## Abstract

We describe the research dataset “Statistics of the banks’ profit and loss accounts (GuV)” using a structured metadata schema.<sup>1)</sup> This document consists of three sections. In the first section, we describe the general properties of the dataset as a whole, such as its scope and coverage and the methods of data collection and data appraisal. The second section looks at the variable level, providing an overview of the variables and tables with details on each variable. The third section looks at the value level and provides codelists, ie information on the meaning of values for categorical variables.

# 1 Dataset description

## 1.1 Overview and identification

### Title of dataset

Statistics of the banks' profit and loss accounts

### German title

Gewinn- und Verlustrechnung der Banken

### Abbreviation

GuV

### Dataset abstract

The statistics of the banks' profit and loss accounts are compiled using data on the income and expenses of German MFIs. In addition they include the calculation of balance sheet profits and losses, their main components, as well as ratios such as the return on equity. This involves the evaluation of the profits and losses calculated from the annual accounts which the banks must submit to the Bundesbank pursuant to section 26 of the German Banking Act (Kreditwesengesetz). As the annual accounts apply to the whole institution (but not to the group), the income and expenses of foreign branches are also covered. The values for the balance sheet capital, balance sheet total and other stock variables are not taken from the annual accounts but are calculated as annual averages on the basis of the monthly balance sheet statistics reported for the institution as a whole.

Preliminary data is available after publication of aggregated results in the Bundesbanks' Monthly Bulletin in September and final data after publication of final aggregation in the internet in spring. The research data are available on a yearly basis from 1999 onwards. Data from 1993 to 1998 are available on request.

### Data ID (DOI)

## 1.2 Dataset scope and coverage

### Legal framework

For the standard data set of the banks' profit and loss accounts statistic (GuV) only already published figures are accessed and so for them there is no need for a legal basis. However, the reporting rules of the Accounting Regulation for Credit Institutions (Verordnung über die Rechnungslegung der Kreditinstitute (RechKredV)) and of the German Commercial Code (Handelsgesetzbuch (HGB)) governing single-entity financial statements apply, particularly: German Commercial Code (HGB) § 242 Duty for statement

“(2) He (note: the merchant) has for the fiscal year-end to compile a contrasting juxtaposition of profits and losses of the financial year (profit and loss accounts).”

Regulation on the financial accounting of the credit institutions and the financial services institutions (“RechKredV”) Section 4 Regulations concerning selected items of the profit and loss accounts (Forms 2 and 3)

- §28 Interest received
- §29 Interest paid
- §30 Commissions received, commissions paid
- §31 General administrative spending
- §32 Special depreciation and value adjustments as well as appropriation to provisions, special income
- §33 Special depreciation and value adjustments, special income

The results from the profit and loss accounts are based on the published annual reports of the individual institutions in accordance with the provisions set forth in the German Commercial Code (Handelsgesetzbuch or HGB) and the Regulation on the Accounting of Credit Institutions (Verordnung über die Rechnungslegung der Kreditinstitute, or RechKredV). They differ in terms of their conception, structure and definitions from the internationally customary IFRS (International Financial Reporting Standards) accounting standards for capital market-oriented banking groups, which means that - from a methodological viewpoint - the respective business results and certain balance sheet or individual profit and loss items are not comparable across the national and international accounting frameworks. For reasons of comparability within Germany, it is advisable to consider the individual accounts when analysing the financial performance. Using group accounts would make a meaningful analysis difficult as, first, many German banks are not part of a group, implying that their individual accounts drawn up in accordance with the German Commercial Code would still have to be used; second, not all group accounts are prepared according to international accounting standards. The published figures cover affiliations of foreign banks whereas the research dataset excludes them due to legal restrictions.

### Unit of analysis

Each line in the dataset corresponds to a report of characteristics of monetary financial institutions.

### Time periods

1999 until 2019

### Geographic coverage

Germany

### Universe

In principle, all institutions with reporting obligations to the monthly balance sheet statistics are the universe of the profit and loss accounts. These are the domestic banks (MFIs), with the status of a deposit-taking credit institution within the meaning of Regulation (EU) No 575/2013 on prudential requirements for credit institutions and investment firms. As the annual accounts apply to the whole institution (but not to the group), the income and expenses of foreign branches are also covered.<sup>2)</sup>

### Historical changes

*Since 1999*

- Profit and loss accounts for building and loan associations included
- “total assets” (variable gvK120) equal the balance sheet total from the monthly balance sheets statistics. Prior to 1999 “total assets” were calculated as balance sheet total plus liabilities arising from the endorsement of rediscounted bills, bills of exchange in circulation drawn by the credit institution, discounted and credited borrowers, and bills sent from the bill portfolio prior to expiry for collection.

*2017*

- Affiliations owned by a bank from outside the European Union are excluded.

*Since 2020*

- For the research dataset the identifier and its name was changed. Up to reporting year 2018, the identifier (gvBAID) was the same as for the domestic parts of the institutes though legally dependent affiliates abroad are included in a banks profit and loss account. Beginning with reporting year 2019 the identifier of the multi-office institutes (BAID\_MOF) is used. The micro-data warehouse of the Bundesbank (HdM) still uses the identifier of the domestic part.

## 1.3 Data collection

### Data collection mode

Electronic or postal submission

---

<sup>2</sup> For the categories the reporting agents; in addition, the business volumes in question would have been expanded disproportionately.

### Data collectors

Deutsche Bundesbank, Statistics Department (S), Monetary and financial statistics (S 1), Cross-sectional tasks and secondary statistics (S 14), Secondary statistics (S 14-3)

### Collection frequency

Yearly

### Sample Size

All German banks (MFIs), with the status of a deposit-taking credit institution within the meaning of Regulation (EU) No 575/2013 on prudential requirements for credit institutions and investment firms, provide a monthly report of their balance sheet. Excluded are affiliations of foreign banks, incomplete business year, banks in liquidation or similar. There are banks with no profit and loss account for one or several years. Six banks have none for one year and one bank has none for two consecutive years though reporting to the monthly balance sheet statistics during all these months. There are additional eight banks with no profit and loss account during three up to nine consecutive years. During these years they do not report to the monthly balance sheet statistic either. For five out of these eight banks this may be due to the fact that the MFI definition changed in 1999 because of monetary union. Thus, in 1999 these banks were no MFIs anymore but became MFIs again some years later. There is also a shell company taking up regular work after some years. Further, for a small number of institutes the financial year differs from the calendar year. The profit and loss accounts of these institutes are allocated to the year of the finalisation, i. e. if the financial year ends February 2016, the profit and loss account is allocated to calendar year 2016.

### Response rate

100%

### Supervision

Within the first quarter of the financial year banks must submit their financial accounts including the profit and loss accounts to the Bundesbank pursuant to section 26 of the German Banking Act (Kreditwesengesetz). This is supervised by the banking supervision.

## 1.4 Missing values

For technical reasons several databases of the Bundesbank require a missing value classification. For the banks' profit and loss accounts this information is more elaborated than required, in particular with respect to the data that only building and loan associations have to report.

In the research datasets the harmonized type of missing (or non-missing) value is coded

**If the type of missing value is N, the corresponding value in the data is set to zero.**

**N** (unreported zero amount) is used for most missing values. The main rationale is that in the banks' profit and loss accounts the total profit has to be reported. Thus the profit can be calculated and compared to the reported profit. Often there is a small difference but this should be due to rounding.

**M** (data cannot exist) is used for the allocations to the funds for hedging saving and loan contracts. It exists for building and loan associations only.

**L** (data exists but not collected) is used for the breakdown of interest income, income expenditure, commissions received and commissions paid according to saving and loan contracts and other business. This must not be reported by MFIs that are not building and loan associations but many banks have these incomes and expenditures though not all and every year.

**K** (nothing available) is used for some ratios where due to rounding the denominator is zero. Thus the ratio is not defined. This occurs rarely.

**P** for provisional value is used in the provisional dataset that is normally provided in September.

For technical reasons, in the provisional dataset some missing values are set to zero. There is a file `GuV_prov_miss.do` replacing these zeros by missing values.

## 1.5 Aggregates

The Bundesbank publishes several tables for the banks' profit and loss accounts on its homepage <https://www.bundesbank.de/resource/blob/804030/f618607f48f3ed5b1e8ca70f3ac94ee5/mL/viii-gewinn-und-verlustrechnungen-der-banken-data.pdf>

These figures are straightforward aggregates of the individual data with the exception of values for the balance sheet capital, balance sheet total and other stock variables. Minor discrepancies in the figures for the breakdown by category of bank arise due to reclassification of banks. Variable names (see section 2) and tables are closely related. We report the titles of the tables together with the corresponding capital letters of the variable names:

- No 01: Overview of profitability of German banks by category of bank (S)
- No 02: Relative importance of key income and expense items by individual category of bank (K)
- No 03: Credit institutions' interest income (E)
- No 04: Cost/income ratio by category of bank (S300, S350)
- No 05: Breakdown of other and extraordinary income or charges (A, E)
- No 06: Return on equity by category of bank (EK11, EK15)
- No 07: Important components of the profit and loss accounts by category of bank (P)
  
- No 08: Credit institutions' profit and loss accounts (K)
- No 09: Credit institutions' expense items (A)
- No 10: Credit institutions' income items (E)

"Total assets" correspond to variable `gvK120`.

## 1.6 Data appraisal

### Quality checks

For data checking process a bottom-up approach is used to guarantee high quality of micro data. Note that individual sums are not reported but calculated.

Plausibility checks and outlier identification

- A lot of plausibility checks are performed on each report
- Comparison of the reporting values with the transmitted data of the previous month and the previous year
- Consistency checks
- Comparison checks between the "Statistics of the banks' profit and loss accounts" and BSI-statistics
- Outlier detection
- Completion check: List of agents which have not yet reported
- For the research dataset checking of the reconciliation formulae. No adjustment for rounding errors.

## 1.7 Data editing

There is no fixed schedule. MFIs have to submit their profit and loss accounts within the first quarter of the financial year.

## 1.8 Data accessibility

### Research proposal conditions

A research proposal is checked for feasibility of the research project given the research data, i.e. the suitability of the data to answer the research questions raised by the proposal. The research project must be of public interest, that is without commercial goals.

### Institutional access conditions

The researcher must be affiliated with a research institution that clearly has a scientific, noncommercial agenda.

## 1.9 Deposit requirements

The researcher must sign a confidentiality agreement and a special contract between Deutsche Bundesbank and the research institution has to be set up. The RDSC must be informed about every document that is made available to the public that contains information derived from the provided data.

## 1.10 Citation requirements

For any study or other document which is made available to the public and contains information derived from the provided data, the researcher is obliged to properly cite the data source as:

## A Definitions

All items of the balance sheet statistics may be found in Special Statistical Publication 1 "Banking statistics, guidelines and customer classification".

### A

**Administrative expenditure** See "General administrative expenditure" and "Other administrative expenditure".

**Affiliated enterprises** Pursuant to section 271 (2) of the Commercial Code (Handelsgesetzbuch), these constitute enterprises which, as parent enterprise or subsidiaries (see section 290 of the Commercial Code), are to be included in the group accounts of a parent enterprise according to the regulations for full consolidation (see sections 300 ff of the Commercial Code).

**Average equity** Annual average value on the basis of the monthly balance sheet statistics reported for the credit institution (balance sheet statistics main template item HV21 310 Capital plus balance sheet statistics main template item HV21 300 Fund for general banking risks). Not included are institutions that are in liquidation or accounting for a truncated financial year. Differing financial years are taken into account.

### B

**Banks majority-owned by foreign banks** Breakdown of legally independent banks that are majority-owned by foreign banks included in the categories "Big banks", "Regional banks and other commercial banks", "Mortgage banks" and "Building and loan associations". See "Banking statistics guidelines" (Verzeichnis der rechtlich selbständigen Banken (MFIs) im Mehrbesitz ausländischer Banken)

<https://www.bundesbank.de/resource/blob/611454/972b8483e96f5a605571737f0eea9070/mL/statso01-16-verzeichnisse-data.pdf>.

### C

**Categories of banks** For definitions of the individual categories of banks, see "Banking statistics guidelines" (Verzeichnis der Banken (MFIs) in Deutschland nach Bankengruppen)

<https://www.bundesbank.de/resource/blob/611454/972b8483e96f5a605571737f0eea9070/mL/statso01-16-verzeichnisse-data.pdf>.

**Changes for statistical reasons** These are changes within the individual banking categories owing to, for example, reclassifications or the discontinuation or admission of institutions, without this being based on a real change to the profitability of the respective banking category. These changes are excluded where indicated.

**Cost-income ratio (CIR)** Indicator of the efficiency of a credit institution. Ratio of administrative spending to gross earnings or operating income. The lower the CIR, the more efficiently the bank generates its earnings.

**Credit institution as a whole** The foreign branches of a given institution are included in the calculation.

**Current income from long-term equity investments** This also includes the dividends from the amounts paid up on cooperative society shares.

### D

**Differing fiscal years** A period of twelve months is used for accounting purposes in a balance sheet, but the balance sheet date is not 31 December.

### E

**Employees, number of** Number of full-time and part-time employees excluding those of the Deutsche Bundesbank. These include the following

\* Commercial banks: employees in the private banking sector, including private mortgage banks.

- \* Credit cooperatives: only employees principally occupied in the banking industry.
- \* Building and loan associations: internal staff only.
- \* Special purpose banks: employees at public mortgage banks and at public special purpose banks.

Sources: data provided by associations and Bundesbank calculations.

## Equity

**Equity ratio** Average equity as a percentage of average total assets, up to and including 1998 as a percentage of the average volume of business (balance sheet statistics main template item HV21 360).

**Extraordinary results in the narrower sense** Balance of reported extraordinary income less reported extraordinary charges.

## F

**Figures for the most recent date** The figures for each of the most recent date are to be regarded as initially provisional.

## G

**General administrative expenditure** Staff costs plus other administrative expenditure ("broad" definition).

**Gross earnings** The sum of net interest income and net commission income.

## H

## I

**Income from operational banking business** See "Operating income".

**Insolvency** Insolvency describes a natural or legal person's inability to pay. A distinction is made between corporate insolvency (an enterprise's inability to pay pursuant to section 14 of the Civil Code (Bürgerliches Gesetzbuch)) and consumer insolvency (a consumer's inability to pay pursuant to section 13 of the Civil Code).

**Interbank transaction** Transaction between credit institutions.

**Interest income (total)** Interest received from lending and money market transactions, debt securities and Debt Register claims plus current income and profits transferred under profit pooling, profit transfer agreements and partial profit transfer agreements.

**Interest income in the narrower sense** Interest received from lending and money market transactions, debt securities and Debt Register claims.

**Interest margin** Net interest income in relation to average total assets.

## J

## K

## L

**Leasing** The basis for this is a leasing contract between a lessee and a lessor. The lessor provides the lessee with the leased good on a lease or rental basis in return for regular leasing payments.

**Long-term equity investments** Balance sheet statistics main template item HV11 100.

**Long-term financial assets** Pursuant to section 266 of the Commercial Code (Handelsgesetzbuch), shares in affiliated enterprises, loans to affiliated enterprises, other long-term equity investments, loans to other long-term investors and investees, long-term securities and other loans.

## M

## N

**Net accumulated losses** Net loss for the financial year plus withdrawals from reserves and participation rights capital less transfers to reserves and participation rights capital. See also "Withdrawals from or transfers to reserves and participation rights capital".

**Net commission income** Commissions received less commissions paid. Also known as non-

interest business.

**Net income or loss for the financial year before tax** Operating result plus other and extraordinary result.

**Net income from traditional interest business** See "Net interest income in the narrower sense".

**Net interest income (total)** Interest income (total) less interest paid. Also known as interest business.

**Net interest income in the narrower sense** Interest received from lending and money market transactions, debt securities and Debt Register claims less interest paid.

**Net operating income or charges** Operating income less general administrative spending.

**Net retained profits** Net income for the financial year plus withdrawals from reserves and participation rights capital less transfers to reserves and participation rights capital. See also "Withdrawals from or transfers to reserves and participation rights capital".

## O

**Operating banking business** All activities that serve the business purpose. These are interest and commission business (gross earnings), trading business and activities that have an effect on the other operating result.

**Operating expenditure** General administrative expenditure less staff costs, including write-downs of fixed assets (excluding write-downs on leased assets).

**Operating income** Net interest income, net commission income, result from the trading portfolio as well as other operating result. **Operating result** Operating result before (re-)measurement plus (re-)measurement gains/ losses (excluding tangible fixed assets and long-term financial assets).

**Operating result before (re-)measurement** Partial operating result plus result from the trading portfolio as well as other operating result.

**Operational banking business** All activities which serve the business purpose. These are interest and commission business, proprietary trading and activities that have an effect on other operating income or charges.

**Other administrative expenditure ("broad" definition)** Other administrative spending ("narrow" definition) plus amortisation and write-downs of intangible fixed assets and depreciation and write-downs of tangible fixed assets, but excluding amortisation, depreciation and write-downs of leased assets.

**Other administrative expenditure ("narrow" definition)** All spending that is required for running the business but is not directly related to the actual business, eg auditing and consultancy costs, costs for premises and postage. "Other administrative spending" is defined in the narrower sense in the table "Credit institutions' charge and income items" only.

**Other and extraordinary result (extraordinary result in the broader sense)** Extraordinary result in the narrower sense plus reversals of write-downs of long-term equity investments, shares in affiliated enterprises and securities treated as fixed assets as well as income from the reversal of special reserves and income from loss transfers less write-downs of long-term equity investments, shares in affiliated enterprises and securities treated as fixed assets as well as charges from loss transfers, transfers to special reserves (up to 2010) and profits transferred under profit pooling, profit transfer agreements and partial profit transfer agreements.

## P

**Partial operating result** Net interest income and net commission income less general administrative spending.

**Participation certificate** Securities based on participation rights to a company. Participation certificates are tradable but are not considered shares. The owner does not receive a voting right at annual general meetings; in return, profit participation usually exceeds the return on debt

securities. Participation certificates are not regulated by law.

**Participation right** Instrument of corporate finance that takes an intermediate position between equity capital and debt capital.

**Profit and loss account by category of bank** The profit and loss account is the comparison of the profit and loss balances (income and expenditure). The annual result of an enterprise is thus shown as either a surplus (profit) for the year or a deficit (loss) for the year. This applies to enterprises domiciled in Germany which conduct banking business pursuant to section 1 (1) of the Banking Act (Kreditwesengesetz) and are defined as monetary financial institutions (MFIs), excluding building and loan associations, insolvent institutions and institutions with a truncated financial year.

**Q**

**R**

**(Re-)measurement gains/losses (excluding tangible fixed assets and long-term financial assets)** Income from reversals of write-downs of receivables and specific securities as well as from the reversal of loan loss provisions less write-downs of receivables and specific securities as well as transfers to loan loss provisions.

**Reserves, disclosed** Pursuant to section 340 g of the Commercial Code (Handelsgesetzbuch), credit institutions are allowed, subject to reasonable commercial judgement, to accumulate disclosed reserves for bank-specific risk in the fund for general banking risks (balance sheet statistics main template item HV21 300).

**Reserves, undisclosed** Pursuant to section 340 f of the Commercial Code (Handelsgesetzbuch), credit institutions are allowed to accumulate additional undisclosed reserves for the total stock of claims and the securities in the liquidity reserve amounting to no more than 4% of these items. The difference between the book value and the actual market value of a balance sheet item (undervaluation of claims and assets or overvaluation of liabilities) that cannot be seen by the users of financial accounts. This is based on the legal valuation and accounting rules.

**Result from the trading portfolio** Balance of income and expenditure arising from business involving securities from the trading portfolio, financial instruments, foreign exchange assets and precious metals as well as the associated write-downs and reversals of write-downs and the accumulation of reserves for this business. Up to 2009, result from financial operations. According to the published annual reports, trading business is dominated by customer-initiated business.

**Return** Ratio of income (price gains and current income) from an investment to capital originally invested.

**Return on equity (RoE)** Net income for the financial year before or after tax as a percentage of average equity.

**S**

**Shares and other variable-yield securities** Balance sheet statistics main template item HV11 090.

**Special reserves** As the "tax dictates financial accounting" principle was repealed to the greatest possible extent with the introduction of the Act to Modernise Accounting Law (Bilanzrechtsmodernisierungsgesetz), the assumption of purely tax options in financial statements has not been permitted since the 2011 reporting year. It is therefore no longer required to set up a special reserves item in the annual accounts. Consequently, since the 2011 reporting year, it has not been permitted to newly set up or increase special reserves, with the result that the charges item "Transfers to special reserves" and the income item "Income from the reversal of special reserves" have been deleted. Special reserves existing at the time of the changeover to the Act to Modernise Accounting Law can either be reversed or retained.

**Specific securities** (within the framework of the items "Write-downs of receivables and specific securities as well as transfers to loan loss provisions" and "Income from reversals of write-downs of receivables and specific securities as well as from the reversal of loan loss provisions").

These specific securities are securities in the liquidity reserve, which include shares and bonds as well as other securities that are neither treated as fixed assets nor belong to the trading portfolio. Here it must be taken into account that these securities may be valued below the lower value of their cost or current market value (principle of the lower of cost or market).

## T

**Tangible fixed assets** Pursuant to section 266 of the Commercial Code (Handelsgesetzbuch), land, land rights and buildings, including buildings on third-party land, technical equipment and machinery, other equipment, operating and office equipment, prepayments and assets under construction.

**Taxes on income and earnings** This describes profit-related taxes (corporation tax, possibly also investment income tax, trade earnings tax, as well as comparable foreign taxes). Partly including tax payments of legally dependent building and loan associations linked to the Landesbanken.

**Total assets, average** Annual average value on the basis of the monthly balance sheet statistics reported for the credit institution as a whole (balance sheet statistic main template item HV21 330). Not included are the foreign branches of savings banks and, as of 2004, the foreign branches of regional institutions of credit cooperatives as well as those institutions that are in liquidation or accounting for a truncated financial year. Differing financial years are taken into account.

## Total assets

**Trading result** See also "Result from the trading portfolio".

**Truncated financial year** Period of less than twelve months in a balance sheet.

## U

## V

**Valuation result (excluding tangible and financial fixed assets)** Income from write-ups of claims and certain securities as well as releases from provisions in lending business less write-downs and value adjustments on claims and certain securities and transfers to provisions in the lending business.

## W

**Withdrawals from or transfers to reserves and participation rights capital** This item includes not only withdrawals from and transfers to reserves (capital and revenue reserves) and participation rights capital but also retained profits and accumulated losses brought forward and withdrawals from and transfers to the fund for general banking risks.

## X

## Y

**Yield** See also "Return".

## Z
