Table of Contents

List of Figures	10
List of Tables.....	17
1 Introduction to CLM.....	27
2 Overview of the UHB	28
2.1 UHB Methodology	28
2.2 UHB Structure.....	28
3 Set-up and Login.....	30
3.1 Communication Network and Services.....	30
3.2 Technical Requirements.....	30
3.3 Security-Related Processes	32
3.4 User Administration	32
4 GUI Structure.....	33
4.1 Menu Structure	33
4.2 Screen Structure	34
4.2.1 Header.....	34
4.2.2 Sub-header.....	35
4.2.2.1 Breadcrumbs	37
4.2.2.2 Bookmark	38
4.2.2.2.1 New Bookmark.....	38
4.2.2.2.2 Bookmark Bar	40
4.2.2.2.3 Modify and Delete Bookmark.....	41
4.2.2.3 User Settings.....	43
4.2.3 Content Area	45
4.2.3.1 Notification Area	46
4.2.3.2 Business Content	48
4.2.3.3 Button Bar	49
4.3 Screen Types	49
4.4 Field Types and Properties	51
4.5 Common Buttons and Icons	60
4.6 Validations	65
4.7 Online Help.....	69
5 Screen Reference Guide – Description of Screens.....	72
5.1 Cash Transfers and Messages.....	75
5.1.1 Cash Transfers – Query Screen	75
5.1.2 Cash Transfers – List Screen.....	93
5.1.3 Cash Transfers – Details Screen	108

5.1.4 Cash Transfers – Modify Earliest Debit Timestamp – Pop-up	111
5.1.5 Cash Transfers – Modify Latest Debit Timestamp – Pop-up	114
5.1.6 Cash Transfers – Manual Reversal Booking T2S – Pop-up	117
5.1.7 Cash Transfers – Manual Reversal Booking TIPS – Pop-up.....	119
5.1.8 Cash Transfers – Manual Reversal Booking RTGS – Pop-up.....	122
5.1.9 Files – Query Screen.....	125
5.1.10 Files – List Screen	127
5.1.11 Files – Details Screen	129
5.1.12 Messages – Query Screen.....	132
5.1.13 Messages – List Screen	140
5.1.14 Messages – Details Screen.....	145
5.1.15 Messages – Simulate Receipt T2S – Pop-up	148
5.1.16 Messages – Simulate Receipt TIPS – Pop-up	151
5.1.17 Messages – Simulate Receipt RTGS – Pop-up.....	154
5.1.18 Business Cases – Query Screen	157
5.1.19 Business Cases – List Screen	160
5.1.20 Account Postings – Query Screen	162
5.1.21 Account Postings – List Screen	166
5.1.22 Statement of Account – Download Screen	169
5.1.23 Financial Institution Credit Transfer – New Screen.....	171
5.1.24 A2A File or Message – Upload Screen.....	187
5.2 Liquidity.....	190
5.2.1 Dashboard Liquidity Overview – Query Screen	190
5.2.2 Dashboard Liquidity Overview Account Selection grouped by Countries – Display Screen ...	199
5.2.3 Dashboard Liquidity Overview Account Selection grouped by Parties – Display Screen.....	214
5.2.4 Dashboard Liquidity Overview Account Selection grouped by Services – Display Screen	229
5.2.5 Dashboard Liquidity Overview Account Selection List View – Display Screen.....	243
5.2.6 Dashboard Liquidity Overview AMG Selection grouped by Countries – Display Screen	247
5.2.7 Dashboard Liquidity Overview AMG Selection grouped by Parties – Display Screen.....	255
5.2.8 Dashboard Liquidity Overview AMG Selection grouped by Services – Display Screen	262
5.2.9 Dashboard Liquidity Overview AMG Selection List View – Display Screen	269
5.2.10 Available Liquidity on Banking Group Level – List Screen.....	274
5.2.11 Detailed Available Liquidity on Banking Group Level – List Screen	278
5.2.12 CLM Cash Account Liquidity – Query Screen.....	283
5.2.13 CLM Cash Account Liquidity – Display Screen.....	285
5.2.14 Credit Line per Account Holder – Query Screen.....	292
5.2.15 Credit Line per Account Holder – List Screen	295
5.2.16 Liquidity Transfer – New Screen	299
5.3 Liquidity Management Features	306
5.3.1 Reservations – Query Screen	306
5.3.2 Reservations – Display Screen	309
5.4 Query Standing Facilities	314

5.4.1 Standing Facilities – Query Screen	314
5.4.2 Standing Facilities – List Screen	315
5.5 Minimum Reserves.....	318
5.5.1 Minimum Reserve – Query Screen	319
5.5.2 Minimum Reserve (Direct) – List Screen	321
5.5.3 Minimum Reserve (Indirect) – List Screen	325
5.5.4 Minimum Reserve (Pool) – List Screen.....	326
5.5.5 Minimum Reserve (Pool of Account Party Level) – List Screen	330
5.5.6 Minimum Reserve Requirements – Query Screen	333
5.5.7 Minimum Reserve Requirements – List Screen.....	335

5.7.11 General System Parameters – Display Screen.....	405
5.8 Monitoring.....	407
5.8.1 Liquidity on CB Level – Display Screen	407
5.8.2 Cash Transfer Order Totals by Party – Query Screen	427
5.8.3 Cash Transfer Order Totals by Party – List Screen	430
5.8.4 Cash Transfer Order Totals by Account – List Screen	432
5.8.5 Cash Transfer Order Totals by Status – List Screen	434

5.8.6 Cash Transfer Order Subtotals by Status – List Screen	439
5.8.7 Available Liquidity by Party – Query Screen	440
5.8.8 Available Liquidity by Party – List Screen	443
5.8.9 Available Liquidity by Account – List Screen.....	447
5.8.10 Warehoused Cash Transfers – Query Screen	450
5.8.11 Warehoused Cash Transfers – List Screen	452
5.8.12 Reservations and Seizure of Funds – List Screen	456
5.8.13 Standing Facilities per Account Holder – Query Screen.....	458
5.8.14 Standing Facilities per Account Holder – List Screen	461
5.8.15 Minimum Reserve Information per Account Holder – Query Screen.....	463
5.8.16 Minimum Reserve Information per Account Holder – List Screen	466
6 Screen User Guide – Description of Use Cases.....	470
6.1 Cash Transfers and Messages.....	471
6.1.1 Query/List cash transfers	471
6.1.2 Display cash transfer (order)	472
6.1.3 Revocation of payment.....	473
6.1.4 Modify cash transfer order.....	473
6.1.4.1 Reorder payment in queue.....	474
6.1.4.2 Modify earliest debit timestamp.....	474
6.1.4.3 Modify latest debit timestamp.....	475
6.1.5 Release cash transfer order of blocked party	476
6.1.6 Manual reverse booking	477
6.1.7 Query files	479
6.1.8 Query messages	480
6.1.9 Display message	481
6.1.10 Simulate receipt.....	482
6.1.11 Simulate a positive receipt	483
6.1.12 List business life cycle events for cash transfers (orders)	483
6.1.13 List account postings.....	484
6.1.14 Download statement of account.....	485
6.1.15 Enter payment order – pacs.009.....	486
6.1.16 Repeat sending	487
6.1.17 Upload A2A file or message via U2A	488
6.2 Liquidity.....	489
6.2.1 Display cash account liquidity (one service only).....	489
6.2.2 Query and display cash account liquidity (dashboard)	490
6.2.3 Enter current liquidity transfer order	492
6.2.4 List credit lines.....	493
6.2.5 Create and modify credit line.....	494
6.2.6 Enter overnight deposit	495
6.2.7 Enter marginal lending on request	497

6.3 Liquidity Management Features	498
6.3.1 Query reservations	498
6.3.2 Display reservations	498
6.3.3 Enter current reservation	499
6.3.4 Modify current reservation	500
6.4 Query Standing Facilities	501
6.4.1 Display standing facilities	501
6.5 Minimum Reserves.....	502
6.5.1 Display minimum reserve requirements and fulfilments per MFI	502
6.5.2 Display aggregated MFI liquidity (indirect management).....	503
6.5.3 Display aggregated MFI liquidity	504
6.5.4 Query minimum reserve infringement penalty payment	505
6.5.5 Display minimum reserve infringement penalty payment	506
6.5.6 Authorise/cancel minimum reserve infringement penalty payment	507
6.5.7 Enter/modify minimum reserve requirement	508
6.5.8 Modify minimum reserve fulfilment.....	509
6.5.9 List minimum reserve requirements and fulfilments on banking community level	510
6.6 Reference Data	511
6.6.1 Query/List party reference data.....	511
6.6.2 Query/List cash account reference data	512
6.6.3 Query cash account by MFI	513
6.6.4 Query BIC.....	514
6.7 Administration	514
6.7.1 Download migration information.....	514
6.7.2 Query task queue	515
6.7.3 Confirmation/Withdrawal of 4-eyes task entries.....	516
6.7.4 Modify 4 eyes tasks.....	517
6.7.5 Query broadcasts	518
6.7.6 Display broadcast.....	519
6.7.7 Enter broadcast	520
6.7.8 Query events	520
6.7.9 Display system parameter.....	521
6.8 Monitoring	522
6.8.1 Sum of cash transfer per account holder	522
6.8.2 Warehoused cash transfers	523
6.8.3 Available liquidity on party level	523
6.8.4 Available liquidity per account holder	525
6.8.5 Status overview for cash transfers	525
6.8.6 Overview standing facilities	526
6.8.7 Display aggregated liquidity	527
6.8.8 Reservations and dedicated liquidity.....	527

7 Annex	529
7.1 References for Error Messages for GUI Screens	529
7.1.1 A2A File or Message – Upload Screen	529
7.1.2 Account Postings – Query Screen	531
7.1.3 Account Postings – List Screen	531
7.1.4 Available Liquidity by Account – List Screen.....	531
7.1.5 Available Liquidity by Party – Query Screen	531
7.1.6 Available Liquidity by Party – List Screen	531
7.1.7 Available Liquidity on Banking Group Level – List Screen.....	532
7.1.8 BICs – Query Screen	532
7.1.9 BICs – List Screen.....	532
7.1.10 Broadcasts – Query Screen	532
7.1.11 Broadcasts – List Screen	532
7.1.12 Broadcast – Details Screen.....	532
7.1.13 Broadcast – New Screen.....	532
7.1.14 Business Cases – Query Screen	534
7.1.15 Business Cases – List Screen	534
7.1.16 Cash Account Reference Data – Query Screen	535
7.1.17 Cash Account Reference Data – List Screen.....	535
7.1.18 Cash Account Reference Data by MFI – Query Screen	535
7.1.19 Cash Account Reference Data by MFI – List Screen	535
7.1.20 Cash Transfer Order Subtotals by Status – List Screen	535
7.1.21 Cash Transfer Order Totals by Account – List Screen	535
7.1.22 Cash Transfer Order Totals by Party – Query Screen.....	535
7.1.23 Cash Transfer Order Totals by Party – List Screen	535
7.1.24 Cash Transfer Order Totals by Status – List Screen	535
7.1.25 Cash Transfers – Query Screen	535
7.1.26 Cash Transfers – List Screen.....	535
7.1.27 Cash Transfers – Details Screen	549
7.1.28 Cash Transfers – Manual Reversal Booking RTGS – Pop-up.....	549
7.1.29 Cash Transfers – Manual Reversal Booking T2S – Pop-up	550
7.1.30 Cash Transfers – Manual Reversal Booking TIPS – Pop-up.....	551
7.1.31 Cash Transfers – Modify Earliest Debit Time – Pop-up.....	553
7.1.32 Cash Transfers – Modify Latest Debit Time – Pop-up	553

1 Introduction to CLM

The Eurosystem provides market infrastructural services for payment and securities settlement called TARGET Services. To be informed on central bank (CB) liquidity and to perform central bank operations (CBOs), the Eurosystem offers the T2 Service and, within this service, the Central Liquidity Management (CLM) component.

CLM provides information on central bank liquidity and managing credit lines and central bank operations. In addition, CLM is the central component for funding the Real-Time Gross Settlement (RTGS), TARGET2-Securities (T2S) and TARGET Instant Payment Settlement (TIPS). Therefore CLM features main cash accounts (MCAs). The MCAs are used for the settlement of CBOs and the management of credit lines (CLs).

CLM is a multi-currency system designed to carry out settlement in euro and non-euro central bank money. Communication with CLM occurs in an application-to-application (A2A) mode between CLM actors and CLM and on a user-to-application (U2A) basis via the graphical user interface (GUI).

CLM interacts with the following other common T2 components:

- I The Eurosystem Single Market Infrastructure Gateway (ESMIG), featuring central authentication, authorisation and user management
- I Common Reference Data Management (CRDM), which allows authorised users to set up, maintain and query all reference data (RD) that T2 Services share for their processing activities
- I Data Warehouse (DWH), which either provides queries or reports the data for historical, statistical and regulatory reporting
- I Business Day Management (BDM), which shows the schedule and calendar for all components and currencies
- I The Billing component (BILL), which provides the functionalities for the aggregation of the daily billable items

2 Overview of the UHB

The User Handbook, hereinafter referred to as UHB, aims to facilitate the use of the GUI. It is intended for all GUI users, regardless of the focus of their activity and outlines the full range of functionalities available in U2A mode. The UHB provides detailed reference information on all GUI screens and step-by-step instructions for typical workflows, referred to as use cases.

Target audience

The target audience of this UHB consists mainly . By referring to the table of contents, each reader can identify the relevant parts.

There ~~will be~~ is a separate UHB describing the operator functionality. For this reason, those functions that are exclusively relevant for the operator are not described within this UHB. However, if a function is available for multiple audiences (e.g. for operators and central banks), this is still indicated.

The UHB is part of the functional documentation and complements the general, technical and detailed specification of the user detailed functional specifications (UDFS), which can be found on the ECB's website. Although the UDFS focuses mainly on the A2A, specific sections/chapters contain detailed descriptions of the business concepts used in , which are also relevant when using the GUI. In addition, the UHB provides helpful information on the design and implementation of the GUI.

2.1 UHB Methodology

Several symbols and methodological elements are used throughout the UHB to help readers keep an overview and find the desired information quickly. All pages of the main UHB chapters have a similar page layout. The reader can find four different elements:

- | The header, indicating the chapter and sub-chapter title
- | The margin column on the left side of each page, which is used for sub-headings and information signs
- | The text column, containing key information, tables and screenshots
- | The footer, displaying the document's name and version as well as the page number

2.2 UHB Structure

The UHB is divided into seven chapters:

Chapter 1

The chapter **Introduction to** provides the reader with a general overview of the design and features.

Chapter 2

The chapter **Overview of the UHB** explains the content and approach of both the document and the GUI. While the first section explains the methodology of the UHB, the second section outlines its general structure.

-
- Chapter 3** The chapter **Set-up and Login** provides the reader with general guidance on the communication network and services, explaining the technical requirements, the security-related processes and the user administration required to use the GUI.
- Chapter 4** The chapter **GUI Structure** explains the basic elements of the GUI structure, i.e. menu and screen structure. It helps users navigate the system easily by using different screen types. This chapter of the UHB provides more details on the general structure of the GUI such as common buttons and icons. An online help facility can also be found within the chapter.
- Chapter 5** The chapter **Screen Reference Guide – Description of Screens** provides users with a complete overview of different possible screens on . Moreover, users will find all screen descriptions including information on context of usage, screen access, privileges, references and the descriptions of fields and buttons on the respective screens.
- Chapter 6** The chapter **Screen User Guide – Description of Use Cases** provides step-by-step instructions on how users can carry out actions in the GUI. It gives users valuable information on how to complete the use case successfully and helps them verify the results. In addition, users can obtain detailed information on how to and obtain more information on administration and central bank functions.
- Chapter 7** The chapter **Annex** provides users with information on:
- | Error messages and error codes in the context of using the GUI screens
 - | U2A privileges

3 Set-up and Login

3.1 Communication Network and Services

Refer to the Connectivity Guide specified in the ESMIG UDFS document, current version available, for details on the communication network and services.

3.2 Technical Requirements

Before entering the GUI, make sure to implement all necessary preparations described below.

Such preparations may be subject to periodical review/update to comply with changing technical/regulatory scenarios.

Supported

Please refer to the “*ESMIG U2A Qualified Configurations*” annex of the ESMIG UDFS.

Web-browsers and Settings

The complete redefinition of the qualified browsers' set and their related versions and the full replacement of the applet technology will be, then, defined in the context of the Eurosystem Single Market Infrastructure Gateway (ESMIG).

JavaScript is used for validations on the client side therefore 'JavaScript' has to be set to 'enabled'.

Supported**Screen**

The required minimum screen resolution is 1366 x 768 pixel. Screen resolutions below this requirement are not supported and can lead to a deviating appearance and functionality of the GUI.

Resolution and Scaling

Even if the screen resolution fulfils the requirement defined above, it is important to note that scaling options provided by the operating system and the browser (e.g. 125% or 150%) may cause a deviating appearance and functionality of the GUI. If this is the case, the usage of scaling options is not supported.

GUI Access

Users are directed to an initial page named ESMIG portal that ensures proper routing to the web applications the user has been granted to enter.

During the non-optional and optional maintenance windows, GUI access is generally possible, but the functionality can be restricted. The following principles apply during the maintenance windows:

- | The GUI does not determine upfront whether all required infrastructure components are available. This is only determined during runtime where the user is informed via an error message.
- | U2A queries: If all infrastructure components are available, U2A queries can be executed as normal. If infrastructure components are unavailable, new sessions or application reloads fail to initialize. Pre-existing sessions display error messages depending on background actions or actions undertaken by the user.

- I U2A instructions: Even if all infrastructure components are available, U2A instructions are rejected with the error code 503 by the backend. If infrastructure components are unavailable, new sessions or application reloads fail to initialize. Pre-existing sessions display various error messages based on background actions or actions undertaken by the user.

NRO Specific Requirements

Non-Repudiation of Origin (NRO) serves as a proof of the origin of actions. Via a digital signature, it provides legal evidence that a user effectively sent a message or, in the case of U2A, entered an instruction.

In order to perform a digital signature, the user needs a private key associated with a public certificate stored in a device accessible by entering a PIN code. For details on the devices see TARGET Services Connectivity Guide. The same PIN code is used for the signing of selected instructions initiated by the user.

The private key of the user is used to sign the instruction. This signed request is attached to the U2A action. On the server side, the application must verify the signature in order to process the request.

To use the token on a working station or laptop the most recent versions of the following software has to be installed in advance:

- I Ascertia Go>Sign Desktop

It may be necessary to remove other certificates like batches or tokens before plugging in the NRO token.

For details on the required configurations see ESMIG U2A Qualified Configurations document.

The user will be asked to enter the PIN code for signature purposes whenever an instruction is submitted on a screen that is subject to NRO (see chapter [Validations](#) [▶ 65], section 'Digital Signature – NRO').

In the context of the NRO implementation, T2 sends XAdES-C data to Legal Archiving instead of replicating the approach used in TARGET2.

3.3 Security-Related Processes

In order to guarantee a secure and safe handling of the information and to protect customer data provided via the GUI, various security elements have been put into place:

- I Each action requires system or human validation as described in the [validation chapter](#) [▶ 65]
- I The scope of available data and functions is controlled via the management of access rights
- I The security features provided by the network providers and described in their respective user documentation prevent unauthorised access

3.4 User Administration

Registration

Prior to the first GUI access, for each CB, PB and AS a system administrator has to be created. The respective system administrator creates the users which can subsequently access the GUI. Only registered users have access to the GUI. The Registration Guide provides information on how to fill in Registration Forms properly.

The system administrator can only assign predefined sets of access rights and roles to its users, single privileges cannot be assigned. For more information on access rights see the latest version of CRDM UDFS, chapter *'Access rights management'*.

4 GUI Structure

This chapter explains the basic elements of the GUI structure (i.e. structure of the menu and the screens), helping the user to navigate through the system and to use it quickly and efficiently.

The chapter 'Menu Structure' explains the menu structure where screens are grouped functionally. The chapter 'Screen Structure' explains the layout structure common to all screens. The following sub-sections provide details on the different screen types and on recurring elements, such as common field types or buttons and icons.

4.1 Menu Structure

The menu is accessible by clicking on the menu button. The menu is structured into main menu and sub-menu entries. By selecting one of the main menu entries, the corresponding sub-menu entries open to the right. By clicking on a sub-menu entry, a screen will open.

The menu provides access to all available business functionalities. The menu only displays those entries for which the user has the appropriate access rights.

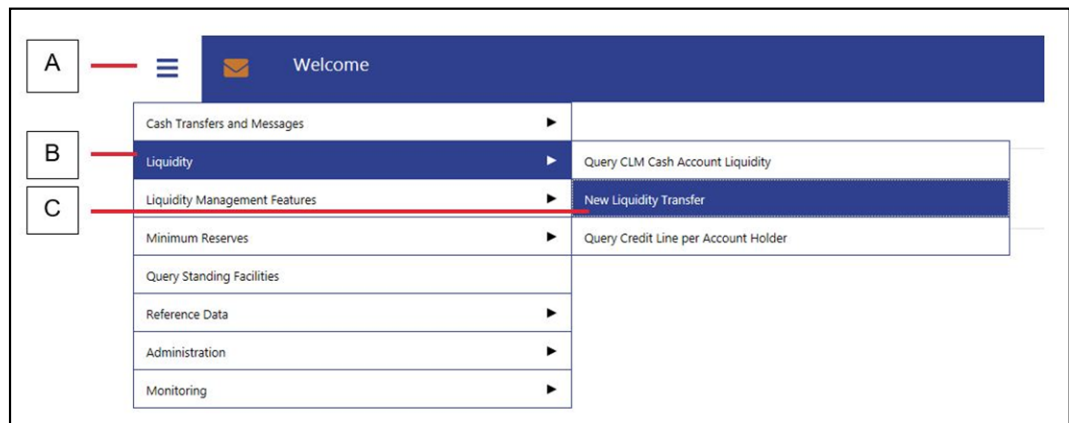

Figure 1 - Menu

Figure
Description

Label	Element
A	Menu button
B	Main menu entries
C	Sub-menu entries

Table 1 - Menu Structure

4.2 Screen Structure

All screens of the GUI follow a standard layout consisting of the following elements:

- I Header
- I Sub-header
- I Content area

Figure 2 - Screen Structure

Figure Description

Label	Element
A	Header
B	Sub-header
C	Content area

Table 2 - Screen Structure

4.2.1 Header

The header appears at the top of every screen. The content and format of the header is common for all screens of the user interface. The header displays the following information to the user:

Figure 3 - Header

Figure
Description

Label	Element	Description
A	TARGET Services T2 Logo	This area shows the TARGET Services T2 logo.
B	Service Component	This area shows the name of the used service (in this case).
C	Technical Environment	This area shows the stage in which the user is operating (e.g. production environment).
D	Business Day	This area shows the business day for which is operating. Format: YYYY-MM-DD
E	User	This area specifies the unique identifier of the user.
F	Release	This area shows the release number of the GUI which the user is logged into.
G	Logo	This area shows the logo of a CB if available.

Table 3 - Header Information

4.2.2 Sub-header

The sub-header appears below the header of every screen. The content and format of the sub-header are common for all screens of the GUI and display the following information:

Figure 4 - Sub-header

Figure
Description

Label	Element	Description
A	Menu button	This button provides access to the main menu and the GUI functions based on the privileges of the user.
B	Broadcast button	This button notifies the user about specific system events as well as operations-related and business-related information. This button is orange when a new broadcast is available and white when there is no new broadcast available. New broadcasts can be accessed by clicking on the broadcast button.
C	Name of current screen	This area shows the name of the current screen.
D	Breadcrumb	This area shows the navigation path of the current screen. Further details can be found in chapter Breadcrumbs [37].
E	Bookmark button	This button allows the user to save most frequently used screens and their settings. This button is only available for Query, List, Display and New Screens but not for Details Screens. Further details can be found in chapter Bookmark [38].

Label	Element	Description
F	Online help button	This button provides a context sensitive description of the current screen. Further details can be found in chapter Online Help [69].
G	User settings button	This button allows the user to select and change GUI preferences for the current session. Further details can be found in chapter User Settings [43].
H	Logout button	This button allows the user to log out of the GUI. When clicking on the button, a pop-up appears that requests the user to confirm or cancel the logout operation.

Table 4 - Sub-header Information

4.2.2.1 Breadcrumbs

The GUI uses breadcrumbs to visualize the window navigation path that the user has used. This navigation path provides an easy option to navigate to previously visited screens.

Figure 5 - Breadcrumb Navigation (with five entries)

The user can click on the listed entries in the navigation path below the screen name in order to return to the respective screen. The screen history (e.g. result set) remains stored.

If the entries of the breadcrumb navigation exceed the available display width, only the first and the last entries are shown, displaying ‘...’ in between representing the other available elements. The user can click on ‘...’ opening a menu which displays all available elements, including the first and the last entry.

Figure 6 - Exceeded Breadcrumb Navigation

A maximum of 12 entries can be stored in the breadcrumb navigation. If this amount of entries is exceeded, the oldest entry on the left will be removed making space for the newest entry on the right.

When returning to a previously visited screen via breadcrumb navigation, all subsequent entries, following the entry the user navigated to, are cleared.

Each external navigation (e.g. a different entry point from the main menu) clears the breadcrumbs.

4.2.2.2 Bookmark

Bookmarks enable the user to save the currently opened screen including all previously entered data on the respective screen. The bookmark function includes adding new bookmarks, organising them in a bookmark bar, modifying and deleting bookmarks.

Detailed information on these functions can be found in the following chapters:

- I [New Bookmark](#) [▶ 38]
- I [Bookmark Bar](#) [▶ 40]
- I [Modify and Delete Bookmark](#) [▶ 41]

4.2.2.2.1 New Bookmark

Context of Usage

The user can click on the 'Bookmark Button' to open the 'Add Bookmark – Pop-up' allowing the user to customize a new bookmark for the currently opened screen.

This function is only available for Query/List, Query/Display and New Screens. Bookmarking a List or Display Screen that follows a Query Screen only saves the respective Query Screen.

Access

This pop-up can be reached in the following way:

- I Sub-header >> [Bookmark button]

Field

Descriptions

ADD BOOKMARK – POP-UP	
Name*	<p>This field requires the user to enter a name for the bookmark which will appear in the bookmark bar. Multiple bookmarks with the same name can be in the same folder.</p> <p>Default value: name of currently opened screen</p> <p>Required format: up to 256 characters</p>
Folder	<p>This field offers the possibility to enter the name of the folder the new bookmark is placed in. The auto-complete functionality shows already existing folders in the bookmark bar.</p> <p>If the user enters a non-existing folder name, a new folder will appear in the bookmark bar after clicking on the 'Submit' button.</p> <p>The user can leave this field empty in order to add the new bookmark to the bookmark bar without adding it to a folder.</p> <p>Required format: up to 64 characters</p>
Bookmarked Screen	<p>This row shows the name of the current screen.</p>
Share with	<p>This section offers the possibility to share the bookmark.</p> <p>PB and AS users can share the bookmark with their own party</p>

ADD BOOKMARK – POP-UP	
	<p>(‘Access’, ‘Modify’), CB users and operators can additionally share the bookmark with their community (‘Access’).</p> <p>Clicking on the checkbox ‘Modify’ in the row ‘Party’ automatically activates the checkbox ‘Access’ in that same row. It further makes the checkbox ‘Access’ non-modifiable.</p> <p>Clicking on the checkbox ‘Access’ in the row ‘Community’ automatically activates the checkbox ‘Access’ in the row ‘Party’. It further makes the checkbox ‘Access’ non-modifiable.</p> <p>A shared bookmark which is modified by a user of a party will be updated for all users of this bookmark.</p>

Table 5 - Add Bookmark – Pop-up

Buttons

ADD BOOKMARK – POP-UP – BUTTONS	
Submit	<p>The user can click on this button to save the bookmark. After submitting, the new bookmark will be placed into the bookmark bar [▶ 40].</p> <p>Depending on the input in the field ‘Folder’, the new bookmark will either be placed into a folder or will be placed as a single entry into the bookmark bar.</p>
Cancel	<p>The user can click on this button to close the pop-up without adding any bookmarks.</p>

Table 6 - Add Bookmark – Pop-up – Buttons

4.2.2.2.2 Bookmark Bar

Context of Usage

The bookmark bar shows the current bookmarks as configured by the user. It shows all bookmarks and folders in alphabetical order, starting with folders.

As soon as the user adds a bookmark, the bookmark bar appears above the header in the GUI. The folders and entries remain saved across sessions in the GUI. If no bookmarks are available or all entries are deleted by the user, the bookmark bar is not displayed.

Screenshot

Figure 9 - Bookmark Bar (with one folder and two bookmarks)

Functionalities

The user can click on a bookmark in order to access the bookmarked screen with all entered data. Clicking on a folder opens a drop-down list with all bookmarks within this folder.

The user can hover over a bookmark to see the full name of the bookmark and the bookmarked screen. While hovering, he can also see the 'Modify' icon which appears to the right of the entry. Clicking on the 'Modify' icon opens the 'Modify Bookmark – Pop-up' which is described in chapter [Modify and Delete Bookmark](#) [▶ 41].

Figure 10 - Hover Functionality Bookmark Bar

A share icon in front of a bookmark entry indicates if a bookmark was shared with the user's party or community.

Figure 11 - Shared Bookmark

4.2.2.2.3 Modify and Delete Bookmark

Context of Usage

The 'Modify Bookmark – Pop-up' offers the possibility to modify or delete an existing bookmark which was selected on the [bookmark bar](#) [▶ 40].

If the user that created the bookmarks is deleted, the bookmarks are deleted as well.

The popup to display a bookmark is opened by clicking on the modify icon next to the bookmark. If the bookmark was shared with the user without the option to modify, the user can only select 'Display Bookmark'. The title of the popup is set to 'Display Bookmark'. The content area of the popup has almost the same content as the 'New Bookmark' pop-up content area, whereas the only change is the bookmark name that is displayed in a text area instead of a text field. All fields are disabled allowing the user to only read information. The button bar has no buttons and therefore is not visible.

Access

The pop-up can be reached in the following way:

- 1 Bookmark Bar >> hover over bookmark the user wants to modify >> [Modify Icon]

Screenshot

Figure 12 - Modify Bookmark – Pop-up

Field
Descriptions

MODIFY BOOKMARK – POP-UP	
Name*	<p>This field shows the current name of the bookmark which appears in the bookmark bar. This value can be overwritten.</p> <p>Default value: current bookmark name</p> <p>Required format: up to 256 characters</p>
Folder	<p>This field offers the possibility to enter the name of the folder the current bookmark will be placed in. The auto-complete functionality shows already existing folders in the bookmark bar.</p> <p>If the user enters a non-existing folder name, a new folder will appear in the bookmark bar after clicking on the 'Submit' button and the previously selected bookmark will be moved to this new folder.</p> <p>If the selected bookmark is currently placed in a folder, the user can delete the folder name from this field in order to remove this bookmark from the folder. The bookmark will appear as a single entry on the bookmark bar after clicking on the 'Submit' button.</p> <p>Required format: up to 64 characters</p>
Bookmarked Screen	<p>This row shows the name of the bookmarked screen.</p>
Share with	<p>This section offers the possibility to share the bookmark.</p> <p>PB and AS users can share the bookmark with their own party ('Access', 'Modify'), CB users and operators can additionally</p>

MODIFY BOOKMARK – POP-UP	
	<p>share the bookmark with their community ('Access').</p> <p>Clicking on the checkbox 'Modify' in the row 'Party' automatically activates the checkbox 'Access' in that same row. It further makes the checkbox 'Access' non-modifiable.</p> <p>Clicking on the checkbox 'Access' in the row 'Community' automatically activates the checkbox 'Access' in the row 'Party'. It further makes the checkbox 'Access' non-modifiable.</p> <p>A shared bookmark which is modified by a user of a party will be updated for all users of this bookmark.</p>

Table 7 - Modify Bookmark – Pop-up

Buttons

MODIFY BOOKMARK – POP-UP – BUTTONS	
Submit	The user can click on this button to save the changes and update the bookmark. A shared bookmark is updated for all users of the bookmark.
Cancel	The user can click on this button to close the pop-up without modifying any bookmarks.
Delete	The user can click on this button to delete the selected bookmark. Clicking on this button closes the pop-up and deletes the respective entry from the bookmark bar.

Table 8 - Modify Bookmark – Pop-up – Buttons

4.2.2.3 User Settings

Context of Usage

The user can click on the 'User Settings Button' to open the 'Modify Settings – Pop-up' allowing the user to specify GUI settings for the current session.

The specified settings are not stored across sessions. After changing the user settings for the current session, the user is redirected to the 'Welcome Screen' of the RTGS GUI.

Access

The pop-up can be reached in the following way:

- I Sub-header >> [User settings button]

Screenshot

Figure 13 - User Settings Button

Figure 14 - Modify Settings – Pop-up – No ‘Act on Behalf’ Selected

Figure 15 - Modify Settings – Pop-up – ‘Act on Behalf’ Selected

Figure 16 - 'Act on Behalf' – Display in Sub-header

Field

Descriptions

MODIFY SETTINGS – POP-UP	
'Please ensure that you have saved your current work before you change these settings!'	A fixed notification displays the information 'Please ensure that you have saved your current work before you change these settings!'. If the user submits changes to the GUI settings while entering data on a specific screen, the current input on a screen will be lost.
Act on Behalf	This field offers the possibility to enter a BIC for which the user works on behalf. The user can enter the BIC manually or search for it by clicking on the smart-select button and opening the Party Reference Data – Query Screen as a pop-up. While searching, the displayed values are restricted to the data scope of the user.

MODIFY SETTINGS – POP-UP	
	<p>Note: In case the user selects a BIC for which he works on behalf, the respective BIC will be displayed in the sub-header after clicking on the 'Submit' button.</p> <p>Required format: 8 or 11 characters</p>

Table 9 - Modify Settings – Pop-up

Buttons

MODIFY SETTINGS – POP-UP – BUTTONS	
Submit	<p>The user can click on this button to submit the modification of GUI settings.</p> <p>Clicking on this button stores the changes locally and closes the 'Modify Settings – Pop-up'. All following requests transmit the stored attributes to the back-end. Therefore, the submitted modifications (e.g. 'Act on Behalf') can restrict the data scope of the user.</p>
Cancel	<p>The user can click on this button to cancel the modification of GUI settings.</p> <p>Clicking on this button discards the current input and closes the 'Modify Settings – Pop-up'.</p>
Delete Act on Behalf	<p>The user can click on this button to delete the BIC for which he works on behalf.</p> <p>Clicking on this button automatically submits the deletion and closes the 'Modify Settings – Pop-up'.</p> <p>This button is only visible if the user has previously selected a BIC for which he works on behalf.</p>

Table 10 - Modify Settings – Pop-up – Buttons

4.2.3 Content Area

The content area is the section of the screen in which the GUI shows functional and business data, input elements or other application-related content. It consists of the notification area, the business content and the button bar. Scrolling is only possible in the content area. The notification area and the button bar always remain visible where they are required within a screen.

4.2.3.1 Notification Area

The notification area displays confirmation and error notifications related to the current screen. It can also inform the user about a change of search criteria.

Success notifications are displayed in green and error notifications are highlighted in red.

Figure 17 - Success Notification

Figure 18 - Error Notification

Notifications regarding the task queue are produced after data submission and show if the data submission was successful or if technical errors occurred inside the application.

In case the user adjusts the search criteria on a list screen after a query has been performed, the notification area indicates the change.

Figure 19 - Change of Search Criteria Notification

Response Notification Box

The response notification box can appear in the notification area showing functional requests with a table visualizing the list entries picked for an action.

The response notification box is also used to notify in case the liquidity information query for at least one account located in TIPS or T2S fails. In this case, the response notification box shows the error code and the error description returned by TIPS or T2S respectively and the service (TIPS or T2S) sending this response. The response notifications are included in a box, containing a table of response notifications and a headline at the top.

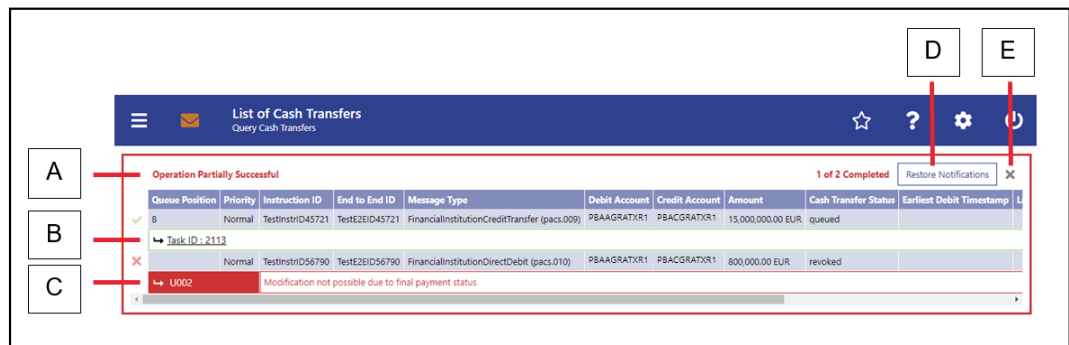

Figure 20 - **Response Notification Box**

Figure
Description

Label	Element	Description
A	Headline	<p>The headline of the response notification box can have three different status labels:</p> <ul style="list-style-type: none"> Operation Successful Operation Partially Successful Operation Failed <p>The headline also gives the user a summary of the error and success notifications contained in the response notification box (e.g. '1 of 2 Completed').</p>
B	Success notification	<p>For success notifications regarding a list entry, the second row (corresponding line) shows the task ID leading to the related item in the task queue.</p> <p>Clicking on the success icon to the left of the entry removes the entry.</p>

Label	Element	Description
C	Error notification	For error notifications regarding a list entry, the second row (plus more if required) shows the errors as corresponding lines containing the error code and the associated error description. Clicking on the error icon to the left of the entry removes the entry.
D	'Restore Notifications' button	The 'Restore Notifications' button restores the content of the complete response notification box and is available until the box is closed. Clicking on this button always restores the content of the response notification box to its initial state. It is not possible to step back iteratively.
E	'Discard' button	The 'Discard' button (represented by the 'x' icon) closes the response notification box.

Table 11 - Response Notification Box

4.2.3.2 Business Content

The business content is the part of the GUI where the user can trigger all business actions. Depending on the screen, it consists of one or multiple sections with different types of input, output or selection options.

A section can be opened by clicking on the expand button next to the section divider. A section can contain multiple sub-sections with further input options. All sections and sub-sections are separated by a divider or a headline.

Closed section The user can open the currently closed section under the divider by clicking on the open button (+) to the left of the section title.

Figure 21 - Closed Section

Open section The user can close the currently open section under the divider by clicking on the close button (-) to the left of the section title.

Figure 22 - Open Section

4.2.3.3 Button Bar

The button bar is a fixed element at the bottom of the content area that remains in place even when the screen has a scrollable content area. The fixed positioning of the button bar allows the user to execute the standard functions associated with the screen without the need to scroll to the bottom of a screen. The buttons in the button bar can vary depending on the selected screen.

Figure 23 - Button Bar

4.3 Screen Types

The GUI consists of different types of screens, each serving a specific function. The user can find all possible ways of accessing a screen in the respective screen description within the Screen Reference Guide.

Query Screen

Query screens allow the user to query a result set by applying query criteria that the user can define. The user can also specify the sorting order of the result list on this screen. After executing a query, the list screen or display screen corresponding to the query opens. Query screens can be accessed via the menu. The result set that the user can query is restricted to the data scope of the user. When there are no mandatory fields on the screen, the user can leave all fields empty to query his whole data scope. The data scope is a restriction definition to enforce limits in data exposure.

List Screen

List screens are displayed after executing a query via a query screen or after clicking on a context menu entry. List screens show a table of data records matching the query criteria. The table lists the total amount of data records in the footer and can show a maximum of 100 entries per result page.

To ensure proper load and response times for the GUI a limit of 2,000 records is available at most. For result sets smaller or equal to 2,000 the real amount of results the query has produced is shown. For result sets larger than 2,000 records, only the first 2,000 records are shown plus the information that the result set is larger than 2,000. With this information the user can determine whether he adjusts the filter criteria (in order to further reduce the result list) or takes a look into the result list produced (with the first 2,000 entries).

The shown data records can usually be right-clicked on which results in opening a context menu with further navigation options. The list of data records can also be exported by clicking on the export button. When using the export functionality, the complete result of the query will be exported regardless of whether the entries are shown in the result list or whether they are not shown because of the limitation to 2,000 records in the GUI.

On list screens, the user also has access to the section 'Search Criteria' in order to modify the values of the previously executed query and refresh the screen accordingly. If only a single data record matches the entered criteria on the query screen and a related details screen exists, the list screen is skipped and the details screen is shown immediately.

- List Screen – Bulk Actions** On certain list screens, bulk actions are possible. The user can click on the list checkboxes next to the respective data records in order to select multiple entries. By right-clicking on one of the selected data records, a context menu opens. This context menu entry only shows those options that can be executed for all selected entries. When the user clicks on a context menu option, the respective action will be performed for all data records individually. After the execution of a bulk action, the results for all selected data records are shown individually in the notification area.
- Details Screen** Details screens provide the user with in-depth information of a previously selected data record that appeared on a list screen. Details screens can be accessed via other screens, e.g. via a context menu on a list screen.
- Details screens can also be accessed if the user queries for a single data record on a query screen.
- Display Screen** Display screens show in-depth information on certain topics such as liquidity. Depending on the screen, they can either be accessed via a query screen, via a button on a related screen or be accessed directly via the menu.
- New Screen** New screens allow the user to enter new data in predefined fields, e.g. in order to enter a payment order or a liquidity transfer (LT) order. New screens can be accessed via the menu or via a button on certain related screens.
- Pop-Up Screen** There are different types of pop-up screens that can be opened by clicking on buttons or context menu entries on other screens. Some pop-up screens are used to modify or display certain values or attributes and some pop-up screens require the user to confirm an action.
- Smart-Select Screen** Smart-select screens can be opened as a pop-up by clicking on the smart-select button next to certain input fields. Smart-select screens usually open a combination of query and the subsequent list screen on which the user can specify search criteria to find the desired option in a result list, e.g. for the input of Business Identifier Codes (BICs). The displayed list allows the user to select and transmit a value to the input field of the screen from which the smart-select screen was opened.

Download and Upload Screen

Furthermore, there are upload and download screens that can be accessed via the menu. A download screen allows the user to define a set of search criteria, similar to a query screen, and immediately download the respective result set as a file. An upload screen allows the user to upload a file while specifying information related to this file.

4.4 Field Types and Properties

Fields appear on all types of screens and allow the user to enter or display information depending on the type of field. The following field types are used:

Input Field

In input fields, the user can enter alphanumeric values. The user has to make sure to comply with the format requirements of the fields which are listed in the Screen Reference Guide.

Figure 24 - Input Field

Input fields can be pre-filled with a default value. The default value can be overwritten.

Figure 25 - Input Field with Default Value

Input Field Error

When the validation of the screen content (e.g. format requirements) returns an error for an input field, the input field with the erroneous value is outlined in red colour. Additionally, a red error icon is shown to the left of the field (see [Common Buttons and Icons](#) [▶ 60]). The user has to make sure to make a valid entry in order to be able to proceed.

Figure 26 - Input Field Error

Read-only Field

Read-only fields are pre-filled and display non-modifiable values. Read-only fields are indicated by grey colour.

Figure 27 - Read-only Field

Inactive Field

The user cannot interact with an inactive field until it is activated by a selection made in a previous field. When the field is inactive, it is coloured in grey. As soon as it becomes active, it is coloured in white.

Figure 28 - Inactive Field

Figure 29 - Activated Field

Mutually Exclusive Fields

Some input fields are mutually exclusive. This means that as soon as one of the mutually exclusive fields is filled with a value, the other field becomes inactive and coloured in grey. As a result, no more input will be possible.

Figure 30 - Mutually Exclusive Fields

List Checkbox

The list checkbox can occur in the first column on a list or smart-select screen. The user can click on the checkbox in order to select or deselect entries from the list. The list checkbox is used when performing bulk actions (see chapter [Screen Types](#) [▶ 49], section 'List Screen – Bulk Actions').

Figure 31 - List Checkbox (example values)

Standard Drop-down List Field

A standard drop-down list allows the user to select one entry from a pre-defined list of possible values.

Figure 32 - Standard Drop-down List Field

Autocomplete List Field

In an autocomplete list, the user can enter characters that the field uses to filter among the available options in the list.

Figure 33 - Autocomplete List Field

Multi-Select List Field

A multi-select list allows the user to select multiple possible values for one field by clicking in the field and activating the checkbox next to the respective list entries. After finishing the selection, the field indicates how many items have been selected. It also offers the possibility to select or deselect all list items by clicking on the checkbox to the left of the

field. A multi-select list can be combined with other list types, e.g. the autocomplete list as shown in the figure below.

Figure 34 - Multi-Select List Field

Smart-Select Field

The user can enter a value directly into the input field, or click on the smart-select button on the right leading to a smart-select screen where one or more search criteria can be used to find the desired option.

Figure 35 - Smart-Select Field

Smart-Select Multi List Field

The smart-select multi list allows the user to select multiple values for one field by clicking on the smart-select button on the right leading to a search screen where one or more search criteria can be used to find one of the desired options.

Figure 36 - Smart-Select Multi List Field

Date and Time Picker

The user can enter a date and time manually or select a date and time using the pop-up which opens by clicking into the input field or clicking on the calendar button on the right side of the field. The time zone is shown on the right side within the field.

Figure 37 - Date and Time Picker

Figure 38 - Date and Time Picker – Pop-up

Date Picker

The user can enter a date manually or select a date using the pop-up which opens by clicking into the input field or clicking on the calendar button on the left side of the field. The pop-up only allows the selection of dates which are allowed for the respective field.

Figure 39 - Date Picker

Figure 40 - Date Picker – Pop-up

Time Picker

The user can enter a time manually or select a time using the pop-up which opens by clicking into the input field or clicking on the clock button on the right side of the field. The time zone is shown on the right side within the field.

Figure 41 - Time Picker

Figure 42 - Time Picker – Pop-up

Field Properties

Data Scope of a User

The data scope of a user determines the set of data this user is allowed to inspect and to act on.

The data scope is depending on the hierarchy of parties (see chapter ‘Data scope’ and ‘Configuration of users’ in the CRDM UDFS) and the types of groups (see chapter ‘Common Reference Data Objects’ and ‘Account Configuration’ in the CRDM UDFS and usage description in chapter ‘Types of groups’ in the UDFS).

It is also depending on the co-management (see chapter 'Common Reference Data Objects' and 'Account Configuration' in the CRDM UDFS and usage description in chapter 'Functionalities' in CLM UDFS) as defined in CRDM.

Every user is assigned the data scope of the party the respective user is directly linked to.

When performing a query with certain search criteria, the result set the user can see on the subsequent list or details screen is determined as an overlap of the following two principles: the entered search criteria on the one hand and the data within his data scope on the other hand.

For queries of reference data, one or more specific values of a result set can be masked due to restrictions in the data scope. Fields that contain values to be masked are overlaid by a lock icon.

With regard to transaction data, the data scope of a user is derived from the data scope of the related reference data. For example a cash transfer is within the data scope of the user when the credit account or debit account included in the cash transfer is within the data scope of the user.

There can be restrictions placed on some actions for certain elements within the data scope of the user. For example a user is not allowed to increase the queue position of a cash transfer order where the credit account is owned by this party and the debit account is owned by another party. If a context menu is only available for a subset of the elements within the data scope of the user then this is explicitly mentioned in the description of the respective context menu.

Characters

In the field description of the Screen Reference Guide, the required character format for input fields is listed.

operates in British English and uses the UTF-8 character set to enter data. Furthermore, there is a validation for input fields to make sure that the input is compliant with the FIN X extended character set. However, some input fields are limited to the FIN X restricted character set. For the relevant fields, this is validated during data input.

Fields with FIN X extended character set

Ensure a given maximum length

Only allow the special characters: / \ - ? : () . , ' + ! # \$ % & * = ^ _ ` { | } ~ " ; < > @ []

Do neither start nor end with a blank

Fields with FIN X restricted character set

Ensure a given maximum length

Only allow the special characters: / - ? : () . , ' +

Do neither start nor end with a blank

FIN X restricted fields The following table lists the fields that are limited to the FIN X restricted character set. It also lists the screen on which the field appears. If the column 'Section' is filled it means that the restriction only applies to the field in this specific section of the respective screen. If the column is empty, the restriction applies to all occurrences of this field on the respective screen.

Field	Screen	Section
Business Message ID (Generated)	Financial Institution Credit Transfer – New Screen	
End To End ID	Financial Institution Credit Transfer – New Screen Liquidity Transfer – New Screen	
ID	Financial Institution Credit Transfer – New Screen	
Instruction ID	Financial Institution Credit Transfer – New Screen	
Member ID	Financial Institution Credit Transfer – New Screen	
Proprietary	Financial Institution Credit Transfer – New Screen	
Subject	Broadcast – New Screen	

Table 12 - List of fields subject to FIN X restricted character set

BIC Validator The GUI uses a validator for fields that require the input of a BIC. The input can either be eight or eleven characters. In case the user enters eight characters, the entry will automatically be completed with three 'XXX' at the end (BIC8+XXX). Fields that use the BIC validator are indicated by the description 'Required format: 8 or 11 characters'.

IBAN Validator The GUI uses a validator for fields that require the input of an IBAN. The validator checks for the correct pattern of the characters in the input field. It also validates the checksum.

Amounts Amounts are displayed with a full stop as decimal separator and with a comma as thousands separator. While negative amounts are displayed in red and marked with a '-', the user can only type amounts that are greater than or equal to zero into input fields.

Case Sensitivity The GUI is case sensitive and differentiates between upper and lower case in terms of data input for input fields. Fields that are only filled with blanks are not processed by . When a field entry starts or ends with a blank, those blanks are deleted automatically.

- Amount Entries** When entering amounts into input fields, the GUI does not add fractional digits automatically. If the user wishes to enter fractional digits, he has to use a decimal point (.) to separate the digits in front of the decimal point from the fractional digits.
- For better readability, the GUI does however automatically add thousands separators (,) when the user enters amounts.
- Quick Input Entries** To facilitate a quicker input, the user can enter the following characters in fields that require the input of amounts:
- | The character T represents thousands, thereby allowing the user to enter three zeros directly
 - | The character M represents millions, thereby allowing the user to enter six zeros directly
 - | The character B represents billions, thereby allowing the user to enter nine zeros directly
- The input of the respective character immediately converts the entry into a value with the corresponding number of zeros.
- For quick input entries the GUI is not case sensitive.
- Country Codes** Certain input fields require the entry of country codes by the user. Country codes have to be entered according to the alpha-2 code specified in ISO 3166-1.
- Currency Codes** Certain input fields require the entry of currency codes by the user. Currency codes have to be entered according to the 3-digit code specified in ISO 4217.
- External Code Sets** The ISO 20022 messages use external code sets that can be entered in certain input fields.
- Unlike other ISO 20022 code sets, the codes listed in the external code sets are not included in the relevant message scheme. The purpose of externalising these codes is to be able to update the code sets (e.g. add new codes) without impacting the messages themselves and, hence, without requiring the development of a new version of the messages that use these code sets.
- The external code sets can be downloaded from the following ISO 20022 page:
https://www.iso20022.org/external_code_list.page
- As the external code sets will be updated by the International Organization for Standardization (ISO) roughly every three months, the values of these sets are in general not included in the UHB. Please consider that in cases when the values are explicitly listed in the UHB, the current external code sets published by ISO will be leading.
- Wildcards** A wildcard is a placeholder for one or more characters that can be used to broaden a search and its results. The user can enter a wildcard character in specific input fields when searching for data.

When an input field allows the usage of wildcards, this is indicated by the suffix '(wildcards allowed)' in the label of the field.

There are two characters that can be used for a wildcard search:

- | The asterisk (*) – to specify any number of characters
- | The question mark (?) – to specify exactly one unknown character

The wildcard search requires the input of at least two characters prior to the asterisk and question mark. The wildcard characters can only be used at the end of the search expression, not in the beginning or in the middle.

Mandatory Content

In the GUI, mandatory fields are marked with an asterisk (*) in the label. On some screens, whole sections and not just single fields are marked as mandatory. This is because the sections have to include certain information that however can be provided by different input fields. An asterisk next to the section divider indicates mandatory sections. All mandatory fields and sections have to be filled in before the user can proceed.

Keyboard Navigation

The user can navigate the GUI with the keyboard for a more effective workflow.

The following general principles apply to the keyboard navigation:

- | All interaction elements are reachable via keyboard. Interaction elements are elements that are used to trigger an action or modify data.
- | Elements that are currently in focus via keyboard navigation are visually highlighted.
- | When opening or reloading a screen or pop-up, the focused element is the first section divider. If the screen or pop-up does not have a divider, the focus is positioned on the first interaction element.
- | Each screen and interaction element is navigated from left to right and from top to bottom.

The user can utilise the following keys and shortcuts while navigating via keyboard:

- | The 'Tab' key navigates to the next interaction element.
- | The 'Shift + Tab' shortcut navigates to the previous interaction element.
- | The 'Up' and 'Down' arrow keys move the cursor within a scrollable or paging element (e.g. a list or a menu).
- | The 'Left' and 'Right' arrow keys navigate between the menu hierarchy.
- | The 'Enter' key triggers an action for the element in focus.
- | The 'Esc' key triggers an action to dismiss.
- | The 'Ctrl + M' shortcut opens the main menu.
- | The 'Ctrl + Y' shortcut opens the context menu related to the item in focus. The context menu can also be opened via the context menu button described in chapter [Common Buttons and Icons](#) [▶ 60] or the menu key on the keyboard.

Wording

For elements such as buttons, links or context menu entries the UHB uses the phrasing ‘to click on’, even though the user can also trigger these elements via keyboard navigation.

Mouse-over Function

For certain columns on list screens, there is a mouse-over function that allows the user to see additional information for specific list entries. In order to use this function, the user has to hover the mouse over the specific list entry for which the additional information is to be shown.

The respective field description in the Screen Reference Guide indicates if the mouse-over function is available for a specific column.

4.5 Common Buttons and Icons

While working with the GUI, the user will find that some buttons and icons appear regularly.

Open Button

The user can click on this button to open a section of a screen. This button is positioned to the left of a divider of a section.

Figure 43 - Open Button

Close Button

The user can click on this button to close a section of a screen. This button is positioned to the left of a divider of a section.

Figure 44 - Close Button

Page Number Button

The page number button indicates the number of a page of a result list by showing a number. The user can click on the respective page number button in order to directly jump to that page of a list.

Figure 45 - Page Number Button

Active Page Number Button

The active page number button is coloured in a darker blue and indicates on which page of a result list the user is currently located.

Figure 46 - Active Page Number Button

First Page Button The user can click on this button to return to the first page of a list.

Figure 47 - First Page Button

Preceding Page Button The user can click on this button to return to the previous page of a list.

Figure 48 - Preceding Page Button

Following Page Button The user can click on this button to go to the following page of a list.

Figure 49 - Following Page Button

Last Page Button The user can click on this button to go to the last page of a list.

Figure 50 - Last Page Button

Refresh Button The refresh button is positioned in the top right of the results divider on list screens. The user can click on this button to reload the content inside the results divider with the previously used search criteria.

Figure 51 - Refresh Button

The last refresh of the results set is indicated by a timestamp to the left of the refresh button.

Figure 52 - Refresh Button with Timestamp

Export Button The user can click on this button to export all data that the executed query has delivered. The complete result set will be exported, not only the visible rows limited to 2,000 entries in the GUI. Upon clicking on this button, the download starts immediately.

The format of the downloaded file is CSV and the name of the file includes the component name, the screen name, the name of the table header and a timestamp.

The exported file is structured into a header and a body. The header is separated from the body by a double slash (//).

The header of the exported file includes the component name, the screen name, the name of the table header, the name of the user and a timestamp. In the row below, the used search criteria are contained.

The body of the file includes the data of the query in a CSV file – using semicolons as field delimiters. For amounts displayed in the GUI, the corresponding currency will be contained in a separate column in the exported file.

Figure 53 - Export Button

Context Menu Button

The user can click on this button to open the available context menu options of the list entries. This button is equivalent to a right-click with the mouse while using a touchpad or keyboard navigation. The button is positioned at the very right of the respective list entries.

Figure 54 - Context Menu Button

Add Button

The add button can appear to the right next to the divider of a section that contains reoccurring groups. The user can click on this button in order to add a new sub-section to the divider.

Figure 55 - Add Button

Delete Button

The delete button can appear to the right next to the divider of a section that contains reoccurring groups. The user can click on this button in order to remove a sub-section from the divider.

Figure 56 - Delete Button

‘+’ Button

This button can appear to the left of certain input fields. The user can click on this button in order to add new lines to an input field.

Figure 57 - ‘+’ Button

‘-’ Button

This button can appear to the left of certain input fields. The user can click on this button in order to remove lines from an input field.

Figure 58 - '-' Button

Smart-Select Button

This button can appear within input fields that have a smart-select option. It opens a smart-select screen where one or more search criteria can be used to find the desired option.

Figure 59 - Smart-Select Button

Calendar Button

This button can appear within input fields that allow the user to select a date. It opens a date picker as a pop-up.

Figure 60 - Calendar Button

Clock Button

This button can appear within input fields that allow the user to select a time. It opens a time picker as a pop-up.

Figure 61 - Clock Button

Screen-Specific Buttons

The button bar contains a certain set of screen-specific buttons such as the 'Submit' button or the 'Reset' button. The buttons in the button bar can vary depending on the screen and are described for each screen individually in the Screen Reference Guide. If the user enters data that does not pass the front-end validation, the 'Submit' button in the button bar is disabled.

'More than or equal to' Icon

This icon can appear to the left of fields that require the input of a date, time or amount. When entering an amount, this icon indicates 'more than or equal to'. When entering a date/time, this icon indicates 'after or equal to'.

Figure 62 - 'More than or equal to' Icon

'Less than or equal to' Icon

This icon can appear to the left of fields that require the input of a date, time or amount. When entering an amount, this icon indicates 'less than or equal to'. When entering a date/time, this icon indicates 'before or equal to'.

Figure 63 - 'Less than or equal to' Icon

'Less than' Icon This icon can appear to the left of fields that require the input of a date, time or amount. When entering an amount, this icon indicates 'less than'. When entering a date/time, this icon indicates 'before'.

Figure 64 - 'Less than' Icon

'Equal' Icon This icon can appear next to an input field that requires the input of a date, time or amount to be used as a filter criteria which needs to be matched exactly.

Figure 65 - 'Equal' Icon

Arrow Icon This icon can appear on specific screens. Upon clicking on this icon, the user is redirected to certain screens while transmitting the values of the current screen.

Figure 66 - Arrow Icon

Success Icon This icon indicates that an operation has been completed successfully.

Figure 67 - Success Icon

Error Icon This icon indicates that some type of error occurred. By hovering the mouse over the error icon, the user can get further information on the error.

Figure 68 - Error Icon

'x' Icon This icon can be used to close boxes or pop-ups.

Figure 69 - 'x' Icon

Loading Screen Icon This animated icon indicates that a screen is loading or being updated.

Figure 70 - Loading Screen Icon

Lock Icon

This icon indicates that the user is not allowed to see a value of one or more specific fields in a result set due to restrictions in his data scope.

Figure 71 - Lock Icon

4.6 Validations

The data entered in the GUI undergoes a validation process consisting of up to three phases.

**Front-end
Validation**

As a first phase of the validation process, the front-end validation takes place without communication with the back-end. This occurs while the user is entering data. The front-end validation may include field validations and cross-field validations. The field validation verifies that the entry complies with the required format. The cross-field validation checks the data consistency between two or more fields in relation to each other. In case of a front-end validation error, a red error icon will be shown next to the erroneous input field. By hovering the mouse over the error icon, the user can get further information on the error.

The front-end validation assists the user in detecting erroneous data as early as possible.

**Synchronous
Back-end
Validation**

After a successful front-end validation, the user can submit data by clicking on the relevant button.

Data submitted to query information is subject to consistency checks in the back-end (e.g. regarding mandatory information needed to execute the query). The user is informed in the notification area if a consistency check fails.

Data submitted for further processing is subject to immediate business validations in the backend. The user is informed about the result of these validations in the notification area. There are two different message types available, the error notification and the success notification.

The chapter References for Error Messages for GUI Screens contains the error codes that may appear in the notification area if the synchronous back-end validation fails.

After the successful synchronous back-end validation of a GUI instruction a task is created to asynchronously process the data entered or modified in the GUI. The processing of such a task encompasses the asynchronous back-end validation. In contrast to GUI instructions no tasks are created for GUI queries.

Asynchronous Back-end Validation Due to the asynchronous processing of tasks in the task queue, the result of this validation phase will not be available immediately and it will not be displayed within the screen on which the data has been entered. The user can query the 'Task Queue – Query Screen' for further information.

The error messages resulting from the asynchronous back-end validation are not in the scope of the UHB. For details on these error messages see UDFS, chapter '*Index of validation rules and error codes*'.

General remarks

With regard to

- | the creation of payment orders in the GUI and
- | the contingency upload of A2A files and messages in U2A,

only a subset of business validations is included in the synchronous back-end validation. The remaining business validations are part of the subsequent asynchronous back-end validation.

For all other GUI instructions the whole set of business validations is part of the synchronous back-end validation.

The execution validations are irrespective of the kind of GUI instruction included in the asynchronous back-end validation.

The following table gives an overview of the validation process:

		U2A ACTIONS		
Type of validation	Check result shown in the GUI	Queries	Creation of payment orders in the GUI, contingency upload of A2A files and messages	All other GUI instructions
Front-end validation	yes	Data consistency checks	Data consistency checks	Data consistency checks
Synchronous back-end validation	yes	Data consistency checks	Initial business validations, NRO validation	All business validations, NRO validation
Asynchronous back-end validation	no	n.a.	Subsequent business validations, execution validations	Execution validations

Table 13 - Validation process

4-Eyes Mode Depending on the access rights setup, the user can operate the GUI in 2-eyes or in 4-eyes mode. The 2-eyes mode and the 4-eyes mode apply for the set-up, the modification and for any kind of deletion of data. If the 4-eyes mode is used, the actions have to be confirmed by a second user in order to be processed.

A party can decide via allocation of roles (i.e. a dedicated set of privileges including privileges in 2- and 4-eyes mode) whether a specific task can be done in 2-eyes or 4-eyes mode in U2A. This allocation is relevant for all users of the respective party. It is not possible to choose the same privilege in both modes.

First Initial User In 4-eyes mode the **first initial** user enters, changes or deletes the data on a screen and afterwards submits the action by clicking on the submit button in the button bar. The success notification appearing after successful validation includes a task ID. For the final execution, a second user is needed to confirm the action in the 'Task Queue – Details Screen'.

Second User After the **first initial** user has entered, changed or deleted the data, a second user (with the required privilege) has to confirm or withdraw the action in the 'Task Queue – Details Screen'.¹ As soon as the data changes are confirmed, marks them as confirmed and forwards them for further processing. If a task is altered, the original task is revoked and the new task is waiting for approval, if the altering user also only has 4-eyes mode privileges.

Digital Signature – NRO In order to ensure NRO for critical transactions, the use of a digital signature has been implemented for specific screens. The user will be asked to enter a PIN code for signature purposes whenever an instruction is initiated. With the entry of the PIN code, a digital signature is attached to the instruction.

After the user clicks on the relevant button, e.g. 'Submit' on the screen, the Ascertia Go>Sign Desktop client is called from the GUI opening a pop-up. This pop-up will handle the PIN code entry and validation against the signature stored on the device. The pop-up offers the possibility to confirm the PIN entry ('OK') or to cancel the PIN entry ('Cancel') and return to the previous screen.

Figure 72 - NRO – Enter PIN – Pop-up

The following principles apply to the digital signature:

¹ In case of a modification, technically the original task is deleted and a new task with the modified values is created.

- I The acceptance of the signature is not a confirmation of the execution of the GUI instruction in the back-end. The user signature is only used to confirm that the user authorised an entry. In case the back-end validation returns an error, the signature process has to be repeated after the correction of data.
- I Generally, only one instruction at a time can be signed. There are, however, specific use cases which can be processed via bulk action. This allows the user to initiate and therefore sign more than one instruction of the same use case at the same time.
- I In case of 4-eyes mode, the user who initiates the instruction and the user confirming the instruction both have to sign individually using their respective certificates.
- I The PIN is blocked when it is entered five times in a wrong way.

Use case	Bulk action possible
This table lists the use cases for which the NRO feature is implemented. It further shows if a processing via bulk action is possible.	
Authorise/cancel minimum reserve infringement penalty payment	
Confirmation/Withdrawal of 4-eyes task entries	
Create and modify credit line	Yes
Enter broadcast	
Enter current liquidity transfer order	
Enter current reservation	
Enter marginal lending on request	
Enter overnight deposit	
Enter payment order – pacs.009	
Enter/modify minimum reserve requirement	Yes
Manual reverse booking	Yes
Modify 4 eyes tasks	
Modify cash transfer order	Yes
Modify current reservation	
Modify minimum reserve fulfilment	Yes
Release cash transfer order of blocked party	Yes

Use case	Bulk action possible
Reorder payment in queue	Yes
Repeat sending	Yes
Revocation of payment	Yes
Simulate a positive receipt	Yes
Simulate receipt	Yes
Upload A2A file or message via U2A	

Table 14 - Use Cases with NRO Validation

4.7 Online Help

The online help is a context sensitive display of the content of the UHB. It can be accessed from the GUI by clicking on the online help button which opens the screen description corresponding to the current screen in a new tab.

The table of contents on the left side offers the possibility to navigate to other parts of the online help.

Figure 73 - Online Help Button

Figure 74 - Online Help

Figure
Description

Label	Element	Description
A	TARGET Services T2 Logo	This area shows the TARGET Services T2 logo. Clicking on the logo opens the welcome screen of the online help, providing information on the author, version number and publication date of the UHB.
B	Breadcrumb	This area shows the navigation hierarchy to the currently opened UHB chapter. It contains links to the higher-ranking chapters in the navigation structure of the online help.
C	Content area	This area is the main element of the online help displaying the content of the UHB.

Label	Element	Description
D	Home button	This button opens the welcome screen of the online help, providing information on the author, version number and publication date of the UHB.
E	Search field	This field allows the user to search for specific keywords. After executing the search, a result list with the relevant UHB chapters will be displayed.
F	Table of contents	The table of contents serves as a navigation element providing access to the content of the UHB by structuring it hierarchically into different chapters and sub-chapters. The currently opened chapter is highlighted in orange.

Table 15 - Online Help

5 Screen Reference Guide – Description of Screens

The screen reference guide offers an overview of all GUI screens that are available in U2A mode. Each screen description focuses on a specific screen and describes the elements (e.g. fields or buttons) that it contains. The structure for each screen description follows the same principle and contains the following elements.

Context of Usage The context of usage describes the content and functions of the screen and the possible actions that can be performed. It also describes special features or restrictions of the screen and the relations to other screens of the GUI.

Screen Access The screen access section lists every possible way to access a screen. This includes navigation via the menu, via other screens as well as navigation via context menus and buttons. Menu entries that have to be clicked on are indicated by '>>' in the respective order. Buttons that have to be clicked on are indicated by '[Button Name]' and context menu entries that have to be clicked on are referred to as shown in the example below. Context menu entries can be accessed by right-clicking on a list entry on a list or details screen.

Example

Navigation via the menu:

Cash Transfers and Messages >> Messages – Query Screen

Navigation via other screens:

Cash Transfers and Messages >> Messages – Query Screen >> [Submit]

Navigation via context menu:

Cash Transfers and Messages >> Messages – Query Screen >> [Submit] >> Context menu entry 'Details'

Privileges The privileges section lists all necessary privileges in order to access a screen and to use its main functions. Privileges that are only necessary to use a specific function of the screen are listed in the description of the respective button, context menu entry or field.

References The references section lists all use cases of the Screen User Guide that include the respective screen. The use cases are linked so that the user can jump to the necessary information in order to complete common workflows.

Screenshot A screenshot of the respective screen is provided in order to serve as orientation when working with the GUI. All screenshots are based on the maximum of access rights, so deviations are possible if the user does not own all privileges which are necessary to use the screen to its full extent. In addition, deviations between the screenshot and the field/button descriptions are possible in a case of mutually exclusive functions or based

on a specific selection the user has made. Values shown on the screenshot may also deviate from the default values indicated in the description.

Field Descriptions

The field descriptions section provides the relevant information related to a respective field such as field function, possible values, mandatory content (*) or required format for the input of data.

The field descriptions are structured in table format with a separate table for each section of the screen. The title cell of each table serves as a navigation element that contains the section of the screen in which the described fields appear. The following figure explains the structure of a field description.

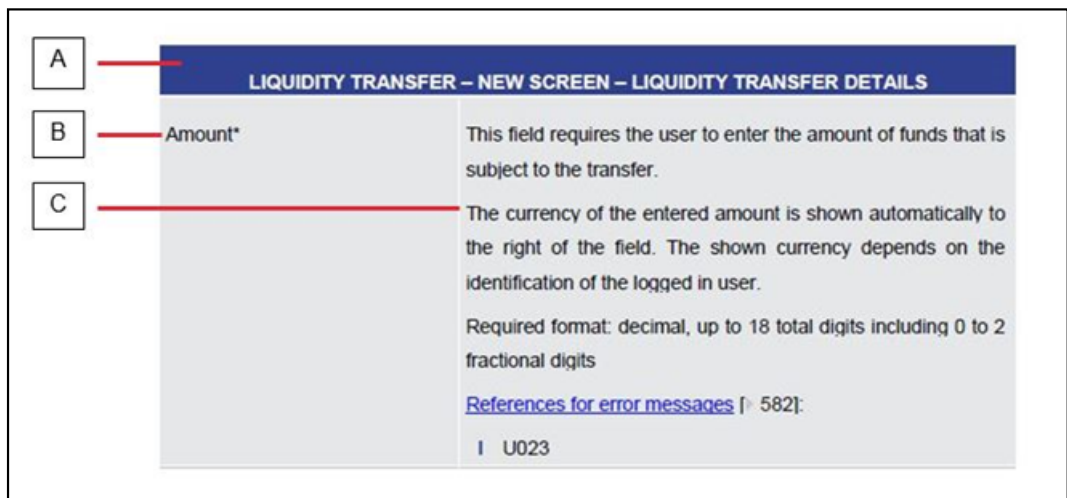

Figure 75 - Structure of a Field Description

Label	Element	Description
A	Title cell	The title cell shows in which section of the screen the field appears and serves as navigation help for the user.
B	Field name	The field name is the name of each field on the screen. Mandatory fields are marked with an asterisk after the field name.
C	Field description	The field description indicates the function of the field and the required or possible activity by the user. It also contains information regarding the relationship to other fields, possible values or format requirements as well as additional field-specific information.

Table 16 - Structure of a Field Description**Buttons**

All buttons specific to the screen are listed and described in a table. The buttons of the button bar are listed at the end of each screen description. On some screens, buttons can appear in the business content part of the content area. In this case, they are listed and described at the position of the screen at which they appear. Therefore, tables that describe fields and tables that describe buttons can alternate. The word 'Buttons' in the title cell of a table indicates that a table describes a button.

Context Menu

All context menu entries that are available on a specific screen are listed and described in a table at the position of the screen at which they appear. Therefore, tables that describe fields and tables that describe context menu entries can alternate. The word 'Context Menu' in the title cell of a table indicates that a table describes a context menu.

**Wording**

Screens involving a cash transfer do not differentiate between a cash transfer order and a cash transfer (settled cash transfer order). Accordingly, the UHB only differentiates between cash transfers and cash transfer orders if relevant for a specific function. In all other functions a cash transfer also means a cash transfer order.

5.1 Cash Transfers and Messages

5.1.1 Cash Transfers – Query Screen

Context of Usage This screen offers the possibility to query cash transfers in CLM. It is possible to query intra-service and inter-service cash transfers that include a CLM account.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Entry Timestamp' in descending order.

The cash transfers matching the data of the search fields are shown in the [Cash Transfers – List Screen](#) [▶ 93].

Screen Access This screen can be reached in the following way:

- | Cash Transfers and Messages >> Cash Transfers – Query Screen

Privileges To use this screen the following privilege is needed:

- | CLM_QueryCashTrans

References This screen is part of the following use case:

- | [Query/List cash transfers](#) [▶ 471]

Table 25 - Cash Transfers – Query Screen – Buttons

5.1.2 Cash Transfers – List Screen

Context of

This screen lists all cash transfers meeting a defined set of criteria.

Usage

These criteria were either defined on the [Cash Transfers – Query Screen](#) [75] or implicitly defined when opening this screen via a context menu.

Screen Access

This screen is selectable in screens displaying entries related to cash transfers (e.g. messages, account postings) via context menu entry (e.g. ‘Display Cash Transfer’).

It can further be reached in the following way:

- | Cash Transfers and Messages >> Cash Transfers – Query Screen >> [Submit]

Privileges

To use this screen the following privilege is needed:

- | CLM_QueryCashTrans

References

This screen is part of the following use cases:

- | [Query/List cash transfers](#) [471]
- | [Revocation of payment](#) [473]
- | [Reorder payment in queue](#) [474]
- | [Modify earliest debit timestamp](#) [474]
- | [Modify latest debit timestamp](#) [475]
- | [Release cash transfer order of blocked party](#) [476]
- | [Manual reverse booking](#) [477]
- | [Simulate a positive receipt](#) [483]

Screenshot

Figure 85 - **Cash Transfers – List Screen**

Field Descriptions

Note: For the description of the attributes and their respective values in the ‘Search Criteria’ section see chapter [Cash Transfers – Query Screen](#) [▶ 75]. The columns displayed in the result list depend on the values selected in the field ‘Selection’ on the ‘Cash Transfers – Query Screen’.

CASH TRANSFERS – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
Queue Position	<p>This column shows the position of the cash transfer in the respective queue.</p> <p>This column only contains a value if the respective cash transfer is queued.</p>
Instruction ID	<p>This column shows the instruction identification of the cash transfer which can be assigned by an instructing party.</p> <p>The instruction identification is a point to point reference that can be used between the instructing party and the instructed party to refer to the individual instruction.</p>
End to End ID	<p>This column shows the end-to-end identification of a cash transfer which is assigned by the initiating party.</p> <p>This identification is passed on, unchanged, throughout the entire end-to-end chain. It can be used for reconciliation or to link tasks relating to the transaction.</p>
Message Type	<p>This column shows the message type of the cash transfer.</p>
Debit Account	<p>This column shows the account BIC or the account number of the debit account, depending on the cash transfer type.</p> <p>In case of a liquidity transfer the account number is displayed. In case of a payment, the account BIC is displayed.</p>
Debit Account Type	<p>This column shows the account type of the account that is debited by the cash transfer.</p>
Credit Account	<p>This column shows the account BIC or the account number of the credit account, depending on the cash transfer type.</p>

CASH TRANSFERS – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
	In case of a liquidity transfer the account number is displayed. In case of a payment, the account BIC is displayed.
Credit Account Type	This column shows the account type of the account that is credited by the cash transfer.
Amount	This column shows the amount and currency of the cash transfer. In case of a partial execution, the partially settled amount is shown.
Cash Transfer Status	This column shows the status of the cash transfer.
Earliest Debit Timestamp	This column shows the earliest debit timestamp of the cash transfer order.
Latest Debit Timestamp	This column shows the latest debit timestamp of the cash transfer order.
Settlement Timestamp	This column shows the settlement timestamp of the cash transfer. If the cash transfer order has not yet been settled, no value is displayed.
Cash Transfer Type	This column shows the type of the cash transfer.
Cash Transfer Category	This column shows the category of the cash transfer.
From BIC (BAH)	This column shows the business sender BIC in the Business Application Header (BAH).
To BIC (BAH)	This column shows the business receiver BIC in the BAH.
Counterparty Country	This column shows the country code for the counterparty.
Business Case ID	This column shows the business case ID of the cash transfer.
Clearing System Reference	This column shows the CLM booking reference for the cash transfer.
Debtor BIC	This column shows the debtor as specified in the underlying message or in the U2A liquidity transfer. Required format: 8 or 11 characters
Creditor BIC	This field column shows the creditor as specified in the underlying message or in the U2A liquidity transfer.

CASH TRANSFERS – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
	Required format: 8 or 11 characters
UETR	This column shows the UETR for the cash transfer.
Value Date	This column shows the value date of the cash transfer.
Entry Timestamp	This column shows the entry timestamp of the cash transfer.

Field Descriptions

Note: For the description of the attributes and the available context menu entries in the 'Corresponding Cash Transfer' section see chapter [Cash Transfers – List Screen](#) [93].

CASH TRANSFERS – DETAILS SCREEN – GENERAL	
Queue Position	This field shows the position of the cash transfer order in the respective queue.
Amount	This field shows the amount and currency of the cash transfer. In case of partial execution, the partially settled amount is shown.
Value Date	This field shows the value date of the cash transfer.
Cash Transfer Status	This field shows the status of the cash transfer.
Cash Transfer Type	This field shows the type of the cash transfer.
Cash Transfer Category	This field shows the category of the cash transfer.
Message Type	This field shows the message type of the cash transfer.
Counterparty Country	This field shows the country code for the counterparty.

Table 28 - Cash Transfers – Details Screen – General

CASH TRANSFERS – DETAILS SCREEN – ACCOUNT AND PARTY INFORMATION	
Debit Account	This field shows the account BIC or the account number of the debit account, depending on the cash transfer type. In case of a liquidity transfer, the account number is displayed. In case of a payment, the account BIC is displayed.
Debit Account Type	This field shows the account type of the debit account.

CASH TRANSFERS – DETAILS SCREEN – ACCOUNT AND PARTY INFORMATION	
Credit Account	This field shows the account BIC or the account number of the credit account, depending on the cash transfer type. In case of a liquidity transfer, the account number is displayed. In case of a payment, the account BIC is displayed.
Credit Account Type	This field shows the account type of the credit account.
From BIC (BAH)	This field shows the sender BIC in the BAH.
To BIC (BAH)	This field shows the receiver BIC in the BAH.

Table 29 - Cash Transfers – Details Screen – Account and Party Information

CASH TRANSFERS – DETAILS SCREEN – IDENTIFIER	
Instruction ID	This field shows the instruction identification of the cash transfer which can be assigned by an instructing party. The instruction identification is a point to point reference that can be used between the instructing party and the instructed party to refer to the individual instruction.
End to End ID	This field shows the end-to-end identification of a cash transfer which is assigned by the initiating party. This identification is passed on, unchanged, throughout the entire end-to-end chain. It can be used for reconciliation or to link tasks relating to the transaction.
Business Case ID	This field shows the unique identifier of the business case.
Clearing System Reference	This field shows the CLM booking reference of the cash transfer.

CASH TRANSFERS – DETAILS SCREEN – IDENTIFIER	
Debtor BIC	This field shows the debtor as specified in the underlying message or in the U2A liquidity transfer. Required format: 8 or 11 characters
Creditor BIC	This field shows the creditor as specified in the underlying message or in the U2A liquidity transfer. Required format: 8 or 11 characters
UETR	This field shows the UETR of the cash transfer.

Table 30 - Cash Transfers – Details Screen – Identifier

CASH TRANSFERS – DETAILS SCREEN – TIMING	
Earliest Debit Timestamp	This field shows the earliest debit timestamp of the cash transfer order.
Latest Debit Timestamp	This field shows the latest debit timestamp of the cash transfer order.
Settlement Timestamp	This field shows the settlement timestamp of the cash transfer. If the cash transfer order has not yet been settled, this attribute is empty.
Entry Timestamp	This field shows the entry timestamp of the cash transfer.

Table 31 - Cash Transfers – Details Screen – Timing

5.1.4 Cash Transfers – Modify Earliest Debit Timestamp – Pop-up

Context of Usage	This pop-up screen offers the possibility to modify the earliest debit timestamp of a selected cash transfer order.

Field

Descriptions

The section 'Corresponding Cash Transfers' displays the cash transfer orders listed on the previous screen that will be affected by the modification. For the detailed field descriptions of this table see chapter [Cash Transfers – List Screen](#) [▶ 93].

MODIFY EARLIEST DEBIT TIMESTAMP – POP-UP – MODIFY EARLIEST DEBIT TIMESTAMP

New Earliest Debit Timestamp

This field offers the possibility to enter a new earliest debit timestamp for the corresponding cash transfer orders.

The new earliest debit timestamp must be earlier than the latest debit timestamp and before the cut-off time. The new earliest debit timestamp must be later than the current system time.

The user can enter a timestamp manually or specify it by clicking on the calendar button.

Required format: YYYY-MM-DD HH:MM:SS

Note: Setting a new earliest debit timestamp is only possible in case an earliest debit timestamp has been set in the original payment order. The new earliest debit timestamp must be within the relevant CLM settlement window related to the currency and the settlement date indicated in the originally sent payment order. The date element of the new earliest debit timestamp refers to a calendar day, which corresponds to the business day of the indicated settlement date of the original payment order. In CLM, these corresponding dates might not be equal due to the start of CLM RTS period on a preceding calendar day, e.g. for a calendar day Friday, the business day can be Monday if the earliest debit timestamp is at 19:15:00. It is not possible to change the originally instructed settlement date via this functionality. For this purpose, the payment order needs to be revoked and a new one needs to be sent with the new settlement date.

Table 32 - Modify Earliest Debit Timestamp – Pop-up – Modify Earliest Debit Timestamp

Buttons

MODIFY EARLIEST DEBIT TIMESTAMP – POP-UP – BUTTONS

Submit

The user can click on this button to initiate a change of the earliest debit timestamp of the selected cash transfer orders.

The user will be asked to enter the PIN for digital signature purposes (NRO). For details see chapter Validations, section ‘Digital Signature – NRO’.

After clicking on this button, the notification area on the [Cash Transfers - List Screen](#) [93] shows whether the data submission and task creation was successful. In case of successful data submission, the notification area also shows a

Context of Usage

This screen shows the details of messages in the original XML format in which they were sent or received. This allows the user to see the message fields in the original format, unaltered by any system for display or processing purposes.

Furthermore the screen shows comprehensive information about the message, details of the ESMIG communication and the validation errors with regard to the message.

Screen Access

This screen can be reached in the following ways:

- | Cash Transfers and Messages >> Messages – Query Screen >> [Submit] >> Messages – List Screen >> Context menu entry 'Details'
- | Cash Transfers and Messages >> Cash Transfers – List Screen >> Context menu 'Display Message' >> Messages – List Screen >> Context menu entry 'Details'
- | Cash Transfers and Messages >> Cash Transfer – Details Screen >> Context menu 'Display Message' >> Messages – List Screen >> Context menu entry 'Details'

Privileges

To use this screen the following privilege is needed:

CLM_QueryMsgDetail

References

This screen is part of the following use case:

- Display message [481]

Field

Descriptions

Note: For the description of the attributes and the available context menu entries in the 'Corresponding Message' section, see chapter [Messages – List Screen](#) [140].

MESSAGES – DETAILS SCREEN – GENERAL	
Message ID	This field shows the message identification contained in the BAH.
Clearing System Reference	This field shows the clearing system reference. In outgoing messages, CLM provides a booking reference in this column.
Business Case ID	This field shows the unique identifier of the business case.
Business Case Status	This field shows the status of the business transaction. This entry is only visible for: Operator CB (as TAH)
Technical Message ID	This field shows the technical identifier that the application assigned to the message. The technical message ID is the internal identifier that CLM assigns to the message when writing it to the database.
UETR	This field shows the UETR of the message.

MESSAGES – DETAILS SCREEN – GENERAL	
	The UETR is an universally unique identifier which is generated by the initiating party of the payment transaction.
Original UETR	This field shows the UETR of the original message which the message currently shown refers to.
From BIC (BAH)	This field shows the business sender BIC in the BAH.
To BIC (BAH)	This field shows the business receiver BIC in the BAH.
Message Direction	This field shows if the message is an incoming or an outgoing message.
Message Status	This field shows the status of the message.
Timestamp	This field shows the date and time of the message validation. The value in this field is a value for incoming messages only.
Message Origin/Destination	This field shows the origin of an incoming message or the destination of an outgoing message respectively.
Message Type	This field shows the message type of the message. For possible values, see Messages – Query Screen [132].
File ID	This field shows the identifier of the file in which the message was contained. This field only contains a value if the message was sent or received within a file.
File Sequence Number	This field shows the position of the message in the file in which the message was contained. This field only contains a value if the message was sent or received within a file.

Table 57 - Messages – Details Screen – General

MESSAGES – DETAILS SCREEN – XML MESSAGE	
XML Message	This field shows the message in the original XML format in which it was sent or received.

Table 58 - Messages – Details Screen – XML Message

MESSAGES – DETAILS SCREEN – VALIDATION ERRORS	
---	--

MESSAGES – DETAILS SCREEN – VALIDATION ERRORS	
This section is only visible if an error occurs in the message.	
Error Code	This column shows the error code resulting from the validation and processing of the message.
Error Description	This column shows the error descriptions resulting from the validation and processing of the message.

Table 59 - Messages – Details Screen – Validation Errors

MESSAGES – DETAILS SCREEN – ESMIG COMMUNICATION	
ESMIG Communication ID	This field shows the internal identifier of the message for the ESMIG communication.
ESMIG Entry Timestamp	This field shows the entry timestamp of the message in ESMIG.
ESMIG Party Technical Address	This field shows the technical address of the sending or receiving party.
ESMIG Technical Service ID	This field shows the technical service identification of the network service.
ESMIG Business Signature – Distinguished Name	This field shows the distinguished name of the signer of the business message. This field is only filled for inbound messages.

Table 60 - Messages – Details Screen – ESMIG Communication

5.1.15 Messages – Simulate Receipt T2S – Pop-up

Context of Usage

This pop-up screen offers the possibility to simulate a receipt (camt.025) for a pull liquidity transfer from CLM to T2S. This can either be a positive or a negative receipt. It can be used to finalise open business cases in case the camt.025 has not arrived in CLM due to a disturbance situation.

This function is only available for the Transit Account Holder of the specific currency and the operator.

Screen Access

This screen can be reached in the following ways:

- I Cash Transfers and Messages >> Messages – Query Screen >> [Submit] >> Messages – List Screen >> Context menu entry ‘Simulate Receipt T2S’

- I Cash Transfers and Messages >> Messages – Query Screen >> [Submit] >> Messages – List Screen >> Context menu entry ‘Details’ >> Messages – Details Screen >> Context menu entry ‘Simulate Receipt T2S’

Privileges To use this screen the following privilege is needed:

- I CLM_SimReceipt

References This screen is part of the following use case:

5.1.18 Business Cases – Query Screen

Context of Usage

This screen offers the possibility to query business cases in CLM.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Entry Timestamp' in descending order.

The business cases matching the data of the search fields are shown in the [Business Cases – List Screen](#) [▶ 160].

This screen is only available for operators and central bank users.

Screen Access

This screen can be reached in the following way:

- | Cash Transfers and Messages >> Business Cases – Query Screen

Privileges

To use this screen the following privilege is needed:

- | CLM_QueryBC

5.1.22 Statement of Account – Download Screen

Context of Usage

This screen offers the possibility to query a statement of account by specifying different attributes for a U2A only CLM Account Holder or an A2A CLM Account Holder.

The result can be downloaded by clicking the ‘Download’ button. The statement of account will be a ‘.pdf’ file containing an unstructured camt.053 XML string of the selected account and business day as stored in CLM when produced at the end of the day.

For A2A parties, only the last generated statement of account file can be downloaded.

Screen Access

This screen can be reached in the following way:

- | Cash Transfers and Messages >> Statement of Account – Download Screen

Privileges

To use this screen the following privilege is needed:

- | CLM_QueryAccStat

References

This screen is part of the following use case:

- | [Download statement of account](#) [485]

5.1.23 Financial Institution Credit Transfer – New Screen

Context of Usage

This screen offers the possibility to enter a new financial institution credit transfer (FICT) order between two CLM accounts by generating a pacs.009 message for CLM services such as liquidity transfers or central bank operations.

Within CLM, the message can have one of the following usages:

- | Creation of payment
- | Connected payment processing
- | Payments linked to central bank operations (credits)

The FICT may be entered by the following entities:

- | Central bank

The credited and debited CLM Accounts must be denominated in the same currency.

Screen Access This screen can be reached in the following way:

- | Cash Transfers and Messages >> Financial Institution Credit Transfer – New Screen

Privileges To use this screen the following privileges are needed:

- | CLM_IniFinInstCreTra
- | CLM_IniConpay (This privilege is only required in order to be able to initiate a connected payment.)

References This screen is part of the following use case:

- | [Enter Payment order - pacs.009](#) [486]

Screenshot

Figure 107 - FICT – New Screen – BAH

Field Descriptions

This screen consists of several sections that contain fields the user can fill. By default, all sections are closed.

Note: On this screen, entire sections are marked as mandatory. The user can provide the mandatory information for a section via a number of different input fields. The GUI indicates which fields are mandatory when the user starts to enter information in a specific input field. An asterisk in the title cell indicates a mandatory section.

5.2 Liquidity

5.2.1 Dashboard Liquidity Overview – Query Screen

Context of Usage

This screen offers the possibility to query exhaustive liquidity information of all accounts in all services related to one or more parties ('Account Selection') or a group of accounts ('Account Monitoring Group' or 'Banking Group').

Depending on the access rights of the user querying the liquidity and depending on the services the respective party or group of account is using, the following information can be queried:

- | Balances of all accounts
- | Credit line on the MCAs
- | Value of the available collateral in T2S
- | Value of the outstanding auto-collateralization amount in T2S
- | Aggregate amount of pending credit and debit transactions for RTGS and CLM Account Holders

The result list can be filtered by the following attributes given on this screen and will be sorted by the selectable values:

- | Style Selection (only valid when having chosen 'Account Selection' or 'Account Monitoring Group')
- | Sort by (only valid when having chosen 'List View' and 'Account Selection' or 'Account Monitoring Group')
- | Sort Order (only valid when having chosen 'List View')
- | Grouped by (only valid when having chosen 'Dashboard View' and 'Account Selection' or 'Account Monitoring Group')

The liquidity information matching the data of the search fields is shown in one of the following screens depending on the chosen selection:

- | [Dashboard Liquidity Overview Account Selection List View – Display Screen](#) [▶ 243]
- | [Dashboard Liquidity Overview AMG Selection List View – Display Screen](#) [▶ 269]

Table 137 - Dashboard Liq. Ov. AMG Sel. List View – Display Liq. Ov. Dashboard AMG Sel. List View

5.2.10 Available Liquidity on Banking Group Level – List Screen

Context of Usage

This screen displays aggregated liquidity information per Banking Group meeting a defined set of criteria. These criteria were defined on the [Dashboard Liquidity Overview – Query Screen](#) [▶ 190].

The liquidity of the central bank which is always defined as banking group leader (see CLM UDFS chapter ‘Types of groups’) is not included in the aggregated liquidity information of the banking group.

When the crisis situation is activated by the operator, the aggregated liquidity information of a banking group also contains detailed liquidity information of banking group members not belonging to the community of the central bank user.

This screen is only available for operator and central bank users.

Screen Access

This screen can be reached in the following way:

- | Liquidity >> Dashboard Liquidity Overview – Query Screen >> [Submit]

Privileges

To use this screen the following privilege is needed:

Table 139 - Available Liq. on Banking Group Lvl. – List Screen – Context Menu

5.2.11 Detailed Available Liquidity on Banking Group Level – List Screen

Context of Usage

This screen displays aggregated liquidity information related to party BICs belonging to a specific banking group. These criteria were defined on the [Available Liquidity on Banking Group Level – List Screen](#) [▶ 274] and by selecting a specific banking group via context menu.

The liquidity of the central bank which is always defined as banking group leader (see CLM UDFS chapter ‘Types of groups’) is not included in the aggregated liquidity information of the banking group.

This screen is only available for operators and central bank users.

When the crisis situation is activated by the operator on the ‘Available Liquidity on Banking Group Level – List Screen’, liquidity information related to party BICs not belonging to the community of the central bank user are also shown.

The central bank user is able to see all party BICs and balances belonging to the specific banking group but can only see balances of party BICs belonging to his community in normal circumstances. If the crisis situation is activated by the crisis manager, the central bank is able to see balances of all banking group members.

Screen Access

This screen can be reached in the following way:

DETAILED AVAILABLE LIQUIDITY ON BANKING GROUP LEVEL – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
This section shows a result list of cash transfers corresponding to the selected banking group. Required privilege: CLM_QueryCashTrans	
Queue Position	This column shows the position of the cash transfer in the respective queue. This column only contains a value if the respective cash transfer is queued.
Instruction ID	This column shows the instruction identification of the cash transfer which can be assigned by an instructing party. The instruction identification is a point to point reference that can

DETAILED AVAILABLE LIQUIDITY ON BANKING GROUP LEVEL – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
	be used between the instructing party and the instructed party to refer to the individual instruction.
End to End ID	<p>This column shows the end-to-end identification of a cash transfer which is assigned by the initiating party.</p> <p>This identification is passed on, unchanged, throughout the entire end-to-end chain. It can be used for reconciliation or to link tasks relating to the transaction.</p>
Message Type	This column shows the message type of the cash transfer.
Debit Account	<p>This column shows the account BIC or the account number of the debit account, depending on the cash transfer type.</p> <p>In case of a liquidity transfer the account number is displayed. In case of a payment, the account BIC is displayed.</p>
Debit Account Type	This column shows the account type of the account that is debited by the cash transfer.
Credit Account	<p>This column shows the account BIC or the account number of the credit account, depending on the cash transfer type.</p> <p>In case of a liquidity transfer the account number is displayed. In case of a payment, the account BIC is displayed.</p>
Credit Account Type	This column shows the account type of the account that is credited by the cash transfer.
Amount	<p>This column shows the amount and currency of the cash transfer.</p> <p>In case of a partial execution, the partially settled amount is shown.</p>
Cash Transfer Status	This column shows the status of the cash transfer.
Earliest Debit Timestamp	This column shows the earliest debit timestamp of the cash transfer order.
Latest Debit Timestamp	This column shows the latest debit timestamp of the cash transfer order.
Settlement Timestamp	This column shows the settlement timestamp of the cash transfer. If the cash transfer order has not yet been settled, no

DETAILED AVAILABLE LIQUIDITY ON BANKING GROUP LEVEL – LIST SCREEN – RESULTS – LIST OF CASH TRANSFERS	
	value is displayed.
Cash Transfer Type	This column shows the type of the cash transfer.
From BIC (BAH)	This column shows the business sender BIC in the BAH.
To BIC (BAH)	This column shows the business receiver BIC in the BAH.
Counterparty Country	This column shows the country code for the counterparty.
Business Case ID	This column shows the business case ID of the cash transfer.
Clearing System Reference	This column shows the CLM booking reference for the cash transfer.
UETR	This column shows the UETR for the cash transfer.
Value Date	This column shows the value date of the cash transfer.
Entry Timestamp	This column shows the entry timestamp of the cash transfer.

Table 152 - CLM Cash Account Liquidity – Display Screen – Results – Buttons

5.2.14 Credit Line per Account Holder – Query Screen

Context of Usage

This screen offers the possibility to query one or all credit lines for central bank users related to default MCAs within their banking community.

The result list can be filtered by 'Party BIC' or 'Main Cash Account' and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Party BIC' in ascending order.

The credit line(s) matching the data of the search fields are shown in the [Credit Line per Account Holder – List Screen](#) [▶ 295].

This screen is only available for operators and central bank users.

Screen Access This screen can be reached in the following way:

- | Liquidity >> Credit Line per Account Holder – Query Screen

Privileges To use this screen the following privilege is needed:

- | CLM_QueryCreLineList

References This screen is part of the following use case:

Table 155 - Credit Line per Account Holder – Query Screen – Buttons

5.2.15 Credit Line per Account Holder – List Screen

Context of Usage

This screen lists either one specific or all credit lines for default MCAs meeting a defined set of criteria. It also offers the possibility to create or modify credit lines via a fixed or a delta amount.

These criteria were either defined on the [Credit Line per Account Holder – Query Screen](#) [▶ 292] or implicitly defined when opening the screen [CLM Cash Account Liquidity – Display Screen](#) [▶ 285] and clicking on the button 'Create/Modify Credit Line' (with pre-filled Main Cash Account Number).

The result list shows the credit lines that are related to one or more specific Party BIC(s) or Account Number(s) or to all MCAs of the banking community of the central bank user (in case no specific value was entered for Party BIC or Account Number).

This screen is only available for operators and central bank users.

Screen Access

This screen can be reached in the following ways:

- | Liquidity >> Credit Line per Account Holder – Query Screen >> [Submit]
- | Liquidity >> CLM Cash Account Liquidity – Query Screen >> [Submit] >> CLM Cash Account Liquidity – Display Screen >> [Create/Modify Credit Line]

Privileges

To use this screen the following privilege is needed:

- | CLM_QueryCreLineList

Field

Note: For the description of the attributes and their respective values in the search criteria

Descriptions

section see chapter [Credit Line per Account Holder – Query Screen](#) [▶ 292].

CREDIT LINE PER ACCOUNT HOLDER – LIST SCREEN – RESULTS – LIST OF CASH ACCOUNT REFERENCE DATA	
Central Bank	This column shows the country code of the CB under which the account holder is defined.
Party BIC	This column shows the party BIC of the account holder in the data scope of the user. Additionally, this column reveals the party short name via mouse-over function.
Main Cash Account	This column shows the account number of all default MCAs of the CB in the data scope of the user.
Current Credit Line	This column shows the current credit line defined for all default MCAs of the CB in the data scope of the user.

CREDIT LINE PER ACCOUNT HOLDER – LIST SCREEN – RESULTS – LIST OF CASH ACCOUNT REFERENCE DATA	
Credit Line Used	This column shows the amount of the default MCA credit line that the CLM Account Holder already used for the current business day.
Available Credit Line	This column shows the remaining amount of the default MCA credit line that the CLM Account Holder can still use for the current business day.
Pending Credit Line Update	This column shows any pending credit line update for the default MCA.

CREDIT LINE PER ACCOUNT HOLDER – LIST SCREEN – RESULTS – LIST OF CASH ACCOUNT REFERENCE DATA	
Credit Line After Update	This column shows the result of 'Current Credit Line' reduced by 'Pending Credit Line Update'.
Fixed Amount Credit Line	<p>This column offers the possibility to enter a new credit line or to make a credit line update as a fixed amount, i.e. the specification of a new credit line as an absolute amount.</p> <p>A fixed amount can only be a positive amount or zero. A reduction of the credit line to zero is considered as a deletion of the credit line.</p> <p>It is only possible to enter either a fixed amount or a delta amount.</p> <p>Required format: decimal, up to 18 total digits including 2 fractional digits</p> <p>Required privilege: CLM_IniCreLineupd</p>
Delta Amount Credit Line	<p>This field offers the possibility to enter the credit line as a difference between the old and the new value. A negative value reduces the credit line and a positive value increases the credit line. A reduction of the credit line to zero is considered as a deletion of the credit line.</p> <p>Negative amounts are entered using a '-' in front of the amount and are shown in red colour.</p> <p>It is only possible to enter either a fixed amount or a delta amount for credit line modification.</p> <p>Required format: decimal, up to 18 total digits including 2 fractional digits</p> <p>Required privilege: CLM_IniCreLineupd</p>

Table 157 - Credit Line per Account Holder – List Screen – Buttons

5.2.16 Liquidity Transfer – New Screen

Context of Usage

This screen offers the possibility to create a new liquidity transfer order.

The transfer of funds can occur within CLM (intra-service liquidity transfer order) or between MCAs or CLM CB Accounts and accounts held in other settlement services (inter-service liquidity transfer order).

This screen can also be used to initiate or reverse an overnight deposit or a marginal lending on request.³

The credited and debited accounts must be denominated in the same currency.

This screen furthermore offers the possibility to display the amount of liquidity available on the debit or credit cash account.

This screen only allows the creation of an immediate liquidity transfer order. A standing order liquidity transfer can be created in CRDM.

Screen Access

This screen can be reached in the following ways:

- | Liquidity >> Liquidity Transfer – New Screen
- | Liquidity >> CLM Cash Account Liquidity – Query Screen >> [Submit] >> CLM Cash Account Liquidity – Display Screen >> [New Liquidity Transfer]

³ For marginal lending on request only until ECMS go-live

| Standing Facilities >> Standing Facilities – Query Screen >> [Submit] >> Context menu entry ‘New Liquidity Transfer from Marginal Lending Account’ ⁴

| Standing Facilities >> Standing Facilities – Query Screen >> [Submit] >> Context menu entry ‘New Liquidity Transfer from/to Overnight Deposit Account’

Privileges

To use this screen the following privileges are needed:

| CLM_IniImLiquiTrans

| CLM_IniMarLenonreq (This privilege is only needed in order to be able to initiate a marginal lending on request.) ⁵

| CLM_IniOveDeprev (This privilege is only needed in order to be able to initiate an overnight deposit reversal.)

| CLM_IniOveDep (This privilege is only needed in order to be able to initiate an overnight deposit.)

5.3 Liquidity Management Features

5.3.1 Reservations – Query Screen

Context of Usage

This screen offers the possibility to query reservations in CLM.

The reservations matching the data of the search fields are shown in the [Reservations – Display Screen](#) [▶ 309].

This screen can query existing reservations on a specific account or any MCA for which a reservation is to be entered for the current business day.

Screen Access

This screen can be reached in the following way:

- | Liquidity Management Features >> Reservations – Query Screen

Privileges

To use this screen the following privilege is needed:

- I CLM_QueryCurReservation

References

This screen is part of the following use case:

- I [Query reservations](#) [▶ 498]

Table 165 - Reservations – Query Screen – Buttons

5.3.2 Reservations – Display Screen

Context of Usage

This screen displays the reservation for central bank operations and the reservation for seizure of funds for a specific account.

The account whose reservations are displayed was defined on the [Reservations – Query Screen](#) [306].

This screen also offers the possibility to modify and enter reservations.

The amount of the reservation for central bank operations is defined by a corresponding standing order and is updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done in CLM are only valid for the current business day.

Screen Access

This screen can be reached in the following way:

- | Liquidity Management Features >> Reservations – Query Screen >> [Submit]

Privileges

To use this screen the following privilege is needed:

- | CLM_QueryCurReservation

References

This screen is part of the following use cases:

RESERVATIONS – DISPLAY SCREEN – RESULTS – ACCOUNT INFORMATION	
Party BIC	This field shows the party BIC. Additionally, this field reveals the party short name via mouse-over function.
Account Number	This field shows the account number.
Account BIC	This field shows the BIC of the account.

Table 166 - Reservations – Display Screen – Results – Account Information

RESERVATIONS – DISPLAY SCREEN – RESULTS – RESERVATION FOR CENTRAL BANK OPERATIONS	
Reservation Amount	This field shows the entered amount of the reservation for CBOs. If there is no pending reservation, this value is equal to the defined value.
Pending Reservation	This field shows the amount of the pending CBOs reservation of the selected account. A pending reservation occurs if a reservation order could not (or not completely) be processed due to lack of liquidity of the selected account.
Defined Value	This field shows the current CBOs reservation reduced by the final payments (only debits) which affect the CBOs.
New Reservation Amount	This field offers the possibility to enter a CBOs reservation or to modify the reservation for the current business day. By submitting a new amount for the selected reservation, a task to initiate the update is created and sent to the task queue. As soon as the related task is successfully processed, the reservation is updated with immediate effect. Fixed value for setting the reservation to zero: 0.00 Required privilege: CLM_ModifyCurReservation

5.4 Query Standing Facilities

5.4.1 Standing Facilities – Query Screen

Context of Usage

This screen offers the possibility to query standing facility account data of one CLM Account Holder.

This screen queries only account balances related to standing facility accounts (i.e. Overnight Deposit Accounts and Marginal Lending Accounts ⁶) and their linked MCA related to one specific CLM ~~CLM~~ Account Holder.

The account data matching the data of the search field is shown in the [Standing Facilities – List Screen](#) [▶ 315].

Screen Access

This screen can be reached in the following way:

Descriptions

MINIMUM RESERVE (DIRECT) – LIST SCREEN – RESULTS – PARTY INFORMATION	
Party BIC	This field is pre-filled with the party BIC of the direct minimum reserve holder as entered in the 'Minimum Reserve – Query Screen'. This value cannot be modified.
Party Name	This field is pre-filled with the party name related to the party BIC of the direct minimum reserve holder as entered in the 'Minimum Reserve – Query Screen'. This value cannot be modified.

Table 177 - Minimum Reserve (Direct) – List Screen – Results – Party Information

MINIMUM RESERVE (DIRECT) – LIST SCREEN – RESULTS – MINIMUM RESERVE	
Maintenance Period Start	This field is pre-filled with the start date of the current maintenance period. This value cannot be modified.
Maintenance Period End	This field is pre-filled with the end date of the current maintenance period. This value cannot be modified.

MINIMUM RESERVE (DIRECT) – LIST SCREEN – RESULTS – MINIMUM RESERVE	
Minimum Reserve Requirement	This field shows the required minimum reserve that the participant has to hold. This value cannot be modified.
Total Minimum Reserve Requirement	This field shows the required minimum reserve that the direct minimum reserve participant has to hold including all the minimum reserve requirements of those he holds indirectly. This value cannot be modified. This field is only displayed if the party has indirect minimum reserve participants.
Excess Reserve Exemption Threshold	This field shows the amount of $(1+n) \times$ Total Minimum Reserve Requirement for which a special interest rate is use. This value cannot be modified. Note: n is the factor for the calculation of the excess reserve exemption amount and this multiplier will be the same for all institutions.

Table 178 - Minimum Reserve (Direct) – List Screen – Results – Minimum Reserve

Buttons

MINIMUM RESERVE (DIRECT) – LIST SCREEN – RESULTS – MINIMUM RESERVE – BUT-TONS	
Display Minimum Reserves of Indirects	Clicking on this button redirects the user to the Minimum Reserve (Indirect) – List Screen [325] while transmitting the corresponding party BIC as leading CLM Account Holder. The button is only visible if the party has indirect minimum reserve participant(s).

Table 179 - Minimum Reserve (Direct) – List Screen – Results – Minimum Reserve – Buttons

MINIMUM RESERVE (DIRECT) – LIST SCREEN – RESULTS – FULFILMENT OF MINIMUM RESERVE	
Running Average	This field shows the daily average balance that the party held on its cash accounts stemming from the previous business days balances in the maintenance period in order to fulfil its minimum reserve requirement. This value cannot be modified.
Adjustment Balance	This field shows the daily average balance that the party would have to hold on its cash accounts for the remaining business days in the maintenance period to fulfil its minimum reserve requirement. This value cannot be modified.

MINIMUM RESERVE (DIRECT) – LIST SCREEN – RESULTS – FULFILMENT OF MINIMUM RESERVE	
	The adjustment balance, which always shows a specific amount, can decrease up to zero. Zero would for instance mean that there is no more positive end of day balance needed for the remaining days of the maintenance period in order to meet the minimum reserve requirement of the user.
Excess Reserve Exemption Balance	This field shows the running average amount above the minimum reserve requirement which yields interest according to the corresponding interest rate in the specified maintenance period. This value cannot be modified.
Excess Reserve Remuneration Balance	This field shows the running average amount above the excess reserve exemption threshold which yields interest according to the corresponding interest rate in the specified maintenance period. This value cannot be modified.

Table 180 - Minimum Reserve (Direct) – List Screen – Results – Fulfilment of Minimum Reserve

MINIMUM RESERVE (DIRECT) – LIST SCREEN – RESULTS – LIST OF ACCOUNT BALANCES	
Account Number	This column shows the account number related to the participant being included in the calculation of the minimum reserve.
Account Type	This column shows the account type related to the participant's accounts being included in the calculation of the minimum reserve.
EoD Balance of Previous Business Day	This column shows the EoD (end-of-day) balance of the previous business day related to the participant's accounts being included in the calculation of the minimum reserve. It contains a sum at the bottom of the column.
Current Balance	This column shows the current balance related to the participant's accounts being included in the calculation of the minimum reserve. It contains a sum at the bottom of the column. When the liquidity information query for at least one account located in TIPS or T2S fails, then the value 'Not available' is shown.

Table 188 - MR (Pool) – List Screen – Results – List of Account Balances – Context Menu

5.5.5 Minimum Reserve (Pool of Account Party Level) – List Screen

Context of Usage

This screen lists the minimum reserve requirements for all accounts belonging to a specific party BIC.

The party BIC can be selected in the [Minimum Reserve \(Pool\) – List Screen](#) [▶ 326] via context menu entry or queried directly in the [Minimum Reserve – Query Screen](#) [▶ 319].

This screen is only shown if the queried party is a pool participant (set up in CRDM: Minimum reserve obligation = Pool).

Screen Access

This screen can be reached in the following ways:

- | Minimum Reserves >> Minimum Reserve – Query Screen >> [Submit]

- | Minimum Reserves >> Minimum Reserve – Query Screen >> [Submit] >> Minimum Reserve (Pool) – List Screen >> Context menu entry ‘Display Minimum Reserves of pooled MFI Leader and Member’

Privileges To use this screen the following privilege is needed:

- | CLM_QueryMinRes

References This screen is part of the following use cases:

- | [Display minimum reserve requirements and fulfilments per MFI](#) [▶ 502]
- | [Display aggregated MFI liquidity](#) [▶ 504]

5.5.7 Minimum Reserve Requirements – List Screen

Context of Usage

This screen lists all minimum reserve requirements meeting a defined set of criteria.

These criteria were defined on the [Minimum Reserve Requirements – Query Screen](#) [▶ 333].

Furthermore, this screen offers the possibility for central bank users to modify the minimum reserve requirement for parties for the current and the next maintenance period.

It also offers the possibility to set up a new minimum reserve requirement for a specific party.

This screen is only available for operators and central bank users showing parties of their own community.

Screen Access

This screen can be reached in the following way:

- | Minimum Reserves >> Minimum Reserve Requirements – Query Screen >> [Submit]

Privileges

To use this screen the following privilege is needed:

- | CLM_QueryListMinResReq

References

This screen is part of the following use case:

5.6 Reference Data

Note: All reference data defined within CLM or RTGS is visible across both components. This means that reference data screens such as the [Party Reference Data – Query Screen](#) [▶ 351] or the [Cash Account Reference Data – Query Screen](#) [▶ 359] will display data of RTGS and CLM regardless in which component they are defined.

5.6.1 Party Reference Data – Query Screen

This screen offers the possibility to query parties that exist in the reference data of CLM and RTGS. The search function allows the user to search for parties within the search

Context of Usage criteria being relevant for CLM and RTGS. The search is restricted to the data scope of the user.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by ‘Party BIC’ in ascending order.

The parties matching the data of the search fields are shown in the [Party Reference Data – List Screen](#) [▶ 356].

Screen Access This screen can be reached in the following way:

- Reference Data >> Party Reference Data – Query Screen

This screen can be reached by clicking on the smart-select button for fields that require the input of a party BIC in several screens throughout the CLM GUI.

Privileges To use this screen the following privilege is needed:

- CLM_Querylocpartrefdat

References This screen is part of the following use case:

5.6.3 Cash Account Reference Data – Query Screen

Context of Usage

This screen offers the possibility to query cash accounts to display their reference data.

The search function allows the user to search for parties within the search criteria being relevant for CLM and RTGS. The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Party BIC' in ascending order.

The cash accounts matching the data of the search fields are shown in the [Cash Account Reference Data – List Screen](#) [▶ 363].

Screen Access

This screen can be reached in the following way:

- Reference Data >> Cash Account Reference Data – Query Screen

This screen can be reached by clicking on the smart-select button for fields that require the input of account information in several screens throughout the CLM GUI.

Privileges

To use this screen the following privilege is needed:

- CLM_QueryLocPartyCashAccRefData

5.7.4 Task Queue – Details Screen

Context of Usage

This screen shows the details of a selected task.

Screen Access

This screen can be reached in the following way:

- | Administration >> Task Queue – Query Screen >> [Submit] >> Task Queue – List Screen >> Context menu entry ‘Details’

Privileges

To use this screen the following privilege is needed:

- | CLM_QueryTaskQueueDetail

References

This screen is part of the following use cases:

- | [Query task queue](#) [▶ 515]
- | [Confirmation/Withdrawal of 4-eyes task entries](#) [▶ 516]
- | [Modify 4 eyes tasks](#) [▶ 517]

Descriptions

TASK QUEUE – DETAILS SCREEN – CORRESPONDING TASK	
Task ID	This column shows the task ID of the task.
Business Case ID	This column shows the unique identifier of the task the user has changed.
Entry Timestamp	This column shows the entry timestamp of the task.
Task Type	This column shows the task type of the task.
Attribute	This column shows the name of the attribute that pertains to the task.
Amount	This column shows the amount of the task.
Old Value	This column shows the content of the attribute before the change.
New Value	This column shows the content of the attribute after the change.
Status	This column shows the status of the task.
Initial User	This column shows the user who created the task.
Second User	This column shows the user who confirmed or has withdrawn the task.

Table 239 - Task Queue – Details Screen – Corresponding Task

TASK QUEUE – DETAILS SCREEN – ERROR INFORMATION	
Error Code	This column shows the error code if occurred while processing the task.
Error Description	This column shows the error description related to the error code.

Table 240 - Task Queue – Details Screen – Error Information

TASK QUEUE – DETAILS SCREEN – OVERVIEW TASK	
---	--

TASK QUEUE – DETAILS SCREEN – OVERVIEW TASK

Note: Depending of the 'Task Type' of the task the user has previously selected on the 'Task Queue – List Screen', the section 'Overview Task' will show the corresponding screen according to the following list. The description needed of the shown values can be found in the field description of the respective screen. To display the information the privilege of the corresponding screen is needed.

Administrate Minimum Reserve Penalty	For this task type the Minimum Reserve Infringements – Administrate Min. Reserve Penalty Order – Pop-up [348] is shown.
Agree Blocked Cash Transfer Order	For this task type the Cash Transfers – Details Screen [108] is shown.
Change Balance For Minimum Reserve Fulfilment	For this task type the Minimum Reserve Fulfilments – List Screen [339] is shown.
Change CBO Reservation	For this task type the Reservations – Display Screen [309] is shown.
Change Credit Line Fixed Amount	For this task type the Credit Line per Account Holder – List Screen [295] is shown.
Change Earliest Settlement Time	For this task type the Cash Transfers – Details Screen [108] is shown.
Change Latest Settlement Time	For this task type the Cash Transfers – Details Screen [108] is shown.
Change Queue Position To End	For this task type the Cash Transfers – Details Screen [108] is shown.
Change Queue Position To Top	For this task type the Cash Transfers – Details Screen [108] is shown.
Change Seizure Of Funds Reservation	For this task type the Reservations – Display Screen [309] is shown.
Decrease Credit Line Delta Amount	For this task type the Credit Line per Account Holder – List Screen [295] is shown.
Disagree Blocked Cash Transfer Order	For this task type the Cash Transfers – Details Screen [108] is shown.
Enter Broadcast	For this task type the Broadcast – New Screen [397] is shown.

TASK QUEUE – DETAILS SCREEN – OVERVIEW TASK	
Enter Liquidity Transfer	For this task type the Liquidity Transfer – New Screen [299] is shown.
Enter Payment	For this task type the Financial Institution Credit Transfer – New Screen [171] is shown.
Increase Credit Line Delta Amount	For this task type the Credit Line per Account Holder – List Screen [295] is shown.
Maintain Minimum Reserve Requirement	For this task type the Minimum Reserve Requirements – List Screen [335] is shown.
Manual Reversal Booking	For this task type either the Cash Transfers – Manual Reversal Booking T2S – Pop-up [117], the Cash Transfers – Manual Reversal Booking TIPS – Pop-up [119] or the Cash Transfers – Manual Reversal Booking RTGS – Pop-up [122] is shown.
Repeat Sending	For this task type the Messages – Details Screen [145] is shown.
Revoke Cash Transfer Order	For this task type the Cash Transfers – Details Screen [108] is shown.
Simulate Negative Receipt Pull LT	For this task type either the Messages – Simulate Receipt T2S – Pop-up [148], the Messages – Simulate Receipt TIPS – Pop-up [151] or the Messages – Simulate Receipt RTGS – Pop-up [154] is shown.
Simulate Positive Receipt Pull LT	For this task type either the Messages – Simulate Receipt T2S – Pop-up [148], the Messages – Simulate Receipt TIPS – Pop-up [151] or the Messages – Simulate Receipt RTGS – Pop-up [154] is shown.
Simulate Receipt Push LT	For this task type the Cash Transfers – Details Screen [108] is shown.
Upload A2A Message/File	For this task type the A2A File or Message – Upload Screen [187] is shown.

Buttons

TASK QUEUE – DETAILS SCREEN – BUTTONS	
Confirm	<p>The 'Confirm' button is only displayed if the corresponding task has the status 'To Confirm' . This button opens a confirmation pop-up displaying the information 'Confirm the Task with ID : #####'.</p> <p>The 'Confirm' button will not be displayed in case of the initial user.</p> <p>By clicking on the 'Yes' button the notification area displays the confirmation with the information 'Task ##### successfully confirmed'. The status of the 'Corresponding Task' changes to 'Confirmed'.</p> <p>By clicking on the 'No' button the user returns to the 'Task Queue – Details Screen' without confirming the task.</p> <p>The user will be asked to enter the PIN for digital signature purposes (NRO). For details see chapter Validations, section 'Digital Signature – NRO'.</p> <p>Note: '#####' is a placeholder for a variable task ID that is shown.</p> <p>Note: For the task type 'Upload A2A Message/File', the A2A File or Message – Upload Screen [187] is opened as a pop-up after clicking on the 'Confirm' button. A second user has to confirm the submitted data by re-uploading the corresponding file in the pop-up.</p> <p>References for error messages: [▶ 580]</p> <ul style="list-style-type: none"> E018 E074 U039 U040 U041 U043 U044 U049 U076 U109

TASK QUEUE – DETAILS SCREEN – BUTTONS	
Withdraw	<p>The 'Withdraw' button is only displayed if the corresponding task has the status 'To Confirm' and if it supports an 'Edit' functionality. This button opens a confirmation pop-up displaying the information 'Withdraw the Task with ID : #####'.</p> <p>By clicking on the 'Yes' button the notification area displays the withdrawal with the information 'Task ##### successfully withdrawn'. The status of the 'Corresponding Task' changes to 'Withdrawn'.</p> <p>By clicking on the 'No' button the user returns to the 'Task Queue – Details Screen' without withdrawing the task.</p> <p>The user will be asked to enter the PIN for digital signature purposes (NRO). For details see chapter Validations, section 'Digital Signature – NRO'.</p> <p>Note: '#####' is a placeholder for a variable task ID that is shown.</p> <p>References for error messages: [▶ 580]</p> <ul style="list-style-type: none"> E018 E074 U039 U040 U041 U043 U044 U049 U109
Edit	<p>The 'Edit' button is only displayed if the corresponding task has the status 'To Confirm' and if it supports an 'Edit' functionality. This button opens a confirmation pop-up displaying the information 'Withdraw the Task with ID : ##### to create a new task'.</p> <p>By clicking on the 'Yes' button the original task is withdrawn. The screen corresponding to the task that is to be modified is opened as a pop-up. The fields of the pop-up screen are pre-filled with the values of the original task. The pop-up screen offers the possibility to submit a new task with modified</p>

TASK QUEUE – DETAILS SCREEN – BUTTONS

values.

The table below shows which screen is opened as a pop-up depending on the task type. It also shows if the 'Edit' functionality is allowed and thus if the 'Edit' button is available for the respective task type.

The user will be asked to enter the PIN for digital signature purposes (NRO). For details see chapter Validations, section 'Digital Signature – NRO'.

By clicking on the 'No' button the user returns to the 'Task Queue – Details Screen' without editing the task.

Note: '#####' is a placeholder for a variable task ID that is shown.

Table 242 - Task Queue – Details Screen – Buttons

TASK QUEUE – DETAILS SCREEN – 'EDIT' BUTTON POP-UP

Note: Depending on the 'Task Type' that is to be edited, different screens will be shown as a pop-up after clicking on the 'Edit' button according to the following list. The description of the shown values can be found in the field description of the respective screen. To edit the task the privilege of the corresponding screen is needed. Some task types do not allow the 'Edit' functionality. This is also indicated in the following list.

Administrate Minimum Reserve Penalty	For this task type the Minimum Reserve Infringements – Administrate Min. Reserve Penalty Order – Pop-up [348] is shown.
Agree Blocked Cash Transfer Order	No 'Edit' functionality.
Change Balance For Minimum Reserve Fulfilment	For this task type the Minimum Reserve Fulfilments – List Screen [339] is shown.
Change CBO Reservation	For this task type the Reservations – Display Screen [309] is shown.
Change Credit Line Fixed Amount	For this task type the Credit Line per Account Holder – List Screen [295] is shown.
Change Earliest Settlement Time	For this task type the Cash Transfers – Modify Earliest Debit Timestamp – Pop-up [111] is shown.
Change Latest Settlement Time	For this task type the Cash Transfers – Modify

TASK QUEUE – DETAILS SCREEN – ‘EDIT’ BUTTON POP-UP	
	Latest Debit Timestamp – Pop-up [114] is shown.
Change Queue Position To End	No ‘Edit’ functionality.
Change Queue Position To Top	No ‘Edit’ functionality.
Change Seizure of Funds Reservation	For this task type the Reservations – Display Screen [309] is shown.
Decrease Credit Line Delta Amount	For this task type the Credit Line per Account Holder – List Screen [295] is shown.
Disagree Blocked Cash Transfer Order	No ‘Edit’ functionality.
Enter Broadcast	For this task type the Broadcast – New Screen [397] is shown.
Enter Liquidity Transfer	For this task type the Liquidity Transfer – New Screen [299] is shown.
Enter Payment	For this task type the Financial Institution Credit Transfer – New Screen [171] is shown.
Increase Credit Line Delta Amount	For this task type the Credit Line per Account Holder – List Screen [295] is shown.
Maintain Minimum Reserve Requirement	For this task type the Minimum Reserve Requirements – List Screen [335] is shown.
Manual Reversal Booking	For this task type either the Cash Transfers – Manual Reversal Booking T2S – Pop-up [117], the Cash Transfers – Manual Reversal Booking TIPS – Pop-up [119] or the Cash Transfers – Manual Reversal Booking RTGS – Pop-up [122] is shown.
Repeat Sending	No ‘Edit’ functionality.
Revoke Cash Transfer Order	No ‘Edit’ functionality.
Simulate Negative Receipt Pull LT	For this task type either the Messages – Simulate Receipt T2S – Pop-up [148], the Messages – Simulate Receipt TIPS – Pop-up [151] or the Messages – Simulate Receipt

TASK QUEUE – DETAILS SCREEN – ‘EDIT’ BUTTON POP-UP	
	RTGS – Pop-up [154] is shown.
Simulate Positive Receipt Pull LT	For this task type either the Messages – Simulate Receipt T2S – Pop-up [▶ 148], the Messages – Simulate Receipt TIPS – Pop-up [▶ 151] or the Messages – Simulate Receipt RTGS – Pop-up [▶ 154] is shown.
Simulate Receipt Push LT	No ‘Edit’ functionality.
Upload A2A Message/File	No ‘Edit’ functionality.

Table 243 - Task Queue – Details Screen – ‘Edit’ Button Pop-Up

5.7.5 Broadcasts – Query Screen

Context of Usage

This screen offers the possibility to query sent or received operations-related and system-triggered broadcasts.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by ‘Send Timestamp’ in descending order.

The broadcasts matching the data of the search fields are shown in the [Broadcasts – List Screen](#) [▶ 392].

Screen Access

This screen can be reached in the following way:

- | Administration >> Broadcasts – Query Screen

Privileges

To use this screen the following privilege is needed:

- | CLM_QueryBroadcast

References

This screen is part of the following use cases:

- | [Query broadcast](#) [▶ 518]
- | [Display broadcast](#) [▶ 519]

Submit	<p>The user can click on this button to query the events matching the entered criteria.</p> <p>The result list will be displayed in the Events – List Screen [▶ 403].</p>
Reset	<p>The user can click on this button to reset all fields to their default values.</p>

Table 260 - Events – Query Screen – Buttons

5.7.10 Events – List Screen

Context of Usage

This screen lists all events concerning the current business day meeting a defined set of criteria.

These criteria were defined on the [Events – Query Screen](#) [▶ 401].

Screen Access This screen can be reached in the following way:

- | Administration >> Events – Query Screen >> [Submit]

Privileges To use this screen the following privilege is needed:

- | CLM_QueryListEvents

References This screen is part of the following use case:

- | [Query events](#) [▶ 520]

Screenshot

Field Descriptions Note: For the description of the attributes and their respective values in the ‘Search Criteria’ section see chapter [Events – Query Screen](#) [▶ 401].

EVENTS – LIST SCREEN – LIST OF EVENTS	
Status	This column shows the status of the event.
Event Code	This column shows the event code.
Event Description	This column shows the event description.

EVENTS – LIST SCREEN – LIST OF EVENTS	
Currency-Specific	This column shows if the event is currency-specific. This column is only visible for: <ul style="list-style-type: none"> Operator CB
Planned Event Day / Time	This column shows the planned event's day and time <u>as initially provided by the BDM for the current business day.</u>
Current Event Day / Time	This column shows the current event's day and time. <u>This may be identical to the 'Planned Event Day /Time'. In case of changes it shows the revised time or the effective time of the event.</u>

Table 261 - Events – List Screen – List of Events

5.7.11 General System Parameters – Display Screen

Context of Usage	This screen displays the general RTGS/CLM system parameters, their current values and their foreseen changes for the next business day. This screen is only available for operators and central bank users.
Screen Access	This screen can be reached in the following way: <ul style="list-style-type: none"> Administration >> General System Parameters – Display Screen
Privileges	To use this screen the following privilege is needed: <ul style="list-style-type: none"> CLM_DisplaySysPara

5.8 Monitoring

5.8.1 Liquidity on CB Level – Display Screen

Context of Usage

This screen lists either:

- | Aggregated liquidity information related to all MCAs, RTGS DCAs, sub-accounts, AS Technical Accounts, AS Guarantee Accounts, CB Accounts, CB ECB Accounts, ECB Mirror Accounts, Marginal Lending Accounts, Overnight Deposit Accounts, Transit Accounts, T2S DCAs and TIPS Accounts belonging to the community of a central bank user in a single currency. It is only available when using the privilege 'CLM_QueryLiqonCBLev' [case 1] or
- | Aggregated liquidity information related to all MCAs, RTGS DCAs, sub-accounts, AS Technical Accounts, AS Guarantee Accounts, CB Accounts, CB ECB Accounts, ECB Mirror Accounts, Marginal Lending Accounts, Overnight Deposit Accounts, Transit Accounts, T2S DCAs and TIPS Accounts present in CLM, RTGS, T2S and TIPS (system wide) related to a single currency. It is only available for central bank users when using the privilege 'CLM_QueryMonCriSit' (should be granted to Crisis Managers) and when the system parameter 'Crisis Situation' was activated (set to 'Yes' by the Operator) [case 2].

This screen is only available for operators and central bank users.

Screen Access This screen can be reached in the following way:

- | Monitoring >> Liquidity on CB Level – Display Screen

Privileges To use this screen and depending on the specific use case one of the following privileges is needed:

- | CLM_QueryLiqonCBLev
- | CLM_QueryMonCriSit

References This screen is part of the following use case:

Field

Descriptions

Note: The fields on this screen show liquidity information for all cash accounts belonging to the community of the respective CB [case 1]. In case of a crisis situation, they show the system wide liquidity [case 2]. As case 1 is the normal case, the following field descriptions refer only to the cash accounts maintained by the respective CB.

LIQUIDITY ON CB LEVEL – DISPLAY SCREEN – RESULTS – LIQUIDITY INFORMATION CLM	
CLM MCAs Information	<p>This divider shows liquidity information for all CLM MCAs maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p> <p>If the divider is closed, the total sum of the field 'Sum of Available Liquidity' is shown on the right on top of the divider.</p>
Sum of Current Balances	<p>This row shows the sum of balances for all CLM MCAs maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p>
Sum of Credit Lines	<p>This row shows the sum of credit lines for all default CLM MCAs maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p>
Sum of Seizure of Funds	<p>This row shows sum of seizure of funds for all CLM MCAs maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p>
Sum of Available Liquidity	<p>This row shows the sum of available liquidity for all CLM MCAs maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p> <p>It consists of 'Sum of Current Balances' including the 'Sum of Credit Lines' reduced by 'Sum of Seizure of Funds'.</p>
Queued Debit Cash Transfer Orders	<p>This row shows the sum of all debit cash transfer orders that are queued in CLM for settlement related to all CLM MCAs maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p>
Queued Credit Cash Transfer Orders	<p>This row shows the sum of all credit cash transfer orders that are queued in CLM for settlement related to all CLM MCAs maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p>
Earmarked Debit Cash Transfer Orders	<p>This row shows the sum of all debit cash transfer orders that are earmarked in CLM related to all CLM MCAs maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p>
Earmarked Credit Cash Transfer Orders	<p>This row shows the sum of all credit cash transfer orders that are earmarked in CLM related to all CLM MCAs maintained by the respective CB (case 1) or system wide within the same</p>

LIQUIDITY ON CB LEVEL – DISPLAY SCREEN – RESULTS – LIQUIDITY INFORMATION CLM	
	currency (case 2).
Sum of Projected Liquidity	<p>This row shows the projected liquidity related to all CLM MCAs maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p> <p>It consists of 'Sum of Available Liquidity' including the 'Aggregated Amount of Queued Credit Cash Transfer Orders' including the 'Aggregated Amount of Earmarked Credit Cash Transfer Orders' reduced by 'Aggregated Amount of Queued Debit Cash Transfer Orders' reduced by 'Aggregated Amount of Earmarked Debit Cash Transfer Orders'.</p> <p>Note: The projected liquidity is only a non-binding forecast as it includes instructed but not yet debited/credited cash transfer orders of the future.</p>
CB Accounts Information	This divider shows the liquidity information for all CLM CB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Current Balance	This row shows the sum of balances for all CLM CB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Debit Cash Transfer Orders	This row shows the sum of all debit cash transfer orders that are queued for settlement on CLM CB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Credit Cash Transfer Orders	This row shows the sum of all credit cash transfer orders that are queued for settlement on CLM CB Accounts maintained by the respective CB.
Earmarked Debit Cash Transfer Orders	This row shows the sum of all debit cash transfer orders that are in status earmarked on CLM CB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Earmarked Credit Cash Transfer Orders	This row shows the sum of all credit cash transfer orders that are in status earmarked on CLM CB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).

LIQUIDITY ON CB LEVEL – DISPLAY SCREEN – RESULTS – LIQUIDITY INFORMATION CLM	
Sum of Projected Liquidity	<p>This row shows the total amount of projected liquidity for CLM CB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p> <p>It consists of 'Sum of Current Balances' including the 'Aggregated Amount of Queued Credit Cash Transfer Orders' including the 'Aggregated Amount of Earmarked Credit Transfer Orders' reduced by 'Aggregated Amount of Queued Debit Cash Transfer Orders' reduced by 'Aggregated Amount of Earmarked Credit Transfer Orders'.</p>
CB ECB Accounts Information	This divider shows the liquidity information for all CB ECB Accounts maintained by the respective CB.
Current Balance	This row shows the sum of balances for all CB ECB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Debit Cash Transfer Orders	This row shows the sum of all debit cash transfer orders that are queued for settlement on CB ECB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Credit Cash Transfer Orders	This row shows the sum of all credit cash transfer orders that are queued for settlement on CB ECB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Earmarked Debit Cash Transfer Orders	This row shows the sum of all debit cash transfer orders that are in status earmarked on CB ECB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Earmarked Credit Cash Transfer Orders	This row shows the sum of all credit cash transfer orders that are in status earmarked on CB ECB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Sum of Projected Liquidity	<p>This row shows the total amount of projected liquidity for CB ECB Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p> <p>It consists of 'Sum of Current Balances' including the 'Aggregated Amount of Queued Credit Cash Transfer Orders'</p>

LIQUIDITY ON CB LEVEL – DISPLAY SCREEN – RESULTS – LIQUIDITY INFORMATION CLM

	including the 'Aggregated Amount of Earmarked Credit Transfer Orders' reduced by 'Aggregated Amount of Queued Debit Cash Transfer Orders' reduced by 'Aggregated Amount of Earmarked Credit Transfer Orders'.
ECB Mirror Accounts Information	This divider shows the liquidity information for all ECB Mirror Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Current Balance	This row shows the sum of balances for all ECB Mirror Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Debit Cash Transfer Orders	This row shows the sum of all debit cash transfer orders that are queued for settlement on ECB Mirror Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Credit Cash Transfer Orders	This row shows the sum of all credit cash transfer orders that are queued for settlement on ECB Mirror Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Earmarked Debit Cash Transfer Orders	This row shows the sum of all debit cash transfer orders that are in status earmarked on ECB Mirror Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Earmarked Credit Cash Transfer Orders	This row shows the sum of all credit cash transfer orders that are in status earmarked on ECB Mirror Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Sum of Projected Liquidity	<p>This row shows the total amount of projected liquidity for ECB Mirror Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).</p> <p>It consists of 'Sum of Current Balances' including the 'Aggregated Amount of Queued Credit Cash Transfer Orders' including the 'Aggregated Amount of Earmarked Credit Transfer Orders' reduced by 'Aggregated Amount of Queued Debit Cash Transfer Orders' reduced by 'Aggregated Amount of Earmarked Credit Transfer Orders'.</p>

LIQUIDITY ON CB LEVEL – DISPLAY SCREEN – RESULTS – LIQUIDITY INFORMATION CLM			
Marginal Lending Accounts Information			This divider shows the liquidity information for all Marginal Lending Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Current Balance			This row shows the sum of balances for all Marginal Lending Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Debit Cash Transfer Orders			This row shows the sum of all debit cash transfer orders that are queued for settlement on Marginal Lending Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Credit Cash Transfer Orders			This row shows the sum of all credit cash transfer orders that are queued for settlement on Marginal Lending Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Earmarked Debit Cash Transfer Orders			This row shows the sum of all debit cash transfer orders that are in status earmarked on Marginal Lending Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Earmarked Credit Cash Transfer Orders			This row shows the sum of all credit cash transfer orders that are in status earmarked on Marginal Lending Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Sum of Projected Liquidity			This row shows the total amount of projected liquidity for Marginal Lending Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2). It consists of 'Sum of Current Balances' including the 'Aggregated Amount of Queued Credit Cash Transfer Orders' including the 'Aggregated Amount of Earmarked Credit Transfer Orders' reduced by 'Aggregated Amount of Queued Debit Cash Transfer Orders' reduced by 'Aggregated Amount of Earmarked Credit Transfer Orders'.
Overnight Deposit Accounts Information			This divider shows the liquidity information for all Overnight Deposit Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).

LIQUIDITY ON CB LEVEL – DISPLAY SCREEN – RESULTS – LIQUIDITY INFORMATION CLM

Current Balance	This row shows the sum of balances for all Overnight Deposit Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Debit Cash Transfer Orders	This row shows the sum of all debit cash transfer orders that are queued for settlement on Overnight Deposit Accounts maintained by the respective CB.
Queued Credit Cash Transfer Orders	This row shows the sum of all credit cash transfer orders that are queued for settlement on Overnight Deposit Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Earmarked Debit Cash Transfer Orders	This row shows the sum of all debit cash transfer orders that are in status earmarked on Overnight Deposit Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Earmarked Credit Cash Transfer Orders	This row shows the sum of all credit cash transfer orders that are in status earmarked on Overnight Deposit Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Sum of Projected Liquidity	This row shows the total amount of projected liquidity for Overnight Deposit Accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2). It consists of 'Sum of Current Balances' including the 'Aggregated Amount of Queued Credit Cash Transfer Orders' including the 'Aggregated Amount of Earmarked Credit Transfer Orders' reduced by 'Aggregated Amount of Queued Debit Cash Transfer Orders' reduced by 'Aggregated Amount of Earmarked Credit Transfer Orders'.
CLM Transit Account Information	This divider shows the liquidity information for all CLM transit accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Current Balance	This row shows the sum of balances for all CLM transit accounts maintained by the respective CB (case 1) or system wide within the same currency (case 2).
Queued Debit Cash Transfer Orders	This row shows the sum of all debit cash transfer orders that

5.8.2 Cash Transfer Order Totals by Party – Query Screen

- Context of Usage** This screen offers the possibility to query the volumes and summarized amounts for all payments and liquidity transfers related to one party. It is also possible to query data for all participants belonging to the community of the central bank user.
- The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Party BIC' in descending order.
- The numbers and summarized amounts for all cash transfers matching the data of the search fields are shown in the [Cash Transfer Order Totals by Party – List Screen](#) [▶ 430].
- This screen is only available for operators and central bank users.
- Screen Access** This screen can be reached in the following way:
- | Monitoring >> Cash Transfer Order Totals by Party – Query Screen
- Privileges** To use this screen the following privilege is needed:
- | CLM_QuerySumCashTrans
- References** This screen is part of the following use case:
- | [Sum of cash transfer per account holder](#) [▶ 522]

5.8.7 Available Liquidity by Party – Query Screen

Context of Usage

This screen offers the possibility to query a list of liquidity relevant information related to a participant. It is also possible to query data for all participants belonging to the community of the user.

The result list can be filtered by different attributes given on this screen and will be sorted by the values of a selected output parameter. The default setting is sorting by 'Party BIC' in ascending order.

The list of liquidity relevant information matching the data of the search fields is shown in the [Available Liquidity by Party – List Screen](#) [▶ 443].

This screen is only available for operators and central bank users.

Screen Access This screen can be reached in the following way:

- | Monitoring >> Available Liquidity by Party

Privileges To use this screen the following privilege is needed:

- | CLM_QueryAvailLiqui

References This screen is part of the following use cases:

Table 280 - Available Liquidity by Party – Query Screen – Buttons

5.8.8 Available Liquidity by Party – List Screen

Context of Usage

This screen lists liquidity relevant information related to a participant meeting a predefined set of criteria.

These criteria were defined on the [Available Liquidity by Party – Query Screen](#) [440].

The result list shows the account balances for accounts within T2, T2S and TIPS, queued and earmarked cash transfer orders and as a result some projected liquidity values related to the entered party BIC or data related to all party BICs belonging to the community of the central bank user (no selection of party BIC).

The account types CB ECB Account, ECB Mirror Account, CLM Technical Account for ECONS II, [CLM Dedicated Transit Account for RTGS](#), [CLM Dedicated Transit Account for T2S](#), [CLM Dedicated Transit Account for TIPS](#), [RTGS Dedicated Transit Account](#), [TIPS](#)

~~Transit Account, T2S Dedicated Transit Account, CLM-CB Account and RTGS-CB Account~~ are generally not considered in the result list.

5.8.9 Available Liquidity by Account – List Screen

Context of Usage

This screen shows the account balances, credit lines, queued cash transfer orders and as a result, some aggregated liquidity positions an account level related to the entered party BIC.

The account types CB ECB Account, ECB Mirror Account, CLM Technical Account for ECONS II, CLM Dedicated Transit Account for RTGS, CLM Dedicated Transit Account for T2S, CLM Dedicated Transit Account for TIPS, RTGS Dedicated Transit Account, TIPS Transit Account, T2S Dedicated Transit Account, are generally not considered in the result list.

This screen is only available via context menu on the [Available Liquidity by Party – List Screen](#) [▶ 443]. By clicking on a party and selecting the context menu entry ‘List of Available Liquidity by Accounts’, a central bank user can see all data related to accounts belonging to the selected party BIC.

Screen Access This screen can be reached in the following way:

- | Monitoring >> Available Liquidity by Party – List Screen >> Context menu entry ‘List of Available Liquidity by Accounts’

Privileges To use this screen the following privilege is needed:

- | CLM_QueryAvailLiqui

References This screen is part of the following use case:

AVAILABLE LIQUIDITY BY ACCOUNT – LIST SCREEN – RESULTS – LIST OF AVAILABLE LIQUIDITY BY ACCOUNT	
Account Number	This column shows all account numbers related to the party BIC previously selected via context menu. Additionally, this column reveals the party short name via mouse-over function.
Projected Liquidity	This column shows the projected liquidity that will be available if all queued and earmarked transactions per account would be settled. The ‘Projected Liquidity Overall’ consists of ‘Liquidity Overall’, ‘Queued Cash Transfer Orders Credit’, ‘Earmarked Cash Transfer Orders Credit’ reduced by ‘Queued Cash Transfer Orders Debit’ and ‘Earmarked Cash Transfer Orders Debit’. When the liquidity information query for at least one account located in TIPS or T2S fails, then the value ‘Not available’ is shown.
Liquidity Overall	This column shows the sum of ‘Available Liquidity in CLM’, ‘RTGS Balance’, ‘T2S Balance’ and ‘TIPS Account Balance’.

AVAILABLE LIQUIDITY BY ACCOUNT – LIST SCREEN – RESULTS – LIST OF AVAILABLE LIQUIDITY BY ACCOUNT	
	When the liquidity information query for at least one account located in TIPS or T2S fails, then the value 'Not available' is shown.
Available Liquidity in CLM	This column shows the liquidity position per account in CLM. The 'Available Liquidity in CLM' consists of 'CLM Balance', 'Credit Line' reduced by seizure of funds amount.
Credit Line	This column shows the credit line of the default MCA.
CLM Balance	This column shows the CLM Cash Account balance.
RTGS Balance	This column shows the RTGS Account balance.
T2S Balance	This column shows the balance of the T2S Account. When the liquidity information query for at least one account located in T2S fails, then for every account located in T2S the value 'Not available' is shown.
TIPS Account Balance	This column shows the balance of the TIPS Account (which can be either a TIPS Account or a TIPS AS Technical Account). When the liquidity information query for at least one account located in TIPS fails, then for every account located in TIPS the value 'Not available' is shown.
Queued Cash Transfer Orders Credit	This column shows the sum of all queued credit cash transfer orders from CLM and RTGS per account.
Queued Cash Transfer Orders Debit	This column shows the sum of all queued debit cash transfer orders from CLM and RTGS per account.
Earmarked Cash Transfer Orders Credit	This column shows all earmarked credit cash transfer orders from CLM and RTGS per account.
Earmarked Cash Transfer Orders Debit	This column shows all earmarked debit cash transfer orders from CLM and RTGS per account.

6 Screen User Guide – Description of Use Cases

The Screen User Guide contains use cases adapted from typical user workflows. Each use case represents a single workflow and consists of single action steps, intermediate results and a final result. Some use cases serve as extensions for other use cases and can only be completed after a previous use case has been completed. This is indicated in the context of usage and instructions part. Each use case description follows the same structure and contains the following elements.

Context of Usage	The context of usage includes the goal of the use case and the relevant context information needed to reach the goal of the use case. The content of this part comprises the action steps described in the section 'Instructions' in the wider context, provides the user with valuable information and shows the relation to other use cases. It can also include usage restrictions or prerequisites depending on the use case.
Privileges	The privileges section lists all necessary privileges in order to complete the respective use case. This includes privileges that are needed to access the involved screens and privileges necessary to proceed with the use case. Privileges that are only necessary to use one specific or optional function of the use case are listed after the description of the respective action step.
References	The references section lists the screens involved in order of their appearance in the use case.
Instructions	Each workflow is described from start to end, beginning with the access to the starting screen. The instructions involve a number of separate steps which lead the user through a series of screens and actions. Each step is focused on one single action. Intermediate results are included and the instructions end with a final result. The instructions describe the main scenario which is the most common workflow.
Instructions – Example	<ol style="list-style-type: none"> 1. Step 1 2. Step 2 <ul style="list-style-type: none"> ⇒ Intermediate result 3. Step 3 <ul style="list-style-type: none"> ➔ Final result
Additional Information	<p>Instead of including all information about possible situations in the main scenario, the use case description focuses on leading the user through the most common workflow first and then provides additional information about alterations and exceptional situations.</p> <p>Such additional information within a use case is highlighted by a notice sign and is described directly below the instructions for the main scenario. Additional information can, among others, include alternative branches, context menu functions, restrictions or screen-specific information.</p>

 **Alternative navigation**

The 'Cash Transfers – List Screen' can also be reached via context menu on screens that contain entries related to a cash transfer by clicking on the context menu entry 'Display Cash Transfer'.

 **Adjusting the search criteria**

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Figure 198 - Additional Information

Wording

Screens involving a cash transfer do not differentiate between a cash transfer order and a cash transfer (settled cash transfer order). Accordingly, the UHB only differentiates between cash transfers and cash transfer orders if relevant for a specific function. In all other functions a cash transfer also means a cash transfer order.

6.1 Cash Transfers and Messages

6.1.1 Query/List cash transfers

Context of Usage

This use case describes how to query cash transfers and view the result list of cash transfers based on the selected filter criteria.

Cash transfers can be queried by entering attribute values with regard to the relevant cash transfers.

This use case provides the basis for the execution of the following use cases:

- I [Display cash transfer \(order\)](#) [▶ 472]
- I [Revocation of payment](#) [▶ 473]
- I [Reorder payment in queue](#) [▶ 474]
- I [Modify earliest debit timestamp](#) [▶ 474]
- I [Modify latest debit timestamp](#) [▶ 475]
- I [Release cash transfer order of blocked party](#) [▶ 476]

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryCashTrans

References Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – Query Screen](#) [▶ 75]
- I [Cash Transfers – List Screen](#) [▶ 93]

Instructions

1. Click on the menu button.
2. Select the main menu entry ‘Cash Transfers and Messages’ and click on the sub-menu entry ‘Query Cash Transfers’.
3. Enter the relevant attribute values of the cash transfers that are to be displayed.
4. Optionally, specify the sorting criterion, the sorting order and the selection of columns for the result list in the section ‘Output Parameters’. If no output parameters are specified, the result list will be sorted by ‘Entry Timestamp’ in descending order.
5. Click on the ‘Submit’ button.
 - ➔ The ‘Cash Transfers – List Screen’ opens. The list shows all cash transfers matching the entered search criteria.

Alternative navigation

The ‘Cash Transfers – List Screen’ can also be reached via context menu on screens that contain entries related to a cash transfer by clicking on the context menu entry ‘Display Cash Transfer’.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section ‘Search Criteria’ can be opened for editing by clicking on the open button in the top left of the screen.

6.1.2 Display cash transfer (order)

Context of Usage

This use case describes how to query cash transfers and view detailed information on a specific cash transfer.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryCashTransDetails

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – Details Screen](#) [▶ 108]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 471].
2. In order to view details of a specific cash transfer, right-click on the cash transfer and select the context menu entry ‘Details’.

- ➔ The 'Cash Transfers – Details Screen' opens. Detailed information with regard to the selected cash transfer is displayed.

Alternative navigation

The 'Cash Transfers – List Screen' can also be reached via context menu on screens that contain entries related to a cash transfer by clicking on the context menu entry 'Display Cash Transfer'.

6.1.3 Revocation of payment

Context of Usage	<p>This use case describes how to revoke cash transfer orders selected in the Cash Transfers – List Screen [▶ 93] or in the Cash Transfers – Details Screen [▶ 108].</p> <p>Revoking cash transfer orders is only possible for cash transfer orders with the status 'Warehoused', 'Earmarked' or 'Queued'.</p> <p>This function is only available for operators or central bank users.</p>
Privileges	<p>To carry out this use case, the following privilege is needed:</p> <ul style="list-style-type: none"> CLM_RevPaymentOrder
References	<p>Further information on screens involved can be found in the screen reference part:</p> <ul style="list-style-type: none"> Cash Transfers – List Screen [▶ 93]
Instructions	<ol style="list-style-type: none">1. Complete the use case for Query/List cash transfers [▶ 471].2. Select one or more cash transfer order(s) that are to be revoked.3. Right-click on the selected item(s) and select the context menu entry 'Revoke'.<ul style="list-style-type: none">⇒ A confirmation pop-up opens showing details of the selected cash transfer order(s).4. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the revocation of the cash transfer order(s). <ul style="list-style-type: none">➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

6.1.4 Modify cash transfer order

This use case includes three functions in order to modify a cash transfer order. These three functions are reordering a payment order in the respective queue, modifying the earliest debit timestamp and modifying the latest debit timestamp.

Detailed information on these functions can be found in the following chapters:

- | [Reorder payment in queue](#) [▶ 474]
- | [Modify earliest debit timestamp](#) [▶ 474]

- I [Modify latest debit timestamp](#) [▶ 475]

6.1.4.1 Reorder payment in queue

Context of Usage

This use case describes how to increase or decrease the queue position of cash transfer orders selected in the [Cash Transfers – List Screen](#) [▶ 93] or in the [Cash Transfers – Details Screen](#) [▶ 108].

Reordering cash transfer orders is only possible for payment orders with the status 'Queued'.

This function is only available for operators or central bank users.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_ModifyPaymentOrder

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 93]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 471].
2. Select one or more cash transfer order(s) that are to be reordered.
3. Right-click on the selected item(s) and select the context menu entry 'Increase' or 'Decrease' respectively.
 - ⇒ A confirmation pop-up opens showing details of the selected cash transfer order(s).
4. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the reordering of the cash transfer order(s).
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Reordering multiple cash transfer orders

If more than one cash transfer order is increased/decreased via bulk action, the order of the increased/decreased items can differ from their original order.

6.1.4.2 Modify earliest debit timestamp

Context of Usage

This use case describes how to modify the earliest debit timestamp of cash transfer orders selected in the [Cash Transfers – List Screen](#) [▶ 93] or in the [Cash Transfers – Details Screen](#) [▶ 108].

Modifying the earliest debit timestamp is only possible for cash transfer orders with the status 'Warehoused' or 'Earmarked' including an earliest debit timestamp.

This function is only available for operators or central bank users.

- Privileges** To carry out this use case, the following privilege is needed:
- I CLM_ModifyPaymentOrder
- References** Further information on screens involved can be found in the screen reference part:
- I [Cash Transfers – List Screen](#) [▶ 93]
 - I [Cash Transfers – Modify Earliest Debit Timestamp – Pop-up](#) [▶ 111]
- Instructions**
1. Complete the use case for [Query/List cash transfers](#) [▶ 471].
 2. Select one or more cash transfer order(s) whose earliest debit timestamp are to be modified.
 3. Right-click on the selected item(s) and select the context menu entry 'Modify earliest debit timestamp'.
 - ⇒ The 'Cash Transfers – Modify Earliest Debit Timestamp – Pop-up' opens showing details of the selected cash transfer order(s).
 4. Fill in the field 'New Earliest Debit Timestamp' by entering a timestamp manually or by clicking on the calendar button. The new earliest debit timestamp must be earlier than the latest debit timestamp and before the cut-off time. The new earliest debit timestamp must be later than the current system time.
 5. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Alternative navigation

The 'Cash Transfers – Modify Earliest Debit Timestamp – Pop-up' can also be reached via context menu on the 'Cash Transfers – Details Screen' by clicking on the context menu entry 'Modify Earliest Debit Timestamp'.

Deleting the earliest debit timestamp

The 'Cash Transfers – Modify Earliest Debit Timestamp – Pop-up' offers the possibility to delete the current earliest debit timestamp by clicking on the 'Delete Earliest Debit Timestamp' button.

6.1.4.3 Modify latest debit timestamp

Context of Usage

This use case describes how to modify the latest debit timestamp of cash transfer orders selected in the [Cash Transfers – List Screen](#) [▶ 93] or in the [Cash Transfers – Details Screen](#) [▶ 108].

Modifying the latest debit timestamp is only possible for cash transfer orders with the status 'Warehoused' or 'Earmarked' including a latest debit timestamp.

This function is only available for operators or central bank users.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_ModifyPaymentOrder

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 93]
- I [Cash Transfers – Modify Latest Debit Timestamp – Pop-up](#) [▶ 114]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 471].
2. Select one or more cash transfer order(s) whose latest debit timestamp are to be modified.
3. Right-click on the selected item(s) and select the context menu entry 'Modify latest debit timestamp'.
 - ⇒ The 'Cash Transfers – Modify Latest Debit Timestamp – Pop-up' opens showing details of the selected cash transfer order(s).
4. Fill in the field 'New Latest Debit Timestamp' by entering a timestamp manually or by clicking on the calendar button. The new latest debit timestamp must be later than the earliest debit timestamp and before the cut-off time. The new latest debit timestamp must be later than the current system time.
5. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

**Alternative navigation**

The 'Cash Transfers – Modify Latest Debit Timestamp – Pop-up' can also be reached via context menu on the 'Cash Transfers – Details Screen' by clicking on the context menu entry 'Modify Latest Debit Timestamp'.

**Deleting the latest debit timestamp**

The 'Cash Transfers – Modify Latest Debit Timestamp – Pop-up' offers the possibility to delete the current latest debit timestamp by clicking on the 'Delete Latest Debit Timestamp' button.

6.1.5 Release cash transfer order of blocked party

Context of

This use case describes how to release blocked cash transfer orders.

Usage

Releasing cash transfer orders is only possible for cash transfer orders which are earmarked due to the blocking of a party or an account. Additionally, the value date of the cash transfer order has to be the current business day.

This function is only available for operators and central bank users (only central bank related to the blocked party or blocked account).

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_Ag/DisagCashTrans

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – Query Screen](#) [▶ 75]
- I [Cash Transfers – List Screen](#) [▶ 93]

Instructions

1. Complete the use case for [Query/List cash transfers](#). [▶ 471]
2. Select one or more cash transfer order(s) that are to be released.
3. Right-click on the selected item(s) and select the context menu entry 'Agree'.
 - ⇒ A confirmation pop-up opens showing details of the selected cash transfer order(s).
4. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to confirm the release of the cash transfer order(s).
 - ➔ A related task is shown in the notification area and the user returns to the 'Cash Transfers – List Screen'.

**Disagreement on cash transfer orders**

In order to disagree on cash transfer orders, complete this use case while selecting the context menu entry 'Disagree' in the third step.

6.1.6 Manual reverse booking

Context of

This use case describes how to reverse one or more booking(s) manually.

Usage

This function is only available for liquidity transfer orders to T2S/TIPS/RTGS with the status 'Settled' or 'Partially Settled'.

In order to reverse booking(s) to T2S, the credit account type has to be 'T2S DCA', 'T2S CB account' or 'CLM dedicated transit account for T2S' for the selected liquidity transfer(s).

In order to reverse booking(s) to TIPS, the credit account type has to be 'TIPS Account' and 'TIPS AS Technical Account' for the selected liquidity transfer(s).

In order to reverse booking(s) to RTGS, the credit account type has to be 'RTGS DCA', 'RTGS CB account', 'RTGS sub-account' or 'CLM dedicated transit account for RTGS' for the selected liquidity transfer(s).

When performing this function it is advisable to check the status of the business case in all services involved in the transaction, e.g. manual reversal booking TIPS to be checked also in TIPS.

This function is only available for operators and the Transit Account Holder of the specific currency.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_ManReversalBook

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 93]
- I [Cash Transfers – Manual Reversal Booking T2S – Pop-up](#) [▶ 117]
- I [Cash Transfers – Manual Reversal Booking TIPS – Pop-up](#) [▶ 119]
- I [Cash Transfers – Manual Reversal Booking RTGS – Pop-up](#) [▶ 122]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 471].
2. Select one or more liquidity transfer(s) that are to be reversed manually.
3. Right-click on the selected item(s) and select the context menu entry 'Reverse Booking T2S'/'Reverse Booking TIPS'/'Reverse Booking RTGS' depending on the type of account involved in the liquidity transfer(s).
 - ⇒ The 'Cash Transfers – Manual Reversal Booking T2S – Pop-up', 'Cash Transfers – Manual Reversal Booking TIPS – Pop-up' or the 'Cash Transfers – Manual Reversal Booking RTGS – Pop-up' opens showing details of the selected liquidity transfer(s).
4. Specify if an error code is to be provided in the field 'Reversal Booking' by selecting 'With T2S Error Code'/'Without T2S Error Code', 'With TIPS Error Code'/'Without TIPS Error Code' or 'With RTGS Error Code'/'Without RTGS Error Code' respectively.
5. In case an error code is to be provided, enter or select the respective error code in the field 'T2S Error Code'/'TIPS Error Code'/'RTGS Error Code'.
6. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the 'Cash Transfers – List Screen'. The notification area shows whether the submission of the data has been completed.

Alternative navigation

The 'Cash Transfers – Manual Reversal Booking T2S – Pop-up', 'Cash Transfers – Manual Reversal Booking TIPS – Pop-up' or the 'Cash Transfers – Manual Reversal

Booking RTGS – Pop-up’ can also be reached via context menu on the ‘Cash Transfers – Details Screen’ by clicking on the context menu entry ‘Reverse Booking T2S’/‘Reverse Booking TIPS’/‘Reverse Booking RTGS’ respectively.

6.1.7 Query files

Context of Usage

This use case describes how to query incoming files and view their content based on the selected filter criteria.

The user can enter the relevant attribute values of the files whose attributes are to be displayed.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryFile

References

Further information on screens involved can be found in the screen reference part:

- I [Files – Query Screen](#) [▶ 125]
- I [Files – List Screen](#) [▶ 127]
- I [Files – Details Screen](#) [▶ 129]

Instructions

1. Click on the menu button.
2. Select the main menu entry ‘Cash Transfers and Messages’ and click on the sub-menu entry ‘Query Files’.
3. Enter all known attribute values of the files that are to be queried.
4. Click on the ‘Submit’ button.
 - ➔ The ‘Files – List Screen’ opens. The list shows all files matching the entered search criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section ‘Search Criteria’ can be opened for editing by clicking on the open button in the top left of the screen.

Details of a file

The context menu entry ‘Details’ on the ‘Files – List Screen’ redirects the user to the ‘Files – Details Screen’ displaying detailed information related to the selected file.

6.1.8 Query messages

Context of Usage

This use case describes how to query incoming and outgoing messages and view the result list based on the selected filter criteria.

Querying messages gives profound information with regard to cash transfers, business cases and AS batches as messages are a constitutive element of these.

The user can enter the relevant attribute values of the payments whose attributes are to be displayed. Alternatively, the user can start the search for messages by selecting a relevant cash transfer.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryMsg

References

Further information on screens involved can be found in the screen reference part:

- I [Messages – Query Screen](#) [▶ 132]
- I [Messages – List Screen](#) [▶ 140]
- I [Cash Transfers – List Screen](#) [▶ 93]
- I [Cash Transfers – Details Screen](#) [▶ 108]
- I [Business Cases – List Screen](#) [▶ 160]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Query Messages'.
3. Enter all known attribute values of the messages that are to be queried.
4. Optionally, specify the sorting criterion, the sorting order and the selection of columns for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Business Case ID' in ascending order with selection of all columns for the result list.
5. Click on the 'Submit' button.
 - ➔ The 'Messages – List Screen' opens. The list shows all messages matching the entered search criteria.

**Alternative navigation**

The 'Messages – List Screen' can also be reached via context menu on screens that contain entries related to messages by clicking on the context menu entry 'Display Message'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.1.9 Display message

Context of Usage

This use case describes how to query messages and view detailed information on a selected message.

Querying messages gives profound information with regard to cash transfers and business cases as messages are a constitutive element of these.

Messages can be queried by entering attribute values with regard to the relevant messages. Alternatively, the search for messages can be started by selecting a relevant cash transfer or business case.

Privileges

To carry out this use case, the following privileges are needed:

- I CLM_MsgDetailQuery

References

Further information on screens involved can be found in the screen reference part:

- I [Messages – Query Screen](#) [▶ 132]
- I [Messages – List Screen](#) [▶ 140]
- I [Messages – Details Screen](#) [▶ 145]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Query Messages'.
3. Enter all known attribute values of the messages that are to be queried.
4. Optionally, specify the sorting criterion, the sorting order and the selection of columns for the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Business Case ID' in ascending order with selection of all columns for the result list.
5. Click on the 'Submit' button.
 - ⇒ The 'Messages – List Screen' opens. The list shows all messages matching the entered search criteria.
6. Right-click on a message and select the context menu entry 'Details'.
 - ➔ The 'Messages – Details Screen' opens. General information with regard to the selected message as well as validation errors, parameters of the ESMIG communication and the XML message in the original format are displayed.

Alternative navigation

The 'Messages – List Screen' can also be reached via context menu on screens that contain entries related to messages by clicking on the context menu entry 'Display Message'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.1.10 Simulate receipt

Context of Usage

This use case describes how to simulate a receipt (camt.025) for a pull liquidity transfer from either CLM to RTGS, CLM to T2S or CLM to TIPS. This can either be a positive or a negative receipt. It can be used to finalise open business cases in case the camt.025 has not arrived in CLM due to a disturbance situation.

This function is only available for the Transit Account Holder of the specific currency and the operator.

Privileges

To carry out this use case, the following privilege is needed:

- CLM_SimReceipt

References

Further information on screens involved can be found in the screen reference part:

- [Messages – Simulate Receipt RTGS – Pop-up](#) [▶ 154]
- [Messages – Simulate Receipt T2S – Pop-up](#) [▶ 148]
- [Messages – Simulate Receipt TIPS – Pop-up](#) [▶ 151]

Instructions

1. Complete the use case for [Query messages](#) [▶ 480] or [Display message](#) [▶ 481].
2. In order to simulate a receipt, right-click on the message and select the context menu entry 'Simulate Receipt RTGS'/'Simulate Receipt T2S'/'Simulate Receipt TIPS'.
 - ⇒ The 'Messages – Simulate Receipt RTGS – Pop-up'/'Messages – Simulate Receipt T2S – Pop-up'/'Messages – Simulate Receipt TIPS – Pop-up' opens.
3. Select one option for the field 'Simulate Receipt RTGS'/'Simulate Receipt T2S'/'Simulate Receipt TIPS'.
4. Depending on the used option, select one value either in the field 'RTGS Error Code'/'T2S Error Code'/'TIPS Error Code' (negative receipt) or in 'Status Code' (positive receipt).
5. Click on the 'Submit' button.

⇒ A confirmation pop-up opens asking the user if he wants to proceed.

6. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to either create a task for simulation of a camt.025 (2-eyes mode) or create a task to be confirmed by another user (4-eyes mode). Moreover the user returns to the previous 'Messages – List Screen'/'Messages – Details Screen'.
7. By clicking on the 'No' button, the user returns to the previous 'Messages – Simulate Receipt RTGS – Pop-up'/'Messages – Simulate Receipt T2S – Pop-up'/'Messages – Simulate Receipt TIPS – Pop-up' screen without creating any task.

6.1.11 Simulate a positive receipt

Context of Usage

This use case describes how to simulate positive receipts (camt.025) in order to finalise open business cases. The action is only possible for liquidity transfers to T2S/TIPS/RTGS with settlement status 'Settled' or 'Partially Settled' and with specific credit account types. This function is only available for the Transit Account Holder of the specific currency and the operators.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_SimReceipt

References

Further information on screens involved can be found in the screen reference part:

- I [Cash Transfers – List Screen](#) [▶ 93]
- I [Cash Transfers – Details Screen](#) [▶ 108]

Instructions

1. Complete the use case for [Query/List cash transfers](#) [▶ 471].
2. In order to simulate a positive receipt, right-click on the selected item(s) and select the context menu entry 'Simulate Positive Receipt T2S'/'Simulate Positive Receipt TIPS'/'Simulate Positive Receipt RTGS' depending on the account type and settlement status of the selected liquidity transfer(s).

⇒ A confirmation pop-up opens asking the user if he wants to proceed.
3. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to either create a task for a positive camt.025 (2-eyes mode) or create a task to be confirmed by another user (4-eyes mode). The user returns to the 'Cash Transfers – List Screen'.
4. By clicking on the 'No' button, the user returns to the 'Cash Transfers – List Screen' without creating any task.

6.1.12 List business life cycle events for cash transfers (orders)

Context of Usage

This use case describes how to query business cases and view the result list based on the selected filter criteria.

Business cases can be queried by entering attribute values with regard to the relevant business cases.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryBC

References

Further information on screens involved can be found in the screen reference part:

- I [Business Cases – Query Screen](#) [▶ 157]

- I [Business Cases – List Screen](#) [▶ 160]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Query Business Cases'.
3. Enter the relevant attribute values of the business cases that are to be displayed.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Entry Timestamp' in descending order.
5. Click on the 'Submit' button.
 - ➔ The 'Business Cases – List Screen' opens. The list shows all business cases matching the entered search criteria.

**Alternative navigation**

The 'Business Cases – List Screen' can also be reached via context menu on screens that contain entries related to business cases by clicking on the context menu entry 'Display Business Case'.

**Adjusting the search criteria**

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.1.13 List account postings

Context of Usage

This use case describes how to query account postings and view the result list based on the selected filter criteria.

The result list shows the starting balance and the current balance along with all account postings of an account matching the defined criteria.

Privileges

To carry out this use case, the following privilege is needed:

I CLM_QueryCashTrans

References

Further information on screens involved can be found in the screen reference part:

I [Account Postings – Query Screen](#) [▶ 162]

I [Account Postings – List Screen](#) [▶ 166]

I [Cash Transfers – List Screen](#) [▶ 93]

Instructions

1. Click on the menu button.
2. Select the main menu entry ‘Cash Transfers and Messages’ and click on the sub-menu entry ‘Query Account Postings’.
3. If the user has more than one account, select the account BIC and account number for which the account postings are to be queried.
4. Optionally, restrict the result list to account postings within a specific timeframe using the fields ‘Timestamp From’ and ‘Timestamp To’.
5. Optionally, specify the sorting criterion and the sorting order in the section ‘Output Parameters’. If no output parameters are specified, the result list will be sorted by ‘Calendar Date’ in ascending order.
6. Click on the ‘Submit’ button.
 - The ‘Account Postings – List Screen’ opens. The list shows the starting balance and the current balance of the selected account in the section ‘Balance’ and a list of all account postings matching the entered search criteria in the section ‘List of Account Postings’.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section ‘Search Criteria’ can be opened for editing by clicking on the open button in the top left of the screen.

Display cash transfer of account posting

By right-clicking on a specific account posting in the result list, the context menu entry ‘Display Cash Transfers’ can be selected. This opens the ‘Cash Transfers – List Screen’ showing the cash transfers of the selected account posting.

6.1.14 Download statement of account

Context of Usage

This use case describes how to query an account statement and download the result list based on the selected filter criteria.

U2A only parties are able to query statement of accounts for the previous ten business days while A2A parties are only able to query the statement of account for the last day.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryAccStat

References

Further information on screens involved can be found in the screen reference part:

- I [Statement of Account – Download Screen](#) [▶ 169]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'Download Statement of Account'.
3. Enter the relevant attribute values of the statement of account that is to be downloaded.
4. Click on the 'Download' button.
 - ⇒ A confirmation pop-up opens asking the user if he wants to proceed.
5. By clicking on the 'Yes' button, a download window appears and the statement of account can be downloaded as '.pdf' file. The user returns to the 'Statement of Account – Download Screen' with the original default settings.
6. By clicking on the 'No' button, the user is returned to the 'Statement of Account – Download Screen' with the already entered information.

**Pre-filled account and party information**

If the user has only one single account, the fields 'Account Number' and 'Account BIC' are pre-filled with the account information of the current user. However, if the user is connected to more than one account (e.g. co-manager) both fields are not pre-filled. In this case, the user can enter an account number or account BIC manually or search for it by clicking on the smart-select button and opening the respective reference data screen as a pop-up.

If the user is associated with exactly one party, the field 'Party BIC' field is pre-filled with the BIC of the respective party.

6.1.15 Enter payment order – pacs.009

Context of Usage

This use case describes how to enter a new credit transfer order between financial institutions.

After completing this use case, a pacs.009 message for the credit transfer order is submitted.

Privileges

To carry out this use case, the following privileges are needed:

- I CLM_IniFinInstCreTra (This privilege is required in order to be able to initiate all payments except for a connected payment.)
- I CLM_IniConpay (This privilege is required in order to be able to initiate a connected payment.)

References Further information on screens involved can be found in the screen reference part:

- I [Financial Institution Credit Transfer – New Screen](#) [▶ 171]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfers and Messages' and click on the sub-menu entry 'New Financial Institution Credit Transfer'.
3. Fill in the mandatory sub-sections of the section 'Business Application Header'.
4. Fill in the mandatory sub-sections of the section 'FinancialInstitution Credit Transfer'. These include 'Instructing Agent', 'Debtor', 'Instructed Agent', 'Creditor', 'Interbank Settlement' and 'Payment ID'. Further information on the fields and their requirements can be found in the screen reference part.
5. Optionally, fill in the additional sub-sections of the section 'FinancialInstitution Credit Transfer'. These include 'Settlement Time Request', 'Payment Type Information' and 'Remittance Information'. Further information on the fields and their requirements can be found in the screen reference part.
6. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - The notification area shows whether the submission of the credit transfer order has been completed.

Initiating a connected payment

In order to initiate a connected payment, the user has to specify the local instrument in the section 'Payment Type Information'. The user has to enter the code CONP followed by an amount that represents the decrease of the credit line. An example is provided in the screen reference part.

6.1.16 Repeat sending

Context of Usage

This use case describes how to resend outbound messages without any modification. The resending function is only available for internal messages with 'Message Direction' 'Outbound', with 'Message Type' camt.050 and camt.025. Moreover, the operator can see and resend camt.019 messages. These messages can only be resent with 'Message Origin/Destination' equal to 'RTGS', 'T2S' or 'TIPS'.

This function is only available for the operators and Transit Account Holders.

Privileges

To carry out this use case, the following privilege is needed:

I CLM_RepeatSending

References

Further information on screens involved can be found in the screen reference part:

I [Messages – List Screen](#) [▶ 140]

I [Messages – Details Screen](#) [▶ 145]

Instructions

1. Complete the use case Query messages.
2. Right-click on one or more message(s) that are to be resent and select the context menu entry 'Repeat Sending'.
 - ⇒ A confirmation pop-up opens asking the user if he wants to proceed.
3. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO) to either resend the message(s) (2-eyes mode) or create task(s) to be confirmed by another user (4-eyes mode).
4. By clicking on the 'No' button, the user returns to the 'Messages – List Screen' without creating any task.

Investigating the result of the resending

To investigate the newly sent message(s) complete the use case Query messages while filtering for the newly sent message(s).

6.1.17 Upload A2A file or message via U2A

Context of Usage

This use case describes how to upload A2A files or messages in a contingency situation.

The user can upload a '.txt' file or an '.xml' file.

This function can only be used in 4-eyes mode.

This function is only available for operators and central bank users.

Privileges

To carry out this use case, the following privilege is needed:

I CLM_UploadFileU2AContSit

References

Further information on screens involved can be found in the screen reference part:

I [A2A File or Message – Upload Screen](#) [▶ 187]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Cash Transfer and Messages' and click on the sub-menu entry 'Upload A2A File or Message'.
3. Enter the mandatory attribute values of the file or message that is to be uploaded in the section 'ESMIG Information'.
4. Click on the '+ Choose' button.

⇒ A browser window opens as a pop-up.

5. Select a '.txt' or '.xml' file.

6. Click on the 'Open' button in the browser pop-up.

⇒ The respective file is shown in the section 'Upload of A2A File or Message'.

7. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).

➔ The notification area shows whether the submission of the data has been completed. In case of successful data submission, the notification area also shows a task ID.

Removing a selected file

The user can remove a selected file by clicking on the 'X' button in the section 'Upload A2A file or message'.

Confirmation of task

This function can only be used in 4-eyes mode. In order to confirm the task created by the **first initial** user, a second user has to re-upload the corresponding file on the [Task Queue – Details Screen](#) [▶ 380].

6.2 Liquidity

6.2.1 Display cash account liquidity (one service only)

Context of Usage

This use case describes how to display the overall liquidity of an account (intra-service) by considering posted cash transfers and pending cash transfer orders to provide a liquidity projection as well as the current balance of the account.

Privileges

To carry out this use case, the following privilege is needed:

I CLM_QueryAvaliq

References

Further information on screens involved can be found in the screen reference part:

I [CLM Cash Account Liquidity – Query Screen](#) [▶ 283]

I [CLM Cash Account Liquidity – Display Screen](#) [▶ 285]

Instructions

1. Click on the menu button.

2. Select the main menu entry 'Liquidity' and click on the sub-menu entry 'Query CLM Cash Account Liquidity'.

3. Enter the account number or the account BIC of the account whose liquidity is to be displayed.

4. Click on the 'Submit' button.

- ▶ The 'CLM Cash Account Liquidity – Display Screen' opens. The screen shows the overall liquidity of an account (intra-service).

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Co-managed accounts

The user has to enter the account information of one specific co-managed MCA manually on the 'CLM Cash Account Liquidity – Query Screen'. In order to query the liquidity of all MCAs including all co-managed accounts, see use case 'Query and Display cash account liquidity (dashboard)'.

6.2.2 Query and display cash account liquidity (dashboard)

Context of Usage

This use case describes how to query and display exhaustive liquidity information of all accounts in all services related to one or more parties ('Account Selection') or a group of accounts ('Account Monitoring Group' or 'Banking Group'). The result can be viewed by country, party or service.

Privileges

To carry out this use case one of the following privileges is needed:

- | CLM_QueryAvaLiq
- | CLM_QueryLiqBanGroLev (This privilege is only required when requesting information on banking group level.)

References

Further information on screens involved can be found in the screen reference part:

- | [Dashboard Liquidity Overview – Query Screen](#) [▶ 190]
- | [Dashboard Liquidity Overview Account Selection List View – Display Screen](#) [▶ 243]
- | [Dashboard Liquidity Overview AMG Selection List View – Display Screen](#) [▶ 269]
- | [Available Liquidity on Banking Group Level – List Screen](#) [▶ 274]
- | [Detailed Available Liquidity on Banking Group Level – List Screen](#) [▶ 278]
- | [Dashboard Liquidity Overview Account Selection grouped by Countries – Display Screen](#) [▶ 199]

- | [Dashboard Liquidity Overview Account Selection grouped by Services – Display Screen](#) [▶ 229]

- I [Dashboard Liquidity Overview AMG Selection grouped by Countries – Display Screen](#) [▶ 247]
- I [Dashboard Liquidity Overview AMG Selection grouped by Parties – Display Screen](#) [▶ 255]
- I [Dashboard Liquidity Overview AMG Selection grouped by Services – Display Screen](#) [▶ 262]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity' and click on the sub-menu entry 'Query Dashboard Liquidity Overview'.
3. Select the field 'Query Content' and click on one of the three available options ('Account Selection', 'Account Monitoring Group' or 'Banking Group').
4. Enter or select specific account information (e.g. account number, Account Monitoring Group ID, Banking Group ID) that are to be queried.
5. Select specific values for the output parameters in 'Style Selection', 'Sort by', 'Sort Order' or 'Grouped by' or use the given default values.
6. Click on the 'Submit' button. Depending on the chosen options above one of the following screens opens:
 - ⇒ 'Dashboard Liquidity Overview Account Selection List View – Display Screen'
 - ⇒ 'Dashboard Liquidity Overview AMG Selection List View – Display Screen'
 - ⇒ 'Available Liquidity on Banking Group – List Screen'
 - ⇒ 'Dashboard Liquidity Overview Account Selection grouped by Countries – Display Screen'
 - ⇒ 'Dashboard Liquidity Overview Account Selection grouped by Parties – Display Screen'
 - ⇒ 'Dashboard Liquidity Overview Account Selection grouped by Services – Display Screen'
 - ⇒ 'Dashboard Liquidity Overview AMG Selection grouped by Countries – Display Screen'
 - ⇒ 'Dashboard Liquidity Overview AMG Selection grouped by Parties – Display Screen'
 - ⇒ 'Dashboard Liquidity Overview AMG Selection grouped by Services – Display Screen'
- ➔ The opened screen shows the liquidity information matching the entered search criteria.

Navigation to Screen 'Detailed Available Liquidity on Banking Group Level – List

Screen'

It can be reached via context menu entry 'Display Details of Available Liquidity on the Banking Group' within the 'Available Liquidity on Banking Group Level – List Screen'.

Available liquidity information in crisis situation

When the crisis situation was activated by the operator there is more liquidity information available in the 'Detailed Available Liquidity on Banking Group Level – List Screen'. In this case, liquidity information of banking group members belonging to other communities than the central bank user is included.

6.2.3 Enter current liquidity transfer order

Context of Usage

This use case describes how to enter a liquidity transfer order that can either be intra-service or inter-service depending on the entered account information.

CLM only allows the creation of a current liquidity transfer order. A standing order liquidity transfer can be created in CRDM.

This use case also describes how to display the amount of liquidity available on the debit or credit cash account respectively.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_InilmLiquiTrans

References

Further information on screens involved can be found in the screen reference part:

- I [Liquidity Transfer – New Screen](#) [▶ 299]
- I [Dashboard Liquidity Overview – Query Screen](#) [▶ 190]
- I [Standing Facilities – List Screen](#) [▶ 315]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity' and click on the sub-menu entry 'New Liquidity Transfer'.
3. Enter the account number of the credit account and the debit account respectively.
4. Optionally, click on the button 'Display Liquidity' for the debit or credit account in order to display the amount of liquidity available for the respective account. This function is only available if the user has the rights to see the liquidity on the account (required privilege: CLM_QueryAvaLiq).
 - ⇒ The 'Dashboard Liquidity Overview – Query Screen' opens to query and show the liquidity of the corresponding account.
5. Enter the amount that is to be transferred and provide an end-to-end ID for the liquidity transfer order.

6. Click on the 'Submit' Button and enter the PIN for digital signature purposes (NRO).
 - ➔ The notification area shows whether the submission of the liquidity transfer order has been completed.

Alternative navigation

The 'Liquidity Transfer – New Screen' can also be reached via opening the 'CLM Cash Account Liquidity – Display Screen' and clicking on the button 'New Liquidity Transfer', directly transmitting the account number of the respective account. It can also be reached via context menu on the 'Standing Facilities – List Screen' by clicking on the context menu entries related to a new liquidity transfer.

Initiating an overnight deposit or marginal lending on request

It is also possible to initiate an overnight deposit or marginal lending on request ¹⁵ via the 'Liquidity Transfer – New Screen'. In order to do so, see use case [Enter overnight deposit](#) [▶ 495] or [Enter marginal lending on request](#) [▶ 497] respectively.

6.2.4 List credit lines

Context of Usage

This use case describes how to query and list a specific or all credit lines for MCAs within their banking community for a central bank user.

This use case provides the basis for the execution of the following use case:

- I [Create and modify credit line](#) [▶ 494]

Privileges

To carry out this use case, the following privilege is needed:

- I CLMQueryCreLineList

References

Further information on screens involved can be found in the screen reference part:

- I [Credit Line per Account Holder – Query Screen](#) [▶ 292]
- I [Credit Line per Account Holder – List Screen](#) [▶ 295]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity' and click on the sub-menu entry 'Query Credit Line per Account Holder'.

15 Until ECMS go-live

3. Enter the relevant attribute values of the credit lines that are to be displayed or leave the fields empty in order to display all credit lines of the MCAs belonging to the community of the central bank user.
4. Click on the 'Submit' button.
 - The 'Credit Line per Account Holder – List Screen' opens. The list shows all credit lines matching the entered criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.2.5 Create and modify credit line

Context of Usage

This use case describes how to create or modify credit lines for MCAs within their banking community for a central bank user.

Privileges

To carry out this use case, the following privileges are needed:

- I CLM_QueryCreLineList
- I CLM_IniCreLineupd

References

Further information on screens involved can be found in the screen reference part:

- I [Credit Line per Account Holder – Query Screen](#) [▶ 292]
- I [Credit Line per Account Holder – List Screen](#) [▶ 295]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity' and click on the sub-menu entry 'Query Credit Line per Account Holder'.
3. Enter the relevant attribute values of the credit lines that are to be displayed or leave the fields empty in order to display all credit lines of the MCAs belonging to the community of the central bank user.
4. Click on the 'Submit' button.
 - ⇒ The 'Credit Line per Account Holder – List Screen' opens. The list shows the credit line related to the specific party/account number or all credit lines of all MCAs belonging to the banking community of the central bank user. It also shows the following field names which enable a user to create or modify one or more credit lines:
 - ⇒ Fixed Amount Credit Line
 - ⇒ Delta Amount Credit Line

5. Enter a credit line amount (fixed or delta) for one or more than one MCA.
6. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The 'Credit Line per Account Holder – List Screen' opens. The list shows the new value of the credit line(s) related to the MCA(s).

Alternative navigation

The 'Credit Line per Account Holder – List Screen' can also be reached via opening the 'CLM Cash Account Liquidity – Query Screen' for a dedicated MCA and clicking on the button 'Create/Modify Credit Line', directly transmitting the MCA information.

Deletion of a credit line

A reduction of the credit line to zero is considered as a deletion of the credit line.

6.2.6 Enter overnight deposit

Context of Usage

This use case describes how to make an overnight deposit with the respective central bank of a CLM Account Holder.

In order to make an overnight deposit, a CLM Account Holder can transfer liquidity to its Overnight Deposit Account.

It is possible for the CLM Account Holder to make an overnight deposit until the general cut-off for the use of standing facilities.

As additional information, this use case furthermore describes how to initiate an overnight deposit reverse.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_IniOveDep

References

Further information on screens involved can be found in the screen reference part:

- I [Liquidity Transfer – New Screen](#) [▶ 299]
- I [Dashboard Liquidity Overview – Query Screen](#) [▶ 190]
- I [Standing Facilities – List Screen](#) [▶ 315]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity' and click on the sub-menu entry 'New Liquidity Transfer'.
3. Enter the account number of the debit account. **This can be the account number of the linked MCA. This can be the account number of the MCA, the RTGS DCA, the T2S DCA, the TIPS Account or the RTGS sub-account of the CLM Account Holder**

~~requesting the overnight deposit. In addition, the Overnight Deposit Account may receive liquidity from any central bank account.~~

4. Enter the account number of the credit account. This has to be the account number of the Overnight Deposit Account owned by the central bank of the respective CLM Account Holder requesting the overnight deposit.
5. Optionally, click on the button 'Display Liquidity' for the debit or credit account in order to display the amount of liquidity available for the respective account. This function is only available if the user has the rights to see the liquidity on the account (required privilege: CLM_QueryAvaLiq).
 - ⇒ The 'Dashboard Liquidity Overview – Query Screen' opens to query and show the liquidity of the corresponding account.
6. Enter the amount that is to be transferred and provide an end-to-end identification for the liquidity transfer order.
7. Click on the 'Submit' Button and enter the PIN for digital signature purposes (NRO) in order to submit the liquidity transfer order.
 - ➔ The notification area shows whether the submission of the data has been completed.

Alternative navigation

An overnight deposit can also be initiated via context menu on the 'Standing Facilities – List Screen' by right-clicking on an Overnight Deposit Account or default MCA and clicking on the context menu entry 'New Liquidity Transfer Order to Overnight Deposit Account'. This opens the 'Liquidity Transfer – New Screen' while directly transmitting the corresponding account numbers to the section 'Debit Account' and 'Credit Account'. This navigation option always pre-fills the section 'Debit Account' with the account number of the MCA. If another account number is to be used, overwrite this value.

Overnight deposit reverse order

In order to initiate an overnight deposit reverse order, enter the account number of the Overnight Deposit Account of the central bank in the section 'Debit Account' and the account number of the default MCA of the CLM Account Holder in the section 'Credit Account' (required privilege: CLM_IniOveDeprev).

Overnight deposit reverse order – Alternative navigation

An overnight deposit reverse order can also be initiated via context menu on the 'Standing Facilities – List Screen' by right-clicking on an Overnight Deposit Account or default MCA and clicking on the context menu entry 'New Liquidity Transfer Order from Overnight Deposit Account'. The 'Liquidity Transfer – New Screen' opens while directly

transmitting the corresponding account numbers to the section 'Debit Account' and 'Credit Account'.

6.2.7 Enter marginal lending on request

Context of Usage

This use case describes how a central bank user can enter a liquidity transfer from a Marginal Lending Account to an MCA in order for a CLM Account Holder to obtain overnight liquidity from the central bank. ¹⁶

It is possible for the CLM Account Holder to request marginal lending at its central bank until the general cut-off for the use of standing facilities.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_IniMarLenonreq

References

Further information on screens involved can be found in the screen reference part:

- I [Liquidity Transfer – New Screen](#) [▶ 299]
- I [Dashboard Liquidity Overview – Query Screen](#) [▶ 190]
- I [Standing Facilities – List Screen](#) [▶ 315]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity' and click on the sub-menu entry 'New Liquidity Transfer'.
3. Enter the account number of the debit account. This has to be the account number of the Marginal Lending Account of the respective CLM Account Holder.
4. Enter the account number of the credit account. This has to be the account number of the MCA of the CLM Account Holder requesting the marginal lending.
5. Optionally, click on the button 'Display Liquidity' for the debit or credit account in order to display the amount of liquidity available for the respective account. This function is only available if the user has the rights to see the liquidity on the account (required privilege: CLM_QueryAvaLiq).
 - ⇒ The 'Dashboard Liquidity Overview – Query Screen' opens to query and show the liquidity of the corresponding account.
6. Enter the amount that is to be transferred and provide an end-to-end identification for the liquidity transfer order.
7. Click on the 'Submit' Button and enter the PIN for digital signature purposes (NRO) in order to submit the liquidity transfer order.
 - ➡ The notification area shows whether the submission of the data has been completed.

¹⁶ Until ECMS go-live

Alternative navigation

A marginal lending on request can also be initiated via context menu on the 'Standing Facilities – List Screen' by right-clicking on an account and clicking on the context menu entry 'New Liquidity Transfer Order from Marginal Lending Account'. This opens the 'Liquidity Transfer – New Screen' while directly transmitting the corresponding account numbers to the section 'Debit Account' and 'Credit Account' respectively. ¹⁷

6.3 Liquidity Management Features

6.3.1 Query reservations

Context of

This use case describes how to query reservations of a specific MCA.

Usage

Querying reservations allows the user to see the amount of reserved liquidity which is currently available for certain payments.

Privileges

To carry out this use case, the following privilege is needed:

- | [CLM_QueryCurReservation](#)

References

Further information on screens involved can be found in the screen reference part:

- | [Reservations – Query Screen](#) [▶ 306]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Liquidity Management Features' and click on the sub-menu entry 'Query Reservations'.
3. Enter the account number or the account BIC of the account whose reservations are to be displayed.
4. Click on the 'Submit' button.
 - ➡ The query is performed with the entered search criteria.

6.3.2 Display reservations

Context of

This use case describes how to display reservations of a specific MCA.

Usage

This use case provides the basis for the execution of the following use cases:

- | [Enter current reservation](#) [▶ 499]
- | [Modify current reservation](#) [▶ 500]

Privileges

To carry out this use case, the following privilege is needed:

I CLM_QueryCurReservation

References Further information on screens involved can be found in the screen reference part:

I [Reservations – Query Screen](#) [▶ 306]

I [Reservations – Display Screen](#) [▶ 309]

Instructions

1. Click on the menu button.
2. Select the main menu entry ‘Liquidity Management Features’ and click on the sub-menu entry ‘Query Reservations’.
3. Enter the account number or the account BIC of the account whose reservations are to be displayed.
4. Click on the ‘Submit’ button.
 - ➔ The ‘Reservations – Display Screen’ opens. The current reservations for central bank operations and the current reservations for seizure of funds are displayed. The field ‘New Reservation Amount’ of the respective reservation offers the possibility to modify the current reservation or to enter a current reservation.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section ‘Search Criteria’ can be opened for editing by clicking on the open button in the top left of the screen.

6.3.3 Enter current reservation

Context of Usage

This use case describes how to enter a reservation with immediate effect for central bank operations or a reservation for seizure of funds.

The entered reservation for central bank operations is only valid for the current business day.

The amount of the reservation for central bank operations is defined by a corresponding standing order and is updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done on reservations for central bank operations in CLM are only valid for the current business day.

Privileges

To carry out this use case, the following privilege is needed:

I CLM_ModifyCurReservation

References

Further information on screens involved can be found in the screen reference part:

I [Reservations – Display Screen](#) [▶ 309]

Instructions

1. Complete the use case for [Display reservations](#) [▶ 498].

2. In order to enter a reservation for central bank operations, use the section 'Reservation for Central Bank Operations'. In order to enter a reservation for seizure of funds, use the section 'Reservation for Seizure of Funds'.
3. Enter an amount that is supposed to be the reservation amount in the field 'New Reservation Amount' of the respective section.
4. Click on the 'Submit' button.
 - ⇒ In case the user entered a reservation for central bank operations, a confirmation pop-up opens displaying the information 'Modifications of Reservation for Central Bank Operations done in CLM are only valid for today'. It requires the user to approve the modification by clicking on the 'OK' button and entering the PIN for digital signature purposes (NRO).
 - ⇒ In case the user entered a reservation for seizure of funds, a related task is directly created after entering the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the 'Reservations – Display Screen'. As soon as the related task is processed successfully the respective reservation is updated immediately.

Entering an amount for both reservation types

If the user enters an amount for both a reservation for central bank operations and a reservation for seizure of funds simultaneously, the confirmation pop-up also opens.

6.3.4 Modify current reservation

Context of Usage

This use case describes how to modify a current reservation. A reservation can be increased, decreased or set to zero. A modified reservation for central bank operations is only valid for the current business day.

The amount of the reservation for central bank operations is defined by a corresponding standing order and is updated at the beginning of each business day. Modifying a standing order is only possible in CRDM. Modifications done on reservations for central bank operations in CLM are only valid for the current business day.

Privileges

To carry out this use case, the following privileges are needed:

- | CLM_ModifyCurReservation
- | CLM_ModSeizofFun

References

Further information on screens involved can be found in the screen reference part:

- | [Reservations – Display Screen](#) [▶ 309]

Instructions

1. Complete the use case for [Display reservations](#) [▶ 498].

2. In order to modify a reservation for central bank operations, use the section 'Reservation for Central Bank Operations'. In order to modify a reservation for seizure of funds, use the section 'Reservation for Seizure of Funds'.
3. Enter an amount that is supposed to be the new reservation amount in the field 'New Reservation Amount' of the respective section. The entered amount can be higher than the defined reservation amount in order to increase the reservation or lower than the defined reservation amount in order to decrease the reservation. The entered amount can also be '0.00' in order to set the reservation amount to zero.
4. Click on the 'Submit' button.
 - ⇒ In case the user entered a reservation for central bank operations, a confirmation pop-up opens displaying the information 'Modifications of Reservation for Central Bank Operations done in CLM are only valid for today'. It requires the user to approve the modification by clicking on the 'Ok' button and entering the PIN for digital signature purposes (NRO).
 - ⇒ In case the user entered a reservation for seizure of funds, a related task is directly created after entering the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the 'Reservations – Display Screen'. As soon as the related task is processed successfully the respective reservation is updated immediately.

Entering an amount for both reservation types

If the user enters an amount for both a reservation for central bank operations and a reservation for seizure of funds simultaneously, the confirmation pop-up also opens.

6.4 Query Standing Facilities

6.4.1 Display standing facilities

Context of Usage	This use case describes how to query standing facilities balances and corresponding cash transfers and view the result list based on the selected filter criteria.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none"> CLM_QueryStaFac
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none"> Standing Facilities – Query Screen [▶ 314] Standing Facilities – List Screen [▶ 315] Cash Transfers – List Screen [▶ 93]
Instructions	1. Click on the menu button and select the main menu entry 'Query Standing Facilities'.

2. Enter the relevant attribute values of the party whose standing facilities are to be displayed.
3. Click on the 'Submit' button.
 - ⇒ The 'Standing Facilities – List Screen' opens. The list shows the standing facilities information of the party matching the entered search criteria.

Display Cash Transfers

The context menu entry 'Display Cash Transfers' redirects the user to the 'Cash Transfers – List Screen' displaying the corresponding cash transfers of the selected account (required privilege: CLM_QueryCashTrans).

6.5 Minimum Reserves

6.5.1 Display minimum reserve requirements and fulfilments per MFI

Context of Usage

This use case describes how to query information related to minimum reserve. Such information is:

- I Start and end date of the current maintenance period
- I Minimum reserve requirement
- I Excess reserve exemption threshold
- I Minimum reserve balances (e.g. running average, adjustment balance, excess reserve exemption balance, excess reserve remuneration balance)
- I Account balances related to accounts throughout the services (e.g. RTGS DCA, TIPS Account) but belonging to the respective party BIC

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryMinRes

References

Further information on screens involved can be found in the screen reference part:

- I [Minimum Reserve – Query Screen](#) [▶ 319]
- I [Minimum Reserve \(Direct\) – List Screen](#) [▶ 321]
- I [Minimum Reserve \(Indirect\) – List Screen](#) [▶ 325]
- I [Minimum Reserve \(Pool\) – List Screen](#) [▶ 326]
- I [Minimum Reserve \(Pool of Account Party Level\) – List Screen](#) [▶ 330]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Minimum Reserves' and click on the sub-menu entry 'Query Minimum Reserve'.

3. Enter the relevant attribute values of the party whose minimum reserves are to be displayed.
4. Click on the 'Submit' button.
 - ⇒ Depending on the chosen party and their kind of minimum reserve holding one of the following screens opens:
 - ⇒ 'Minimum Reserve (Direct) – List Screen'
 - ⇒ 'Minimum Reserve (Indirect) – List Screen'
 - ⇒ 'Minimum Reserve (Pool) – List Screen'
- The respective list screen opens. The list shows the minimum reserve information of the party matching the entered search criteria.

6.5.2 Display aggregated MFI liquidity (indirect management)

Context of Usage

This use case describes how to display the aggregated minimum reserve requirement in case of indirect minimum reserve management.

By completing this use case, the user can retrieve information on:

- I The dates of the current maintenance period
- I The minimum reserve requirement of the individual institution(s) holding the requirement indirectly
- I The aggregated minimum reserve requirement of the intermediary and the institution(s) holding the requirement indirectly

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryMinRes

References

Further information on screens involved can be found in the screen reference part:

- I [Minimum Reserve – Query Screen](#) [▶ 319]
- I [Minimum Reserve \(Direct\) – List Screen](#) [▶ 321]
- I [Minimum Reserve \(Indirect\) – List Screen](#) [▶ 325]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Minimum Reserves' and click on the sub-menu entry 'Query Minimum Reserve'.
3. Enter the relevant party BIC of the indirect holder of the minimum reserve whose minimum reserves are to be displayed.
4. Click on the 'Submit' button.
 - The 'Minimum Reserve (Indirect) – List Screen' opens. The section 'Minimum Reserve' shows the dates of the current maintenance period and the divider 'Related Parties holding their Minimum Reserve Requirement Indirectly' lists the minimum re-

serve requirement of the individual institutions as well as the aggregated minimum reserve requirement as a sum row.

Alternative navigation

The 'Minimum Reserve (Indirect) – List Screen' can also be reached via opening the 'Minimum Reserve (Direct) – List Screen' by searching for the corresponding direct holder of the minimum reserve and clicking on the button 'Display Minimum Reserves of Indirects'. This directly transmits the corresponding Party BIC as Leading CLM Account Holder.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.5.3 Display aggregated MFI liquidity

Context of Usage

This use case describes how to display the aggregated liquidity of an MFI and of the cash accounts contributing to the minimum reserve requirement of this MFI belonging to a minimum reserve pool.

By completing this use case, the user can retrieve information on:

- | The dates of the current maintenance period
- | The minimum reserve requirement of the MFI
- | The running average of the MFI
- | The adjustment balance of the MFI
- | The current balances of the individual accounts contributing to the minimum reserve requirement as well as the aggregated liquidity of all contributing accounts
- | The total EoD balances of the previous business day of the individual accounts contributing to the minimum reserve requirement as well as the aggregated liquidity of all contributing accounts

This use case also describes how to retrieve minimum reserve information on account level.

Privileges

To carry out this use case, the following privilege is needed:

- | CLM_QueryMinRes

References

Further information on screens involved can be found in the screen reference part:

- | [Minimum Reserve – Query Screen](#) [▶ 319]

- I [Minimum Reserve \(Pool\) – List Screen](#) [▶ 326]
- I [Minimum Reserve \(Pool of Account Party Level\) – List Screen](#) [▶ 330]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Minimum Reserves' and click on the sub-menu entry 'Query Minimum Reserve'.
3. Enter the relevant BIC of the leading CLM Account Holder belonging to a minimum reserve pool in order to display its minimum reserves.
4. Click on the 'Submit' button.
 - The 'Minimum Reserve (Pool) – List Screen' opens. The section 'Pool of Account Information' shows the dates of the current maintenance period, the minimum reserve requirement and the excess reserve exemption threshold. The section 'Fulfilment of Minimum Reserve' shows the running average and adjustment balance. The section 'List of Account Balances' lists the balances of the individual accounts contributing to the minimum reserve requirement as well as the aggregated liquidity of all accounts as a sum row.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Displaying minimum reserve information on account level related to a party belonging to a minimum reserve pool

The leading CLM Account Holder can view all minimum reserve information on account level related to the parties which belong to a minimum reserve pool. This is possible by right-clicking on a listed account in the section 'Results – List of Account Balances' and selecting the context menu entry 'Display Minimum Reserves of pooled MFI Leader and Member'. This opens the 'Minimum Reserve (Pool of Account Party Level) – List Screen'.

6.5.4 Query minimum reserve infringement penalty payment

Context of Usage

This use case describes how central bank users can query the infringements of the community.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryMinResInf

References

Further information on screens involved can be found in the screen reference part:

[I Minimum Reserve Infringements – Query Screen \[▶ 342\]](#)**Instructions**

1. Click on the menu button.
2. Select the main menu entry 'Minimum Reserves' and click on the sub-menu entry 'Query Minimum Reserve Infringements'.
3. Enter the relevant attribute values of the minimum reserve infringements that are to be displayed. Enter the relevant party BIC of the party whose information is to be displayed or leave the field empty in order to display all parties belonging to the community of the central bank user.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ➔ The query is performed with the entered search criteria.

6.5.5 Display minimum reserve infringement penalty payment

Context of Usage

This use case describes how central bank users can display minimum reserve infringement penalty payments.

This use case provides the basis for the execution of the following use case:

[I Authorise/cancel minimum reserve infringement penalty payment \[▶ 507\]](#)**Privileges**

To carry out this use case, the following privilege is needed:

[I CLM_QueryMinResInf](#)**References**

Further information on screens involved can be found in the screen reference part:

[I Minimum Reserve Infringements – Query Screen \[▶ 342\]](#)[I Minimum Reserve Infringements – List Screen \[▶ 346\]](#)**Instructions**

1. Click on the menu button.
2. Select the main menu entry 'Minimum Reserves' and click on the sub-menu entry 'Query Minimum Reserve Infringements'.
3. Enter the relevant attribute values of the minimum reserve infringements that are to be displayed. Enter the relevant party BIC of the party whose information is to be displayed or leave the field empty in order to display all parties belonging to the community of the central bank user.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.

5. Click on the 'Submit' button.

- ➔ The 'Minimum Reserve Infringements – List Screen' opens. The list shows all minimum reserve infringements matching the entered search criteria. The list also provides information on the penalty status and the penalty amount of the respective infringement(s).

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.5.6 Authorise/cancel minimum reserve infringement penalty payment

Context of Usage

This use case describes how central bank users can authorise or cancel the penalty payment for the infringement of the minimum reserve by a party.

The user can choose between authorisation with penalty type 1, authorisation with penalty type 2 or cancellation of a penalty payment.

Privileges

To carry out this use case, the following privileges are needed:

- I CLM_QueryMinResInf
- I CLM_AdmMinResPen

References

Further information on screens involved can be found in the screen reference part:

- I [Minimum Reserve Infringements – List Screen](#) [▶ 346]
- I [Minimum Reserve Infringements – Administrate Minimum Reserve Penalty Order – Pop-up](#) [▶ 348]

Instructions

1. Complete the use case for [Display minimum reserve infringement penalty payment](#) [▶ 506].
2. Right-click on a list entry in the section 'List of Minimum Reserve Infringements' and select the context menu entry 'Administrate Minimum Reserve Penalty Order'.
 - ⇒ The 'Minimum Reserve Infringements – Administrate Minimum Reserve Penalty Order – Pop-up' opens showing details of the selected minimum reserve infringement.
3. Select the penalty type that is to be used when authorising a penalty payment by utilising the field 'Penalty Status Assignment'.

It is possible to choose between 'Authorised Type 1 – Single Infringement' or 'Authorised Type 2 – Multiple Infringement'. The fields 'Penalty Amount Type 1' and 'Penalty Amount Type 2' indicate what the corresponding penalty would be. It is also possible to cancel a penalty payment by selecting the value 'Cancelled'.

4. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The user returns to the 'Minimum Reserve Infringements – List Screen'. The notification area shows whether the submission of the data has been completed.

6.5.7 Enter/modify minimum reserve requirement

Context of Usage

This use case describes how central bank users can query the minimum reserve requirements of their community and how they can modify the queried minimum reserve requirements.

It also describes how central bank users can set up a new minimum reserve requirement for a specific party.

Privileges

To carry out this use case, the following privileges are needed:

- I CLM_QueryListMinResReq
- I CLM_ModMinResReq

References

Further information on screens involved can be found in the screen reference part:

- I [Minimum Reserve Requirements – Query Screen](#) [▶ 333]
- I [Minimum Reserve Requirements – List Screen](#) [▶ 335]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Minimum Reserves' and click on the sub-menu entry 'Query Minimum Reserve Requirements'.
3. Enter the relevant attribute values of the minimum reserve requirements that are to be displayed.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ⇒ The 'Minimum Reserve Requirements – List Screen' opens. The list shows all minimum reserve requirements matching the entered search criteria.
6. Enter an amount that is supposed be the new minimum reserve requirement in the field 'New Minimum Reserve Requirement' of the respective list entry. The entered amount has to be greater than or equal to zero and will be used as the new amount for the minimum reserve requirement.
7. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The notification area shows whether the submission of the data has been completed.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Setting up a new minimum reserve requirement

The result list also shows party BICs for which no minimum reserve requirement is set up yet. In this case, a minimum reserve requirement can be set up by entering a value in the field 'New Minimum Reserve Requirement'.

6.5.8 Modify minimum reserve fulfilment

Context of

This use case describes how central bank users can query the minimum reserve fulfilment of a specific party and how they can modify the minimum reserve fulfilment by making an adjustment to the EoD balance.

Usage

Privileges

To carry out this use case, the following privileges are needed:

- | CLM_QueryListMinResFul
- | CLM_ModMinResFul

References

Further information on screens involved can be found in the screen reference part:

- | [Minimum Reserve Fulfilments – Query Screen](#) [▶ 338]
- | [Minimum Reserve Fulfilments – List Screen](#) [▶ 339]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Minimum Reserves' and click on the sub-menu entry 'Query Minimum Reserve Fulfilments'.
3. Enter the party BIC of the party whose minimum reserve fulfilment data is to be displayed.
4. Click on the 'Submit' button.
 - ⇒ The 'Minimum Reserve Fulfilments – List Screen' opens. The list shows the minimum reserve fulfilments for the current and each past business day of the current maintenance period.
5. Enter a new amount in the field 'New Adjustment EoD' of the respective list entry in order to make an adjustment to the respective EoD balance. It is possible to enter adjustments for multiple business days.
6. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).
 - ➔ The notification area shows whether the submission of the data has been completed. As soon as the related task is processed successfully the entered amount will be the new value for the field 'Current Adjustment EoD'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.5.9 List minimum reserve requirements and fulfilments on banking community level

Context of Usage

This use case describes how central bank users can query and display the minimum reserve requirements and fulfilments per party for the whole banking community or for a single member.

Information regarding the minimum reserve requirement, the running average, the aggregated current balance of all the accounts to be taken into account for the party and the needed adjustment balance can be retrieved.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryMinResAccHol

References

Further information on screens involved can be found in the screen reference part:

- I [Minimum Reserve Information per Account Holder – Query Screen](#) [▶ 463]
- I [Minimum Reserve Information per Account Holder – List Screen](#) [▶ 466]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Query Minimum Reserve Information per Account Holder'.
3. Enter the relevant party BIC of the member whose information is to be displayed or leave the field empty in order to display all parties belonging to the community of the central bank user.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - The 'Minimum Reserve Information per Account Holder – List Screen' opens. The list shows the minimum reserve information of the parties matching the entered search criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left

of the screen.

6.6 Reference Data

6.6.1 Query/List party reference data

Context of Usage	This use case describes how to query party reference data and view the result list based on the selected filter criteria.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I CLM_QueryLocRefData
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I Party Reference Data – Query Screen [▶ 351]I Party Reference Data – List Screen [▶ 356]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Reference Data' and click on the sub-menu entry 'Query Party Reference Data'.3. Enter the relevant attribute values of the parties whose reference data is to be displayed.4. Optionally, specify the sorting criterion and the sorting order of the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.5. Click on the 'Submit' button.<ul style="list-style-type: none">➡ The 'Party Reference Data – List Screen' opens. The list shows the reference data of all parties matching the entered search criteria.

Smart-select function

The 'Party Reference Data – Query Screen' can also occur as a smart-select screen in order to search for cash accounts. By clicking on the smart-select button the 'Party Reference Data – Query Screen' is opened as a pop-up.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

**Parties shown in the result list**

Only those parties are shown that are within the data scope of the user.

6.6.2 Query/List cash account reference data

Context of Usage

This use case describes how to query cash account reference data and view the result list based on the selected filter criteria.

Starting from the queried reference data of a cash account, linked sub-accounts, linked RTGS DCAs and linked RTGS CB Accounts can be displayed.

Privileges

To carry out this use case, the following privilege is needed:

- CLM_QueryLocPartyCashAccRefData

References

Further information on screens involved can be found in the screen reference part:

- [Cash Account Reference Data – Query Screen](#) [▶ 359]
- [Cash Account Reference Data – List Screen](#) [▶ 363]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Reference Data' and click on the sub-menu entry 'Query Cash Account Reference Data'.
3. Enter the relevant attribute values of the cash accounts whose reference data is to be displayed.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.
5. Click on the 'Submit' button.
 - ➔ The 'Cash Account Reference Data – List Screen' opens. The list shows the reference data of all cash accounts matching the entered search criteria.

**Smart-select function**

The 'Cash Account Reference Data – Query Screen' can also occur as a smart-select screen in order to search for cash accounts. By clicking on the smart-select button the 'Cash Account Reference Data – Query Screen' is opened as a pop-up.

**Adjusting the search criteria**

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

List RTGS DCA, RTGS CB Account or RTGS sub-accounts

The 'Cash Account Reference Data – List Screen' can be updated to show the linked RTGS sub-accounts for RTGS DCAs and RTGS CB Accounts or the linked RTGS DCAs and linked RTGS CB Accounts for RTGS sub-accounts. This can be achieved by clicking on the context menu entries 'Display Sub-Accounts' or 'Display RTGS Accounts' respectively. The context menu entries will only be displayed if the action is possible for the user and the listed cash account.

6.6.3 Query cash account by MFI

Context of Usage

This use case describes how to query cash accounts by MFI and view the result list based on the selected filter criteria.

The result list shows Cash Accounts Reference Data by MFI matching the defined criteria.

Privileges

To carry out this use case, the following privilege is needed:

- CLM_QuerylocrefdatbyMFI

References

Further information on screens involved can be found in the screen reference part:

- [Cash Account Reference Data by MFI – Query Screen](#) [▶ 366]
- [Cash Account Reference Data by MFI – List Screen](#) [▶ 368]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Reference Data' and click on the sub-menu entry 'Query Cash Account Reference Data by MFI'.
3. Enter the relevant MFI code to be queried.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'MFI Code' in ascending order.
5. Click on the 'Submit' button.
 - ➔ The 'Cash Account by MFI – List Screen' opens. The list shows the reference data of all cash accounts by MFI matching the entered search criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.6.4 Query BIC

Context of Usage	This use case describes how to search for an account BIC when the user only knows parts of the account BIC or the respective financial institution name.
Privileges	To carry out this use case there is no specific privilege needed.
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I BICs – Query Screen [▶ 369]I BICs – List Screen [▶ 371]
Instructions	<ol style="list-style-type: none">1. Click on the smart-select button for a field that requires the input of a BIC.<ul style="list-style-type: none">⇒ The 'BICs – Query Screen' opens as a pop-up.2. Enter the relevant attribute values of the BIC(s) which are to be queried.3. Optionally, specify the sorting criterion and the sorting order of the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Financial Institution Name' in ascending order.4. Click on the 'Submit' button.<ul style="list-style-type: none">⇒ The 'BICs – List Screen' opens. The list shows data of all BICs matching the entered search criteria.5. Select one or more entries in the list by clicking on the checkbox next to the respective entry.6. Click on the 'Select' Button.<ul style="list-style-type: none">➡ The field that requires the input of a BIC is filled with the selected account BIC(s).

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.7 Administration

6.7.1 Download migration information

Context of Usage	This use case is executed during the migration of balances from TARGET2 to CLM and describes how to download the information which TARGET2 accounts are currently unmapped and whose balances will be part of the balance of the CLM CB Account accordingly.
-------------------------	--

This function is only available for operators and central bank users.

Privileges

To carry out this use case, the following privilege is needed:

- I [CLM_DownloadMigInf](#)

References

Further information on screens involved can be found in the screen reference part:

- I [Migration Information – Download Screen](#) [▶ 372]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Administration' and click on the sub-menu entry 'Download Migration Information'.
3. Click on the 'Download' button.
 - ⇒ A confirmation pop-up opens asking the user if he wants to download the migration information.
4. Click on the 'Yes' button.
 - ➔ The information regarding the balances of unmapped TARGET2 accounts is downloaded as a '.csv' file.

6.7.2 Query task queue

Context of Usage

This use case describes how to query tasks and view the result list of tasks based on the selected filter criteria.

This use case provides the basis for the execution of the following use cases:

- I [Confirmation/Withdrawal of 4-eyes task entries](#) [▶ 516]
- I [Modify 4 eyes tasks](#) [▶ 517]

Privileges

To carry out this use case, the following privileges are needed:

- I [CLM_QueryTaskQueue](#)
- I [CLM_QueryTaskQueueDetail](#)

References

Further information on screens involved can be found in the screen reference part:

- I [Task Queue – Query Screen](#) [▶ 373]
- I [Task Queue – List Screen](#) [▶ 379]
- I [Task Queue – Details Screen](#) [▶ 380]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Administration' and click on the sub-menu entry 'Query Task Queue'.
3. Enter the relevant attribute values of the respective task to be displayed.

4. Optionally, specify the sorting criterion and the sorting order of the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Entry Timestamp' in descending order.
5. Click on the 'Submit' button.
 - ⇒ The 'Task Queue – List Screen' opens. The respective list shows all tasks matching the entered criteria.
6. Right-click on a task and select the context menu entry 'Details'.
 - ➔ The 'Task Queue – Details Screen' opens. Detailed information with regard to the selected task is displayed.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the list screen.

6.7.3 Confirmation/Withdrawal of 4-eyes task entries

Context of Usage

This use case describes how to confirm or withdraw task entries in 4-eyes mode. The confirmation/withdrawal of a task entry is only possible if the corresponding task has the status 'To Confirm'.

Privileges

To carry out this use case various privileges can be required, depending on the affected task type. The required privileges are linked to the corresponding screens and the selected 'Task Type' in the 'Task Queue – List Screen'.

References

Further information on screens and required privileges involved can be found in the screen reference part:

- I [Reservations – Display Screen](#) [▶ 309]
- I [Cash Transfers – Details Screen](#) [▶ 108]
- I [Minimum Reserve Requirements – List Screen](#) [▶ 335]
- I [Minimum Reserve Fulfilments – List Screen](#) [▶ 339]
- I [Minimum Reserve Infringements – List Screen](#) [▶ 346]
- I [Credit Line per Account Holder – List Screen](#) [▶ 295]
- I [Task Queue – Details Screen](#) [▶ 380]

Instructions

1. Complete the use case for [Query task queue](#) [▶ 515].
2. In order to confirm the corresponding task, click on the 'Confirm' button. In order to withdraw the corresponding task, click on the 'Withdraw' button.

⇒ A confirmation pop-up opens displaying the information 'Confirm/Withdraw the Task with ID : #####'.

3. Click on the 'Yes' button and enter the PIN for digital signature purposes (NRO).

➔ The notification area displays the confirmation/withdrawal with the information 'Task ##### successfully confirmed/withdrawn'. The status of the 'Corresponding Task' changes to 'Confirmed'/'Withdrawn'.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the list screen.

Task ID

The placeholder '#####' used within the instructions stands for a variable task ID that is shown.

6.7.4 Modify 4 eyes tasks

Context of Usage

This use case describes how to modify task entries in 4-eyes mode. The modification of a task entry is only possible if the corresponding task has been created by an an first initial user and if the corresponding task has the status 'To Confirm'.

In case of a modification, technically the original task is withdrawn and a new task with the modified values is created.

Privileges

To carry out this use case, the following privileges are needed:

- I CLM_QueryTaskQueue
- I CLM_QueryTaskQueueDetail

In order to edit a certain task, the user additionally needs the privilege corresponding to the task type that is to be modified.

References

Further information on screens involved can be found in the screen reference part:

- I [Task Queue – Query Screen](#) [▶ 373]
- I [Task Queue – List Screen](#) [▶ 379]
- I [Task Queue – Details Screen](#) [▶ 380]

Instructions

1. Complete the use case for [Query task queue](#) [▶ 515] while selecting a task that is to be modified.
2. In order to modify the corresponding task, click on the 'Edit' button.

- ⇒ A confirmation pop-up opens displaying the information 'Withdraw the Task with ID : ##### to create a new task'.
- 3. Click on the 'Yes' button.
 - ⇒ The original task is withdrawn and the screen corresponding to the task that is to be modified is opened as a pop-up. The fields of this screen are pre-filled with the values of the original task.
- 4. Change the values of the original task that is to be modified.
- 5. Click on the relevant button that the screen corresponding to the task offers in order to submit the modification and enter the PIN for digital signature purposes (NRO).
 - ⇒ The user returns to the 'Task Queue – Details Screen'. The notification area shows whether the submission of the data has been completed.

Task ID

The placeholder '#####' used within the instructions stands for a variable task ID that is shown.

'Edit' button

The screen description of the 'Task Queue – Details Screen' lists which screen will be shown as a pop-up depending on the task type after clicking on the 'Edit' button.

6.7.5 Query broadcasts

Context of Usage	This use case describes how to query sent or received operations-related and system-triggered broadcasts.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none"> I CLM_QueryBroadcast
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none"> I Broadcasts – Query Screen [▶ 388]
Instructions	<ol style="list-style-type: none"> 1. Click on the menu button. 2. Select the main menu entry 'Administration' and click on the sub-menu entry 'Query Broadcasts'. 3. Enter the relevant attribute values of the respective broadcasts that are to be displayed. 4. Click on the 'Submit' Button. <ul style="list-style-type: none"> ➔ The query is performed with the entered search criteria.

6.7.6 Display broadcast

Context of Usage This use case describes how to query sent or received operations-related and system-triggered broadcasts and view detailed information on a selected broadcast. It also describes how to retrieve detailed information of a selected broadcast and how to clone a broadcast.

Privileges To carry out this use case, the following privilege is needed:

- I CLM_QueryBroadcast

References Further information on screens involved can be found in the screen reference part:

- I [Broadcasts – Query Screen](#) [▶ 388]
- I [Broadcasts – List Screen](#) [▶ 392]
- I [Broadcast – Details Screen](#) [▶ 395]
- I [Broadcast – New Screen](#) [▶ 397]

- Instructions**
1. Click on the menu button.
 2. Select the main menu entry ‘Administration’ and click on the sub-menu entry ‘Query Broadcasts’.
 3. Enter the relevant attribute values of the respective broadcasts that are to be displayed.
 4. Click on the ‘Submit’ Button.
 - ⇒ The ‘Broadcasts – List Screen’ opens. A list of broadcasts matching the entered search criteria is displayed.
 5. In order to view details of a specific broadcast, right-click on the broadcast and select the context menu entry ‘Details’.
 - ➔ The ‘Broadcast – Details Screen’ opens. Detailed information with regard to the selected broadcast is displayed.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section ‘Search Criteria’ can be opened for editing by clicking on the open button in the top left of the list screen.

Cloning a broadcast

It is possible for a central bank user to clone a broadcast by right-clicking on a specific broadcast and clicking on the context menu entry ‘Clone’. This opens the ‘Broadcast – New Screen’ while directly transmitting the values of the selected broadcast to the respective input fields (required privilege: CLM_NewBroadcast).

6.7.7 Enter broadcast

Context of Usage	This use case describes how to enter and send a broadcast.
Privileges	This function is only available for operators and central bank users.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I CLM_NewBroadcast
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I Broadcasts – List Screen [▶ 392]I Broadcast – Details Screen [▶ 395]I Broadcast – New Screen [▶ 397]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Administration' and click on the sub-menu entry 'New Broadcast'.3. Fill in the mandatory fields in the section 'Broadcast Information' and 'Date-Time Information'.4. Select one or more specific receiver(s) of the broadcast in the section 'Receiver Information'.5. Click on the 'Submit' button and enter the PIN for digital signature purposes (NRO).<ul style="list-style-type: none">➔ The notification area shows whether the submission of the data has been completed.

Alternative navigation

The 'Broadcast – New Screen' can also be reached via context menu on the 'Broadcasts – List Screen' or the 'Broadcast – Details Screen'. This can be achieved by selecting a list item and clicking on the context menu entry 'Clone'. This navigation option directly transmits the values of the selected broadcast to the respective input fields in the 'Broadcast – New Screen'. The context menu entry for cloning a broadcast is only visible for central bank users.

6.7.8 Query events

Context of Usage	This use case describes how to query events concerning the current business day and view the result list of events based on the selected filter criteria.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I CLM_QueryListEvents
References	Further information on screens involved can be found in the screen reference part:

I [Events – Query Screen](#) [▶ 401]

I [Events – List Screen](#) [▶ 403]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Administration' and click on the sub-menu entry 'Query Events'.
3. Enter the relevant attribute values of the respective event(s) that are to be displayed.
4. Optionally, specify the sorting criterion and the sorting order of the result list in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Planned Event Day / Time' in ascending order.
5. Click on the 'Submit' button.
 - ⇒ The 'Events – List Screen' opens. The respective list shows all events matching the entered criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.7.9 Display system parameter

Context of

This use case describes how to display system parameters.

Usage

This function is only available for operators and central bank users.

Privileges

To carry out this use case, the following privilege is needed:

I CLM_DisplaySysPara

References

Further information on screens involved can be found in the screen reference part:

I [General System Parameters – Display Screen](#) [▶ 405]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Administration' and click on the sub-menu entry 'Display General System Parameters'.
 - ➡ The 'General System Parameters – Display Screen' opens. The current values and changes foreseen starting from next business day are displayed.

6.8 Monitoring

6.8.1 Sum of cash transfer per account holder

Context of Usage	This use case describes how to query the numbers and summarized amounts for all payments and liquidity transfers related to one account holder. It is also possible to query data for all participants belonging to the community of the user.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I CLM_QuerySumCashTrans
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I Cash Transfer Order Totals by Party – Query Screen [▶ 427]I Cash Transfer Order Totals by Party – List Screen [▶ 430]I Cash Transfer Order Totals by Account – List Screen [▶ 432]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Query Cash Transfer Totals per Party'.3. Enter the relevant party BIC(s) of the aggregated account holder information that is to be displayed or leave the field empty in order to display all aggregated account holder information of the parties belonging to the community of the central bank user.4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.5. Click on the 'Submit' button.<ul style="list-style-type: none">➡ The 'Cash Transfer Totals by Party – List Screen' opens. The list shows all aggregated account holder information of all party BICs matching the entered search criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

Display List of Cash Transfer Totals per Account

The context menu entry 'Display List of Cash Transfer Totals per Account' redirects the user to the 'Cash Transfers Totals by Account – List Screen' displaying the aggregated

account holder information per account of the selected party.

6.8.2 Warehoused cash transfers

Context of Usage	This use case describes how to query information related to warehoused cash transfer orders for one or more specific party BIC(s) or all parties belonging to the central bank of a central bank user.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none">I CLM_QueryWarehoused
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none">I Warehoused Cash Transfer – Query Screen [▶ 450]I Warehoused Cash Transfer – List Screen [▶ 452]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Query Warehoused Cash Transfers'.3. Select the relevant 'Debtor/Instructing Agent*' option and relevant party BIC(s) of the warehoused cash transfer order information that is to be displayed or leave the field empty in order to display all warehoused cash transfer order information of the parties belonging to the community of the central bank user.4. Click on the 'Submit' button.<ul style="list-style-type: none">➡ The 'Warehoused Cash Transfer – List Screen' opens. The list shows all warehoused cash transfer order information of all party BICs matching the entered search criteria.

Context menu entry 'Details'

The context menu entry 'Details' redirects the user to the 'Cash Transfers – List Screen' displaying the warehoused cash transfer orders per account of the selected party.

6.8.3 Available liquidity on party level

Context of Usage	<p>This use case describes how to query a list of liquidity relevant information related to a participant. It is also possible to query data for all participants belonging to the community of the user.</p> <p>The account types CB ECB Account, ECB Mirror Account, CLM Technical Account for ECONS II, CLM Dedicated Transit Account for RTGS, CLM Dedicated Transit Account for T2S, CLM Dedicated Transit Account for TIPS, RTGS Dedicated Transit Account, TIPS</p>
-------------------------	--

~~Transit Account, T2S Dedicated Transit Account, CLM-CB Account and RTGS-CB Account~~ are generally not considered in the result list.

This use case provides the basis for the following use case:

- I [Available liquidity per account holder](#) [▶ 525]

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryAvailLiqui

References

Further information on screens involved can be found in the screen reference part:

- I [Available Liquidity by Party – Query Screen](#) [▶ 440]
- I [Available Liquidity by Party – List Screen](#) [▶ 443]
- I [Available Liquidity by Account – List Screen](#) [▶ 447]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Available Liquidity by Party'.
3. Enter the relevant party BIC for displaying liquidity relevant information or leave the field empty in order to display all liquidity relevant information of the parties belonging to the community of the central bank user.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in descending order.
5. Click on the 'Submit' button.
 - The 'Available Liquidity by Party – List Screen' opens. The list shows all liquidity relevant information of all party BICs matching the entered search criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

List of Available Liquidity by Accounts

The context menu entry 'List of Available Liquidity by Accounts' redirects the user to the 'Available Liquidity by Account – List Screen' displaying the liquidity relevant information on account level related to the selected party.

6.8.4 Available liquidity per account holder

Context of Usage This use case describes how to query a list of liquidity relevant information related to a participant. It is also possible to query data for all participants belonging to the community of the user.

The account types CB ECB Account, ECB Mirror Account, CLM Technical Account for ECONS II, CLM Dedicated Transit Account for RTGS, CLM Dedicated Transit Account for T2S, CLM Dedicated Transit Account for TIPS, RTGS Dedicated Transit Account, TIPS Transit Account, T2S Dedicated Transit Account, are generally not considered in the result list.

Privileges To carry out this use case, the following privilege is needed:

- I CLM_QueryAvailLiqui

References Further information on screens involved can be found in the screen reference part:

- I [Available Liquidity by Party – Query Screen](#) [▶ 440]
- I [Available Liquidity by Party – List Screen](#) [▶ 443]
- I [Available Liquidity by Account – List Screen](#) [▶ 447]

Instructions

1. Complete the use case for [Available Liquidity on Party Level](#) [▶ 523].
2. In order to view liquidity relevant information related to accounts belonging to the selected party, right-click on the specific party data set and select the context menu entry 'List of Available Liquidity by Accounts'.
 - The 'Available Liquidity by Account – List Screen' opens. The list shows accounts belonging to the selected party BIC and their respective liquidity relevant information.

6.8.5 Status overview for cash transfers

Context of Usage This use case describes how to query aggregated information about the status of cash transfer orders related to participants belonging to the banking community of a central bank user.

Privileges To carry out this use case, the following privilege is needed:

- I CLM_QueryOverviewCashTrans

References Further information on screens involved can be found in the screen reference part:

- I [Cash Transfer Order Totals by Status – List Screen](#) [▶ 434]
- I [Cash Transfer Order Subtotals by Status – List Screen](#) [▶ 439]

Instructions

1. Click on the menu button.

2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'List of Cash Transfer Totals by Status'.

- ➔ The 'Cash Transfer Order Totals by Status – List Screen' opens. The list shows aggregated information for all cash transfer orders of the current business day. This information is grouped by cash transfer status related to participants belonging to the banking community of the central bank user.

Display Cash Transfer Orders Subtotals

The context menu entry 'Display Cash Transfer Orders Subtotals' redirects the user to the 'Cash Transfers Order Subtotals by Status – List Screen' displaying aggregated information for all cash transfer orders of the current business day grouped by message type related to participants belonging to the banking community of the central bank user.

Display Cash Transfers

The context menu entry 'Display Cash Transfers' redirects the user to the 'Cash Transfers – List Screen' displaying detailed information on each related cash transfer order.

6.8.6 Overview standing facilities

Context of Usage

This use case describes how to query standing facilities information for a specific party BIC or all parties belonging to the central bank of a central bank user.

Privileges

To carry out this use case, the following privilege is needed:

- I CLM_QueryStaFacAccHol

References

Further information on screens involved can be found in the screen reference part:

- I [Standing Facilities per Account Holder – Query Screen](#) [▶ 458]
- I [Standing Facilities per Account Holder – List Screen](#) [▶ 461]

Instructions

1. Click on the menu button.
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Query Standing Facilities per Account Holder'.
3. Enter the relevant party BIC(s) of the standing facilities information that is to be displayed or leave the field empty in order to display all standing facilities information of the parties belonging to the community of the central bank user.
4. Optionally, specify the sorting criterion and the sorting order in the section 'Output Parameters'. If no output parameters are specified, the result list will be sorted by 'Party BIC' in ascending order.
5. Click on the 'Submit' button.

- ➔ The 'Standing Facilities per Account Holder – List Screen' opens. The list shows all standing facilities information of all party BICs matching the entered search criteria.

Adjusting the search criteria

If the search criteria have been entered incorrectly or need to be adjusted, the section 'Search Criteria' can be opened for editing by clicking on the open button in the top left of the screen.

6.8.7 Display aggregated liquidity

Context of Usage	This use case describes how to query aggregated liquidity information on central bank level or on system wide level for a central bank user. For the latter a specific privilege for crisis situation is required.
Privileges	To carry out this use case and depending on the scenario, one of the following privileges is needed: <ul style="list-style-type: none"> CLM_QueryLiqonCBLev CLM_QueryMonCriSit
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none"> Liquidity on CB Level – Display Screen [▶ 407]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'Display Liquidity on CB Level'.<ul style="list-style-type: none">➔ The 'Liquidity on CB Level – Display Screen' opens. The list shows aggregated liquidity information for CLM, RTGS, T2S and TIPS accounts.

6.8.8 Reservations and dedicated liquidity

Context of Usage	This use case describes how to query different types of reservations and the number of standing orders for the current business day. It shows an aggregated view related to all MCAs belonging to participants of the central bank user's community.
Privileges	To carry out this use case, the following privilege is needed: <ul style="list-style-type: none"> CLM_QueryReservationDedLiqui
References	Further information on screens involved can be found in the screen reference part: <ul style="list-style-type: none"> Reservations and Seizure of Funds – List Screen [▶ 456]
Instructions	<ol style="list-style-type: none">1. Click on the menu button.

-
2. Select the main menu entry 'Monitoring' and click on the sub-menu entry 'List of Reservations and Seizure of Funds'.
 - The 'Reservations and Seizure of Funds – List Screen' opens. The list shows aggregated information for different types of reservations and standing orders related to all MCAs belonging to participants of the central bank user's community.

7 Annex

7.1 References for Error Messages for GUI Screens

This section includes a list of references for error messages for individual screens which are organised in alphabetical order and specify the respective error codes applicable for each screen. Each error code table entry includes the error text, the description as well as the field or button which can trigger the respective error.

7.1.1 A2A File or Message – Upload Screen

For screen description see [A2A File or Message – Upload Screen](#) [▶ 187].

7.2 Technical HTTP Error Codes

The following list contains the technical hypertext transfer protocol (HTTP) errors which may occur. With the help of the provided error codes, the user can determine which instructions he has to carry out in case of an error.

Angular Error

The Angular application may experience an internal error.

This error is in most cases solved by reloading the application.

A reloading of the application has to occur via the browser and not via refreshing the application as this does only refresh the data.

General Error

The following general error may occur:

Error Code	Title	Instruction
0	General Error	Reload the application and check the connection to the network service provider. If this error persists, contact the T2 service provider.

Table 316 - General Error

Client Errors

The following client errors may occur:

Error Code	Title	Instruction
400	Bad Request	Check the validity of the provided entries and try again. If this error persists, contact the local IT administration.
403	Forbidden	Contact the local user administrator if the access to the desired resource is falsely denied.
404	Not Found	The requested resource could not be found. Check the previous entry.
408	Request Timeout	The server timed out waiting for the request. If this error persists, check the connection or contact the local IT administration.

Table 317 - Client Errors

Server Errors

The following server errors may occur:

Error Code	Title	Instruction
500	Internal Server Error	Try again later. If this error persists, contact the T2 service provider.
501	Not Implemented	Try again later. If this error persists, contact the T2 service provider.

Error Code	Title	Instruction
502	Bad Gateway	Check the connection to the network service provider. If this error persists, contact the T2 service provider.
503	Service Unavailable	Try again later. If this error persists, contact the T2 service provider.
504	Gateway Timeout	Check the connection to the network service provider. If this error persists, contact the T2 service provider.
