2. Gap-fill

"Central bank money" is the term used to refer to deposits held at the central bank and cash brought into circulation by the central bank, as only the \_\_\_\_\_\_ can create this money. New central bank balances arise when the central bank extends a loan to a commercial bank. If the commercial bank pays back the \_\_\_\_\_\_ using its account balance, the central bank money that was previously created \_\_\_\_\_\_. Central bank balances also arise if the central bank purchases assets such

as \_\_\_\_\_ or \_\_\_\_

from a commercial bank. By contrast, if the central bank sells an asset to

the commercial bank, the central bank money that was previously created

once again \_\_\_\_\_.

Commercial banks need to hold central bank money in their

\_\_\_\_\_ at the central bank:

(1) because the central bank may call for commercial banks to maintain a certain minimum balance on their central bank accounts –

otherwise referred to as the \_\_\_\_\_

# The origin of money – Part III: central bank money 3 of 6

(2) because their customers are withdrawing more and more \_\_\_\_\_. The commercial banks have to obtain this additional cash from the \_\_\_\_\_. To do so, they need \_\_\_\_\_ \_\_\_\_\_ that they can draw upon. (3) for cashless \_\_\_\_\_. Commercial banks obtain central bank balances by taking out loans from the central bank. The commercial banks are required to pay \_\_\_\_\_ on these loans at the ECB's \_\_\_\_\_\_. This, in turn, serves as the lever for the Eurosystem's \_\_\_\_\_ \_\_\_\_\_: the Eurosystem has the option of using the policy rate to influence interest rate levels in the \_\_\_\_\_\_. If there is a risk of deflation, the ECB Governing Council will \_\_\_\_\_ interest rates. If there is a risk of inflation, the Eurosystem will \_\_\_\_\_\_ interest rates.

### 5. Transmission mechanism

The Eurosystem can use the policy rate (the rate at which commercial banks pay interest on central bank money) to influence interest rate levels - and thus, ultimately, the rate of inflation – in the euro area. Assuming a rising policy rate, study the right and left options in each box and choose the correct one to describe what happens next. Write the letter on the side that you have chosen in the corresponding numbered box to reveal the solution word.
