2.2.4.1 Change Requests

No Item

2.2.4.2 Production Problems

No Item

2.2.4.3 Release Defects

No Item

3 Additional Information

The regression risk for this release is considered low according to regression tests performed in the internal environment and to the analysis done by the support teams.

Non-regression tests for CoCos CRs and PBIs originated in other TS are conducted by the service provider of the service where the changes originated, and these should be sufficient to address potential regressions for all the services using the CoCos.
