the Federal Republic of Germany need to be observed.

These statistical reporting regulations apply to incoming and outgoing external transactions, stocks of certain external assets and liabilities as well as stocks of cross-border equity investments. The data reported are used for the purpose of compiling the balance of payments and international investment position of the Federal Republic of Germany and for the foreign direct investment stock statistics.

For the bodies responsible for economic and monetary policy in particular, but also for associations, enterprises and research, these external sector statistics provide a comprehensive and reliable body of data on the degree and structure of Germany's external links with the rest of the world.

The Bundesbank is obliged to treat **all the individual pieces of data with the utmost confidentiality**. The Bank is not permitted to disclose any individual data or pass them on to other official bodies such as tax offices.
