# 1 Dataset description

## 1.1 Overview and identification

### Title of dataset

External position of banks

### German Title

Auslandsstatus der Banken

### Abbreviation

AUSTA

### Dataset Abstract

The External position of banks (MFIs) and of non-MFI credit institutions shows the assets and liabilities of the banks in Germany and their foreign branches and subsidiaries vis-à-vis non-residents on a monthly basis. It comprises the assets and liabilities of German banks vis-à-vis foreign banks, enterprises, households and governments. The microdatabase contains further breakdowns of assets by recipient country as well as by type and maturity of investment. A separate external position is compiled for the banks' domestic operations as well as for domestic institutions' foreign branches and foreign subsidiaries. Non-MFI credit institutions must report for the domestic part only. These data serve the purpose of observing German banks' activities worldwide and are an important source of input when calculating both monetary and balance of payment statistics aggregates. They also contribute to the German submissions to the International Banking Statistics of the BIS.

With regard to definition and valuation of the collected positions, internationally agreed concepts such as the currently valid 6th edition of the International Monetary Fund's Balance of Payments Manual (BPM6), the Regulations on national accounts agreed at UN level (SNA 2008) as well as the European System of Accounts (ESVG 2010), which is binding for all members of the European Union, are taken into account.

## 1.2 Dataset scope and coverage

### Legal framework

Banks in Germany and Foreign Branches:

- Anlage 2 zur Bundesbank-Mitteilung Nr. 8002/2014
- For Banks in Germany also a regulation of the ECB (ECB/2013/33)
  
- Bundesbank Ordinances No 8006/2021
- For Banks in Germany also a regulation of the ECB (ECB/2021/2)

Foreign Subsidiaries:

- Anlage 3 zur Bundesbank-Mitteilung Nr. 8001/2012

### **Unit of analysis**

Each line in the dataset corresponds to a report of positions of a monetary financial institution vis-à-vis a certain country in a certain month in a certain original currency.

### **Time periods**

03/2002 until 12/2023

### **Geographic coverage**

World

### **Universe<sup>2)</sup>**

The monthly external position report is to show all assets and liabilities vis-à-vis foreign banks, enterprises, households and general government. Moreover, positions vis-à-vis residents, in other words Germany, are to be specified as a memo item.

In principle, the assets to be shown here are to be taken from the reporting institution's books in the same way as in the report for the Monthly balance sheet statistics. In defining the individual items, the maturity classification and all general reporting issues, the guidelines on monetary financial institutions' reports for the Monthly balance sheet statistics are to be applied as appropriate.

In principle, classification of the assets and liabilities vis-à-vis individual countries and sectors reported in the external position report is determined by the country of domicile and economic sector of the immediate counterparty. Immediate counterparties comprise local affiliates for which separate books are kept; their country of domicile and the economic sector within which they fall do not necessarily have to be identical with the legal domicile and economic sector of the respective head office of the enterprise.

---

<sup>2</sup> For details, see External position report of banks (MFIs) Guidelines.

Institutions subject to reporting requirements are to submit one report each for the domestic part of the institution, covering the overall external business of the institution transacted in Germany. In addition, MFIs must return reports for the branches abroad encompassing their external business with the data for the branches located in the same country of domicile consolidated in a single report. Furthermore, MFIs must return reports on the external position of the foreign subsidiaries, with a separate report being submitted for each subsidiary (including its branches).

In the case of banks which are required not only to submit reports for the domestic part of their institution but also for their branches abroad and/or foreign subsidiaries, the Bundesbank calculates "consolidated" external assets. As part of this consolidation, related positions contained in the domestic, branch and subsidiary reports are aggregated and any positions relating to group-affiliated banks that are presented separately in these reports are offset against one another. The consolidated group upon which this "consolidated" external position is based therefore consists solely of bank-like institutions, in other words, the reporting domestic institution and its foreign branches and/or foreign subsidiaries which are also included in the external position report.

## Historical changes

### Since June 2010

Domestic banks have to report:

- Loans and advances to foreign group-affiliated banks (am207)
- Liabilities to foreign group-affiliated banks of foreign branches (am400)

Foreign branches and subsidiaries have to report:

- Loans and advances to foreign group-affiliated banks (am207)

### Since December 2014

Domestic banks have to report:

- Loans and advances to foreign group-affiliated banks overnight money and other assets payable on demand (am171)
- Loans and advances to foreign group-affiliated banks fixed-term assets of one year or less (am172)
- Loans and advances to foreign group-affiliated banks fixed-term assets of more than one year (am174)
- Liabilities to foreign group-affiliated banks amounts owed and repayable on demand (am371)
- Liabilities to foreign group-affiliated banks fixed-term liabilities of one year or less (am372)
- Liabilities to foreign group-affiliated banks fixed-term liabilities of more than one year but not more than two years (am374)

- Liabilities to foreign group-affiliated banks fixed-term liabilities of more than two years (am375)

Foreign branches and subsidiaries have to report:

- Loans and advances to foreign group-affiliated banks overnight money and fixed term claims of one year or less of foreign branches and subsidiaries (am231)
- Loans and advances to foreign group-affiliated banks overnight money and fixed term claims of more than one year of foreign branches and subsidiaries (am232)

All banks:

- Domestic bank subsidiaries and their foreign branches and foreign subsidiaries are included in the definition of “group-affiliated banks”.

### Since March 2020

All banks (changes to research dataset):

- The name of the identifier has changed from ‘BAID’ to ‘BAID\_DOM’ for domestic banks, to ‘BAID\_FIL’ for affiliates, and to ‘BAID\_CON’ for consolidated banks.
- Countries are coded as two-letter code (almost iso-3166). Previously a three-digit numeric code was in use.
- No calculation of variables am207 and am400 after November 2014 by the RDSC anymore.

Domestic banks (changes to research dataset):

- Full coverage of domestic banks. Previously the dataset covered only a subsample.
- Full coverage of countries of counterparty including the total of international institutions as country of counterparty, denoted as ‘1A’. Previously the dataset did not cover small countries.
- Stocks are reported in original currency (EUR, USD, CHF, GBP, JPY, other (Z97)).
- A separate dataset corresponding to the coarser breakdown of affiliates is provided.
- In a further version the positions are not reported in columns (wide) but in rows (long).

### Since January 2022

Non-MFI credit institutions must report for their domestic part to the External position of banks (MFIs) and of non-MFI credit institutions.

## 1.3 Data collection

### Data collection mode

Electronic submission via ExtraNet

## Collection frequency

Monthly

## Supervision

1. All reporting agents receive a mandatory notice from the board of Deutsche Bundesbank.
2. Decision of the European Central Bank on non-compliance with statistical reporting requirements (ECB/2010/10)<sup>3</sup>: The ECB and the NCBs shall monitor the compliance of reporting agents with the minimum standards required to meet their reporting obligations, as set out in Annex IV to Regulation ECB/2013/33. In the event of non-compliance, the ECB and the competent NCB may decide to conduct an assessment phase and/or initiate an infringement procedure. Following an infringement procedure the ECB may impose sanctions in line with Article 7 of Regulation (EC) No 2533/98.
3. Annex IV of Regulation ECB/2013/13 contains minimum standards that are to be applied by the actual reporting population. These are minimum standards for:
  - transmission (timeliness and correctness of form)
  - accuracy (correctness, completeness, continuity)
  - conceptual compliance (compliance with definitions)
  - revisions (compliance with revisions procedure)
4. To monitor compliance with these minimum standards, the ECB has established a procedure which guarantees that common criteria are applied with respect to compliance with reporting deadlines and accuracy of statistical reporting throughout the euro area. According to this procedure, all euro-area central banks must, under certain circumstances, inform the ECB if an institution within their jurisdiction has not complied with the statistical reporting requirements. The Notice of the European Central Bank on the imposition of sanctions for infringements of balance sheet statistical reporting requirements (ECB/2010/10) sets out the principles that are followed during a sanctions procedure pursuant to the provisions of Council Regulation (EC) No 2532/98 concerning the powers of the European Central Bank to impose sanctions.

## Stratification

Institutes; type of institute (domestic institute, branches, subsidiary); countries; positions

## Sample Size

Domestic banks:

- Complete

---

<sup>3</sup> ECB/2010/10 amended by ECB/2015/50 in 2016 and by ECB/2017/5 in 2017.

Foreign branches and subsidiaries:

- Due to technical reasons data for only 107 countries are provided.

Consolidated banks:

- Due to technical reasons data for only 106 countries are provided.

The research dataset does not include supplementary information besides positions relating to group-affiliated institutions. Further, it does neither include “Total amounts vis-à-vis foreign countries as shown in the Monthly Balance Sheet Statistics” (column 1 of the reporting form) nor “Memo item: Assets vis-à-vis Germany as shown in the Monthly Balance Sheet Statistics” (column 5 of the reporting form).

## 1.4 Aggregation Method

The Bundesbank publishes several tables for the External position of banks on its homepage <https://www.bundesbank.de/en/statistics/banks-and-other-financial-corporations/banks/external-position-of-banks-mfis/tables-793918>. These published figures are aggregates of the individual data. Since the research dataset is a sample and no expansion factors are provided aggregates of the sample can differ from published figures. For example, in contrast to the published figures, the research dataset does not include positions vis-à-vis international organisations.

## 1.5 Missing values

For technical reasons several databases of the Bundesbank require a missing value classification. In 2018 an attempt has been made to create a harmonized classification for micro data in research datasets. In the AUSTA research dataset missing values are replaced by zeros if appropriate. In these cases the type of missing value is set to “N”. However, there are also reported zeros. Banks can choose whether they report in euro or in foreign currency which is then converted by the Bundesbank. Amounts have to be reported in 1,000 units of the relevant currency. If a bank reports eg in Yen it has to report even 1000 Yen. Since these are approximately 8 euro and AUSTA reports amounts in thousand Euro, the resulting amount is zero. For these zeros the type of (non-missing value) is “A”.

In the research dataset the harmonized type of missing (or non-missing) value is coded

- A normal value, non-missing (default)
- C calculated value (deterministic)
- E estimated value
- K nothing available (default)

- L data exists but not collected
- M data cannot exist
- N unreported zero amount
- P provisional value

**If the type of missing value is N, the corresponding value in the data is set to zero.**

N (unreported zero amount) is used for most missing values.

L (data exists but not collected). Since December 2014 a finer breakdown of some positions is required. The respective coarser variables end November 2014. For the finer breakdown missing values preceding December 2014 have been coded by "L" as have the coarser data after December 2014.

## 1.6 Data appraisal

### Quality checks

For data checking process a mixture of a bottom-up and top-down approach is used: Main focus is on bottom-up approach to guarantee high quality of micro data before aggregation. Top-down approach to check aggregate developments might lead to additional questions to reporting institutions. Reporting agents can access a spreadsheet with reconciliation formulas for verifying report compliance, separately for domestic banks, branches of foreign banks in Germany, foreign branches of German banks, foreign subsidiaries of German banks and saving and loan associations.<sup>4)</sup>

Bottom-up-Checks (more than 1.000 plausibility checks are performed):

- Automated format and basic consistency checks
- Completion check
- Internal consistency checks in the external position report
- Consistency checks with Monthly balance sheet statistics
- Comparison of the reported values with the data of the previous month(s)

Top-down-Checks:

- Drill down of aggregated data to determine major effects on developments in the aggregate

### Data editing

Data editing takes place during eight weeks after the reporting deadline. There are different reporting deadlines for the banks in Germany, for the branches and the subsidiaries. Action is taken in case of deviations deemed relevant.

---

<sup>4</sup> For details, see Forms to the external position report.

1. Sending queries to the reporting institutions
2. Revisions in accordance with reporting institutions (in most cases a lump-sum correction in the reporting month while corrections of past months only in exceptional cases)
3. Aggregation
4. Submission to German BSI Statistics, to BoP, to IIP (only banks in Germany), to BIS (also branches and subsidiaries)

## 1.7 Data accessibility

### Research proposal conditions

A research proposal is checked for feasibility of the research project given the research data, i.e. the suitability of the data to answer the research questions raised by the proposal. The research project must be of public interest, that is without commercial goals.

### Institutional access conditions

The researcher must be affiliated with a research institution that clearly has a scientific, noncommercial agenda.

### Contact

Deutsche Bundesbank, Research Data and Service Centre (RDSC)

E-mail: [fdsz-data@bundesbank.de](mailto:fdsz-data@bundesbank.de)

Homepage: <https://www.bundesbank.de/rdsc>

### Deposit requirements

The researcher must sign a confidentiality agreement and a special contract between Deutsche Bundesbank and the research institution has to be set up. The RDSC must be informed about every document that is made available to the public that contains information derived from the provided data.

### Citation requirements

For any study or other document which is made available to the public and contains information derived from the provided data, the researcher is obliged to properly cite the data source as:

**amount**: amount

---

Notes	Banks can choose whether they report in euro or in foreign currency which is then converted by the Bundesbank. Amounts have to be reported in 1,000 units of the relevant currency. If a bank reports eg in Yen it has to report even 1000 Yen. Since these are approximately 8 euro and AUSTA reports amounts in thousand Euro, the resulting amount is 0.

## B Other Appendix

## C Definitions

**Abroad** Non-residents are natural persons or corporations whose normal abode, head office or registered office is located abroad.

### Foreign banks

Foreign banks are institutions whose registered office or seat of management is located abroad, and which are regarded as banks in the country concerned. These also include domestic banks' branches abroad (including those of the reporting institution), but not the domestic branches and representative offices of foreign banks. Foreign monetary authorities/central banks, including the central banks of the euro-area member states and the ECB, as well as supranational banks such as the Bank for International Settlements (BIS), are also deemed to be foreign banks. Within the context of the European Union, only MFIs are to be recorded as banks.

### Foreign branches

Foreign branches are legally dependent institutions located abroad, and which are regarded as banks in the country concerned.

### Foreign subsidiaries

Foreign subsidiaries are legally independent institutions located abroad, and which are regarded as banks in the country concerned.

**Monetary financial institutions (MFIs)** Monetary financial institutions (MFIs) are central banks, resident credit institutions as defined in Community law, other resident financial institutions and also money market funds whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account (at least in economic terms), to grant credits and/or make investments in securities. For the purpose of the MFI interest rate statistics MFIs are defined with the exception of central banks and money market funds.

**Foreign enterprises and households** Foreign enterprises also include international development banks (with the exception of the European Investment Bank) and the European Financial Stability Facility (EFSF), as well as the foreign affiliates of domestic enterprises. Foreign households also include members of foreign armed forces stationed in Germany (including civilian support personnel) and their families. By contrast, foreign workers living in Germany are, as a rule, to be regarded as residents.

**Foreign general government** Foreign central governments, including their diplomatic and consular missions in Germany and the agencies of foreign armed forces, as well as foreign state and local government and foreign social security funds. In addition, this category also includes international organisations, excluding supranational banks and international development banks.

### Form "External assets" (R11../R12..)

**Item 123 Loans and advances to non-residents** All loans and advances to non-residents (excluding trustee claims) not evidenced by negotiable securities are to be recorded here, in accordance with the classification by economic sector and by maturity provided for on the report form. Loans and advances to legally dependent affiliates of German enterprises and banks abroad are also to be included under this item; they are to be assigned to the country in which the affiliate is domiciled.

Domestic branches of foreign banks are also to list here any loans and advances they have made to their head office and to foreign affiliates. Institutions with branches abroad are also to record here, in the report for the domestic part of the institution, any loans and advances they have made to these branches abroad

(other than working capital supplied; see item 142).

**Item 124 Foreign Treasury bills and Treasury discount paper** Treasury bills, Treasury discount paper and similar debt instruments issued by foreign public bodies and which have been discounted and are eligible for refinancing with the central banks of the countries in which the reporting bank is established are to be shown under this item. The paper is to be shown under the currency in which it is denominated and under the country in which the issuer is domiciled. "Countries in which the reporting bank is established" are deemed to be all countries - including the main country of domicile - in which the reporting institution conducts banking business, offers services or is represented for other reasons, irrespective of the form (office, branch, representative office) in which it operates in the country concerned.

**Items 125, 126 and 127 Money market paper** Negotiable Treasury bills, Treasury notes and other money market paper (commercial paper, euro notes, certificates of deposit, "bons de caisse" and similar rights evidenced by certificates with an original maturity of up to and including one year) issued by foreign borrowers, other than those to be included in item 124 "Foreign Treasury bills and Treasury discount paper", are to be shown in these items. Debt securities issued by the ESCB are also to be recorded here using the ECB country code (pseudo-ISO code 4F, country code 918). Repurchased subordinated and non-subordinated negotiable money market paper issued by the reporting institution itself is to be recorded in the column "Assets vis-à-vis Germany" under the corresponding asset item 125 in line with the balance sheet statistics.

**Items 129 to 140 Other foreign securities (with items 151, 152, 190 and 193)** Own holdings of securities issued by foreign borrowers are to be shown under these items - specifically, negotiable bonds and debt securities, and shares and other variable-yield securities (including shares in foreign money market funds, for example), other than those to be included in item 141 "Participating interests and shares in affiliated enterprises abroad".

The paper is to be shown under the currency in which it is denominated and under the country in which the issuer is domiciled.

Repurchased subordinated and non-subordinated negotiable debt securities issued by the reporting institution itself are to be recorded in the column "Assets vis-à-vis Germany" under the corresponding asset items 129 or 130 in line with the balance sheet statistics.

Holdings of non-negotiable debt securities are not to be shown here but in items 101 to 120 "Loans and advances ...".

**Item 141 Participating interests and shares in affiliated enterprises abroad (with items 153 and 154)** All participating interests and shares in affiliated enterprises abroad (including in banks and in other financial intermediaries) are to be listed under this item, irrespective of whether they are securitised or not.

**Item 142 Working capital supplied to foreign branches** The working capital supplied to foreign branches which is included in item 176 "Other assets" of the Monthly balance sheet statistics is to be shown separately under this item.

**Items 171 to 174 Loans and advances to group-affiliated banks** Loans and advances to own foreign branches and to own foreign subsidiaries deemed to be banks in their country of domicile that are included under items 101 to 104 "Loans and advances ... to foreign banks" are to be recorded separately here. Branches of foreign banks and banks either directly or indirectly majority-owned by non-residents must also include their loans and advances to foreign head offices or parent companies and to foreign affiliates.

From December 2014, the definition of “group-affiliated banks” will be expanded to include domestic bank subsidiaries and their foreign branches and foreign subsidiaries.

#### **Form “External liabilities” (R21../R22..)**

**Item 353 Liabilities to non-residents (excluding savings deposits)** All unsecuritised liabilities to non-residents (other than savings deposits and trustee liabilities, but including subordinated liabilities) are to be shown under this item in accordance with the classification by sector of the economy and maturity provided for on the reporting form. Liabilities to legally dependent branches of German enterprises and banks abroad are also to be included under this item; they are to be assigned to the country in which the branch is domiciled. Liabilities arising from genuine sale and repurchase transactions (repos) and from securities and precious metal lending transactions against monetary collateral that are included in liabilities are to be shown here separately in the amounts received for the transfers. Building and loan associations are to show deposits under savings contracts placed by non-residents as deposits with an agreed maturity of over two years, depending on the creditor, on line 305 or lines 312, 318, 324, 330, 336, 344 or 350.

Domestic branches of foreign banks are also to show their liabilities to their head office and their foreign affiliates (with the exception of the working capital received; see item 357) under this item. Banks with branches abroad are also to show here, in the report for the domestic part of the institution, their liabilities to branches abroad.

**Item 356 Non-residents’ savings deposits** Only funds satisfying the requirements of section 21 (4) of the Accounting Regulation for Credit Institutions are to be shown in this item as non-residents’ savings deposits.

**Item 357 Working capital supplied to domestic branches of foreign banks** The working capital (including reserves) supplied to domestic branches of foreign banks as shown in item HV2 1/310 “Capital” of the Monthly balance sheet statistics is to be recorded here.

**Items 371 to 375 Liabilities to group-affiliated banks** Liabilities to own foreign branches and to own foreign subsidiaries deemed to be banks in their country of domicile that are included under items 301 to 305 “Liabilities ... to foreign banks” are to be recorded separately here. Branches of foreign banks and banks either directly or indirectly majority-owned by non-residents must also include their liabilities to foreign head offices (with the exception of working capital; see item 357) or parent companies and to foreign affiliates.

From December 2014 on, the definition of “group-affiliated banks” will be expanded to include domestic bank subsidiaries and their foreign branches and foreign subsidiaries.
