Terms and Abbreviations.................................................................................................................. 12
1 Introduction ...................................................................................................................................... 14
  1.1 Overview of the User Handbook .............................................................................................. 14
    1.1.1 UHB Methodology ............................................................................................................. 14
    1.1.2 UHB Structure .................................................................................................................. 17
  1.2 Overview of the Graphical User Interface ................................................................................... 18
    1.2.1 Setup and Login Procedures ............................................................................................. 18
    1.2.2 GUI Structure ................................................................................................................... 19
      1.2.2.1 Menu Structure .......................................................................................................... 20
      1.2.2.2 Screen Structure ........................................................................................................ 20
      1.2.2.3 Screen Types .............................................................................................................. 22
      1.2.2.4 Field Types and Properties ........................................................................................ 23
      1.2.2.5 Common Buttons and Icons ....................................................................................... 30
    1.2.3 Validation ............................................................................................................................ 35
    1.2.4 Communication Network and Services .............................................................................. 38
    1.2.5 User Administration ........................................................................................................... 38
    1.2.6 Security and Certification Services ....................................................................................... 38
    1.2.7 Online Help ......................................................................................................................... 38
2 Screen Reference Part .................................................................................................................... 39
  2.1 General ....................................................................................................................................... 39
  2.2 Services ..................................................................................................................................... 44
    2.2.1 Additional Services ............................................................................................................ 44
      2.2.1.1 Data Changes – Search/List Screen ............................................................................. 44
      2.2.1.2 Data Changes – Details Screen ................................................................................... 47
  2.3 Common ..................................................................................................................................... 50
    2.3.1 Parties ................................................................................................................................. 50
      2.3.1.1 Parties – Search/List Screen ....................................................................................... 50
      2.3.1.2 Party – Details Screen ................................................................................................ 57
      2.3.1.3 Party – New/Edit Screen ............................................................................................ 63
      2.3.1.4 Technical Addresses Network Services Link – Details Screen .................................. 75
      2.3.1.5 Technical Addresses Network Services Link – New/Edit Screen ............................. 76
      2.3.1.6 Party Service Link – Search/List Screen ..................................................................... 79
      2.3.1.7 Party Service Link – Details Screen ........................................................................... 83
      2.3.1.8 Party Service Link – New/Edit Screen ....................................................................... 87
      2.3.1.9 TIPS Directory – Search/List Screen ......................................................................... 95
    2.3.2 Cash Account ....................................................................................................................... 97
      2.3.2.1 Cash Accounts – Search/List Screen .......................................................................... 97
      2.3.2.2 Cash Account – Details Screen ................................................................................... 104
      2.3.2.3 Cash Account – New/Edit Screen .............................................................................. 110
      2.3.2.4 Limits – Search/List Screen ......................................................................................... 127
      2.3.2.5 Limit – New/Edit Screen ............................................................................................. 133
2.3.2.6 Authorised Account User – Search/List Screen........................................... 139
2.3.2.7 Authorised Account User – New/Edit Screen........................................... 143
2.3.2.8 Standing/Predefined Liquidity Transfer Order – Search/List Screen............... 148
2.3.2.9 Standing/Predefined Liquidity Transfer Order – Details Screen...................... 153
2.3.2.10 Standing/Predefined Liquidity Transfer Order – New/Edit Screen............... 157

2.3.3 Access Rights.......................................................... 164
    2.3.3.1 Users – Search/List Screen....................................................... 164
    2.3.3.2 User – Details Screen.......................................................... 168
    2.3.3.3 User – New/Edit Screen........................................................ 171
    2.3.3.4 Certificate Distinguished Names – Search/List Screen.......................... 173
    2.3.3.5 Certificate Distinguished Names – New Screen.................................. 176
    2.3.3.6 User Certificate Distinguished Name Links – Search/List Screen............... 177
    2.3.3.7 User Certificate Distinguished Name Link – New Screen......................... 181
    2.3.3.8 Roles – Search/List Screen....................................................... 183
    2.3.3.9 Role – New/Edit Screen.......................................................... 186
    2.3.3.10 Grant/Revoke System Privileges – Search Screen.................................. 187
    2.3.3.11 Grant/Revoke System Privilege – Details Screen.................................. 189
    2.3.3.12 Grant/Revoke System Privilege – New/Edit Screen.............................. 190
    2.3.3.13 Grant/Revoke Roles – Search/List Screen........................................ 195
    2.3.3.14 Grant/Revoke Role – Details Screen............................................. 196
    2.3.3.15 Grant/Revoke Role – New/Edit Screen............................................ 199

2.3.4 Message and Reports .................................................. 204
    2.3.4.1 Message Subscription Rule Sets – Search/List Screen.............................. 204
    2.3.4.2 Message Subscription Rule Set – Details Screen.................................... 209
    2.3.4.3 Message Subscription Rule Set – New/Edit Screen................................ 214
    2.3.4.4 Message Subscription Rule – New/Edit Screen..................................... 218
    2.3.4.5 Report Configurations – Search/List Screen........................................ 229
    2.3.4.6 Report Configuration – Details Screen.............................................. 235
    2.3.4.7 Report Configuration – New/Edit Screen............................................ 239

2.3.5 Market Specific Configuration ...................................... 248
    2.3.5.1 Restriction Types – Search/List Screen............................................. 248

2.3.6 Network Configuration............................................... 251
    2.3.6.1 Distinguished Name-BIC Routing – Search/List Screen.......................... 251
    2.3.6.2 Distinguished Name-BIC Routing – New/Edit Screen............................. 256
    2.3.6.3 Routing – Search/List Screen....................................................... 260
    2.3.6.4 Routing – New/Edit Screen.......................................................... 264
    2.3.6.5 BIC Directory – Search/List Screen.................................................. 270

2.3.7 Scheduling............................................................. 273
    2.3.7.1 Closing Days – Search/List Screen.................................................. 273
    2.3.7.2 Event Types – Search/List Screen................................................... 277
    2.3.7.3 Event Type – Details Screen........................................................ 279
2.3.8 General Configuration Parameters ........................................................................ 281
  2.3.8.1 System Entity – Search/List Screen ................................................................ 281
2.3.9 Billing .................................................................................................................. 284
  2.3.9.1 Invoice Configurations – Search/List Screen ................................................. 284
  2.3.9.2 Invoice Configurations – Details Screen ....................................................... 288
  2.3.9.3 Invoice Configuration – New/Edit Screen .................................................... 292
  2.3.9.4 VAT – Search/List Screen .............................................................................. 300
  2.3.9.5 VAT – New/Edit Screen ................................................................................. 302
  2.3.9.6 Service Items – Search/List Screen .............................................................. 305
  2.3.9.7 Service Item – Details Screen ....................................................................... 308
  2.3.9.8 Tariffs – Search/List Screen ......................................................................... 310
2.3.10 Revisions ......................................................................................................... 312
  2.3.10.1 Revision/Audit Trail – List Screen ............................................................... 312
  2.3.10.2 Revision/Audit Trail – Details Screen ......................................................... 313
2.4 T2 ......................................................................................................................... 315
  2.4.1 Cash .................................................................................................................. 315
    2.4.1.1 Account Monitoring Group – Search/List Screen ...................................... 315
    2.4.1.2 Account Monitoring Group – Details Screen ........................................... 318
    2.4.1.3 Account Monitoring Group – New/Edit Screen ...................................... 321
    2.4.1.4 Liquidity Transfer Group – Search/List Screen ....................................... 324
    2.4.1.5 Liquidity Transfer Group – Details Screen .............................................. 327
    2.4.1.6 Liquidity Transfer Group – New/Edit Screen .......................................... 329
    2.4.1.7 Settlement Bank Account Group – Search/List Screen .......................... 332
    2.4.1.8 Settlement Bank Account Group – Details Screen .................................. 335
    2.4.1.9 Settlement Bank Account Group – New/Edit Screen ............................. 338
    2.4.1.10 Direct Debit Mandate – Search/List Screen ........................................... 342
    2.4.1.11 Direct Debit Mandate – New/Edit Screen .............................................. 346
    2.4.1.12 Standing Order for Reservation – Search/List Screen ........................... 350
    2.4.1.13 Standing Order for Reservation – New/Edit Screen ............................... 354
2.4.2 Party .................................................................................................................. 357
    2.4.2.1 Banking Group – Search/List Screen ......................................................... 357
    2.4.2.2 Banking Group – Details Screen ............................................................... 360
    2.4.2.3 Banking Group – New/Edit Screen ........................................................... 362
    2.4.2.4 Ancillary System Bilateral Agreement – Search/List Screen ................. 366
    2.4.2.5 Ancillary System Bilateral Agreement – New/Edit Screen .................... 371
    2.4.2.6 Ancillary System Procedures – Search/List Screen .................................. 374
    2.4.2.7 Ancillary System Procedure – Details Screen ........................................... 377
    2.4.2.8 Ancillary System Procedures – New/Edit Screen .................................... 378
    2.4.2.9 Billing Group – Search/List Screen ........................................................... 390
    2.4.2.10 Billing Group – Details Screen ............................................................... 393
    2.4.2.11 Billing Group – New/Edit Screen ............................................................ 396
2.4.3 Configuration ........................................................................................................................................... 400
  2.4.3.1 CLM Repository – Search/List Screen ................................................................................................. 400
  2.4.3.2 RTGS Directory – Search/List Screen ................................................................................................. 403
3 User Instructions Part ...................................................................................................................................... 406
  3.1 General .......................................................................................................................................................... 406
  3.2 Digital Signature ......................................................................................................................................... 407
    3.2.1 Digital Signature (NRO) ....................................................................................................................... 407
  3.3 Access Rights .............................................................................................................................................. 409
    3.3.1 Configuration of a Role ......................................................................................................................... 409
      3.3.1.1 Create a new Role ............................................................................................................................. 409
      3.3.1.2 Grant Privileges to a Role .................................................................................................................. 411
      3.3.1.3 Assign a Role to a Party .................................................................................................................... 412
      3.3.1.4 Assign a Role to a User .................................................................................................................... 414
    3.3.2 Configuration of a User ......................................................................................................................... 416
      3.3.2.1 Create a New User ............................................................................................................................ 416
      3.3.2.2 Create a New Certificate Distinguished Name .................................................................................. 417
      3.3.2.3 Create a New User Certificate Distinguished Name Link ............................................................... 418
      3.3.2.4 Assign a Role to a User .................................................................................................................... 419
    3.3.3 Usage of the 4-Eyes Mode ..................................................................................................................... 421
      3.3.3.1 Initiate an Action in 4-Eyes Mode ...................................................................................................... 421
      3.3.3.2 Approve an Action in 4-Eyes Mode .................................................................................................. 422
  3.4 Rule Sets ....................................................................................................................................................... 423
    3.4.1 Configuration of a New Message Subscription Rule Set ...................................................................... 423
    3.4.2 Create a New Message Subscription Rule Set ...................................................................................... 423
  3.5 Party Management ...................................................................................................................................... 426
    3.5.1 Administration of Participants ............................................................................................................ 426
      3.5.1.1 Create a New Participant .................................................................................................................. 426
      3.5.1.2 Edit an Existing Participant ............................................................................................................. 427
      3.5.1.3 Delete an Existing Participant .......................................................................................................... 431
      3.5.1.4 Create a Party Service Link .............................................................................................................. 432
      3.5.1.5 Create a Distinguished Name-BIC Routing configuration ............................................................. 434
  3.6 Reports ......................................................................................................................................................... 434
    3.6.1 Report Management ............................................................................................................................. 434
      3.6.1.1 Create a New Report Configuration ................................................................................................. 434
  3.7 Revisions ....................................................................................................................................................... 436
    3.7.1 Monitoring of Revisions ........................................................................................................................ 436
      3.7.1.1 View Revisions .................................................................................................................................. 436
  3.8 Account Management ................................................................................................................................. 437
    3.8.1 Administration of Cash Accounts ........................................................................................................ 437
      3.8.1.1 Create a New Cash Account ............................................................................................................ 437
      3.8.1.2 Edit an Existing Cash Account ....................................................................................................... 438
3.8.1.3 Delete an Existing Cash Account .................................................................................................................. 440
3.8.1.4 Create a Cash Accounts Group ...................................................................................................................... 441
3.8.1.5 Create an Authorised Account User ............................................................................................................... 442
3.8.1.6 Edit an Authorised Account User .................................................................................................................. 443
3.8.1.7 Delete an Authorised Account User .............................................................................................................. 443
3.8.1.8 Usage of RTGS Directory .................................................................................................................................. 444
3.9 Technical Addresses .................................................................................................................................................. 445
3.9.1 Configuration of a Technical Address .................................................................................................................. 445
3.9.1.1 Add a new Technical Address to a Party ...................................................................................................... 446
3.9.1.2 Create a New Technical Address Service Link ............................................................................................ 447
4 Annex ........................................................................................................................................................................ 450
4.1 Sitemap .................................................................................................................................................................. 450
4.1.1 Data Changes...................................................................................................................................................... 450
4.1.2 Party .................................................................................................................................................................... 451
4.1.3 Technical Addresses Network Services Link .................................................................................................. 451
4.1.4 TIPS Directory .................................................................................................................................................... 451
4.1.5 Party Service Link ............................................................................................................................................. 452
4.1.6 Cash Account .................................................................................................................................................... 452
4.1.7 Limits .................................................................................................................................................................. 453
4.1.8 Authorised Account User .................................................................................................................................. 453
4.1.9 Standing/Predefined Liquidity Transfer Order ................................................................................................. 454
4.1.10 User ................................................................................................................................................................ 454
4.1.11 Certificate Distinguished Name ...................................................................................................................... 455
4.1.12 User Certificate Distinguished Name Link ................................................................................................... 455
4.1.13 Roles ................................................................................................................................................................ 456
4.1.14 Grant/Revoke System Privilege ..................................................................................................................... 456
4.1.15 Grant/Revoke Role ........................................................................................................................................... 457
4.1.16 Message Subscription Rule Set ....................................................................................................................... 457
4.1.17 Message Subscription Rule ................................................................................................................................ 458
4.1.18 Report Configuration ....................................................................................................................................... 458
4.1.19 Restriction Types ................................................................................................................................................ 459
4.1.20 Distinguished Name-BIC Routing .................................................................................................................. 459
4.1.21 Routing ............................................................................................................................................................. 460
4.1.22 BIC Directory ................................................................................................................................................... 460
4.1.23 Closing Days ..................................................................................................................................................... 461
4.1.24 Event Types ....................................................................................................................................................... 461
4.1.25 System Entity .................................................................................................................................................... 462
4.1.26 Invoice Configurations ..................................................................................................................................... 462
4.1.27 VAT ................................................................................................................................................................... 463
4.1.28 Service Items ..................................................................................................................................................... 463
4.1.29 Tariffs ............................................................................................................................................................... 463
4.1.30 Account Monitoring Group................................................................. 464
4.1.31 Liquidity Transfer Group................................................................. 464
4.1.32 Settlement Bank Account Group...................................................... 465
4.1.33 Direct Debit Mandate................................................................. 465
4.1.34 Standing Order for Reservation .................................................... 466
4.1.35 Banking Group ............................................................................ 466
4.1.36 Ancillary System Bilateral Agreement ............................................ 467
4.1.37 Ancillary System Procedures .......................................................... 467
4.1.38 Billing Group .............................................................................. 468
4.1.39 CLM Repository.............................................................................. 468
4.1.40 RTGS Directory ............................................................................ 468

4.2 List of Privileges .............................................................................. 469
4.2.1 Reader’s Guide ................................................................................ 469
4.2.2 Privileges for GUI Screens ............................................................. 469
  4.2.2.1 Account Monitoring Group – Search/List Screen ..................... 469
  4.2.2.2 Account Monitoring Group – Details Screen ............................ 469
  4.2.2.3 Account Monitoring Group – New/Edit Screen ..................... 469
  4.2.2.4 Ancillary System Bilateral Agreement – Search/List screen .... 469
  4.2.2.5 Ancillary System Bilateral Agreement – New/Edit screen ....... 470
  4.2.2.6 Ancillary System Procedures – Search/List screen ................. 470
  4.2.2.7 Ancillary System Procedures – Details screen ......................... 470
  4.2.2.8 Ancillary System Procedures – New/Edit screen ................. 470
  4.2.2.9 Authorised Account User – Search/List Screen ...................... 470
  4.2.2.10 Authorised Account User – New/Edit Screen ....................... 471
  4.2.2.11 Banking Group – Search/List Screen ...................................... 471
  4.2.2.12 Banking Group – Details Screen ............................................. 471
  4.2.2.13 Banking Group – New/Edit Screen ........................................ 471
  4.2.2.14 BIC Directory – Search/List Screen ......................................... 471
  4.2.2.15 Billing Group – Search/List Screen ........................................ 471
  4.2.2.16 Billing Group – Details Screen ............................................... 472
  4.2.2.17 Billing Group – New/Edit Screen ........................................... 472
  4.2.2.18 Cash Account – Search/List Screen ........................................ 472
  4.2.2.19 Cash Account – Details Screen ............................................... 472
  4.2.2.20 Cash Account – New/Edit Screen .......................................... 472
  4.2.2.21 Certificate Distinguished Name – Search/List Screen ............ 472
  4.2.2.22 Certificate Distinguished Name – New Screen ...................... 473
  4.2.2.23 CLM Repository – Search/List Screen .................................... 473
  4.2.2.24 Closing Days – Search/List Screen ......................................... 473
  4.2.2.25 Data Changes – Search/List Screen ........................................ 473
  4.2.2.26 Data Changes – Details Screen ............................................... 473
  4.2.2.27 Direct Debit Mandate – Search/List Screen ............................ 473
4.2.2.28 Direct Debit Mandate – New/Edit Screen ................................................................. 474
4.2.2.29 Distinguished Name–BIC Routing – Search/List Screen ........................................ 474
4.2.2.30 Distinguished Name–BIC Routing – New/Edit Screen ........................................... 474
4.2.2.31 Event Types – Search/List Screen .............................................................................. 474
4.2.2.32 Event Type – Details Screen ..................................................................................... 474
4.2.2.33 Grant/Revoke Role – Search/List Screen .................................................................. 474
4.2.2.34 Grant/Revoke Role – Details Screen ......................................................................... 474
4.2.2.35 Grant/Revoke Role – New/Edit Screen ..................................................................... 475
4.2.2.36 Grant/Revoke System Privileges – Search/List Screen ............................................ 475
4.2.2.37 Grant/Revoke System Privileges – Details Screen .................................................... 475
4.2.2.38 Grant/Revoke System Privileges – New/Edit Screen .............................................. 475
4.2.2.39 Invoice Configurations – Search/List Screen ............................................................ 475
4.2.2.40 Invoice Configurations – Details Screen .................................................................. 475
4.2.2.41 Invoice Configurations – New/Edit Screen ............................................................... 475
4.2.2.42 Limits – Search/List Screen ...................................................................................... 476
4.2.2.43 Limits – New/Edit Screen ......................................................................................... 476
4.2.2.44 Liquidity Transfer Group – Search/List Screen ......................................................... 476
4.2.2.45 Liquidity Transfer Group – Details Screen ............................................................... 476
4.2.2.46 Liquidity Transfer Group – New/Edit Screen ............................................................ 476
4.2.2.47 Message Subscription Rule Set – Search/List Screen .............................................. 476
4.2.2.48 Message Subscription Rule Set – Details Screen ..................................................... 477
4.2.2.49 Message Subscription Rule Set – New/Edit Screen ................................................ 477
4.2.2.50 Message Subscription Rule – New/Edit Screen ....................................................... 477
4.2.2.51 Parties – Search/List Screen ..................................................................................... 477
4.2.2.52 Party – Details Screen ............................................................................................. 478
4.2.2.53 Party – New/Edit Screen ......................................................................................... 478
4.2.2.54 Party Service Link – Search/List Screen ................................................................... 478
4.2.2.55 Party Service Link – Details Screen ........................................................................ 478
4.2.2.56 Party Service Link – New/Edit Screen ..................................................................... 478
4.2.2.57 Report Configuration – Search/List Screen ............................................................... 478
4.2.2.58 Report Configuration – Details Screen ..................................................................... 478
4.2.2.59 Report Configuration – New/Edit Screen ............................................................... 479
4.2.2.60 Restriction Types – Search/List Screen ..................................................................... 479
4.2.2.61 Revision/Audit Trail – List Screen ............................................................................. 479
4.2.2.62 Revision/Audit Trail – Details Screen ....................................................................... 479
4.2.2.63 Roles – Search/List Screen ..................................................................................... 479
4.2.2.64 Role – New/Edit Screen ......................................................................................... 479
4.2.2.65 Routing – Search/List Screen .................................................................................. 480
4.2.2.66 Routing – New/Edit Screen .................................................................................... 480
4.2.2.67 RTGS Directory – Search/List Screen ....................................................................... 480
4.2.2.68 Service Items – Search/List Screen ......................................................................... 480
4.3 List of References for Error Messages

4.3.2 References for error messages for GUI screens

4.3.2.1 All ........................................................................................................ 484
4.3.2.2 All screens which allow the initiation of a second user .......................... 485
4.3.2.3 Account Monitoring Group – Search/List Screen .............................. 485
4.3.2.4 Account Monitoring Group – Details Screen .................................... 486
4.3.2.5 Account Monitoring Group – New/Edit Screen ............................... 487
4.3.2.6 Ancillary System Bilateral Agreement – Search/List Screen ................. 489
4.3.2.7 Ancillary System Bilateral Agreement – New/Edit Screen .................. 490
4.3.2.8 Ancillary System Procedures – Search/List Screen ............................ 492
4.3.2.9 Ancillary System Procedures – Details Screen .................................. 492
4.3.2.10 Ancillary System Procedures – New/Edit Screen ............................ 492
4.3.2.11 Authorised Account User – Search/List Screen ............................... 498
4.3.2.12 Authorised Account User – New/Edit Screen ................................. 500

</table>
# 1 Introduction

## 1.1 Overview of the User Handbook

The CRDM User Handbook, hereinafter called UHB, aims at facilitating the use of the Graphical User Interface of the Common Reference Data Management (CRDM GUI). It is intended for any CRDM user regardless of the focus of activities and describes the full range of functionalities available in user-to-application (U2A) mode. The UHB provides detailed reference information on all GUI screens and step-by-step instructions for typical workflows.

### Target Audience

There is only one handbook addressing all actors: central banks (CBs) and payment banks/ancillary systems. By referring to the table of contents as well as to the usage indication list, each reader can easily identify the relevant parts.

### Related documentation

The UHB is part of the functional documentation and complements the UDFS. In particular, chapter one of the UDFS contains a detailed description of the business concepts used in CRDM, which are also relevant when using the GUI.

### Updates

Updated versions of the UHB will be provided on a regular basis.

## 1.1.1 UHB Methodology

Several symbols and methodological elements are used throughout the CRDM UHB to ease orientation and help you to find your desired information quickly.

### Page Layout

Every page of the main UHB parts has a similar page layout. You can find four different elements:

- the header, which shows the chapter and sub-chapter title
- the margin column on the left side of each page, which is used for subheadings and information signs
- the text column, which contains the main information, tables and screenshots
- the footer, which shows the name and the release of the document as well as the page number
### Information Signs

<table>
<thead>
<tr>
<th>Name</th>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Notice sign</td>
<td><img src="image" alt="Notice Sign" /></td>
<td>Notice signs are used to highlight useful information. Read its content to find out about hints, action alternatives or other details helping you to improve your usage of the CRDM GUI.</td>
</tr>
<tr>
<td>Example sign</td>
<td><img src="image" alt="Example Sign" /></td>
<td>Example signs are used to highlight examples, which illustrate the corresponding text, especially when a verbal description is difficult or too extensive.</td>
</tr>
</tbody>
</table>

### Links

Links are illustrated throughout the UHB with a little triangle followed by a page number within squared brackets. These links help you to jump to related sections by clicking on them or turning to the relevant page.

![Illustration 1: Link Illustration](image)

Please find the information on page 6. [6]

### Tables

Tables are used to present information in a clearly arranged format. They consist of a table head and a table body. The body is divided into a left and a right column. The left column contains keywords, for example field names, which are explained in the right column. Subsections within a table are preceded by a heading. The order of the description follows the appearance on the screen from left to right and from top to bottom.

### Type Set

Regular text in the UHB is written in Arial Unicode MS font with a size of 11pt. Screen and button names are written in italic letters, GUI paths use the Courier New font. Field names and field values are put in quotation marks if they appear in a context other than their dedicated description.
### Element Format Example

<table>
<thead>
<tr>
<th>Element</th>
<th>Format</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Screen name</td>
<td>Italic letters</td>
<td><em>Data changes – search/list screen</em></td>
</tr>
<tr>
<td>Button name</td>
<td>Italic letters</td>
<td><em>New button</em></td>
</tr>
<tr>
<td>GUI path</td>
<td>PC code</td>
<td><em>Common &gt;&gt; Parties &gt;&gt; Parties</em></td>
</tr>
<tr>
<td>Field name or value quotation</td>
<td>'...'</td>
<td><em>‘Opening Date’ ; ‘Active’</em></td>
</tr>
</tbody>
</table>

### Action Steps

Business scenarios are divided into single action steps. These action steps are numbered sequentially. Intermediate results are described where appropriate and marked with an indented arrow. Each business scenario ends with a final result, indicated by an arrow.

#### Example

1. Action step 1
2. Action step 2
   - Intermediate result
3. Action step 3
   - Result

### Screenshots

Screenshots are used to illustrate the corresponding text. Note that there might be minor deviations between the screenshot and your screen appearance, according to your access rights or a specific selection you have made. In addition, some functions are mutually exclusive and cannot be represented in a single screenshot. In these cases, the screenshot illustrates the more prevalent use of the screen.

Values shown on a screenshot might also deviate from the default values indicated in the description. In these cases, the description is valid rather than the screenshot.
The UHB is structured in three parts and is complemented by an annex.

**Part 1**

The *introduction* explains the aim, the content and the approach of both the UHB and the GUI. While the first section explains how to use the UHB, the second section focuses on the design and common functionalities of the GUI.

The overview of the UHB includes information about:
- The UHB methodology
- The UHB structure

The overview of the GUI consists of information about:
- Setup and login procedures
- GUI structure, including information about the menu structure, screen structure, screen types, field types and properties, and common buttons and icons
- Validation
- Communication network and services
- User administration
- Security and certification services
- Online help

Refer to this part if you need information on how to use the UHB or on common functionalities of the GUI.

**Part 2**

The *screen reference part* starts with a general section serving as a reader’s guide for this part. It is followed by the screen descriptions of all screens.
contained in the GUI. Each description follows an identical structure which comprises detailed information on all screen fields.

The screen reference part is structured along the first and second GUI menu level, followed by the screens in alphabetical order. Within this alphabetical order, all screen types belonging to the same business function are grouped together to follow the business logic (*search/list* screen, *details* screen, *new/edit* screen).

Refer to this part if you need detailed and precise information on a screen, field or button.

**Part 3**

The **user instructions part** starts with a general section serving as a reader’s guide for this part. It is followed by step-by-step instructions for typical GUI workflows, called business scenarios. Each description follows an identical structure.

Related business scenarios are grouped into comprehensive business packages, which are further grouped into categories.

Refer to this part if you need to know how to carry out an action using the GUI.

**Annex**

The **annex** supplies detailed information complementing the UHB:
- **Annex Section 4.1 - Sitemap**: Hierarchical, structured illustration of all screens and their interrelations
- **Annex Section 4.2 - List of privileges**: For each screen, all privileges and their corresponding description are listed
- **Annex Section 4.3 - List of references for error messages**: For each screen, all references for error messages, the error text and the corresponding description are listed

**1.2 Overview of the Graphical User Interface**

The GUI is a browser-based application for communication with CRDM in U2A mode. It is based on the ISO norm 9241 ‘Ergonomics of human system interaction’.

**1.2.1 Setup and Login Procedures**

Before entering the GUI, make sure that your workstation complies with the hardware and software requirements and implement all necessary preparations (e.g. firewall settings) described below.

Such requirements/preparations may be subject to periodical review/update to comply with changing technical/regulatory scenario.
Hardware requirements

The following hardware requirements are needed:
- Processor: 1 GHz or faster with support for PAE, NX, and SSE2;
- RAM: 1 GB (32-bit) or 2 GB (64-bit);
- Hard disk space: 16 GB (32-bit) or 20 GB (64-bit);
- Graphics card: Microsoft DirectX 9 graphics device with WDDM driver.

Software requirements

The following software requirements are suggested:
- Windows 10 as OS, since running the application can only be guaranteed on Windows 10 OS or newer.
- JRE Version: 1.8.0_31 or higher (remark: additional constraints coming from NSP to be verified).

Supported Web-Browsers and Settings

The following web-browsers are suggested:
- Mozilla Firefox;
- Google Chrome

The complete redefinition of the qualified browsers’ set and their related versions and the full replacement of the applet technology will be, then, defined in the context of the Eurosystem Single Market Infrastructure Gateway (ESMIG), being part of the ongoing T2/T2S consolidation project.

GUI Access

Users are directed to an initial page named ESMIG portal that ensures proper routing to the web applications the user has been granted to enter.

NRO specific requirements

The signing client installation onto the user workstation is triggered with the first attempt to sign an instruction. The users have to ensure that the security settings of their institutions, i.e. firewalls, allow for installation of the client.

1.2.2 GUI Structure

This chapter explains the basic elements of the CRDM GUI structure (i.e. structure of the menu and the screens) helping you to navigate through the system and to use it quickly and efficiently.

The first subsection describes the menu structure where screens are grouped hierarchically. Afterwards, the second subsection explains the layout structure common to each screen. The following subsections provide details on the different screen types and on recurring elements, such as common field types or buttons and icons.
1.2.2.1 Menu Structure

The GUI menu is structured into four hierarchical menu levels. The hamburger menu appears when the proper icon is selected. After the first level is presented, it is possible to choose the functionalities that are common to the shared services and those that are specific for T2 or TIPS. Then the menu can be further navigated - the second, third and fourth menu levels are accessible via mouse-over on the first-level menu item - in order to select the desired functionality.

**Hint**

Depending on your access rights, it is possible that not all menu entries are visible for you. Contact your system administrator to verify that you have the necessary privileges to access all screens relevant to you. The privileges are listed in each screen and business scenario description.

*Illustration 3: CRDM menu levels*

<table>
<thead>
<tr>
<th>Position No.</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Menu level 1</td>
</tr>
<tr>
<td>2</td>
<td>Menu level 2</td>
</tr>
<tr>
<td>3</td>
<td>Menu level 3</td>
</tr>
<tr>
<td>4</td>
<td>Menu level 4</td>
</tr>
</tbody>
</table>

All entries on the third menu level are structural subcategories. To access a screen you have to click on the fourth menu level.

1.2.2.2 Screen Structure

In general, each screen of the CRDM GUI follows the same layout containing a header and a content area.

The header appears at the top of every screen. It contains three main elements providing useful information and helping you to navigate between the different screens as shown in the illustration below.
Header

Illustration 4: Header elements

<table>
<thead>
<tr>
<th>Position No.</th>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Menu bar</td>
<td>... presents the main menu item and allows you to navigate to the screens.</td>
</tr>
<tr>
<td>2</td>
<td>CRDM logo button</td>
<td>... links to the welcome screen.</td>
</tr>
<tr>
<td>3</td>
<td>Information panel</td>
<td>... displays your login name, the logout and help buttons as well as date and time of last data access.</td>
</tr>
</tbody>
</table>

Content Area

The content area is the part of the GUI where you can trigger all business actions. It is organised by five main elements which help you to interact properly with the GUI as shown in the illustration below.

To structure large amounts of data, the content area is further separated into frames and sub-frames.

Illustration 5: Content area elements
## 1.2.2.3 Screen Types

The CRDM GUI consists of the following types of screens, each with a different function:

- **Welcome screen**
- **Search/List screen**
- **Details screen**
- **Enter screen** (usually *new* or *edit* screen)

### Welcome Screen

The welcome screen is the entrance into the CRDM GUI.

### Search/List Screen

You can access all search/list screens on menu level four.

The *search/list* screen allows you to query the CRDM database using a predefined set of search criteria. After executing a search, a list of data records matching your search criteria is displayed in a table. To select an entry from a list displayed on a *search/list* or *list* screen, click on the desired entry. The background colour of the table line changes to indicate the selected entry. If the search retrieves only one record, the *details* screen is displayed directly, if you are authorised to access the *details* screen, else the record is displayed in the table in the *list* screen. You can browse through the list using the table buttons. Furthermore, it is possible to arrange your search results in ascending or descending order by the columns shown. This does not trigger a refreshed query.

### Details Screen

In contrast to the *search/list* screen, you can only access the *details* screens via other screens.

All *details* screens provide you with in-depth information of a previously selected data record.

---

### Table: Common Reference Data Management for CSLD - User Handbook

<table>
<thead>
<tr>
<th>Position No.</th>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Breadcrumb</td>
<td>... shows the main path to the current screen.</td>
</tr>
<tr>
<td>2</td>
<td>Basic icons</td>
<td>... exports or prints the screen content.</td>
</tr>
<tr>
<td>3</td>
<td>Frame and sub-frame title</td>
<td>... groups related information as a structural function.</td>
</tr>
<tr>
<td>4</td>
<td>Button bar</td>
<td>... shows all available buttons for the current screen.</td>
</tr>
</tbody>
</table>

Further information about the icons can be found in the common buttons and icons section.
Before showing the details screen, a new query is forwarded to the system to ensure most up-to-date data.

Enter Screen

Similar to the details screens, you can only access the enter screens through other screens.

Enter screens allow you to enter data, which can be done in two enter modes:

1. New mode, represented by the new screens
2. Edit mode, represented by the edit screens

In general, both modes contain the same fields. In the case of the new mode, all fields are blank. In the case of the edit mode, existing data are prefilled in the fields. In addition, one past value is reported (if available) which cannot be edited. You can edit the existing currently valid value by changing the content of the field. You can only edit an existing currently valid value provided that there is no future value. Otherwise, you need to delete the existing future value beforehand. You can also enter a new future value by clicking on the pencil icon.

1.2.2.4 Field Types and Properties

Field Types

The description of the common field types with the proper descriptions follow.

Input Fields

In input fields you can enter text and/or numeric content. Make sure to comply with the format requirements, which are part of each field/screen description.

Input-sensitive fields are input fields with an auto-complete mode that helps you to input data. As soon as you start typing the first characters of the respective data into an input-sensitive field, CRDM automatically proposes possible matching entries from which you can select the desired one.

Illustration 6: Input-sensitive field
Hint

You can use the tab key on your keyboard to navigate through the GUI fields.

BIC8 that are entered via GUI are automatically supplemented to BIC11 by adding ‘XXX’ in order to unambiguously identify a party.

Select fields are either select boxes, radio buttons or check boxes.

Select boxes: Functionally a select box is a way to enter data from a limited list of possible values. In CRDM you can find different types of select boxes, standard select box, input-sensitive select box and auto-complete select box.

The standard select box enables the user to choose one entry from a predefined set of values. To select an entry, click on the little box with the arrow to open the menu. Then select the desired value by clicking on it.

Illustration 7: Standard select box

The input-sensitive select box enables the user to enter the desired value manually, which will be used to reduce the possible set of values in the input-sensitive select box list, which provides you with a drop-down menu that shows the 10 first entries of the set of values irrespective of what you might have entered in the text field.

Illustration 8: Input-sensitive select box using the input-sensitive select box icon and input-sensitive select box with manually entered values.

The auto-complete select box enables the user, differently from the input-sensitive select box, to make entries and choose values outside the standard set of values to be sent to the back-end for further validation (extended data scope). Due to that possibility of transporting unqualified data the validation of the values
is restricted to basic checks and will be carried out mainly in the backend. Apart from that, the auto-complete select box functions similar to the input-sensitive select box.

**Illustration 9:** Auto-complete select box

**Radio buttons:** Enable the user to make exact selections using one value from a set of options. You can select only one value at the same time. Click on the icon corresponding to the option you would like to select.

**Illustration 10:** Radio buttons

**Check boxes:** Enable you to select more than one value at the same time. Click on the boxes corresponding to the options you would like to select. Selected check boxes contain a check mark.

**Illustration 11:** Check boxes

**Wildcards**

A wildcard is a placeholder for characters and it represents any acceptable character or a set of them in a string. In CRDM you can use a wildcard in input fields or google-style fields in all the search screens to search for data widening the result to all the strings matching the pattern. The required number of characters is indicated in the field description. CRDM accepts two possible values:

1. `*` that is a placeholder for one or more characters of the input value;
2. `?` that is a placeholder for exactly one character of the input value.
Examples

CRDM*: The result list contains all data records beginning with ‘CRDM’.

*Account: The result list contains all data records ending with ‘Account’.

CRD?: The result list contains all data records that have any acceptable character at the end of ‘CRD’, e.g. ‘CRDM’, ‘CRDX’, etc.

The combination of the wildcard ‘*’ is not possible, e.g. ‘CRD?*’ or ‘CR**’

The wildcards are always usable in the fields reported before with the following restrictions:

- It is possible that to properly search with wildcards you have to insert at least two or four characters. In this case, the minimum number of characters to be entered is reported in the field remarks;
- It is possible that a field does not allow wildcards; in this case, this is explicitly mentioned in the Remarks field.

Read-only Fields

In addition to enter and select fields, the CRDM GUI has also read-only fields, which are pre-filled and do not allow data changes.

Field Properties

All field types have specific properties with respect to possible character sets, and mandatory content.

Date

A Date type field has the following format: YYYY-MM-DD. There are four digits representing the year, two digits representing the month and two digits representing the day.

The default value of Date fields, unless differently specified, is BLANK.

Generally, if a closing date value is not specified, the system will automatically set the date “9999-12-31”.

The field Date is always linked to a calendar icon that opens a calendar where you can select a day. It is possible to insert a date writing in the field or using the calendar.

Time

The Time type field has the following format: HH:MM. There are two digits representing the hour and two digits representing the minute.

DateTime

A DateTime type field has the following format: YYYY-MM-DD HH:MM. There are four digits representing the year, two digits representing the month, two digits representing the day, two digits representing the hour and two digits

1 The Time in the system refers to the CET/CEST zone.
representing the minute. The field DateTime is always linked to a calendar icon that opens a calendar where you can select a day. It is possible to insert a date writing in the field or using the calendar.

**Amount**

The GUI will show the amounts with all decimal points, English Format (the decimal separator will be a “.” and the thousand separator is “,”) and right alignment.

Amounts can be entered up to 18 figures, that is maximum 19 characters if the decimal separator is present.

When the amount field is in read-only mode or the amount field is not selected for typing, the amount shows the thousand separator.

When the user is typing the numbers, the amount is shown without the thousand separators.

The number of decimals is defined by the currency.

Negative amounts (shown by the system but not entered by the user) are written in red and marked with a “-“ (This rule applies for all negative values).

According to the character set, only numerical characters (decimal – abbreviation "d") can be used for amounts plus the negative symbol.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
<th>Validation</th>
<th>Error Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Amounts</td>
<td>Contains an Amount.</td>
<td>The Amount must be greater than or equal to 0.</td>
<td>The amount must be greater than or equal to 0.</td>
</tr>
<tr>
<td>Amounts</td>
<td>Number of Decimals of an amount</td>
<td>The Amount must have &lt;number of decimals stored for the currency&gt; decimals.</td>
<td>Wrong format in field &lt;field name&gt;. The correct format has to be xxx.xxx,&lt;number of decimals stored for the currency&gt;.</td>
</tr>
<tr>
<td>Amounts</td>
<td>Character set to be used</td>
<td>It is only possible to use a numerical character set.</td>
<td>Only numerical characters are allowed.</td>
</tr>
</tbody>
</table>

**Quick Input Entries**

To facilitate a quicker input, the user can enter the following characters in fields that require the input of amounts:

- The character T (or t) represents thousands, thereby allowing the user to enter three zeros directly, e.g. to enter 5T instead of 5,000;
- The character M (or m) represents millions, thereby allowing the user to enter six zeros directly, e.g. to enter 5.5M instead of 5,500,000;

The input of the respective character immediately converts the entry into a value with the corresponding number of zeros.

For quick input entries, the GUI is not case sensitive.
**Numeric**

There are different types of numeric fields. In general, these fields, in edit mode, can contain only numbers and "-" symbol.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
<th>Edit mode</th>
<th>New mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>Numeric</td>
<td>Can contain only natural numbers (positive integer).</td>
<td>Only numbers are allowed.</td>
<td>The thousand separator is shown.</td>
</tr>
<tr>
<td>Integer</td>
<td>Can contain positive and negative integer values.</td>
<td>Numbers and char &quot;-&quot; are allowed.</td>
<td>The thousand separator is shown. When negative, the char &quot;-&quot; is shown and the string is in red.</td>
</tr>
<tr>
<td>Positive Real</td>
<td>Can contain positive values with decimals. When using decimal separators are shown.</td>
<td>Numbers and decimal separator are allowed.</td>
<td>The thousand and decimal separators are shown.</td>
</tr>
<tr>
<td>Real</td>
<td>Can contain positive and negative values with separator and char &quot;-&quot; are allowed.</td>
<td>Numbers, decimal separator and char &quot;-&quot; are allowed.</td>
<td>When negative, the char &quot;-&quot; is shown and the string is in red.</td>
</tr>
<tr>
<td>Percentage</td>
<td>Can contain positive values with decimals. When using decimal separators are shown.</td>
<td>Numbers and decimal separator are allowed.</td>
<td>The thousand and decimal separators are shown plus &quot;%&quot; symbol.</td>
</tr>
<tr>
<td>Percentage + negative</td>
<td>Can contain positive and negative values with separator and char &quot;-&quot; are allowed.</td>
<td>Numbers, decimal separator and char &quot;-&quot; are allowed.</td>
<td>The thousand and decimal separators are shown plus &quot;%&quot; symbol. When negative, the char &quot;-&quot; is shown and the string is in red.</td>
</tr>
</tbody>
</table>

**Characters**

CRDM operates in British English and uses the SWIFT-x character set to enter data: if not described differently, the fields are intended to be based on the SWIFT-x character set. CRDM can accept the UTF-8 character set with the exception of ‘<’, ‘>’ and ‘&’ in specific fields; when this happens, this is explicitly reported.
The GUI does not differentiate between upper and lower case in terms of data input for input fields.

The SWIFT-x character set corresponds with the following content:

<table>
<thead>
<tr>
<th>Character</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>a - z</td>
<td>26 small characters of the Latin alphabet</td>
</tr>
<tr>
<td>A - Z</td>
<td>26 capital characters of the Latin alphabet</td>
</tr>
<tr>
<td>0 - 9</td>
<td>10 numeric characters</td>
</tr>
<tr>
<td>/</td>
<td>Solidus (slash)</td>
</tr>
<tr>
<td>-</td>
<td>Hyphen</td>
</tr>
<tr>
<td>?</td>
<td>Question mark</td>
</tr>
<tr>
<td>:</td>
<td>Colon</td>
</tr>
<tr>
<td>(</td>
<td>Opening parenthesis</td>
</tr>
<tr>
<td>)</td>
<td>Closing parenthesis</td>
</tr>
<tr>
<td>.</td>
<td>Full stop</td>
</tr>
<tr>
<td>,</td>
<td>Comma</td>
</tr>
<tr>
<td>’</td>
<td>Apostrophe</td>
</tr>
<tr>
<td>+</td>
<td>Plus</td>
</tr>
<tr>
<td></td>
<td>Space (blank)</td>
</tr>
<tr>
<td>CR</td>
<td>Carriage return</td>
</tr>
<tr>
<td>LF</td>
<td>Line feed</td>
</tr>
</tbody>
</table>

**Hint**

CRDM does not process fields (mandatory or optional), that are only filled with blanks. Blanks appearing at the beginning or at the end of a field entry are deleted automatically without any notification.

Fields in a **list or details** screen, where the dataset was saved without an entry, are filled with ‘---’.

**Mandatory Content**

In the GUI all mandatory fields are marked with a red line in the label. All marked fields have to be filled in before you are allowed to proceed. The red line is turned into green when the field contains a value or is selected.
Illustration 12: Mandatory fields

<table>
<thead>
<tr>

<td>Mandatory select field</td>
</tr>
<tr>
<td>2</td>
<td>Mandatory input field</td>
</tr>
</tbody>
</table>

1.2.2.5 Common Buttons and Icons

While working with the CRDM GUI you will find that some buttons and icons appear regularly. There are three types of common elements:

- Basic icons, which you can find on every screen
- Utility elements, which represent functions within the content area
- Table elements, which you can find below data record lists on search/list

The buttons contained in the button bar are variable and therefore explained in the screen descriptions.

Basic Icons

Illustration 13: Basic icons
<table>
<thead>
<tr>
<th>Position No.</th>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Export icon</td>
<td>... exports the data of the executed query from the current screen into a csv-file. If exporting a list, the related search criteria are exported as well whereas detailed data are only exported, if the respective list and the details screen are covered by the same query. Otherwise just the list entry will be exported. The export icon is common to all CRDM screens except for the welcome and the new screens. In addition to the exported data from the screen the following information is exported at the start of the file: name of the exported screen (including menu path), current date, name of the user who triggered the exporting, classification label ‘RESTRICTED’, timestamp of the export, defined search criteria (query parameters, if applicable), ‘CHANGED DATA’ when exporting an edit screen which contains amended data that has not been submitted yet.</td>
</tr>
<tr>
<td>2</td>
<td>Print icon</td>
<td>… prints the data of the current screen. It is strongly recommended to use this button for generating a clearly arranged overview of data on the printout. The print icon is common to all CRDM screens except for the welcome screen.</td>
</tr>
</tbody>
</table>

*Illustration 14: Utility Elements*
<table>
<thead>
<tr>
<th>Position No.</th>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Calendar icon</td>
<td>... opens a calendar where you can select a day. If applicable, you can also select the time via the calendar icon.</td>
</tr>
<tr>
<td>2</td>
<td>Pencil icon</td>
<td>... enables you to enter a new future value into an input field. In edit mode, you can either change an existing data record or enter a new future one. If you have changed the existing current value before entering a future one, the data are restored. The pencil icon is only available on edit screens.</td>
</tr>
<tr>
<td>3</td>
<td>Delete row icon</td>
<td>... removes the selected row in the corresponding list as well as fields or sub-frames.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The delete row icon is only available on new and edit screens.</td>
</tr>
<tr>
<td>4</td>
<td>Submit changes icon</td>
<td>... updates the selected row in the corresponding list using the values inserted in the related fields.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The submit changes icon is only available on new and edit screens.</td>
</tr>
<tr>
<td>5</td>
<td>Cancel changes icon</td>
<td>... enables you to leave the selected and edited row without causing any changes.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The cancel changes icon is only available on new and edit screens.</td>
</tr>
<tr>
<td>6</td>
<td>Magnifier icon</td>
<td>... provides the possibility to search for data on other screens. If you are not aware of the exact/correct value, but you know other related data, click on the magnifier icon to enter the search screen. There you can enter all information known to you and execute a search. By clicking on the select button, you are redirected to the initial screen with the desired data entered in the respective fields. The attribute equipped with magnifier icon works otherwise like an auto-complete select box.</td>
</tr>
</tbody>
</table>
### Table Elements

<table>
<thead>
<tr>
<th>Position No.</th>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Sort Icon</td>
<td>... sorts the list in ascending or descending order by clicking on the up or down arrow.</td>
</tr>
</tbody>
</table>

**Illustration 15a: Table Elements – Sort icon**

**Illustration 15b: Table Elements - Supplementary filters in list objects**
<table>
<thead>
<tr>
<th>2</th>
<th><strong>Supplementary filter</strong></th>
<th>… allows in-memory filtering, depending on the type of fields, of the displayed list of items according to additional criteria as shown below.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Data fields supplementary filter criteria:</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Equals</td>
<td></td>

<tr>
<td></td>
<td>Not equal</td>
<td></td>
</tr>
<tr>
<td></td>
<td>In range</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Text fields supplementary filter criteria:</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Equals</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Not equal</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Starts with</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Ends with</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Contains</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Not contains</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Predefined supplementary filter criteria:</strong></td>
<td>It contains an adaptive list of values which is consistent with the related search criterion. E.g. for any Status field, the predefined supplementary filter contains the following values: ‘All’, ‘Active’, ‘Deleted’.</td>
</tr>
<tr>
<td></td>
<td>When a supplementary filter criterion is used, the list is automatically filtered in memory without submitting the query to the back-end. When applied, any supplementary filter can be removed by individually resetting the corresponding filter.</td>
<td></td>
</tr>
</tbody>
</table>
|   | If a supplementary filter is applied, a small icon near the column header is displayed, as shown in the following image. | ![Status Filter Icon](image.png)
1.2.3 Validation

In CRDM, all submission processes undergo various validations, which take place in the front-end and/or in the back-end. Only correct entries, fulfilling all predefined criteria, can be further processed. To indicate the status of the recently performed action, CRDM uses two different types of messages to indicate a successful or failed validation as described below.

In addition to the automatic validation carried out by CRDM, human validation can be imposed by using the 4-eyes mode.

Furthermore, non-repudiation of origin (NRO) is implemented for a specified number of screens.

**Front-End Validation**

As first part of the validation process, the front-end validation takes place without communication to the back-end. The front-end validation includes both the field validation and the cross-field validation. It is carried out after clicking on a button.

The field validation verifies that all entries comply with the required format.

The cross-field validation checks the data consistency between two or more fields/buttons in relation to each other.

**Back-End Validation**

The back-end validation is the second part of the validation process. After successful front-end validation, your request is submitted to the back-end and checked for compliance with the business validation rules. In case of failure an error message is displayed. You can find a detailed list of all error messages and their description in the annex of the UHB (list of references for error messages [1]).

**Result**

After each validation, the CRDM GUI informs you about the result. There are two different message types available, the **error message** and the **success message**.

**Error Message**

Each error message appears as a pop-up on the upper right corner of the screen. In the case of a failed front-end or back-end validation, it indicates the source of the failure, the type of error and a short hint.
Success Message

The success message appears as a pop-up on the upper right corner of the screen. It confirms that your data have been submitted successfully.

If you are working in 4-eyes mode, the success message also provides you with the 4-eyes principle ID.

4-Eyes Mode

Depending on the access rights setup, you can use CRDM in 2-eyes or in 4-eyes mode. The 2-eyes mode and the 4-eyes mode apply for enter screens (new and edit mode) and for any kind of deletion processes. If you are a 4-eyes mode user, your actions have to be confirmed by a second user in order to be processed.

First User

In 4-eyes mode the first user enters, changes or deletes the data on a screen and afterwards submits the action by clicking on the submit button in the button bar. The success message appearing after successful validation includes a 4-eyes principle ID. For the final execution a second user is needed to confirm the action.
After the first user has entered, changed or deleted the data, a second user (with the required privilege) has to approve or revoke this action via the data changes screen either using the 4-eyes mode ID or the search functionality.

As soon as the data changes are positively approved, CRDM marks these data as approved and they are forwarded to further processing.

In order to ensure non-repudiation of origin (NRO) for critical transactions, the system foresees the use of a digital signature for specified screens: the user must enter a PIN code for signature purposes whenever a specific action is initiated. With the entry of the PIN, CRDM attaches a digital signature to the instruction entered by the actor.

The following (exhaustive) list provides an overview of screens for which the NRO feature is implemented:

- Cash Account - New/Edit screen
- Standing Order For Reservation – Details screen
- Standing Order For Reservation – New/Edit screen
- Standing Order For Reservation – Search/List screen
- Standing/Predefined Liquidity Transfer Order – Details screen
- Standing/Predefined Liquidity Transfer Order – New/Edit screen
- Standing/Predefined Liquidity Transfer Order – Search/List screen
- Data Changes – Details screen
- Grant/Revoked Privileges – Selection criteria screen
- Grant/Revoke Role – New/Edit screen
- Grant/Revoke System Privilege – New/Edit screen
- Restriction Type – New/Edit screen
- Restriction Type – Search/List screen
- Role - New/Edit screen
- Role - Search/List screen
- User - Details screen
- User - New/Edit screen
1.2.4 Communication Network and Services

Refer to the ESMIG UDFS document for details on the communication network and services.

1.2.5 User Administration

Registration

Only registered users have access to the CRDM GUI, therefore registration in CRDM reference data and to the network is necessary prior to the first GUI access. The Registration Guide provides information on how to fill in Registration Forms properly.

After registration the system administrator is given the possibility to grant and revoke privileges to its users within the CRDM GUI as described in both the screen reference part and the user instructions part.

1.2.6 Security and Certification Services

In order to guarantee a secure and safe handling of the information and to protect customer data provided via the GUI, various security elements have been put into place:

- Each action requires System or human validation as described in the validation [ref]
- The scope of available data and functions is controlled via the management of access rights
- The security features provided by the network providers and described in their respective user documentation prevent unauthorised access

1.2.7 Online Help

The content of the UHB can be accessed from the CRDM GUI by clicking on the help button.
2 Screen Reference Part

2.1 General

The screen reference part offers a complete overview of all CRDM GUI screens that are available in U2A mode. Each screen description focuses on a single screen and explains all fields contained therein. An exception is made for the new and edit screens, which are largely similar and therefore included in a single screen description. The description is always based on and contains only the screenshot of the edit screen, but describes deviations for the new screen in a separate row for each field or button description.

<table>
<thead>
<tr>
<th>Position No.</th>
<th>Element</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Description relevant for new mode.</td>
</tr>
<tr>
<td>2</td>
<td>Description relevant for edit mode.</td>
</tr>
</tbody>
</table>

Illustration 19: Example of a new and edit screen description

Context of Usage

The context of usage explains what a screen displays, what you can do with the screen and which special features are available for the screen, for example the need for confirmation in 4-eyes mode or usage restrictions. If the export functionality produces more data than shown on the screen (if a list screen is based on a detailed query), this is also indicated in the context of usage.

Screen Access

The screen access lists all possible ways to access the screen. This includes navigation via the menu and navigation via other screens.
Examples

Navigation via the menu:
Common >> Cash >> Cash Account >> cash accounts – search/list screen

Navigation via other screens:
Common >> Parties >> Parties >> Technical Address Network Service Link >>
Click on the new or edit button

When navigating via a search/list or list screens, a data record has to be selected by clicking on a table row. Afterwards, you can click on specific buttons in the button bar, e.g. the edit or details button.

Privileges

The privileges segment lists all necessary privileges to access the screens and to use its functions. First, the privileges to access a screen are mentioned, followed by the privileges that are necessary to use all functions on the screen. For further information, refer to the list of privileges [1].

Reference

The reference lists all business scenarios containing the respective screen (reference to the user instructions part).

Screenshot

You can use the screenshot as orientation for your work with the UHB. All screenshots are based on the maximum of access rights, so deviations are possible if you do not own all privileges which are necessary to use the screen in its full extent. In addition, deviations between the screenshot and the field/button description are possible in the case of mutually exclusive functions and based on a specific selection you have made. Values shown on the screenshot might also deviate from the default values indicated in the description.

In the case of the new/edit screen description, the screenshot of the edit screen is used. Differences appearing in the new screen are explained in the field description.

Field Description

The field description provides all the relevant information related to the respective field name. It is structured in table format with a separate table for each frame. Sub-frames are indicated by subsection headings in the table. The following illustration explains the structure of a field description.
<table>
<thead>
<tr>
<th>Party 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Opening Date</td>
</tr>
<tr>
<td>1</td>
</tr>
<tr>
<td>Enter the opening date of the party or use the calendar icon. 3</td>
</tr>
<tr>
<td>Reference for error message [ ]: 6</td>
</tr>
<tr>
<td>• DPC1205</td>
</tr>
<tr>
<td>• DPU1206</td>
</tr>
<tr>
<td>• DPU1208</td>
</tr>
<tr>
<td>The inserting opening date must be equal or greater than the current business date. 5</td>
</tr>
<tr>
<td>This field is mandatory in create mode.</td>
</tr>
<tr>
<td>This field is read-only in edit mode if the current business date is greater than the &quot;opening date&quot;. 7</td>
</tr>
<tr>
<td>Required format is: YYYY-MM-DD. 4</td>
</tr>
</tbody>
</table>

Illustration 20: Example of a screen description
<table>
<thead>
<tr>
<th>Position No.</th>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Field name</td>
<td>... indicates the respective name of each screen field. Mandatory fields are explicitly indicated. Input and select fields with no specific remark are always optional.</td>
</tr>
<tr>
<td>2</td>
<td>Frame name</td>
<td>... indicates the respective name of each screen frame.</td>
</tr>
</tbody>
</table>
| 3           | Field description     | ... indicates the field type and required content. Each field description starts with a keyword, which illustrates your required activity:   
  ❙ ‘Shows...’ indicates a read-only field [  ]  
  ❙ ‘Select...’ indicates a select field [  ]  
  ❙ ‘Enter...’ indicates an input field [  ]  
  ❙ ‘Enter or select...’ indicates an input sensitive select box or an input field with suggestions [  ]  
  If there is an exhaustive list of possible values, these are listed.                                                      |
| 4           | Required/Displayed format | ... indicates all field format requirements related to the fields. If there is more than 1 format requirement, they are separated with a comma.  
  In read-only fields the displayed format is only mentioned, if the field content is ambiguous. This applies especially to date fields.  
  The following keywords are used for the format requirements:  
  ❙ ‘Digit’ indicates numbers  
  ❙ ‘Character’ indicates a character from the SWIFT-x character set [  ]  
  ❙ ‘Letter’ indicates upper and lower case letters of the Latin alphabet  
  |  
| 5           | Cross-field validations | ... indicate interdependencies between fields relevant for the validation of your input.                                                                                                                     |
For further details on the validation process, refer to validation [ ].

6 References for error messages

... indicates the code of all possible errors applying to the field during the back-end validation. The corresponding error text and error description is listed in the annex (list of references for error messages [ ]).

For further details on the validation process, refer to validation [ ].

7 Additional information

... indicates the useful information that is for filling in the field.

**Buttons**

All buttons specific to the screen are listed and described in a table at the end of the screen description. The following illustration explains the structure of a button description.

<table>
<thead>
<tr>
<th>Position No.</th>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Button name</td>
<td>... indicates the respective name of each button.</td>
</tr>
<tr>
<td>2</td>
<td>Button description</td>
<td>... indicates the action that is triggered when clicking on the button. Each button description starts with ‘This function enables you...’</td>
</tr>
<tr>
<td>3</td>
<td>Cross-field validations</td>
<td>... indicate interdependencies between a field and the button relevant for the validation of your input. For further details on the validation process, refer to validation [ ].</td>
</tr>
<tr>
<td>4</td>
<td>Additional information</td>
<td>... indicates useful information regarding the button and/or its function.</td>
</tr>
</tbody>
</table>

*Illustration 21: Example of a button description*

For further information on common buttons, refer to Common Buttons and Icons.
2.2 Services

2.2.1 Additional Services

2.2.1.1 Data Changes – Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for all reference data changes which were initiated in 4-eyes mode. You can use this screen to search for items which are waiting for approval, select those and approve or revoke them.

The search results will be displayed in a list, which is sorted by the values of the column ‘Update Date and Time’ in descending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

Screen Access

- Common >> Services >> Data Changes

Privileges

To use this screen, the following Privileges is needed:
- Data Changes of a business object list query
- Data Changes of a business object details query

Reference

User Instructions Part

This screen is part of the following business scenarios:
- Initiate an action in 4-eyes mode
- Approve an action in 4-eyes mode
### Data Changes - Search Criteria

<table>
<thead>
<tr>
<th>Action Type</th>
<th>Users Reference</th>
<th>4-Eyes Identification</th>
<th>Object Identifier</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select the type of action initiated by the first user for a dedicated reference data object from the possible values:</td>
<td>Enter the identification the first user added to his request. Required format is: max. 35x characters.</td>
<td>Enter the identification of the data change, automatically assigned by CRDM to an operation that has to be authorised by a second user. Required format is: max. 35x characters.</td>
<td>Enter the object identifier of the added / changed / deleted object. It is the technical identifier of an object unless a business identifier is available for this object. Required format is: max. 35x characters.</td>
</tr>
<tr>
<td>All (default value)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### Date of Update

**From**
- Enter the lower bound of the date from which the data change was requested.
- The default value is the current calendar date.
- Required format is: Date.

**To**
- Enter the upper bound of the date until which the data change was requested.
- The default value is the current calendar date.
- Required format is: Date.

### CRDM System User

**User**
- Enter the name of the last user who entered, edited or deleted the reference data.
- Required format is: max. 35x characters.

**Parent BIC**
- Enter or select the Parent BIC of the party which the last user belongs to.
- Required format is: max. 11x characters.

**Party BIC**
- Enter or select the BIC of the party which the last user belongs to.
- Required format is: max. 11x characters.

### Status

- Select the processing status of the data change from the possible values:
  - All (Default value)
  - Awaiting approval
  - Queued
  - Approved
  - Rejected
  - Revoked

### Data Changes - List

<table>
<thead>
<tr>
<th>Action type</th>
<th>Shows the type of action initiated by the first user for a dedicated reference data object.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Users Reference</td>
<td>Shows the identification by the first user added to his request.</td>
</tr>
<tr>
<td>4-Eyes Identification</td>
<td>Shows the identification of the change automatically assigned by CRDM to an operation that has to be authorised by a second user.</td>
</tr>
<tr>
<td>-----------------------</td>
<td>------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Object Identifier</td>
<td>Shows the object identifier of the added / changed / deleted object. It is the technical identifier of an object unless a business identifier is available for this object.</td>
</tr>
<tr>
<td>CRDM System User</td>
<td>Shows the name of the last user who entered, edited or deleted the static or dynamic data.</td>
</tr>
<tr>
<td>CRDM System Users Party</td>
<td>Shows the BIC of the party which the last user belongs to.</td>
</tr>
<tr>
<td>Date of Update</td>
<td>Shows the timestamp when the first user entered, edited or deleted the static or dynamic data. Displayed format is: Timestamp.</td>
</tr>
<tr>
<td>Status</td>
<td>Shows the status of the data change.</td>
</tr>
</tbody>
</table>

### Buttons

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Search</td>
<td>This function enables the user to start a search according to the entered criteria. The results are displayed in a list on the same screen. If the search retrieves only one record, the details screen is displayed directly.</td>
</tr>
<tr>
<td>Reset</td>
<td>This function enables the user to set default search criteria and blanks out all optional criteria.</td>
</tr>
<tr>
<td>Details</td>
<td>This function enables the user to display the details of the selected data change.</td>
</tr>
</tbody>
</table>

### 2.2.1.2 Data Changes – Details Screen

#### Context of Usage

This screen displays detailed information on the selected reference data changes, changes are highlighted in red. You can check the data and proceed further by clicking on the buttons below. You can use this screen for approving/revoking reference data changes and to see details of already approved/revoked items.

#### Screen Access

- Common >> Services >> Data Changes >> search/list screen >> Click on the search and/or details button
Privileges

To use this screen, you need the following privilege [ ]:

- Data Changes of a Business Object Details Query

Reference

User Instructions Part

This screen is part of the following business scenarios:

- Initiate an action in 4-eyes mode [ ]
- Approve an action in 4-eyes mode [ ]

2.3 Common

2.3.1 Parties

2.3.1.1 Parties – Search/List Screen

This screen contains a number of search fields. By inputting the relevant data, you can search for parties. The search results will be displayed in a list, which is sorted by the values of the ‘BIC’ column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

Party reference data can only be created and edited by users belonging to the responsible CB or by the Service operator (for ‘NCB’ party type). Party reference data can only be viewed by users belonging to the responsible CB or to the party itself, while the Service operator can view all party data.
Screen Access

Common >> Parties >> Parties >> Search

Privileges

To use this screen, the following Privileges are needed:

- Party list query
- Party reference data query
- Delete party

### Auto-Collateralisation Rule (For T2S only)

| Collateralisation Procedure | Select the type of collateralisation procedure chosen for the party by the national central bank from the possible values:  
|                            | - Pledge  
|                            | - Pledge Sub-account  
|                            | - Repo  
|                            | For payment banks this attribute, if inserted, must be equal to "Repo" (Pledge and Pledge Sub-account cannot be selected). 
| Minimum Amount for Auto-collateralisation | Enter the minimum amount to be sourced in an autocollateralisation operation involving the Party. 
|                                           | This field is only available for Payment Banks.  
|                                           | Reference for error message [ ]:  
|                                           | - DPC1304

2.3.1.6 Party Service Link – Search/List Screen

Context of Usage
This screen contains a number of search fields. By inputting the relevant data, you can search the Service to which a Party is linked. It is worth noting that a Payment Bank defined in the CRDM does not need to be linked to the “T2S” Service in order to operate in T2S. The search results are displayed in a list. After selecting an entry, you can proceed further by clicking on the buttons below.

Screen Access

- Common >> Parties >> Party Service Links >> Search

Privileges
To use this screen, the following Privileges are needed [ ]:
- Delete Party-Service Link
- Party-Service Link List query

2.3.1.9 TIPS Directory – Search/List Screen

**Context of Usage**
This screen allows the authorised users searching for elements of the TIPS Directory. By inputting the relevant search data, you can search for the BICs satisfying the searching parameters. A user can use this screen for searching the items and showing the related list and downloading the details of the TIPS Directory, both full and update versions.

The result list is displayed sorted by default by “User BIC”.

**Screen Access**
- Common >> Parties >> TIPS Directory >> TIPS Directory – Details screen

**Privileges**
To use this screen, the following Privileges are needed:
- TIPS Directory query
**Fields Description**

### TIPS Directory - Search Criteria

**User BIC**
Enter the Participant's BIC to search.

### TIPS Directory - List

**User BIC**
Shows the BIC configured as Authorised Account User in TIPS. This BIC identifies one and only one TIPS Account, TIPS Ancillary System Technical Account or TIPS Credit Memorandum Balance in TIPS and it is the BIC that shall be used to address Instant Payments in TIPS.

**Institution Name**
Shows the name stored in the CRDM BIC Directory together with the user BIC.

**Party BIC**
Shows the BIC that identifies a TIPS Participant or a Reachable Party in TIPS. This BIC is for information purpose only and it allows grouping all User BICs configured by a given TIPS Participant or Reachable Party. It cannot be used to address Instant Payments in TIPS.

**Account Owner BIC**
Shows the BIC of the TIPS Participant (or TIPS Ancillary System) owning the TIPS Account (or TIPS Ancillary System Technical Account) for which the User BIC has been authorised, also through a CMB.

**Valid From**
Shows the date from which the BIC is valid.

**Valid To**
Shows the date until which the BIC is valid.
<table>
<thead>
<tr>
<th>Participation Type</th>
<th>Shows the type of participation of the User BIC.</th>

### 2.3.2 Cash Account

#### 2.3.2.1 Cash Accounts – Search/List Screen

**Context of Usage**

This screen contains a number of search fields. By inputting the relevant data, you can search for Cash Accounts. The search results will display a list sorted by the values of the ‘Cash Account Number’ column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

Users can see Cash Accounts under their datascope and the ones for which they have been defined as Co-Manager.

**Screen Access**

- Common >> Cash >> Cash Accounts >> Search
- Common >> Parties >> Parties >> Parties – search/list screen >> Click on the search and details button >> Click on the cash accounts button
Privileges

To use this screen, the following Privileges are needed [ ];

- Delete Cash Account
- Cash Account list query
- Cash Account reference data query

### 2.3.2.3 Cash Account – New/Edit Screen

#### Context of Usage
This screen contains a number of fields regarding cash accounts. You can enter new data or edit existing data. Afterwards you can proceed further by clicking on the buttons below.

Central Bank users can edit Cash Accounts under their datascope and the ones for which they have been defined as Co-Manager.

Payment Bank and Ancillary System users can only edit floor/ceiling attributes (Floor Notification Amount, Ceiling Notification Amount, Target Amount After Breaching Floor, Target Amount After Breaching Ceiling, Floor Notification and Ceiling Notification) for Cash Accounts under their datascope and for the ones for which they have been defined as Co-Manager.

#### Screen Access
- Common >> Cash >> Cash Accounts >> New
- Common >> Cash >> Cash Accounts >> Search >> click on New or Edit button

#### Privileges
To use this screen, the following Privileges are needed:
- Create Cash Account
- Update Cash Account

This field is mandatory in create mode.
This field is read-only in edit mode.

| Opening Date | Enter the opening date of the cash account or use the calendar icon. |
| **Reference for error message [ ]:** | DCC1205  
| | DCC1213  
| | The ‘Opening Date’ must be equal to or later than the current business date.  
| | This field is mandatory in create mode.  
| | This field is read-only in edit mode if the current business date is greater than the “opening date”.  
| | Required format is: Date.  
| **Closing Date** | Enter the closing date of cash account or use the calendar icon.  
| | Reference for error message [ ]:  
| | DCC1210  
| | DCC1250  
| | DCC1532  
| | DCU1210  
| | DCU1250  
| | DCU1313  
| | The ‘Closing Date’ must be equal to or later than the ‘Opening Date’ and the current business date.  
| | Required format is: Date.  
| **Parent BIC** | Enter or select the parent BIC of the party holding the account.  
| | Reference for error message [ ]:  
| | DCC1001  
| | DCC1101  
| | DCC1524  
| | DCU1001  
| | You can choose to either enter the parent BIC of the party holding the account or to select it from the suggested items in the drop-down menu.  
| | This field is mandatory in create mode.  
| | This field is read-only in edit mode.  
| | Required format is: max. 11x characters.  
| **Party BIC** | Enter or select the BIC of the party holding the account. |
| **Reference for error message [:]** | DCC1001  
|                                   | DCC1524  
|                                   | DCU1001 |

You can choose to either enter the BIC of the party holding the account or to select it from the suggested items in the drop-down menu.

This field is mandatory in create mode.
This field is read-only in edit mode.
Required format is: max. 11x characters.

| **Party Short Name** | Shows the Party short name of the owner of the account.  
|                      | This field is visible only in edit mode and is read-only. |

| **Party type** | Shows the Party type of the owner of the account.  
|                | Reference for error message [:]:  
|                | DCC1555  |

This field is visible only in edit mode and is read-only.

| **Floor Notification Amount** | Enter the lower threshold for notifying the cash manager.  
|                              | Reference for error message [:]:  
|                              | DCC1800  
|                              | DCU1313  
|                              | DCU1800 |

Required format is: Amount. In case this amount is not specified or it is set to zero, no floor notification will be triggered. In order to configure a floor threshold that triggers a notification when a balance becomes negative, the threshold value should be set to 0.01.

This field is allowed for:

- TIPS Account
- TIPS Credit Memorandum Balance
- TIPS Ancillary System Technical Account
- RTGS DCA
- RTGS CB Account
- Main Cash Account
- CLM CB Account
### Ceiling Notification Amount

Enter the upper threshold for notifying the cash manager.

Reference for error message [ ]:
- DCC1800
- DCU1800

Required format is: Amount. In case this amount is not specified or it is set to zero, no ceiling notification will be triggered. In order to configure a ceiling threshold that triggers a notification when a balance becomes positive, the threshold value should be set to 0.01.

This field is allowed for:
- TIPS Account
- TIPS Credit Memorandum Balance
- TIPS Ancillary System Technical Account
- RTGS DCA
- RTGS CB Account
- Main Cash Account
- CLM CB Account
- T2S Central Bank Account
- T2S Dedicated Cash Account

### Currency

Select the currency of the account selecting it from the drop-down menu.

Reference for error message [ ]:
- DCC1100
- DCC1207
- DCC1530
- DCC1531
- DCC1550

This field is not allowed if the Cash Account Type is TIPS Credit Memorandum Balance.

It is mandatory in all other cases.

### Linked Account Type

Select the type of cash account to which the cash account can be linked.

Possible values:
### Cash Account

**External RTGS Account**

Reference for error message [ ]:

- DCU1209

This field is disabled until the Account Type field is selected. If the Account Type field is cleared then the Linked Account Type is emptied.

This field is enabled and mandatory when Account Type is:

- TIPS Credit Memorandum Balance
- RTGS Sub-Account
- T2S Dedicated Transit Account
- T2S Central Bank Account
- T2S Dedicated Cash Account
- Contingency Cash Account
- CB Contingency Account

This field is enabled and optional when Account Type is:

- RTGS Dedicated Cash Account
- Overnight Deposit Account
- Marginal Lending Account

It remains disabled in all other cases.

<table>

### 2.3.2.7 Authorised Account User – New/Edit Screen

**Context of Usage**

The “Authorised Account User - New/Edit” screen enables the Service Operator, NCBs, Payment Banks and Ancillary Systems to create a new Authorised Account User or to edit an existing one, previously selected. The screen has a slightly different behaviour depending on the function the user is submitting.

**Screen Access**

- **Common >> Cash >> Authorised Account User >> New**
- **Common >> Cash >> Authorised Account User >> Search >> Click on New or Edit button**

**Privileges**

To use this screen, the following Privileges are needed [ ]:

- Create Authorised Account User
- Update Authorised Account User

**Screenshot**

2.3.2.8 Standing/Predefined Liquidity Transfer Order – Search/List Screen

**Context of Usage**

This screen contains a number of search fields. By inputting the relevant data, you can search for Standing/Predefined Liquidity Transfer Orders. The search results will display a list sorted by the values of the ‘Order Reference’ column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

Central Bank, Ancillary System and Payment Bank users can see all Standing/Predefined Liquidity Transfer Orders depending on their datascope. Payment Bank users can see the ones under their datascope and the ones where the debtor cash account is under their datascope or for which they have been defined as Co-Managers. Duly authorised users can manage Standing/Predefined Liquidity Transfer Orders on Cash Accounts for which they are defined as Co-Managers.

AS users can see the ones under their datascope.

**Screen Access**

I Common >> Cash >> Standing/Predefined Liquidity Transfer Order >> Search

**Privileges**

To use this screen, the following Privileges are needed [ ]:

I Delete Liquidity Transfer Order  
I Liquidity Transfer Order list query  
I Liquidity Transfer Order detail query

### 2.3.3.3 User – New/Edit Screen

#### Context of Usage

The screen “User – New/Edit” enables the user to create a new User or to edit an existing one. This screen enables also to lockout a user to enter the system and removing the lockout. Locking out a user means that the “lockout” flag is selected and a lockout timestamp is provided. Deleting a lockout means that the “lockout” flag is deselected.

It is possible to use this screen either in 2-eyes or in 4-eyes mode.

The screen has a slightly different behaviour depending on the function the user is submitting.

#### Screen Access

- **Common >> Access Rights Management >> Users >> New**
- **Common >> Access Rights Management >> Users >> Users – search/list screen >> Click on the new or edit button**
- **Common >> Access Rights Management >> Users >> Users – search/list screen >> Click on the search and/or details button >> User – details screen >> Click on the edit button**

#### Privileges

To use this screen, the following Privileges are needed [1]:

- Create User
- Update User

## Common Reference Data Management for CSLD - User Handbook

### Fields Description

<table>
<thead>
<tr>
<th>Role</th>
<th>Description</th>
</tr>
</thead>
</table>
| Role Name | Enter the name of the Role.  
References for error messages [ ]:
- DRC6006  
- DRU6006  
This field is mandatory.  
Required format is: max. 35x characters. |
| Role Description | Enter the description of the Role.  
This field is mandatory.  
Required format is: max. 127x characters. |

### Buttons

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
</table>
| Submit | This function enables the user to create or edit a Role.  
References for error messages [ ]:
- DRC6001  
- DRC6006  
- DRU6001  
- DRU6003  
- DRU6006 |
| Reset | This function enables the user to set all fields to default value and blanks out all optional fields. |
| Cancel | This function enables the user to cancel the process and return to the previous screen. |

### 2.3.3.10 Grant/Revoke System Privileges – Search Screen

**Context of Usage**

This screen contains a number of search fields. By inputting the relevant data, you can search for privileges granted to a role. You can proceed further by clicking on the buttons below. This function is available in U2A mode only.

**Screen Access**

- Common >> Access Rights Management >> Grant/Revoke System Privileges

**Privileges**

To use this screen, the following Privilege is needed [ ]:
- Privilege query

| <close group> | This function enables the user to hide all the privileges related to the group. |

### 2.3.3.12 Grant/Revoke System Privilege – New/Edit Screen

**Context of Usage**

This screen contains a number of fields regarding system privileges. User can grant new system privileges to roles, parties or users, or revoke those that have been previously granted. The screen shows two lists:

- On the left side, the list of all privileges the user can see that have not been granted to the specified grantee item.
- On the right side, the list of privileges that have been granted to the specified grantee item.

Afterwards you can proceed further by clicking on the buttons below. This screen is not relevant for payment bank users.
Common >> Access Rights Management >> Grant/Revoke System Privileges

To use this screen, the following Privileges are needed:

- Grant Privilege
- Revoke Privilege
- Granted System Privileges List Query

### Fields Description

| Role <Role Name> OR Party <Parent BIC + BIC> OR User <User Login Name> |
| Current not Granted Privileges |
| Group Name | Shows the full list of all group names related to the currently not granted privileges. |

2.3.4 Message and Reports

2.3.4.1 Message Subscription Rule Sets – Search/List Screen

**Context of Usage**
This screen contains a number of search fields. By inputting the relevant data, you can search for message subscription rule sets. The search results are displayed in a list, which is sorted by the values of the 'Rule Set Identification' column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

**Screen Access**
- Common >> Messages and Reports >> Message Subscription Rule Set >> Search

**Privileges**
To use this screen, the following Privileges are needed:
- Message subscription rule set list query
- Delete message subscription rule set

2.3.4.2 Message Subscription Rule Set – Details Screen

**Context of Usage**

This screen displays detailed information on the selected message subscription rule set. It also contains a number of fields regarding message subscription rules set, for which you can enter new data or edit existing data. You can check the data and proceed further by clicking on the buttons below. Message Subscription Rule List is only shown after clicking on the related button, if the user is granted with the required privileges. Same principles applied for editing or deleting a Message Subscription Rule.

This screen also allows you to show the list of related Message Subscription Rules, including their details on the same list.

**Screen Access**

- Common >> Messages and Reports >> Message Subscription Rule Set >> Message Subscription Rule Set – search/list screen >> Click on the search and/or details button

**Privileges**

To use this screen, the following Privileges are needed:

- Message subscription rule set details query
- Delete message subscription rule set
- Message subscription rule list query
- Update message subscription rule
- Delete message subscription rule

### 2.3.4.4 Message Subscription Rule – New/Edit Screen

**Context of Usage**  
The screen “New/Edit Messages Subscription Rule” enables the user to create a new Messages Subscription Rule or to edit an existing one. A Messages Subscription Rule consists of grouped parameters; every parameter is of a specific Parameter Type. Each rule is a box and contains a set of boxes for the related groups. The users can add or drop an entire group or add or delete specific parameters inside a group. Duly authorised users can refer, when managing a message subscription, to accounts under their Party ownership or for which their party is configured as co-manager. There is no usage restriction for this screen.
Screen Access

- Common >> Messages and Reports >> Message Subscription Rule Set >> Message Subscription Rule Set - search/list screen >> Click on the search button >> Click on the details button >> Click on the Message Subscription Rule button >> Click on the add rule button

- Common >> Messages and Reports >> Message Subscription Rule Set >> Message Subscription Rule Set - search/list screen >> Click on the search button >> Click on the details button >> Click on the Message Subscription Rule button >> select a Rule and click on edit rule button

Privileges

To use this screen, the following Privileges are needed [1]:

- Create Message Subscription Rule
- Update Message Subscription Rule
- Message Subscription Rule List Query
- Message Subscription Rule Set Details Query
- Message Subscription Rule Set List Query

</tr>
</tbody>
</table>

**Predicates (Set of groups of Parameters)**

Enables the user to enter the groups of parameters related to a message subscription rule.

It is possible to add one or more predicate to a group. A predicate is a parameter and the user is allowed to enter the predicates one by one. The user must select the type of parameter to be added in a select box and the relevant input field(s) is/are shown.

When adding a predicate to a group, select box must show the parameter types consistent with the selected Service:

In a group a parameter can appear only once. The aforementioned select box must not show a parameter type if already present in the group.

The already inserted parameters in a group can be amended.

| Group  | Group of the Parameters related to a Rule. When the user clicks on the edit group button, the displayed pop-up shows a text field where inserting the Group Name.

**Add Group**

This function enables the user to add a group in the groups box in which the user can enter the name of the new group. After inserting a name and pushing the “ok” button in the popup, the group name is added to the Boolean Expression.

**Edit Group**

This function enables the user to edit a group name.

**Delete Group**

Pushing this button, the selected group is removed from the Boolean Expression with all its parameters.

**Reset**

This function restores the situation shown at opening of the page.

**Cancel**

This function enables the user to cancel the creation or the edit action. No operations are performed.

**Add predicate**

If the user pushes this button, the system shows a pop-up with select box to choose the proper parameter type. After selecting the parameter type, the field(s) for the parameter value is/are shown. After inserting a value and pushing the “ok” button in the popup, a value is inserted in the selected relevant group box.
2.3.4.5 Report Configurations – Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for report configuration. The search results are displayed in a list. After selecting an entry, you can proceed further by clicking on the buttons below. Duly authorised users can see and manage Report configuration under their datascope or configured for Cash Accounts they own or co-manage.

Screen Access

- Common >> Messages and Reports >> Report Configurations >> Search

Privileges

To use this screen, the following Privileges are needed [1]:
- Report configuration list query
- Delete report configuration

Screenshot

```
Edit predicate
If the user pushes this button, the system shows a pop-up with a editable select box containing the actual Parameter Value. The user can change the Parameter Value. After editing a new value and pushing the “ok” button in the popup, the new value appears in the relevant group box.

Delete predicate
Pushing this button, the selected predicate is removed from the relevant group.
```

2.3.4.7 Report Configuration – New/Edit Screen

Context of Usage

This screen contains a number of fields regarding report configuration. You can enter new data or edit existing data. Afterwards you can proceed further by clicking on the buttons below. Each report configuration specifies a type of report, its data scope (i.e. full or delta report), the set of parties entitled to get said type of report and the mode they get it (i.e. push or pull).

The screen has a slightly different behaviour depending on the function the user is submitting. Duly authorised users can see and manage Report configuration under their datascope or configured for Cash Accounts they own or co-manage.

You can use this screen either in 2-eyes or in 4-eyes mode.

Screen Access

- Common >> Messages and Reports >> Report Configuration >> New
- Common >> Messages and Reports >> Report Configuration >> Report Configuration – search/list screen >> click on New or Edit button

Privileges

To use this screen, the following Privileges are needed:

- Create Report configuration
- Update Report configuration

### 2.3.6 Network Configuration

#### 2.3.6.1 Distinguished Name-BIC Routing – Search/List Screen

**Context of Usage**

This screen contains a number of fields regarding the relationship between a Distinguished Name and a BIC for which it is authorised to operate, and enables the user to display a list of DN-BIC couples matching the entered criteria. It gives
also the possibility to display, edit, delete and restore a selected DN-BIC couple and to show Revisions and Audit trail of a selected one.

The search results will display a list sorted by the values of the ‘Distinguished Name’ column in ascending order (default setting).

After selecting an entry, you can proceed further by clicking on the buttons below.

Screen Access

| Revisions | This function enables the user to access the Display Revisions List screen related to the selected DN-BIC Routing. |

### 2.3.6.2 Distinguished Name-BIC Routing – New/Edit Screen

**Context of Usage**

This screen enables the user to create a new link between an existing distinguished name (DN) and an existing Authorised BIC, Participant or Reachable Party’s BIC. The couple (DN, BIC) can be managed by the Service Operator, NCBs, Ancillary Systems or Payment Banks.

NCBs can manage DN-BIC Routings within their own System Entities.

Payment Banks and Ancillary Systems can manage DN-BIC Routings that reference BICs authorised to act on their own accounts and DNs linked to their own users (for TIPS) or to one of their Party Technical Addresses (for T2 RTGS).
Screen Access

- Common >> Network Configuration >> DN-BIC Routing >> New
- Common >> Network Configuration >> DN-BIC Routing >> Search >> Click on the new or edit button

Privileges

To use this screen, the following Privileges are needed:
- Create DN-BIC Routing
- Update DN-BIC Routing

Fields Description

<table>
<thead>
<tr>
<th>Distinguished Name - BIC Routing</th>
</tr>
</thead>
</table>
| **Distinguished Name** | Enter or select the Distinguished Name to link to the BIC. Reference for error message [ ]:
  - DRC8002
  This field is mandatory in create mode. This field is read-only in edit mode. |
Direction | Select the Direction to specify whether the link between the DN and
the BIC authorises the DN to act as Originator (inbound routing) or
as Beneficiary (outbound routing).
Possible values are:
- Inbound
- Outbound
Reference for error message [ ]:
- DRU8006
In create mode, if the user enters a value in the Participation Type field, this field is blanked. It’s mandatory otherwise.
This field is read-only in edit mode.

Participation Type | Select the participation type of the related Authorised Account User.
Possible values are:
- Direct
- Multi Addressee – Branch of Direct Participant
- Multi Addressee – Credit Institution
Reference for error message [ ]:
- DRU8008
In create mode, if the user enters a value in the Direction field, this field is blanked. It’s mandatory otherwise.
This field is read-only in edit mode.

Valid From | Enter the date from which the DN-BIC routing link is valid or use the calendar icon.
Reference for error message [ ]:
- DRC8004
- DRU8003
- DRU8004
This field is mandatory in create mode and it must be equal to or later than the current business date.
In edit mode, if the date is equal to or lower than the current business date, this field is read-only.
Required format is: Date.
| Valid To | Enter the date until which the DN-BIC routing link is valid or use the calendar icon.  
| | Reference for error message [ ]:  
| | DRC8005  
| | DRU8005  
| | In create mode, the ‘Closing Date’ must be equal to or later than the ‘Opening Date’ and the current business date.  
| | Required format is: Date.  |
| BIC | Select one or more BIC to link to the chosen Distinguished Name.  
| | User can filter the list of BIC, typing in the dedicated field.  
| | Reference for error message [ ]:  
| | DRC8003  
| | DRU8007  
| | This field is mandatory in create mode.  
| | This field is read-only in edit mode. |

**Buttons**

| Submit | This function enables the user to create or edit a DN-BIC Routing according to the information filled in the fields.

Revisions

This function enables the user to access the Display Revisions List screen related to the selected Routing.

2.3.6.4 Routing – New/Edit Screen

Context of Usage
This screen contains a number of fields regarding Routing configurations. You can enter new data or edit existing data. Afterwards you can proceed further by clicking on the buttons below. NCBs can create Routing configurations acting on behalf of their Participants. Payment Banks and Ancillary System can create Routing configurations for their own Technical Addresses.

Screen Access
- Common >> Network Configuration >> Routing >> New
- Common >> Network Configuration >> Routing >> Search >> Click on the new or edit button

Privileges
To use this screen, the following Privileges are needed [ ]:
- Create Routing
- Update Routing

Screenshot

### Routing

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Routing Identification</td>
<td>Shows the technical identification of the routing. The field is visible only in Edit mode and is read-only.</td>
</tr>
<tr>
<td>Description</td>
<td>Enter the description of the routing configuration. This field is mandatory. Required format is: max. 127x characters.</td>
</tr>
<tr>
<td>Network Service</td>
<td>Select the name of the network service related to the routing from the drop-down menu. References for error messages [ ]: DRCW002, DRCW007, DRCW014, DRUW004, DRUW007, DRUW015, DRUW016. This field is mandatory. Required format is: max. 35x characters.</td>
</tr>
<tr>
<td>Parent BIC</td>
<td>Enter or select the parent BIC of the party. The field is properly filled returning from “display party list” after a search. References for error messages [ ]: DRCW003, DRUW001. This field is mandatory. Required format is: max. 11x characters.</td>
</tr>
<tr>
<td>Party BIC</td>
<td>Enter or select the BIC of the party.</td>
</tr>
</tbody>
</table>
The field is properly filled returning from “display party list” after a search.

References for error messages [ ]:
- DRCW003
- DRUW001

This field is mandatory.
Required format is: max. 11x characters.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Technical Address</td>
<td>Select the unique technical address of the party. This field contains the list of the Technical Addresses of the selected Party filtered by the selected Network Service name (on the basis of the Technical Address Network Services Links). If the party and the relevant network service are not selected.</td>
</tr>
<tr>
<td></td>
<td>References for error messages [ ]:</td>
</tr>
<tr>
<td></td>
<td>- DRCW004</td>
</tr>
<tr>
<td></td>

### Fields Description

<table>
<thead>
<tr>
<th>System Entity – Search Criteria</th>
</tr>
</thead>
</table>
| Direct Holding CSD | Select whether the system entity is a CSD operating in a direct holding market from the possible values:
  - All (default value)
  - Yes
  - No
  
  This field is for T2S only. |
| Direct Holding Technical Offset Account | Enter the direct holding technical offset account number that T2S requires for settlement of settlement instructions in a direct holding market.

  This field is for T2S only.

  Required format is: max. 35x characters. |
| System Entity Mnemonic | Enter the system entity code.

  At least one field between Mnemonic and Name must be specified.

  Required format is: max. 4x characters. |
| System Entity Name | Enter the name of the system entity.

  At least one field between Mnemonic and Name must be specified.

  Required format is: max. 35x characters. |
### System Entity Type

Select the system entity type from the possible values:
- All (default value)
- T2S Operator
- Central securities depository (CSD)
- National central bank (NCB)

### Currency Code

Select the currency related to the system entity. The default value is ‘All’.

### System Entity – List

2.3.9 Billing

2.3.9.1 Invoice Configurations – Search/List Screen

Context of Usage

This screen allows searching for the Invoice Configurations. By inputting the relevant data, you can search for the Invoice Configurations satisfying the searching parameters. A user can use this screen for searching, displaying details and download the Invoice Configurations. National Central Bank Users and European Central Bank users can additionally manage the Invoice Configurations creating new ones or editing, deleting or restoring the existing ones.

The result list is displayed sorted by the values of the ‘Service’ column in ascending order (default setting).

Screen Access

| Common >> Billing >> Invoice Configurations >> Search |

Privileges

To use this screen, the following Privileges are needed [·]:

| Invoice Configuration list query |

2.3.9.4 VAT – Search/List Screen

**Context of Usage**
This screen enables the user to display a list of VAT matching the entered criteria. A VAT is the value added tax rate based on the billable item, service/application and system entity to which the Party to be charged is assigned to.

This screen gives also the possibility to delete and restore a selected VAT.

This screen is not relevant for payment bank users. The items related to “T2 RTGS COMPONENT” are configured as VAT valid for T2 Service.

**Screen Access**

- Common >> Billing >> VAT >> Search

**Privileges**
To use this screen, the following Privileges are needed:
- Delete VAT
- VAT list query

**Screenshot**

2.3.9.5 VAT – New/Edit Screen

**Context of Usage**

This screen contains a number of fields regarding VAT. You can enter new data or edit existing ones. Afterwards you can proceed further by clicking on the buttons below. A VAT code, when created, can be uniquely linked to a variable number of Service Items.

This screen is not relevant for payment bank users. The items related to “T2 RTGS COMPONENT” are configured as VAT valid for T2 Service.
Screen Access

- Common >> Billing >> VAT >> New
- Common >> Billing >> VAT >> Search >> Click on the New or Edit button

Privileges

To use this screen, the following Privileges are needed:
- Create VAT
- Update VAT

2.4.1.10 Direct Debit Mandate – Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search the Direct Debit Mandates with which a Cash Account is debited. The search results are displayed in a list, sorted by the values of the ‘Payee Parent BIC’ column in ascending order (default setting), in which you can find all the relevant Direct Debit Mandate details. After selecting an entry, you can proceed further by clicking on the buttons below.
Screen Access

- T2 >> Cash >> Direct Debit Mandate >> Search

Privileges

To use this screen, the following Privileges are needed:

- Delete Direct Debit Mandate
- Direct Debit Mandate List query

This function enables the user to cancel the process and return to the previous screen.

2.4.2.4 Ancillary System Bilateral Agreement – Search/List Screen

Context of Usage
This screen allows the authorised users to search for the Ancillary System Bilateral Agreements set from and towards Ancillary Systems under connected user’s datascope.

This screen gives also the possibility to Service Operator and CB users to edit, delete and restore a selected Ancillary System Bilateral Agreement.

Finally, it is possible to create a new Ancillary System Bilateral Agreement.

This screen can be accessed by Central Bank and Ancillary System users.
The result list is displayed sorted by default by “Status, “Initiator Parent BIC”, “Initiator Party BIC”.

Screen Access

- T2 >> Party >> Ancillary System Bilateral Agreement >> Search

Privileges

To use this screen, the following Privileges are needed:

- AS Bilateral Agreement list query
- Delete AS Bilateral Agreement

Screenshot

2.4.3 Configuration

2.4.3.1 CLM Repository – Search/List Screen

Context of Usage

This screen allows the authorised users searching for elements of the CLM Repository. By inputting the relevant search data, you can search for the BICs satisfying the searching parameters. A user can use this screen for searching the items and showing the related list and downloading the details of the CLM Repository, both complete and delta.
The result list is displayed sorted by default by “BIC”, “Account BIC”, “Valid from”, “Type of change”.

**Screen Access**

1. T2 >> Configuration >> CLM Repository >> Search

**Privileges**

To use this screen, the following Privileges are needed:

- CLM Repository query

3 User Instructions Part

3.1 General

The user instructions part comprises scenarios adapted from typical user workflows. They are grouped into related activities, called business packages, which are further grouped into categories.

Furthermore, you can find business scenarios dedicated only to the Service operator are highlighted by the adding ‘Service operator only’ in the title.

Categories

The categories are a structural element and do not contain any information.

Business Packages

The business packages define an overall task. They include an overview and a list of the business scenarios. In detail, each business package description has the same structure and contains the following elements.

Overview

The overview describes the aim and the background of the business package. It also explains the interrelation of the business scenarios.

List of Business Scenarios

This section contains a list of all business scenarios belonging to the business package.

The list is unordered if the business scenarios represent alternative ways to achieve the aim of the business package. It is ordered if the business scenarios have to be carried out sequentially. Sequential business scenarios do not necessarily have to be carried out directly after each other. The sequence only implies that one business scenario is a prerequisite for the following ones.

Business Scenarios

Each business scenario represents a single workflow and consists of single action steps, intermediate results and a final result. In detail, each business scenario description has the same structure and contains the following elements.

Context of Usage

The context of usage describes the aim of the business scenario and indicates whether this business scenario is mandatory or optional in order to fulfil the overall business package. It also contains the usage restrictions and the pre-requisites (excluding the privileges), if available.
Privileges

In this section, all the necessary privileges to access and use the involved screens are listed. First the privileges to access the first screen are mentioned, followed by the privileges necessary to proceed with the business scenario. Afterwards, the privileges for the following screens are mentioned in the same order.

Reference

This section lists all references to the screens involved, in order of their appearance in the business scenario.

Instructions

Each workflow is described from the start to the end, beginning with the access to the starting screen. The instructions involve a number of separate steps which lead you through a series of screens and actions. Each action step is focused on 1 single action. Intermediate results are included and the instructions end with a final result. Possible alternatives and repetitions are highlighted with a notice sign.

Example

1. Action step 1
2. Action step 2
   ⇨ Intermediate result
3. Action step 3
   ⇨ Result

3.2 Digital Signature

3.2.1 Digital Signature (NRO)

Overview

This business section describes in a general way the interaction of the actors with the Digital Signature.

Application of a Digital Signature is applicable for the following GUI screens when performing the listed actions:
## Digital Signature

<table>
<thead>
<tr>
<th>Function</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash Account - New/Edit screen</td>
<td>Submit</td>
</tr>
<tr>
<td>Standing Order For Reservation – Details screen</td>
<td>Delete, Restore</td>
</tr>
<tr>
<td>Standing Order For Reservation - New/Edit screen</td>
<td>Submit</td>
</tr>
<tr>
<td>Standing Order For Reservation - Search/List screen</td>
<td>Delete, Restore</td>
</tr>
<tr>
<td>Standing/Predefined Liquidity Transfer Order – Details screen</td>
<td>Delete, Restore</td>
</tr>
<tr>
<td>Standing/Predefined Liquidity Transfer Order - New/Edit screen</td>
<td>Submit</td>
</tr>
<tr>
<td>Standing/Predefined Liquidity Transfer Order - Search/List screen</td>
<td>Delete, Restore</td>
</tr>
<tr>
<td>Data Changes – Details screen</td>
<td>Submit</td>
</tr>
<tr>
<td>Grant/Revoked Privileges - Selection criteria screen</td>
<td>Grant, Revoke</td>
</tr>
<tr>
<td>Grant/Revoke Role - New/Edit screen</td>
<td>Grant, Revoke</td>
</tr>
<tr>
<td>Grant/Revoke System Privilege - New/Edit screen</td>
<td>Grant, Revoke</td>
</tr>
<tr>
<td>Restriction Type - Search/List screen</td>
<td>Delete, Restore</td>
</tr>
<tr>
<td>Restriction Type - New/Edit screen</td>
<td>Submit</td>
</tr>
<tr>
<td>Role - Search/List screen</td>
<td>Delete, Restore</td>
</tr>
<tr>
<td>Role - New/Edit screen</td>
<td>Submit</td>
</tr>
<tr>
<td>User - Details screen</td>
<td>Delete, Restore</td>
</tr>
<tr>
<td>User - New/Edit screen</td>
<td>Submit</td>
</tr>
<tr>
<td>User - Select/List screen</td>
<td>Delete</td>
</tr>
</tbody>
</table>
Business Scenario

The actor that is performing a business scenario linked to the screens and the buttons listed above must consider these steps as part of the specific business scenario.

1. Select the needed item or input the desired values, then click on the action button (Submit, Delete, Restore, Grant, Revoke).
2. Once prompted with the request of inserting the PIN associated with the digital identity, insert the PIN and click the OK button.

→ The action initiated by the actor is concluded and the request is digitally signed.

3.3 Access Rights

3.3.1 Configuration of a Role

Overview

This business package describes the configuration of a role.
To configure a role, you first have to select a role and then to assign privileges or other roles to the selected role.
Afterwards you can assign the new role to a user or to a party.
To configure a role, carry out the business scenarios in the predefined order and choose the business scenario relevant to you whenever options are given.

Business Scenario

In the GUI all mandatory fields are marked with a red line in the label. All marked fields have to be filled in before you are allowed to proceed. The red line is turned into green when the field contains a value or is selected.

1. Create a new Role
2. Grant Privileges to a Role
3. Assign a role to a party
4. Assign a role to a user

3.3.1.1 Create a new Role

Context of Usage

This business scenario describes how to create a new role.
A role is a set of privileges, which can be granted to users and parties. You can create a new role for your participant and for yourself.

Creating a new role is mandatory for configuration of a role.

This business scenario is not relevant for payment bank and ancillary system users.

**Privileges**

To carry out this business scenario, you need the following privileges:

- Role list query
- Create Role

**Reference**

Further information on screens involved can be found in the screen reference part:

- Roles – search screen [ ]
- Role – new/edit screen [ ]

**Instructions**

1. Go to the Roles – search/list screen:
   Common >> Access Rights Management >> Roles

2. Click on the new button.

   The Role – new screen is displayed.

3. Enter all mandatory information about the role you want to create.

**Alternatives**

To set all fields to default value and blank out all optional fields, click on the reset button.

To cancel the process and return to the previous screen, click on the cancel button.

4. Click the submit button.

   The new Role has been created.
3.3.1.2 Grant Privileges to a Role

**Context of Usage**
This business scenario describes how to grant a system privilege to a role. Before you start, make sure that you have already been granted the same privilege and that the role belongs to your system entity.

This business scenario is not relevant for payment bank and ancillary system users.

**Privileges**

To carry out this business scenario, you need the following privileges:
- Grant Privilege
- Grant System Privileges List Query

**Reference**
Further information on screens involved can be found in the screen reference part:
- Grant/revoke privileges – search screen
- Grant/revoke system privileges – new/edit screen

**Instructions**

1. Go to the grant/revoke privileges – search screen:
   Common >> Access Rights Management >> Grant/Revoke Privileges

2. Select “Role name” and choose the name of the relevant Role from the drop-down menu.

3. Click on the search button.
   - The grant/revoke system privilege – new/edit screen is displayed.

4. Search the relevant category in the 'Privileges' frame, open it by clicking the expand group icon and select the relevant privilege.
If the privilege has been already granted to the role, you can finish the business scenario with this step.

If the privilege has not been granted to the role, proceed with the next step.

5. Select the privilege(s) you want to grant to the Role.

6. Click on the arrow icon.

The privilege has been granted to the role.

Repetition

To grant more privileges to the role, repeat step 4 and 5 or select all the privileges you want to grant before clicking the arrow icon.

3.3.1.3 Assign a Role to a Party

Context of Usage

This business scenario describes how to assign a role to a party. A role is a homogenous group of privileges. To grant a role to a party, you must own that role. You can grant a role to a party not belonging to your system entity only if you are the party administrator of the party that owns the role. This business scenario is not relevant for payment bank and ancillary system users.

Privileges

To carry out this business scenario, you need the following privileges:
- Role list query
- Grant/revoke role
Reference

Further information on screens involved can be found in the screen reference part:

- Grant/revoke privileges – search screen
- Grant/revoke role – new/edit screen

Instructions

1. Go to the grant/revoke roles – search screen:
   Common >> Access Rights Management >> Grant/Revoke Roles

2. Select the parent BIC and the BIC of the party you would like to assign the role to

3. Click on the search button.
   - The grant/revoke roles – new/edit screen is displayed.

4. Check if the party has been already granted to the relevant roles in the left column.
   - If the party has been already granted to the role, you can finish the business scenario with this step.
   - If the party has not been granted to the role, proceed with the next step.

5. Select the role(s) you want to grant to the party in the ‘Roles’ frame.
6. Click on the arrow icon.

![GRANT/REVOKE ROLES](image)

-The role has been granted to the party.

**Repetition**

To grant more roles to the party, repeat step 4 and 5 or select all the roles you want to grant before clicking the arrow icon.

### 3.3.1.4 Assign a Role to a User

**Context of Usage**

This business scenario describes how to assign a role to a user. A role is a homogenous group of privileges. To grant a role to a user, you must own that role. You can only grant a role to a user that belongs to your system entity.

**Privileges**

To carry out this business scenario, you need the following privileges:

- Role list query
- Grant/revoke Role

**Reference**

Further information on screens involved can be found in the screen reference part:

- Grant/revoke roles – search screen
- Grant/revoke role – new/edit screen

**Instructions**

1. Go to the grant/revoke roles – search screen:
   
   Common >> Access Rights Management >> Grant/Revoke Roles

2. Enter the login name of the relevant party in the ‘User’ subframe.
3. Click on the search button.
   ⇒ The grant/revoke role – new/edit screen is displayed.

4. Check if the user has been already granted to the relevant roles in the left column.
   ⇒ If the user has been already granted to the role, you can finish the business scenario with this step.
   ⇒ If the user has not been granted to the role, proceed with the next step.

5. Select the role(s) you want to grant to the user in the ‘Roles’ frame.

6. Click on the arrow icon.

   ⇒ The role has been granted to the user.
Repetition

To grant more roles to the user, repeat step 4 and 5 or select all the roles you want to grant before clicking the arrow icon.

3.3.2 Configuration of a User

Overview

This business package describes the configuration of a user. A user is a reference data object that allows an individual or an application to interact with the shared services. The functions that can be triggered depend on the privileges granted to the user. It is possible to grant roles to the new user after its creation. To configure a user, carry out the following business scenarios in the predefined order.

Business Scenario

1. Create a new user
2. Create a new user certificate distinguished name link
3. Assign a role to a user

3.3.2.1 Create a New User

Context of Usage

This business scenario describes how to create a new user. A user is a reference data object that allows an individual or an application to interact with one or many Eurosystem Market Infrastructure services. The functions that can be triggered within each service depend on the privileges granted to the user.

The user is mainly defined by the ‘Login Name’ and ‘System User Reference’ that must be unique in the system. All the users are linked to a specific party and can be created by another authorised user. There is no usage restriction for this business scenario.

Privileges

To carry out this business scenario, you need the following privileges:

- System user query
- Create User

Reference

Further information on screens involved can be found in the screen reference part:

- Users – search/list screen
- User – new/edit screen
Instructions

1. Go to the users – new/edit screen:
   Common >> Access Rights Management >> Users >> New
   ➔ The user – new screen is displayed.

2. Enter all mandatory information in the ‘User’ frame.

   ![User New Screen]

   Alternatives
   To set all fields to default value and blank out all optional fields, click on the reset button.
   To cancel the process and return to the previous screen, click on the cancel button.

3. Click on the submit button.
   ➔ The new user has been created.

3.3.2.2 Create a New Certificate Distinguished Name

Context of Usage

This business scenario describes how to create a new user certificate distinguished name.

Privileges

To carry out this business scenario, you need the following privileges:

- Certificate query
- Create certificate distinguish name

Reference

Further information on screens involved can be found in the screen reference part:

- Certificate distinguished names – search/list screen [1]
Instructions

1. Go to the certificate distinguished name – new/edit screen:
   Common >> Access Rights Management >> Certificate Distinguished Name >> New
   ⇒ The certificate distinguished name – new screen is displayed.

2. Enter all mandatory information in the ‘Certificate Distinguished Name’ field.

   ![Certificate Distinguished Name Screen]

Alternative

To set default criteria and blank out all optional fields, click on the reset button. To cancel the process and return to the previous screen, click on the cancel button.

3. Click on the submit button.
   ⇒ The new certificate distinguished name has been created.

3.3.2.3 Create a New User Certificate Distinguished Name Link

Context of Usage

This business scenario describes how to create a new user certificate distinguished name link.

You need to create a link between a certificate distinguished name and a user login name in order to allow your users or applications to access to the system via the interface.

Before you start please check if a certificate distinguished name has been available and if a link between the selected user and the certificate distinguished name has been already created.

You can link more than one certificate to a single login name and one certificate to more than one user.

Privileges

To carry out this business scenario, you need the following privileges:

- Create user certificate distinguish name link
- Query user certificate distinguish name link
- System user link query
Further information on screens involved can be found in the screen reference part:

- User certificate distinguished name links – search/list screen
- User certificate distinguished name link – new screen

Instructions

1. Go to the user certificate distinguished name links – new/edit screen:
   - Common >> Access Rights Management >> User Certificate Distinguished Name Links >> New
   - The user certificate distinguished name link – new screen is displayed.

2. Enter all mandatory information in the ‘User Certificate Distinguished Name Links’ frame.

Alternatives

- To set default criteria and blank out all optional fields, click on the reset button.
- To cancel the process and return to the previous screen, click on the cancel button.

3. Click on the submit button.
   - The new user certificate distinguished name link has been created.

3.3.2.4 Assign a Role to a User

Context of Usage

This business scenario describes how to assign a role to a user. A role is a homogenous group of privileges. To grant a role to a user, you must own that role. You can only grant a role to a user that belongs to your system entity.

Privileges

To carry out this business scenario, you need the following privileges:

- Role list query
- Grant/revoke Role

Reference

Further information on screens involved can be found in the screen reference part:
Instructions

1. Go to the grant/revoke roles – search screen:
   Common >> Access Rights Management >> Grant/Revoke Roles
2. Enter the login name of the relevant party in the ‘User’ subframe.
3. Click on the search button.
   The grant/revoke role – new/edit screen is displayed.
4. Check if the user has been already granted to the relevant roles in the left column.
   If the user has been already granted to the role, you can finish the business scenario with this step.
   If the user has not been granted to the role, proceed with the next step.
5. Select the role(s) you want to grant to the user in the ‘Roles’ frame.
6. Click on the arrow icon.

The role has been granted to the user.

Repetition

To grant more roles to the user, repeat step 4 and 5 or select all the roles you want to grant before clicking the arrow icon.

3.3.3 Usage of the 4-Eyes Mode

Overview

This business package describes the usage of the 4-eyes mode. The use of the 2-eyes or the 4-eyes mode depends on your access rights configuration.

Business Scenario

To use the CRDM in 4-eyes mode, carry out the following business scenarios in the predefined order:

- Initiate an action in 4-eyes mode
- Approve an action in 4-eyes mode

3.3.3.1 Initiate an Action in 4-Eyes Mode

Context of Usage

This Business scenario describes how to initiate an action via an enter (new/edit) screen, which has to be approved by a second user. Whether your actions in CRDM (new/edit/delete) have to be approved by a second user depends on your access right configuration. Initiating an action in 4-eyes mode is mandatory for the usage of the 4-eyes mode.

Privileges

To carry out this business scenario, you need the privileges necessary for the action you want to initiate.
Reference

Further information on screens involved can be found in the screen reference part (see business scenario or screen description of the underlying action).

Instructions

1. Go to the relevant edit or new screen.
2. Enter all mandatory information in the enter screen on which you want to initiate an action or delete a request by clicking on the delete button.
3. Click on the submit button:
   - A success message is displayed on the screen indicating that the request was sent in 4-eyes mode and showing the 4-eyes principle ID assigned by CRDM.
   - You have initiated an action carrying the ‘Awaiting approval’ status.

### 3.3.3.2 Approve an Action in 4-Eyes Mode

**Context of Usage**

This Business scenario describes how to approve an action, which has been initiated by a different user in 4-eyes mode. The use of 2-eyes or 4-eyes mode depends on your access rights configuration.

Approving an action is mandatory for the usage of the 4-eyes mode.

Before you start, the action has to be initiated by a different user.

**Privileges**

To carry out this business scenario, you need the following privileges:

- Data changes of a business object list query.
- Data changes of a business object details query.

**Reference**

Further information on screens involved can be found in the screen reference part:

- Data changes – search/list screen [v]
- Data Change – details screen [v]

**Instructions**

1. Go to the Data changes – search/list screen.
2. Enter the search criteria known to you (e.g. user reference of the change) about the action waiting for your approval. Ask the first user for the 4-eyes principle ID submitted in the success message to identify the action easily.
3. In the status field, select the status ‘Awaiting approval’.
4. Click on the search button:
   - The search results are displayed in a list on the same screen.
If the search retrieves only one data change waiting for your approval, the **data change – details screen** is displayed directly. Proceed with step 7.

5. Select the action you would like to approve by clicking on an entry in the list.
6. Click on the **details** button:
   ⇒ The data change – details screen is displayed.
7. Check the data. If everything is correct, click on the **approve** button.
   ⇒ The action has been approved and is submitted for execution. The **data changes – search/list** screen is displayed with the updated result of the previously selected criteria.

### 3.4 Rule Sets

#### 3.4.1 Configuration of a New Message Subscription Rule Set

**Overview**

This business package describes how to configure a new message subscription rule set.

You can only create a new message subscription rule set, if you have the relevant privilege. You can configure the specific set of messages (or copies of messages) you want to receive for yourself and for your directly connected parties based on a set of rules.

Each Actor can have many active rule sets at any given point in time. Each rule set can include many rules. Each rule can include many groups of parameters. The maximum overall number of groups of parameters for the active rule sets is 1,500. Each rule can include many parameters. Within each rule, each parameter can be linked to many distinct values. The maximum overall number of distinct values for the active rule sets is 50.

**Business Scenario**

To configure a new message subscription rule set, carry out the following business scenario:

- Create a new message subscription rule set

#### 3.4.2 Create a New Message Subscription Rule Set

**Context of Usage**

This Business scenario describes how to create new message subscription rule sets, which are used by the CRDM application for each outgoing message. These rules determine to which interested party or parties the given message has to be sent or copied.
Creating a new message subscription rule set is mandatory for the creation of a new message subscription rule set.

The creation of a message subscription rule set can be performed by all parties owning the relevant privilege.

**Privileges**

To carry out this business scenario, you need the following privileges:

- Create message subscription rule set
- Message subscription rule set list query
- Message subscription rule list query
- Create message subscription rule

**Reference**

Further information on screens involved can be found in the screen reference part:

- Message subscription rule sets – search/list screen
- Message subscription rule set – new/edit screen

**Instructions**

1. Go to the message subscription rule sets – new/edit screen:
   Common >> Messages and Reports >> Message Subscription Rule Set >> New

   ➔ The message subscription rule set – new screen is displayed.

2. Enter all mandatory information about the rule set you want to create in the ‘Message Subscription Rule Set’ and ‘Interested Parties’ frames.

3. Click on the submit button.
The new message subscription rule set has been created without any rule attached.

4. Go to the message subscription rule sets – search/list screen:
   Common >> Messages and Reports >> Message Subscription Rule Set >> Search

5. Enter all search criteria known to you about the message subscription rule set you have just created.

6. Click on the search button.
   ✔ A list containing the search results is displayed on the screen.

7. Select the message subscription rule set you just created by clicking on an entry in the list.

8. Click on the details button.
   ✔ The message subscription rule set – details screen is displayed.

9. Click on the Add Rule button.
   Enter all mandatory information about the rule you want to create in the 'Message Subscription Rules' frame.

10. Click on the Ok icon.

11. Click on the submit button. At least one rule should be present in the rule set.
    ✔ The new message subscription rule has been created.
3.5 Party Management

3.5.1 Administration of Participants

Overview
This business package describes all activities a CB can perform for the administration of its participants during their lifecycle. The administration of participants has the aim of making sure that all parties are registered in CRDM and that their reference data are always up to date.

After the initial creation of participants, a party administrator has to edit the previously entered reference data whenever a change takes place. The Central Bank party administrator can also decide to close a party, imposing a new closing date. If a party ceases to exist, the party administrator has to delete it in CRDM.

Business Scenario
To administer your participants, carry out the following business scenarios in the predefined order:
- Create a new participant [+]  
- Edit an existing participant [+]  
- Delete an existing participant [+]  
- Create a Party Service Link [+]  
- Create a Distinguished Name-BIC Routing configuration [+]  

3.5.1.1 Create a New Participant

Context of Usage
This business scenario describes how to create a new participant. Each NCB is responsible for the creation of the party reference data for their payment banks or ancillary systems.

Creating a new participant is mandatory for the administration of participants. It is optional for the configuration for a central bank.

Before you start, check whether the participant has not already been created by someone else. Also, make sure that the party BIC you want to use for the new participant has been created in the BIC directory.

Privileges
To carry out this business scenario, you need the following privileges:
- Party list query  
- Create Party

Reference
Further information on screens involved can be found in the screen reference part:
Instructi ons

1. Go to the Party – new/edit screen:
   Common >> Parties >> Parties >> New
   The party – new screen is displayed.

2. Enter all mandatory information, also in the ‘Codes’, ‘Name’, ‘Addresses’ and ‘Technical Addresses’ frames.

3. To add a technical address, enter all mandatory information in the ‘Technical Addresses’ and ‘Restrictions’ frames. At least one technical address has to be defined.

4. Click on the submit button.

   The new participant has been created.

3.5.1.2 Edit an Existing Participant

Context of Usage

This business scenario describes how to edit the reference data of an existing participant. Each national central bank is responsible for maintaining the reference data for their payment banks or ancillary systems.

Editing an existing participant is optional for the administration of participants.

If you want to close a party, verify that all the reference data of all objects linked to that party have a closing date equal to or earlier than the party closing date or have been deleted.
Privileges

To carry out this business scenario, you need the following privileges:

- Party list query
- Party reference data query
- Update Party

Reference

Further information on screens involved can be found in the screen reference part:

- Parties – search/list screen
- Party – details screen
- Party – new/edit screen

Instructions

1. Go to the parties – search/list screen:
   Common >> Parties >> Parties >> Search

2. Enter all search criteria known to you about the party you want to edit.

3. Click on the search button.
   ⇒ A list containing the search results is displayed on the screen.
   ⇒ If the search retrieves a single party, the party – details screen is displayed directly. Proceed with step 6.

4. Select the relevant party from the search results by clicking on an entry in the list.

5. Click on the details button.
   ⇒ The party – details screen is displayed.

6. Click on the edit button.
   ⇒ The party – edit screen is displayed.

7. To add or change current values in the ‘Party’ or other frames, enter the new values in the respective fields.
8. To add future values in the ‘Party’ or other frames, click on the pencil icon in the lower right-hand corner of the frame.
   - Empty fields are displayed.
   - Changes in the current values are reset.

9. Enter all mandatory information in the newly displayed fields. The ‘Valid From’ date must be later than today.

10. To delete existing values in the ‘Party’ or other frames, clear the content and leave the respective fields blank or use the delete row icon.

11. To add new technical addresses, enter new data in the ‘Technical Address’ sub-frames.

12. Click on the add row icon.
   - A technical address or restriction has been added to the list.

13. To delete a technical address, select the relevant entry from the list.

14. Click on the delete row icon.
   - The data of the technical address has been deleted from the list.
Repetition

Repeat steps 11 and 12 to add more technical addresses.
Repeat steps 13 to delete more technical addresses.
You can add or delete up to 10 technical addresses.

Alternatives

To set all fields to default value and blank out all optional fields, click on the reset button.
To cancel the process and return to the previous screen, click on the cancel button.

15. Click on the submit button.
   ➤ The edited party reference data are stored.

3.5.1.3 Delete an Existing Participant

Context of Usage

Each central bank is responsible for maintaining the reference data for their payment banks or ancillary systems. If a party ceases to exist, the party administrator has to delete it in CRDM.

Deleting an existing participant is an optional step for the administration of participants.

Before you delete a participant, check the opening and closing date of the participant. A participant can only be deleted if the closing date has passed or if the opening date has not yet been reached (future opening date). If the closing date is equal to the current date, you have to wait for the new business day to delete the participant. In addition, make sure that all the linked instances in a higher position within the deletion hierarchy (i.e. Cash account) have been deleted.

Privileges

To carry out this business scenario, you need the following privileges:
- Party list query
- Party reference data query
- Delete party

Reference

Further information on the involved screens can be found in the screen reference part:
### Instructions

1. Go to the *parties – search/list screen*:
   
   Common >> Parties >> Parties >> Search

2. Enter all search criteria known to you about the party you want to delete.

3. Click on the *search* button.
   
   ➔ A list containing the search results is displayed on the screen.

   ➔ If the search retrieves a single party, the *party – details screen* is displayed directly. Proceed with step 6.

4. Select the relevant party from the search results by clicking on an entry in the list.

5. Click on the *details* button.
   
   ➔ The *party – details screen* is displayed.

6. Click on the *delete* button if the opening date is not reached and/or the closing date is later than the current date.
   
   ➔ A confirmation prompt is displayed.

   7. Click on *yes* if you really want to delete the party reference data.

   ➔ The party reference data are deleted.

### 3.5.1.4 Create a Party Service Link

#### Context of Usage

This section describes how to create a Party Service Link, which can be done only by NCB users. This screen is meant to link a party to a service, depending on the user business case. It must be noticed that, in order to insert a party as Leading CLM Account Holder, it’s necessary that this party is referenced in an already existing and active Party Service Link as account holder. Therefore, in order to have a Party Service Link configured with a Leading CLM Account Holder, it’s necessary:
- first to create a Party Service Link for the Party, with Minimum Reserve Obligation first set to "no";
- then to modify the Party Service Link inserting the party itself as Leading CLM Account.

**Privileges**
To carry out this business scenario, you need the following privilege:
- Create Party Service Link

**Reference**
Further information on the involved screens can be found in the screen reference part:
- Party Service Link – new/edit screen

**Instructions**
1. Go to Party Service Link – new/edit screen:
   Common >> Parties >> Party Service Link >> New
   ➡ The Party Service Link – new screen is displayed.

2. Enter all mandatory information. In the following example, it was set T2 CLM COMPONENT as for Service and CLM Account Holder as for Party Type for service.

3. Click on the submit button.
3.5.1.5 Create a Distinguished Name-BIC Routing configuration

Context of Usage

Each participant is responsible for maintaining the reference data for their DN-BIC routing links. For Inbound communication, different DNs can be linked to different BICs and vice versa. In the outbound case, the same BIC can only be linked to a single DN. However different BICs can still be linked to the same DN.

Privileges

To carry out this business scenario, you need the following privilege:

- Create DN-BIC Routing

Reference

Further information on the involved screens can be found in the screen reference part:

- Distinguished Name-BIC routing – search/list screen
- Distinguished Name-BIC routing – new/edit screen

Instructions

1. Go to Distinguished Name-BIC routing – search/list screen:
   Common >> Network Configuration >> Distinguished Name-BIC routing >> New
   ➔ The Distinguished Name-BIC routing – new screen is displayed.

2. Enter all mandatory information.

3. Click on the submit button.
   ➔ The new Distinguished Name-BIC routing has been created.

3.6 Reports

3.6.1 Report Management

3.6.1.1 Create a New Report Configuration

Context of Usage

This business scenario describes how to create a new report to receive specific information about dynamic or reference data through a predefined report. Each report is periodically created.

You can check the created report via the CRDM graphical user interface.

You can configure a report only in U2A mode.
Priviliges
To carry out this business scenario, you need the following privileges:
- Report configuration list query
- Create report configuration

Reference
Further information on screens involved can be found in the screen reference part:
- Report configuration – search/list screen
- Report configuration – new/edit screen

Instructions
1. Go to the report configuration – new/edit screen:
   Common >> Messages and Reports >> Report Configurations >> New
   ⇒ The report configuration – new screen is displayed.
2. Enter all mandatory information about the report configuration you want to create.
3. Enter all mandatory information about the addressee of the report in the ‘Party Links’ frame.
4. Click on the *add row icon*.
   ⇒ The report configuration party link has been added.

5. Click on the *submit button*.
   ⇒ A new report configuration has been created.

### 3.7 Revisions

#### 3.7.1 Monitoring of Revisions

**Overview**

This business package describes the monitoring of revisions. It enables you to view the historical status and historical data of a dataset in order to monitor revisions.

**Business Scenario**

To monitor revisions, carry out the following business scenario:

- View revisions

#### 3.7.1.1 View Revisions

**Context of Usage**

This business scenario describes how to view the historical status of a dataset and the history of attribute values, the identification of the user who created/edited/deleted the dataset as well as the timestamp when this action happened, since every creation/modification/deletion of a dataset is stored within CRDM.

In case of the 4-eyes mode any action of the first and confirming user including the timestamp is displayed. Viewing revisions is mandatory for the monitoring of revisions.

**Privileges**

To carry out this business scenario, you need (depending on the underlying object) the following privileges:

- Party audit trail query
- Cash Account audit trail query
- Residual Static Data audit trail query

**Reference**

Further information on screens involved can be found in the screen reference part:

- Revisions/audit trail – list screen
- Revisions/audit trail – details screen
Instructions

1. Go to the relevant search/list or details screen.
2. Click on the revisions button.
3. Select the item you want to view by clicking on an entry in the list.
4. Click on the details button.
   ➪ The revisions/audit trail – details screen is displayed.

3.8 Account Management

3.8.1 Administration of Cash Accounts

3.8.1.1 Create a New Cash Account

Context of Usage
This business scenario describes how to create a new cash account. Each central bank is responsible for opening cash accounts for itself and its Payment Banks or Ancillary Systems, in order to settle Instant Payment transactions.

You have to link each of your cash accounts to a specific settlement currency. This business scenario is mandatory for the administration of cash accounts, for the configuration for a central bank.

Privileges
To carry out this business scenario, you need the following privileges:
- Create cash account
- Cash account list query

Reference
Further information on screens involved can be found in the screen reference part:
- Cash Account – search/list screen [↩]
- Cash Account – new/edit screen [↩]

Instructions
1. Go to the cash accounts – search/list screen:
   Common >> Cash >> Cash Accounts >> New
   ➪ The cash account – new screen is displayed.
2. Enter all mandatory information in the ‘Cash Account’ frame.
3. Enter all mandatory information in the available fields of the “Restrictions” frame.
4. Click on the submit button.

The new cash account has been created.

3.8.1.2 Edit an Existing Cash Account

Context of Usage
This business scenario describes how to edit an existing cash account. Each NCB is responsible to maintain the reference data for the cash account of their participants, which means Payment Banks and Ancillary Systems, since this business scenario is not relevant for them.

Privileges
To carry out this business scenario, you need the following privileges:
- Cash account list query
- Update cash account
- Delete cash account

Reference
Further information on screens involved can be found in the screen reference part:
- Cash Account – search/list screen
- Cash Account – new/edit screen
- Cash Account – details screen

Instructions
1. Go to the cash accounts – search/list screen:
   Common >> Cash >> Cash Accounts >> Search
2. Enter the search criteria known to you about the cash account you want to edit.
3. Click on the search button.
A list containing the search results is displayed on the screen.

If the search retrieves a single cash account, the cash account – details screen is displayed directly. Proceed with step 5.

4. Select the relevant cash account by clicking on an entry in the list.

5. Click on the edit button.

The cash account – edit screen is displayed.

6. To add or edit current values of the cash account reference data, enter all mandatory information in the "cash account" frame.

7. To add a field in a subtable click on the related icon “

8. Enter all mandatory information in the available fields in the frame.

9. Click on the add row button.

10. To edit a field in a subtable, select the relevant entry from the list by clicking on it.

11. Click on the copy row icon

12. Update the data.

13. Click on the add row button.

The data has been changed in the list.

14. To delete an entry in a subtable, select the relevant entry from the list.

15. Click on the delete row button.

The row has been deleted from the list.
16. Click on the submit button.
⇒ The edited cash account reference data is stored.

3.8.1.3 Delete an Existing Cash Account

Context of Usage
This business scenario describes how to delete an existing cash account. Each NCB is responsible to delete the cash account of their participants, which means Payment Banks and Ancillary Systems. Deleting an existing cash account is an optional step in the administration of a cash account.

The request to delete a cash account must refer to an existing and active cash account. Before you delete the cash account, check the opening and closing day: a cash account can be deleted if the closing date is earlier than or equal to the current business date or if the opening date is earlier than the current business date. In case of the deletion of a future RTGS dedicated transit account, check that no active cash account with the same currency exists. This business scenario is not relevant for Payment Bank and Ancillary System users.

Privileges
To carry out this business scenario, you need the following privileges:
- Cash account list query
- Cash account reference data query
- Delete cash account

Reference
Further information on screens involved can be found in the screen reference part:
- Cash Account – search/list screen [1]
- Cash Account – details screen [1]

Instructions
1. Go to the cash accounts – search/list screen:
   Common >> Cash >> Cash Accounts >> Search
2. Enter the search criteria known to you about the cash account you want to delete.
3. Click on the search button.
   ⇒ A list containing the search results is displayed on the screen.
   ⇒ If the search retrieves a single cash account, the cash account – details screen is displayed directly. Proceed with step 6.
4. Select the relevant cash account by clicking on an entry in the list.
5. Click on the details button.
   ⇒ The cash account – details screen is displayed.
6. Click on the delete button if the opening date is not reached and/or the closing date is equal or greater than the current date.
The cash account has been deleted.

3.8.1.4 Create a Cash Accounts Group

Context of Usage
This section describes how to create a group that includes different cash account, depending on the user purpose. As a reminder, user can create groups in order to manage actions as monitoring, liquidity transfer and settlement. Groups have a peculiar data visibility, and can be created only by NCB users. In this case scenario, focus is dedicated to the Account Monitoring Group, but the other screens are very similar.

Privileges
To carry out this business scenario, you need the following privilege:
- Create Account Monitoring Group

Reference
Further information on the involved screens can be found in the screen reference part:
- Account Monitoring Group – new/edit screen [1]

Instructions
1. Go to Account Monitoring Group – new/edit screen:
   T2 >> Cash >> Account Monitoring Group >> New
   ➔ The Account Monitoring Group – new screen is displayed.
2. Enter all mandatory information, paying particular attention to Leader Party BIC field, which will be able to view all the group’s content but will be able to edit only the account entities under its data scope.
3. Click on the submit button.
The new Account Monitoring Group has been created.

### 3.8.1.5 Create an Authorised Account User

**Context of Usage**

This business scenario describes how to create an authorised account user in order to connect a BIC11 to a specific cash account. This connection allows the BIC11 to use the cash account for its settlement purposes.

The same cash account can be assigned to more than one BIC11 but only one cash account can be linked to the same BIC11.

Before you start, check whether the BIC11 and the cash account exist in CRDM.

**Privileges**

To carry out this business scenario, you need the following privileges:

- Create Authorised Account User

**Reference**

Further information on screens involved can be found in the screen reference part:

- Authorised Account User – search/list screen
- Authorised Account User – new/edit screen

**Instructions**

1. Go to the Authorised Account User – new/edit screen:
   Common >> Cash >> Authorised Account Users >> New

2. Enter all the mandatory information in the ‘Authorised account user new’ frame. In the following example, it was set a RTGS DCA as **Cash Account Number** for a Direct Participation Type.

3. Click on the submit button.

   ✅ A new Authorised Account User has been created.
3.8.1.6 Edit an Authorised Account User

Context of Usage
This business scenario describes how to edit an authorised account user in order to modify the validity dates of the connection between the BIC11 and the cash account for settlement purposes.

Privileges
To carry out this business scenario, you need the following privileges:
- Update Authorised Account User

Reference
Further information on screens involved can be found in the screen reference part:
- Authorised Account User – search/list screen
- Authorised Account User – new/edit screen

Instructions
1. Go to the Authorised Account User – search/list screen:
   Common >> Cash >> Authorised Account Users >> Search
2. Enter the search criteria known to you about the Authorised Account Users you want to edit
3. Click on the edit button.
4. Modify the information on the validity dates of the selected Authorised Account User.
5. Click on the submit button.
   ➤ The Authorised account user has been modified.

3.8.1.7 Delete an Authorised Account User

Context of Usage
This business scenario describes how to delete an authorised account user. The authorised account user can be deleted only if the Valid from value is in the future or the Valid to value is in the past.
Privileges

To carry out this business scenario, you need the following privileges:

少见 Delete Authorised Account User

Reference

Further information on screens involved can be found in the screen reference part:

少见 Authorised Account User – search/list screen [†]
少见 Authorised Account User – new/edit screen [†]

Instructions

1. Go to the Authorised Account User – search/list screen:
   Common >> Cash >> Authorised Account Users >> Search
2. Enter the search criteria known to you about the Authorised Account Users you want to delete.
3. Click on the search button.
4. Click on the delete button.
5. The Authorised account user has been deleted.

3.8.1.8 Usage of RTGS Directory

Context of Usage

The RTGS Directory is a query that is meant to allow the user to search for Account BICs and then download the related data, according to the configuration, especially the Participation Type, already set when creating an Authorised Account User. A non exhaustive example related to the Account BIC and Participation type “Direct” follows.

Privileges

To carry out this business scenario, you need the following privileges:

少见 RTGS Directory query

Reference

Further information on screens involved can be found in the screen reference part:

少见 RTGS Directory – search/list screen [†]

Instructions

1. Go to the Authorised Account User – new/edit screen:
   Common >> Cash >> Authorised Account Users >> New
2. Enter, as an example, ABCDITPPXXX in the ‘Authorised account user BIC’ field, which indicates the party authorized on a specified cash account. For the latter, fill the ‘Cash Account Number’ field, inserting AAAAAAAAXXX. Complete the configuration, setting the ‘Valid From’ field and also selecting
3. Click on the **submit** button.

   ➨ A new Authorised Account User has been created.

4. Go to the **RTGS Directory – search/list screen**:
   - Common >> T2 >> Configuration >> RTGS Directory

5. Search for ‘Account Holder BIC’, which means AAAAAAAXXX.

   ➨ Searched data is displayed. User can now download it clicking on the button related to the interested RTGS Directory version.

### 3.9 Technical Addresses

#### 3.9.1 Configuration of a Technical Address

**Overview**

This business package describes the configuration of a technical address. The technical address is used by the shared services to exchange data with the party. A complete configuration foresees the specification of a technical address connected to a network service via a technical address service link.

**Business Scenario**

To configure a technical address, carry out the following business scenarios in the predefined order:

- Add a new technical address to a party [↩]
- Create a new technical address service link [↩]
3.9.1.1 Add a new Technical Address to a Party

Context of Usage
This business scenario describes how to add a new technical address to a party. Each Central Bank is responsible for defining all the required technical addresses for its parties as a first step to have a complete routing configuration. Adding a new technical address to a party is mandatory for the configuration of a technical address. Before you add a technical address to yourself or one of your participants, check whether the technical address exists in CRDM. You have to add at least one technical address for each of your participants. This business scenario is not relevant for Payment Bank and Ancillary System users.

Privileges
To carry out this business scenario, you need the following privileges:
- Party list query
- Party reference data query
- Technical address network service link details query
- Update party

Reference
Further information on screens involved can be found in the screen reference part:
- Parties – search/list screen
- Party – details screen
- Party – new/edit screen

Instructions
1. Go to the parties – search/list screen:
   Common >> Parties >> Parties >> Search
2. Enter all search criteria known to you about the party to which you want to add the technical address.
3. Click on the search button.
   - A list containing the search results is displayed on the screen.
   - If the search retrieves only one party, the party – details screen is displayed directly. Proceed with step 5.
4. Select the relevant party by clicking on an entry in the list.
5. Click on the edit button.
   - The party – edit screen is displayed.
6. To add a technical address, enter its name in the ‘Technical Addresses’ frame.
7. Click on the **add row** button.

   The technical address has been added to the list.

   ![TECHICAL ADDRESS](image)

<td><strong>2</strong></td>
</tr>
</tbody>
</table>

   **Alternatives**

   To set all fields to default value and blank out all optional fields, click on the **reset** button.

   To cancel the process and return to the previous screen, click on the **cancel** button.

8. Click on the **submit** button.

   The new technical address has been created.

### 3.9.1.2 Create a New Technical Address Service Link

#### Context of Usage

This business scenario describes how to create a new technical address in order to connect a party technical address to a specific network service. This connection allows the shared services to route outbound communication.

You can assign the same network service to more than one technical address of the same party and you can also assign more than one network service to the same technical address.
Before you start, check whether the network service and the technical address exist in CRDM.

This business scenario is not relevant for Payment Bank and Ancillary System users.

**Privileges**

To carry out this business scenario, you need the following privileges:

- Party list query
- Party reference data query
- Update party
- Create technical address network service link

**Reference**

Further information on screens involved can be found in the screen reference part:

- Parties – search/list screen
- Party – details screen
- Party – new/edit screen
- Technical addresses network services link – new/edit screen

**Instructions**

1. Go to the parties – search/list screen:
   - Common >> Parties >> Parties >> Search

2. Enter all search criteria known to you about the party to which you want to create a technical address service link.

3. Click on the search button.
   - A list containing the search results is displayed on the screen.
   - If the search retrieves only one party, the party – details screen is displayed directly. Proceed with step 6.

4. Select the relevant party by clicking on an entry in the list.

5. Click on the edit button.
   - The party – edit screen is displayed.

6. Click on the technical addresses network services links button.
   - The technical address network services links – edit screen is displayed.
7. Enter all mandatory information in the 'Add Tech. Address Network Service Link' frame.

8. Click on the *submit row* button.

**Repetition**

To add more technical addresses network services links, repeat steps 7 and 8.

You can add up to 10 technical addresses network services links.

- A new technical address network service link has been created.
4 Annex

4.1 Sitemap

In the following sub-sections the reader may find the hierarchical, structured illustration of all the CRDM screens and their interrelations.

You can find below the legend which explains the meaning of each object, i.e. screen, button, dotted (blue) arrow, solid (red) arrow illustrated in the following diagrams.

## 4.3 List of References for Error Messages

### 4.3.1 Reader's Guide

**Reader's Guide**

This section includes a list of references for error messages for all screens. The list of references for error messages consists of a general section, which lists overall error codes that apply to all GUI screens, and a section listing all error codes relevant for using the 4-eyes mode in GUI screens. For all sections, these are followed by specific sections for individual screens, which are organised in alphabetical screen order and specify the respective error codes applicable for each screen. Each error code table entry includes the error text and the description.

Please bear in mind that the Error Message description may make references to T2S reference data objects since the underlying Business Rules may be used for the creation of reference data for T2S when CRDM may be used for T2S also.

### 4.3.2 References for error messages for GUI screens

#### 4.3.2.1 All

<table>
<thead>
<tr>
<th>Reference for error message</th>
<th>Field or Button</th>
<th>Error Text</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DXAA007</td>
<td></td>
<td>Only one instance may become effective in the future</td>
<td>Each historical entity may have no more than one future instance.</td>
</tr>
<tr>
<td>DXAA045</td>
<td></td>
<td></td>
<td>During the night-time processing, if the requested change has an impact on the ongoing settlement process, the Reference Data object is created with approval status &quot;Queued&quot;. These changes are finalized at the end of each night-time settlement sequence.</td>
</tr>
<tr>
<td>DXAA046</td>
<td></td>
<td></td>
<td>Any changes made active on a Reference Data object that may affect pending processes are notified to the relevant domains.</td>
</tr>
</tbody>
</table>
## 4.3.2.2 All screens which allow the initiation of a second user

<table>
<thead>
<tr>
