Abstract

We describe the research dataset “Individual financial statements of non-financial firms” (JANIS) using a structured metadata schema.¹⁾ This document consists of two sections and the appendix. In the first section, we describe the general properties of the dataset as a whole, such as its scope and coverage and the methods of data collection and data appraisal. The second section looks at the variable level, providing an overview of the variables and tables with details on each variable. Appendix A looks at value level and provides code lists, ie information on the meaning of values for categorical variables.

Keywords: Balance sheet data, Non-financial corporations, Refinancing business

1 Dataset description

1.1 Overview and identification

Title of dataset

Individual financial statements of non-financial firms

German title

Einzelabschlüsse nicht-finanzieller Unternehmen

Abbreviation

JANIS

Dataset abstract

The JANIS dataset contains annual financial statements of German non-financial corporations which are sent to the Bundesbank for credit assessment purposes, as well as financial statements from public sources. JANIS is an extension of the USTAN dataset of corporate balance sheet statistics. The new hierarchical format is based on the current classification of the German Commercial Code (Handelsgesetzbuch – HGB).

Starting from the 1997 accounting year, JANIS data can be used as panel data by researchers, who can access items of the balance sheet, income statement and, where applicable, the statement of changes in tangible fixed assets (property, plant and equipment) as well as other firm variables such as economic sector and legal form.

Data ID (DOI)

10.12757/Bbk.JANIS.9723.13.13

1.2 Dataset scope and coverage

Legal framework

Since the beginning of the 1999 - with the start of the third stage of European monetary union (EMU) - the Deutsche Bundesbank provides refinancing and intraday credits to resident credit institutions. Credit institutions can submit their credit claims against non-financial corporations as collaterals. Thereby corporations have to be "central bank eligible". In order to assess whether the eligibility requirements are met and the credit claim against a corporation can be accepted as collateral, financial statements have been sent to the Bundesbank to enable it to verify the eligibility of the securitised non-negotiable assets (bank loans to business enterprises and bills of exchange which credit institutions use as collateral to cover their liabilities to the Bundesbank).

The use of the data is mainly based on a private-law agreement, ie the data can only be used for purposes that are expressly mentioned in the letter sent out to the corporation and to which this corporation has given its consent.

Unit of analysis

Each line in the dataset corresponds to a balance sheet statement of a non-financial corporation.

Time periods

1997 until 2023

Geographic coverage

Germany

Universe

JANIS consists of individual financial statements of non-financial corporations which are provided from several sources: financial statements received by the Deutsche Bundesbank in the context of the credit assessment and from public sources like the Bundesanzeiger.

Research dataset

The structure of the financial statements in the JANIS database reflects the current state of the German Commercial Code (*HGB/Handelsgesetzbuch*). It provides the balance sheet data, the profit and loss account, the asset history sheet and the statement of appropriation of income (if any). Furthermore, this data offers additional information about firms, like the branch of industry or the legal form.

Sampling:

In comparison to former balance sheet data offered by the Deutsche Bundesbank, the JANIS data provides more balance sheets in the area of services like catering and hotel industry, information and communication, and enterprise and private services. Additionally, the number of balance sheets for small and medium sized enterprises has increased.

"U-boat phenomenon":

Many firms appear only for a few years in the dataset. Therefore, a long time-series can be observed only for a small part of firms.

Zeros:

The value zero of a variable can indicate that no information about the variable has been submitted (missing value) or that the reported value was zero. Unfortunately, it is not possible to distinguish between these two cases.

Profit and loss account:

The structure of the cost of sales method (*Umsatzkostenschema*) has been transferred to the structure of the aggregate cost method (*Gesamtkostenschema*) as far as possible (BBK_HM_COFS_PL_TYPE).

Type of accounting:

There are only commercial balance sheets (*Handelsbilanzen*) in the JANIS data and no tax balance sheets (*Steuerbilanzen*). A marker (BBK_HM_ACCOUNTING) included in the database is set to "2" throughout the database.

Update and revisions of the dataset

The research dataset is annually updated. The update includes the data for the following year and corrections for the preceding years. Please note, that the years 2022 and 2023 are still not complete and will be updated with the next update.

1.3 Data collection

Data collection mode

Concerning the Bundesbank part of the data, postal or electronic submission is possible. In the first step the financial statements are the base for the credit rating of the Deutsche Bundesbank. Since the beginning of April 2018 it is possible to submit the financial statements in an electronic way. The financial statement flows directly into the database of the Deutsche Bundesbank. The other way is to transmit the financial statement as PDF. Then the analyst incorporates the financial statement into the database.

Data collectors

Deutsche Bundesbank, Markets Department / Statistics Department

Collection frequency

Yearly

Sampling

Non-financial companies which submitted balance sheets to the Deutsche Bundesbank in the context of the credit assessment and public sources.

Response rate

Concerning the Bundesbank part of the data, the submission of the financial statement is a voluntary process for the companies.

1.4 Data appraisal

Quality checks

All submitted balance sheets by the corporations to the Deutsche Bundesbank are checked for correctness by the Deutsche Bundesbank. Correctness is assessed by various plausibility checks.

Data editing

No data editing

1.5 Data accessibility

Research proposal conditions

A research proposal is checked for feasibility of the research project given the research data, i.e. the suitability of the data to answer the research questions raised by the proposal. The research project must be of public interest, that is without commercial goals.

Institutional access conditions

The researcher must be affiliated with a research institution that clearly has a scientific, noncommercial agenda.

Contact

Deutsche Bundesbank, Research Data and Service Centre (RDSC)

E-mail: fdsz-data@bundesbank.de

Homepage: <https://www.bundesbank.de/rdsc>

Deposit requirements

The researcher must sign a confidentiality agreement and a special contract between Deutsche Bundesbank and the research institution has to be set up. The RDSC must be informed about every document that is made available to the public that contains information derived from the provided data.

Citation requirements

For any study or other document which is made available to the public and contains information derived from the provided data, the researcher is obliged to properly cite the data source as:

Research Data and Service Centre of the Deutsche Bundesbank, Microdatabase JANIS 1997-2023-1

And please cite this data report as:
