Information pursuant to Section 5 of the German Tele-  
media Act (Telemediengesetz) can be found at:  
[www.bundesbank.de/imprint](http://www.bundesbank.de/imprint)

Reproduction permitted only if source is stated.

ISSN 2699-9196

Please consult the relevant table for the date of the last  
update.

This Statistical Series is released once a month and pub-  
lished on the basis of Section 18 of the Bundesbank Act  
(Gesetz über die Deutsche Bundesbank).

To be informed when new issues of this Statistical Series  
are published, subscribe to the newsletter at:  
[www.bundesbank.de/statistik-newsletter\\_en](http://www.bundesbank.de/statistik-newsletter_en)

Compared with the regular issue, which you may subscribe  
to as a newsletter, this issue contains data, which have  
been updated in the meantime.

Up-to-date information and time series are also available  
online at:  
[www.bundesbank.de/content/821976](http://www.bundesbank.de/content/821976)  
[www.bundesbank.de/timeseries](http://www.bundesbank.de/timeseries)

Further statistics compiled by the Deutsche Bundesbank  
can also be accessed at the Bundesbank web pages.

A publication schedule for selected statistics can be viewed  
on the following page:

# ■ Contents

## ■ I. Banks and other financial institutions

1. German contribution to monetary aggregates in the euro area	
a) German contribution to the monetary aggregate M3 and its components in the euro area .....	6
b) German contribution to important counterparts of the monetary aggregate M3 in the euro area .....	7
2. Deposits and loans in Germany	
a) Loans of monetary financial institutions (excluding the Bundesbank) in Germany to the domestic private sector .....	8
b) Deposits held with monetary financial institutions (excluding the Bundesbank) in Germany by domestic non-banks .....	9

## ■ II. Macroeconomic accounting systems

1. GDP and gross value added of selected economic sectors .....	10
2. GDP expenditure components at previous-year prices .....	11
3. GDP expenditure components at current prices .....	12
4. National income .....	13
5. Households' income .....	14
6. Productivity and labour costs in the economy as a whole .....	15
7. Unit labour costs in selected economic sectors .....	16

## ■ III. Economic activity and prices

1. Output	
a) Output in the production sector – general survey .....	17
b) Output in industry, by main grouping .....	18
c) Output in selected branches of industry .....	19
d) Output in services .....	20
2. Orders received	
a) Orders received by industry, by main grouping .....	21
b) Orders received by industry from the domestic market .....	22
c) Orders received by industry from abroad .....	23
d) Orders received by selected branches of industry – value .....	24
e) Orders received by selected branches of industry – volume .....	25
f) Orders received by main construction industry – value .....	26
g) Orders received by main construction industry – volume .....	27
h) Building permits granted for structural engineering work .....	28
3. Stock of orders	
a) Stock of orders by industry, by main grouping .....	29
b) Stock of orders by industry from the domestic market .....	30
c) Stock of orders by industry from abroad .....	31
d) Stock of orders by selected branches of industry – value .....	32
e) Stock of orders by selected branches of industry – volume .....	33

4. Turnover	
a) Turnover of industry, by main grouping – total and domestic.....	34
b) Turnover of industry, by main grouping – exports.....	35
c) Retail turnover.....	36
d) Turnover in services.....	37
5. Employment and labour market.....	38
6. Labour costs.....	39
7. Producer and harmonised index of consumer prices.....	40
8. Foreign trade prices.....	41

## ■ IV. External sector

1. Current account	
a) Current account.....	42
b) Exports and imports of goods and its components.....	43
c) Services and primary income.....	44
2. Exports	
a) Exports, by group of countries.....	45
b) Exports, by category of goods.....	46
3. Imports	
a) Imports, by group of countries.....	47
b) Imports of industry, by main grouping.....	48
c) Imports, by selected branches of industry.....	49

## ■ Explanatory notes

Seasonal adjustment.....	50
Classifications.....	50
Data in the national accounts at previous-year prices and contributions to growth.....	51
Sources of unadjusted figures.....	52

## Interpretation of data

Seasonally adjusted figures are estimated and hence subject to some uncertainty. Therefore, minor changes from one period to another affecting the last digit of the figures in this Series do not necessarily allow conclusions to be drawn as to economically relevant changes. The series are normally accurate enough to enable the reader to infer the mostly rounded rates of change given in the Bundesbank's analyses.

The factors used for seasonal adjustment are recalculated at regular intervals and as required. Revised time series or tables are marked with an (R).

The seasonal adjustment also includes adjustment for working-day variations, insofar as such variations can be proved and quantified (see also the explanatory notes, section on seasonal adjustment).

## Abbreviations and symbols

<b>p</b>	Provisional
<b>r</b>	Revised
<b>s</b>	Estimated
<b>ts</b>	Partly estimated
<b>...</b>	Data available at a later date
<b>.</b>	Data unknown, not to be published, not meaningful or not informative owing to particular uncertainty relating to the seasonal adjustment
<b>0</b>	Less than 0.5 but more than nil
<b>–</b>	Nil
<b>A</b>	Seasonal adjustment using the additive method
<b>R</b>	Seasonal factors recalculated

## I. Banks and other financial institutions

### 1. German contribution to monetary aggregates in the euro area

#### a) German contribution to the monetary aggregate M3 and its components in the euro area

Period	seasonally adjusted						Memo item: Monetary aggregate M3 in the euro area <sup>1,3</sup>
	Monetary aggregate M3 (excluding currency in circulation) <sup>1</sup>	of which:		Deposits with an agreed maturity of up to 2 years	Deposits redeemable at notice of up to 3 months	Marketable instruments <sup>1,2</sup>	
		Monetary aggregate M2 (excluding currency in circulation)	Overnight deposits				
<b>Outstanding amounts in € billion <sup>4</sup></b>

Source of the unadjusted figures: Federal Statistical Office. \* Last update: May 2026.  
+ Not adjusted for working-day variations. 1 Derived from seasonally adjusted basic series. 2 Including employers contributions to social security funds. 3 Including, besides

entrepreneurial income, income from interest, dividends, distribution of profits, net rents and reinvested earnings on foreign investment. 4 Figures revised as of Q1 2025.

Source of the unadjusted figures: Federal Statistical Office. \* Households including non-profit institutions serving households. Last update: May 2026. + Not adjusted for working-day variations. **1** Residence concept. **2** Wage tax payable on gross wages and salaries, and employees' social contributions. **3** Derived from seasonally adjusted basic series. **4** Cash benefits from social security funds, general government and

non-residents, pensions (net), private funded social benefits, less levies on social benefits, taxes on consumer goods and government charges. **5** Including property income. **6** Including the adjustment for the change in the net equity of households in pension funds reserves. **7** Saving as a percentage of disposable income. **8** Figures partially revised as of Q1 2025.

## II. Macroeconomic accounting systems

### 6. Productivity and labour costs in the economy as a whole \*

seasonally adjusted +

Period	GDP at previous-year prices per total hours worked (R)		Compensation per employee hours worked (domestic concept) (R)		Labour costs (R)				GDP deflator	
	2020 = 100	Change from previous period in %	2020 = 100	Change from previous period in %	Per unit of output 1		Per unit of turnover 2		2020 = 100	Change from previous period in %
					2020 = 100	Change from previous period in %	2020 = 100	Change from previous period in %

Sources of the unadjusted figures: Federal Statistical Office, Institute for Employment Research of the Federal Employment Agency. \* Last update: May 2026. + Not adjusted for working-day variations; derived from seasonally adjusted basic series, except GDP deflator. 1 Index of compensation per employee hours worked divided by index of GDP

at previous-year prices per total hours worked. 2 Index of compensation per employee hours worked divided by index of nominal GDP per total hours worked. 3 Figures partially revised as of Q1 2025, GDP deflator revised Q1 2026.

## II. Macroeconomic accounting systems

### 7. Unit labour costs in selected economic sectors \*

seasonally adjusted +

Source of the unadjusted figures: Federal Statistical Office. 1 The turnover in the service sector includes the sections transportation and storage, accommodation and food service activities, information and communication, real estate activities, professional, scientific and technical activities as well as administrative and support service activities. The turnover in accommodation and food service activities is

measured by an index that is currently labelled experimental and which is not identical with the published relatives of accommodation and food service activities. 2 Classification of Economic Activities, 2008 edition. 3 As of January 2025 figures are provisional and partially revised.

Sources of the unadjusted figures: Federal Statistical Office, Federal Employment Agency. \* For employment (EU definition): averages; employment (subject to social security contributions) and exclusively marginal employment: end-of-month levels; unemployment (registered) and vacancies: mid-month levels; short-time workers: flows; quarterly figures: averages <sup>1</sup> Workplace concept. <sup>2</sup> Earned income does not regularly exceed €556 per month (until December 2024: €538). <sup>3</sup> See explanatory notes. <sup>4</sup> Definition in accordance with Section 96 of the Social Security Code (SGB III). <sup>5</sup> Excluding government-assisted forms of employment and seasonal jobs, including

jobs located abroad. <sup>6</sup> Inclusion of refugees in need from Ukraine under the SGB II. <sup>7</sup> As of May 2025, calculated on the basis of updated labour figures. <sup>8</sup> Unadjusted figures estimated by the Federal Employment Agency. The estimates for Germany in 2023 and 2024 deviated from the final figures by a maximum of 0.1 % for employees subject to social contributions, by a maximum of 0.5 % for persons solely in jobs exempt from social contributions and by a maximum of 23.6 % for cyclically induced short-time work. <sup>9</sup> Initial preliminary estimate by the Federal Statistical Office.

Source of the unadjusted figures for foreign trade: Federal Statistical Office. \* Figures at current prices, foreign trade also in volumes. <sup>1</sup> Including non-monetary gold. <sup>2</sup> The seasonally adjusted series of balances are subject to much greater uncertainty than the

basic series from which they are derived. <sup>3</sup> Calculated using price indices on the basis of 2021 = 100. <sup>4</sup> Figures as of January 2025 provisional and partially revised.

#### IV. External sector

##### 1. Current account

##### c) Services and primary income

€ billion seasonally adjusted

## ■ Explanatory notes

### ■ Seasonal adjustment

The Deutsche Bundesbank's purpose in seasonally adjusting time series is to filter out the usual seasonal fluctuations within the movements of the time series under review. "Usual seasonal fluctuations" are those movements which recur with similar intensity in the same season each year and which, on the basis of past movements of the time series in question, can, under normal circumstances, be expected to recur. Thus, fluctuations due to exceptionally strong or weak seasonal influences (for example, extreme weather conditions or atypical holiday constellations) will continue to be visible in the seasonally adjusted series to the extent that they exceed, or fall short of, the normal seasonal average. In general, other random disruptions and unusual movements that are readily understandable in economic terms (for example, the consequences of economic policy, large-scale orders or strikes) are also not eliminated.

Seasonal adjustment also includes the elimination of working-day variations insofar as influences deriving from differences in the number of working days or the dates of particular days (e.g. public holidays, weekday on the last day of the month in the case of stock series) can be demonstrated and quantified.

Seasonal adjustment is based on the Census X-13ARIMA-SEATS method, as implemented in the seasonal adjustment software JDemetra+, version 2.2.2. As a rule, the breakdown of time series is based on a multiplicative model. Time series adjusted using the additive approach are marked with an (A).

Discrepancies between the aggregated series and their components are due to the fact that some of the seasonally adjusted aggregates are estimated directly and not derived from seasonally adjusted components.

### ■ Classifications

Directive ECB/2001/13 and the Deutsche Bundesbank's Special Statistical Publication 1 – Banking statistics guidelines and customer classification form the basis for the harmonised balance sheet data from monetary financial institutions (MFIs) in Tables I.

The data in the national accounts (Tables II) are based on the European System of Accounts (ESA 2010).

The classification of further economic indicators (Tables III.1 to III.4 and III.6) is based on the Classification of Economic Activities, 2008 edition (WZ 2008). This is the national implementation and breakdown of the European classification NACE Rev. 2 which contains the aggregated sections down to the disaggregated level for the classes (four-digit codes) (Regulation (EC) No 1893/2006). The main industrial groupings are defined in Regulation (EC) No 656/2007. The item "Industry" has been added and is defined as an aggregate of producers of intermediate, capital and consumer goods. Energy and industry have been merged to form the item "Mining and quarrying, manufacturing and electricity, gas, steam and air conditioning supply" (WZ 2008 sections B, C and D). The production sector also includes the areas "Water supply; sewerage, waste management and remediation activities" as well as "Construction" (WZ 2008 sections E and F). However, section E and item 41.1 in section F are not included in the production index for the production sector. The statistics for industrial new orders include data for the following sections of WZ 2008: 13, 14, 17, 20, 21 and 24 to 30. These economic activities account for just about 75% of industrial sales from 2010. Statistics regarding building permits granted for structural engineering work (Table III.2.h) are regulated by the Act on Construction Statistics (Hochbaustatistikgesetz). The national term "Main construction industry" (Tables III.1.a, III.2.f and III.2.g) includes WZ 2008 items 41.2, 42, 43.1 and 43.9. The results for this area are listed by building type and contracting party.

An overview of the definitions used in the labour market statistics (Table III.5) can be found in the glossary for statistical reporting at the back of the Federal Employment Agency's monthly publication "Amtliche Nachrichten der Bundesagentur für Arbeit". All persons who have reached the age of 15 but have not yet reached the age of 65 and who are without employment or only with short-time employment (less than 15 hours per week) and seeking an employment of at least 15 hours per week subject to compulsory insurance are counted as unemployed. They must be registered as unemployed at an employment agency or at a basic allowance institution and be available for employment services and not be unfit for work owing to sickness.

The balance of payments statistics are based on the sixth edition of the IMF's Balance of Payments Manual (BPM6) (see Deutsche Bundesbank, Changes in the Methodology and Classifications of the Balance of Payments and the International Investment Position, June 2014, pp. 57-68). Up to December 2008, the categorisation of groups of goods in Tables IV.2.b, IV.3.b and IV.3.c follows the Prod-

uct Classification for Production Statistics, 2002 edition (Güterverzeichnis für Produktionsstatistiken, GP 2002). Since the changeover in foreign trade statistics, the categorisation of groups of goods has been based on the Product Classification for Production Statistics, 2009 edition (GP 2009). The allocation of groups of goods from GP 2002 to main industrial groupings is carried out pursuant to Regulation (EC) No 586/2001. For GP 2009, this classification is based on Regulation (EC) No 656/2007.

## Data in the national accounts at previous-year prices and contributions to growth

Chain-linked Laspeyres indices (annual overlap) are at the centre of the report on the quarterly data at previous-year prices. This method evaluates the quarterly volume data of any given year at the average prices of the previous year and expresses them in terms of the quarterly average of the nominal values of the previous year. This ratio is then chain-linked with the successively chain-linked annual average ratios. The resulting time series for the volumes may contain statistically-related breaks from the fourth quarter of one year to the first quarter of the following year. The smaller the relative price change from year to year and the less the volume structure in the fourth quarter of the previous year deviates from that of the entire previous year, the smaller such breaks arising from the change of the price basis are. Within a year, however, the volume series do not experience any breaks. In addition, the method ensures that the annual average of the seasonally and calendar-adjusted indices is equal to the average of the only calendar adjusted series and that the annual average of the only seasonally adjusted results is equal to the average of the unadjusted values (except for rounding differences).

Balancing items for which a change in the plus or minus sign is possible (e.g. changes in inventories and net exports) cannot be meaningfully expressed as chain-linked indices. Even so, in order to ascertain their importance for economic dynamics, mechanical contributions to growth are identified. For example, the mechanical contribution of net exports to growth is the difference between the actual rate of growth of GDP and that which one would obtain if, under otherwise equal conditions, both imports and exports had remained constant vis-à-vis the comparable period. Owing to the statistical break from the fourth quarter of one year to the first quarter of the following year, the sum of the contributions to growth of the components of GDP at previous-year prices for this period is

not necessarily equal to the rate of change in real GDP. The additivity of the contributions to growth within one calendar year, however, is assured (except for rounding differences).

## ■ Sources of unadjusted figures

The source of the unadjusted figures of the seasonally adjusted time series is the Deutsche Bundesbank, unless stated otherwise in the tables.
